## ASX Announcement

Wednesday, 8 June 2011

COE080611a

Dear Shareholders,

### Turton-1 Plugged and Abandoned

Since the last ASX announcement (COE300511a Turton-1 Spud), the Turton exploration well has drilled to a total depth of 1777.5 mRT and wireline logs have been run and interpreted.

During drilling there were no hydrocarbon shows observed in the primary objective (Namur Sandstone) or secondary objectives (Birkhead and Poolowanna Formations) and the evaluation of the wireline logs has confirmed the absence of hydrocarbons in all objective horizons.

The Turton-1 well has been plugged and abandoned as dry hole, and the rig released on 6 June 2011.

The rig is currently moving to the Westall-1 drill site.

An announcement on Westall-1 will be made following spud of the well.

Regards,  
Cooper Energy Limited

**Michael Scott**  
Managing Director
