ASX Announcement

Monday, 20 June 2011

COE200611a

Dear Shareholders,

Westall-1 Plugged and Abandoned

Since the last ASX announcement (COE130611a Westall-1 Spud), the Westall-1 exploration well has been drilled to a total depth of 1808 mRT and wireline logs have been run and interpreted.

During drilling there were no hydrocarbon shows observed in the primary objective (Namur Sandstone) or secondary objectives (Birkhead, Hutton and Poolowanna Formations) and the evaluation of the wireline logs has confirmed the absence of hydrocarbons in all objective horizons.

The Westall-1 well has been plugged and abandoned as dry hole, and the rig released on 19 June 2011.

The rig is currently moving to the Parsons-5 drill site as a development well.

An announcement on Parsons-5 will be made following spud of the well.

Regards,
Cooper Energy Limited

Laurie Shervington
Chairman
