Presentation Overview

- ◆ Strategy
- ◆ Canada Overview
- ◆ Operating Update

Earthmoving equipment solutions

Strategy

RENTAL | SALES | PARTS | ASSET MANAGEMENT

Executing the Strategy

Current focus on Optimising the Core

- ◆ Embed “Customer Centric” model in growing mining markets
- ◆ Align Australia Sales and Parts with Rental (mining)
- ◆ Increase weighting of large mining equipment

- ◆ Incremental investment in core markets with quality historical returns
- ◆ Expand maintenance services offering
- ◆ Leverage core competencies to expand products/services & geographies

- ◆ Disciplined investment to achieve above WACC returns
- ◆ Ongoing optimisation of capital structure
- ◆ Building capability to deliver consistent returns

Focus on Customer Needs

Customer requirements vary but Emeco's solution is used at all stages of mine life

Emeco's Mining cycle leverage:	Mine Construction 6%	Mine Development 19%	Core Production 42%	Overburden (Production) 33%
--------------------------------	--------------------------------	--------------------------------	-------------------------------	---------------------------------------

Customers Needs:	Flexibility	Equipment Availability	Mechanical Availability	Capital Management	Avoid Residual Risk
------------------	--------------------	-------------------------------	--------------------------------	---------------------------	----------------------------

Ramp-up:

Full Mine Production:

Ramp-down:

Incremental Investment

Investment of incremental capital in core businesses to deliver returns above the cost of capital

- ♦ **Australia** will remain around 75% of earnings in short to medium term
- ♦ Customer diversification and growing coal volumes in **Indonesia** will drive sustained and improving returns
- ♦ **Canada** to benefit from mining fleet reorientation and broader commodity exposure
- ♦ CY09 trough earnings more than a commodity downcycle...
- ♦ Corporate Costs and Goodwill impact on Group ROC diluted through incremental investment

Returns from Core Businesses over 4 years

Notes:

Graph represents operating results;
ROFE calculated as EBIT divided by Funds Employed for the period;
Funds Employed as Equity plus Net Debt less Goodwill

1 Australia Rental excludes Victoria rental

2 Excludes Group Corporate costs and Goodwill

Earthmoving equipment solutions

Canada Overview

RENTAL | SALES | PARTS | ASSET MANAGEMENT

Strategic Focus - Canada

Fleet reconfiguration and commodity diversification first steps to deliver enhanced returns

◆ Customers

- Differentiating our offering from competitors through flexible, well supported solutions
- Focus on increasing rental direct to miners (progress made with SLA's, safety paramount)

◆ Commodity diversification

- Robust outlook for oilsands with good margins, however inherent volatility remains
- Commodity diversification focused on coal (Western Canada) and iron ore (Eastern Canada)

◆ Fleet mix

- Reducing exposure to civil construction equipment
- Focus on orientating the fleet to mining production activity well progressed

◆ Maintenance services

- High quality workshop facility centrally located in the oil sands region
- Access to skilled labour and technical capability is driving customer opportunities

Markets

Volume growth outlook in target commodities supports investment thesis

- ◆ Robust activity in core production and reclamation works
- ◆ Current rental fleet is much less reliant on development works given its inherent volatility

- ◆ Focus on coal in Alberta and BC, targeting Sherritt, Teck & Western Canadian Coal
- ◆ Close proximity to existing facilities and characteristics similar to Australia

- ◆ Opportunities exist in Iron Ore particularly in the Labrador region
- ◆ Target on fully maintained 'project' basis

Canadian Fleet Evolution

Large mining equipment expected to deliver more consistent utilization

June 09:

WDV C\$99.4M

264 machines

WDV:

June 10:

WDV C\$88.3M

154 machines

Oct 10:

WDV C\$97.9M

146 machines

Machine

Operating Update

RENTAL | SALES | PARTS | ASSET MANAGEMENT

Rental Fleet Utilisation

Strong market activity and fleet optimization translating into higher utilization

- ◆ Customer activity levels driven by strong commodity outlook
- ◆ All core markets are contributing to strong utilization
- ◆ Market demand for large and small mining equipment
- ◆ +4% increase in fleet weighting toward large mining equipment
- ◆ Non-core asset disposal well progressed with \$15M of \$60M target achieved in Q1

Average Equipment Utilisation by WDV

Business Unit Performance

Strong demand for equipment in Eastern Australia

Queensland

- ◆ Recent wet weather had little impact on equipment utilisation (no major fleets in transit)
- ◆ Investment in 5 x 240 tonne trucks purchased and deployed in 1Q11 to Rio Tinto Coal
- ◆ Further growth opportunities present within the region

New South Wales

- ◆ Thermal coal activity remained robust
- ◆ Utilization consistently high across the cycle
- ◆ Close proximity of mines within the Hunter Valley limits redeployment downtime
- ◆ Two major fleet redeployments occurring in 2Q11

Business Unit Performance

Strong sector activity in WA translating into sustained utilisation

Western Australia

- ◆ New projects commissioned in FY10 now well established
- ◆ Gold production expected to increase as new projects come on-line
- ◆ Iron Ore production at record levels

Victoria

- ◆ Victorian business disposed on 1st October as a going concern
- ◆ \$12.5M proceeds realised
- ◆ Remaining civil fleet of ~\$25M(excluded from transaction) will be disposed of over FY11

Business Unit Performance

Revised strategy and strong market fundamentals providing growth opportunities offshore

Canada

- ◆ Reconfigured mining fleet highly utilized with strong activity in oil sands region
- ◆ Seasonal “freeze” and “thaw” periods will impact utilisation
- ◆ Sharper ‘return to work’ expected due to increasing exposure to production cycle
- ◆ Stronger AUD may impact translation of CAD earnings

Indonesia

- ◆ Robust thermal coal activity underpinning steady improvements in fleet utilisation
- ◆ New management team transition complete
- ◆ Growth opportunities exist in deploying larger mining equipment with top tier customers
- ◆ Stronger AUD may impact translation of USD earnings

Note: Graphs reflect average equipment utilisation which is defined as % of fleet rented to customers (measured by written down value)

Equipment

Progressing fleet evolution

Fleet mix
proportions by
net book value:

- ◆ Continue to increase weighting of large mining equipment
- ◆ Acquisition of \$29M large mining fleet in 1Q11, including 5x 240 tonne trucks
- ◆ Further downsizing of small civil equipment targeted in FY11

Recent activities

Executing refinance and first half earnings guidance

Dynamic	Results
Refinance Complete	♦ Successful execution of \$450 million senior debt facility ♦ 3 year and 5 year tranches deliver extended debt maturity profile ♦ Strong balance sheet in place to pursue value creating strategies ♦ Refinancing completed with seven banks from existing syndicate
Earnings Guidance	♦ Earnings for 1H11 expected to be in the range of \$27 million to \$29 million ♦ Fleet utilisation remains robust at 89% with strong mining customer demand ♦ Recontracting of large Australian rental fleets now finalised ♦ Risks to 1H11 earnings from first quarter Queensland weather events has now diminished ♦ AUD appreciation has impacted contribution from Indonesia and Canada

Market Outlook

Outlook in core markets remains positive

Dynamic	Outlook
Market Dynamics	◆ Continuing strong fundamentals for bulk commodities in Asia Pacific region ◆ Canadian oil sands stable with positive outlook ◆ Lead times on new OEM mining equipment continue to increase ◆ Market value of mining equipment remains strong ◆ Civil equipment experiencing improved liquidity
Emeco Focus	◆ Evaluate profitable opportunities for further investment in large mining equipment ◆ Evaluate maintenance services offering in NSW and Canada ◆ Consolidate presence in Canadian oil sands production cycle ◆ Liberate underperforming capital (targeting \$60M release in FY11)
Challenges	◆ Currency may impact translated earnings ◆ Labour continues to be challenging ◆ Access to equipment may dampen growth opportunities, however continue to leverage procurement capabilities

Geographies

FY10 Rental WDV by Geographic Region (AUD \$M)

- Queensland
- Western Australia
- Canada
- New South Wales
- Indonesia
- Victoria

FY10 Revenue Split

- Australian Rental
- Canada
- Indonesia
- Sales
- Parts
- USA (discontinued)
- Europe (discontinued)

FY10 Commodity Exposure

- Thermal Coal
- Coking Coal
- Gold
- Zinc
- Oil Sands
- Iron Ore
- Civil
- Other
