Digislide Releases Three Gaming Projectors to the Market

Digislide Holdings Limited (Digislide) is pleased to announce the market release of 3 gaming projectors; Sii™, StingRay™ and XRay™480.

These three ultra portable SVGA projectors have an LED light source, which requires no warm up/cool down period, making the products Plug and Play! And Show and Go! With a 150 lumens output for a guaranteed 30,000 hours, these products are absolutely ideal for gamers, families and group presentations!

Each has the same specifications, but Digislide has selected different branding to provide three perfect companion projectors for the three major games consoles.

Sii According to sales data collected by Nintendo Australia, the Nintendo Wii™ has sold 1.79M consoles since launch¹. This represents about 10% of Australian households as being Wii™ owners. Digislide will be targeting Australian families who want to set the Wii™ free from the TV!

STINGRAY
DIGISLIDE™ GAMING PROJECTOR

The StingRay™ has all the same functionality as the Sii™, but is branded differently. The product is black with a silver logo, making it the perfect companion for the Sony Playstation™.

The display is DLP technology, and all three products have PC Compatability (VGA, SVGA, XGA, SXGA) and Video Compatibility (NTSC, PAL, SECAM).

Auto keystone correction and a range of interfaces (vga, composite video, S video, USB, SD-Card Reader) makes presentations easy.

XRAY™ The third product in the range is the XRay™480, so named for the 480,000 pixel resolution the SVGA resolution provides.

XRay™480 is a perfect companion for the Microsoft XBox™. Its branding and colour are designed to complement the aesthetics of the XBox™. It looks great as a stand-alone projector for a home theatre or an office environment.

¹ Nintendo, (2010) *Nintendo Australia*, nintendo.com.au, 10/9/2010

These three SVGA projectors have no expensive lamps to replace, and are equally suitable for Home Theatre, Office or Mobile users – making them the most versatile projectors in the market.

Digislide is in discussion with licensed distributors in Australia, North America, India and Middle East markets with regard to stocking these products, and will inform the market as existing distribution agreements are expanded and new contracts set in place.

About Digislide

Digislide is an innovative Australian based company with an extensive Intellectual Property portfolio and proven capacity to design, develop and commercialise complex projection products. The technologies have wide patent protection and have already received international acclaim.

Digislide's strategy is to licence manufacturers to produce miniature projection systems for embedding in mobile and/or hand held communication devices, such as mobile phones, PDA's and notebook computers, and its tactical focus has been to design hand held projectors which complement and interface with 5 of the world's biggest selling electronic devices; Apple's iPHONE™ and iPOD™, Nintendo's Wii™, Sony's Playstation™ suite and Microsoft's XBox 360™.

Following the convergence of projection, telecommunications, mobile gaming, and IPTV (Internet Protocol Television) technologies VSDN Pty Ltd (a wholly owned subsidiary) was incorporated.

Virtual Streaming Distribution Network (VSDN) technologies remove the perception of the Internet as "the digital divide" and enable it to be "the fourth utility". IPTV brings access to information, education, entertainment, health and wellbeing to a commodity level.
