Transfield Services JV awarded A\$65 million contract with Woodside

Transfield Worley Services (TWS) – the 50/50 joint venture between Transfield Services and WorleyParsons – today signed a A\$65 million contract to provide Hook-up and Commissioning (HUC) services for the Woodside operated, North West Shelf Project's North Rankin B Platform, to be located approximately 135 kilometres off the north-west coast of Western Australia.

The agreed scope of work includes the provision of labour and materials for the hook-up and assistance with the pre-commissioning and commissioning of relevant systems for the HUC of the integrated float over deck.

The work covers both the onshore planning phase, including potential visits to the topsides fabrication yard in South Korea, and the offshore implementation phase.

Transfield Services Managing Director and CEO, Peter Goode, said today: "This contract builds on our 15-year relationship with Woodside and reinforces our position in the North West Shelf, Australia's largest resource development area."

The work will commence this month.

In January 2010, TWS signed a four-year agreement with Woodside to provide brownfield project and maintenance services to Woodside's offshore gas production and onshore Liquefied Natural Gas (LNG) processing facilities in Western Australia.
