OUTLOOK

- ❑ **Period of severe adverse weather conditions** - sustained periods of widespread and unseasonably high rainfall
- ❑ **Stress testing of businesses** - wet weather contingency plans actioned
- ❑ **\$1.0 million uplift in NPAT** - lower operating result boosted by lower tax and with strong underlying cash generation preserved
- ❑ **Robust operations** - affected in the half year by the severe adverse weather patterns but resilient overall and within the tolerance for earnings deviation arising from extraneous factors
- ❑ **Ridley AgriProducts \$12.8m first half result** -
  - Supplements down by \$1.0 million with abundance of pasture
  - FY11 expensing of costs that were capitalised on ERP in FY10
  - Other sectors stable with slow but steady dairy sector recovery
- ❑ **Cheetham result of \$11.3m including JV's** –
  - Queensland weather events causing stock losses, production disruption, and lower stockfeed volumes
  - Reduction in soda ash volumes and JV profits
- ❑ **Unlocking of further growth potential remains the key focus**

# RIDLEY RESILIENT

INTRODUCTION

OUTLOOK

- ❑ Sustained periods of rainfall in dry season led to highest levels recorded on east coast for up to 50 years prior to onset of widespread flooding around half year end
- ❑ Abundance of natural pasture for dairy, beef and sheep sectors
- ❑ Less reliance placed on supplementary feeding

- ❑ Group NPAT of \$15.9m, up \$1.0m or 6% on 1H FY10
- ❑ EBIT result for AgriProducts of \$12.8m includes \$0.4m contribution from liquid feeds business up to and including its sale
- ❑ Cheetham impacted by severe weather events
- ❑ Highly reliable earnings and cash streams from joint ventures, slightly down on budget and last year
- ❑ Corporate costs in line with budget
- ❑ Net interest up by \$0.7m due to accelerated amortisation on capitalised borrowing costs
- ❑ Low tax expense largely due to 2010 R&D tax concession claim for ERP

ACQUISITION

OUTLOOK

- ❑ **EBIT result of \$12.8m** - temporary deviation from longer term growth path but highly resilient result in stressful period for the business
- ❑ **Aqua-feeds** - insulated from on-land adverse weather events
- ❑ **Packaged Products** – earnings stable despite pasture availability
- ❑ **Pig and Poultry** - Loss of pig volume more than covered by poultry growth but minimal earnings impact due to shift in margin mix
- ❑ **Dairy sector** - positive earnings recorded for the half year but full recovery still 18 months away
- ❑ **Supplements result down \$1.0m on prior year** - despite increase in market share and adoption of cost minimisation strategies
- ❑ **Non-core liquids business divested** - two months of operations and sale transaction contributed \$0.4m to the half year.
- ❑ **Expensing of ERP costs** – incremental operating costs of \$0.5m and amortisation of \$0.8m charged in period not in prior period result

<b>Total Tonnes</b>	<b>829</b>	<b>790</b>	<b>↑</b>

- ❑ **Poultry:** 24% growth from ramp up of long term customer contracts, market growth of chicken consumption and growth in niche turkey and duck sectors
- ❑ **Aqua-feed:** prior year sales growth and market penetration maintained with Ridley Aqua-feed looking to expand into new markets and secure new customers
- ❑ **Packaged Products:** volumes down primarily due to pasture availability and slower than anticipated dairy sector recovery but earnings maintained through tight margin management
- ❑ **Dairy:** 14% improvement in Dairy volumes and margins as the sector recovers on the back of firmer milk prices and pasture availability
- ❑ **Pig:** continued producer profitability and stabilised pig numbers have maintained volumes except for loss of major customer as previously reported.
- ❑ **Supplements:** increased market share recorded in a shrunken seasonal market due to widespread pasture availability.
- ❑ **Beef & Sheep:** small sectors for Ridley but both affected by pasture abundance.

- ❑ **EBIT result of \$12.8m recorded despite adverse weather conditions.**
- ❑ **EBITDA maintained at 2010 level, with \$1.0m increase in depreciation due to ERP.**
- ❑ **Net working capital movement from June:**
  - increase in debtors and inventory driven by sharp grain price rises in July/ August 2010 and held for remainder of the period.
- ❑ **Total capex of \$4.0m maintained within depreciation of \$4.3m.**
- ❑ **\$5.0m proceeds on sale of share of non-core liquid feeds business.**
- ❑ **Continued high cash conversion.**
- ❑ **High ROFE maintained of 18.7%.**
- # Prior period reclassification of \$0.4m trade payable facility from reported EBIT of \$13.7m to Interest expense.

## Macro Economic Environment

- ❑ 2H FY11 impact of widespread flooding too early to predict with sufficient precision to issue guidance at the present time
- ❑ Existence of abundant pasture through the summer season will slow the pace of return of historical Ridley dairy volumes and margins
- ❑ Continued population growth and steadily increasing consumption of white meat to benefit Ridley poultry (and duck) volumes
- ❑ Large volumes of domestic feed grain available but subject to influences of world markets following lower than expected overseas harvests

**Clearer picture expected to be available with Q3 results  
but no change in long term outlook**

## Strategic Actions for 2H FY11

- ❑ **Poultry** - continue long term strategy to secure additional volumes in regional growth areas in South Australia and South East Queensland
- ❑ **Aqua-feeds** - continue to develop improvements in Feed Conversion Ratios through specialised diets for domestic customer and expand customer base in Asia-Pacific
- ❑ **Pig volumes** - develop relationships to secure new pig customer base to replace lost volume
- ❑ **Packaged Products** - provide new product offerings, channel relationships, and product differentiation to grow volumes
- ❑ **Dairy** – market the cost effectiveness of feed solutions available, provide innovative solutions to ease seasonal cash flow constraints, and launch new product offering in Gippsland
- ❑ **Supplements** - minimise current year losses and position to take advantage of sector recovery
- ❑ **ERP platform** - continue to roll out throughout the business

# HIGHLIGHTS

- ❑ EBIT result of \$11.3m, down \$2.0m on corresponding period
- ❑ \$2.0m adverse impact of severe weather events:
  - 36% volume fall in stockfeed sector
  - delays in reaching nameplate production capacity
  - loss of harvested salt from the bank at Bajool
  - harvest deferral at Bowen
- ❑ Cost savings of \$0.6m realised compared to prior period freight and start up costs
- ❑ 10% fall in soda ash volume
- ❑ Joint Ventures continued solid performance. Cash dividends again withheld to conclude NZ expansion.
- ❑ Strong volume growth in Indonesia through new refinery offset by provision raised for contested tax assessment

- ❑ Soda Ash volumes down due to lower offtake by Penrice.
- ❑ Chemical FY10 comparative included the one off sale of low grade, prior year harvest stack.
- ❑ Food reflects slight reduction in retail volumes.
- ❑ Pool volumes increased by 13% due to weather conditions consistent with re-chlorination of pools in Qld and NSW.
- ❑ Hide volumes steady year on year.
- ❑ Weather in Qld severely affected stockfeed demand.
- ❑ Export of crude salt to Dominion down 7.4kt although export volumes to Japan have increased by 0.8kt.
- ❑ Indonesia volumes have increased by 36%. Full impact of new refinery being realised.

<b>Annualised ROFE (EBIT/Funds employed exc JV's)</b>	<b>8.3%</b>	<b>9.7%</b>

- ❑ Sales revenue fall of only 3.0% despite 6.5% volume decrease
- ❑ EBIT result before JV's of \$7.8m, down \$1.7m or 18% on FY10
- ❑ Higher depreciation and \$5.7m reduction in development capex reflect completion of refinery rationalisation strategy
- ❑ Tight control over working capital such that operating cash flow of \$9.0m achieved
- ❑ JV NPAT of \$3.5m for annualised ROI of 13.8% (FY10: \$3.8m & 17.2%) with dividends withheld to fund Dominion Salt NZ expansion
- ❑ High cash conversion maintained
- ❑ FY11 net cash flow higher given capex movements between periods

## Macro Economic Environment

- ❑ The impact of the floods and subsequent restocking program uncertain at the present time, but flat overall volumes are likely for FY11
- ❑ Salt demand typically grows in line with population growth and GDP as a low cost, essential ingredient/constituent item

## Market Environment

- ❑ Increasing demand for pool salt
- ❑ Food salt demand stable as reductions in the salt content of food products is being offset by population growth

## Strategic Actions

- ❑ Realise full cost savings from new refinery at Bajool, including supply chain efficiency improvements
- ❑ Sustainable salt field management
- ❑ Focus on taking cost out of the business

- ❑ Feasibility study with Delfin Lend lease concluded in half year
- ❑ 22 October 2010 ASX release confirmed redevelopment of the Dry Creek site into a residential community is financially viable
- ❑ Redevelopment not feasible at the present time due to current contractual commitments to Penrice
- ❑ Potential to create significant long term shareholder value
- ❑ In prime location with proximity to Adelaide CBD, included within SA Government's 30 Year Plan
- ❑ Redevelopment value underpins current in-use carrying value
- ❑ On continuous watch by Ridley

# CONCLUSIONS & OUTLOOK

INTRODUCTION

AGRIPRODUCTS

CHEETHAM

FINANCIALS

ACQUISITION

OUTLOOK

- Half year result - weather impacted, delayed the returns to come from capital projects, but delivered strong operational cash flows despite sharp and sustained rises in grain prices**
- Impacts of recent and widespread flooding still to be fully assessed**
- Second half raw material prices likely to remain high despite availability of weather damaged grain**
- New banking facility to start to deliver finance cost savings by year end**
- Maintain focus on internal costs and efficiency - further prior year tax benefit to finalise**
- Growth in Dairy, Packaged Products, Aqua-feed and Poultry sectors anticipated to continue**
