Hercules Adds Muscle To Amber Product Range...

Ambertech Limited is proud to announce their appointment as the Australian distributor for the standard-setting range of Hercules multimedia speaker systems, webcams, Digital DJ equipment and *eCAFÉ™* high-performance netbooks.

Developed by the French-based Guillemot Corporation, with origins stretching back to 1984, the Hercules brand established itself as a world leader in the field of 3D graphics cards before Guillemot Corporation utilised their considerable technical expertise to expand into the home entertainment and gaming markets.

Today, Hercules products have become leaders in the discerning and demanding European market place by offering high-performance, ergonomic designs which maximise the enjoyment of digital interactive entertainment end users. Hercules high-performance multimedia solutions are now proudly distributed in Australia by Amber Technology and will be available from an extensive network of selected specialist dealers.

For enquiries please contact: Robert Glasson, CFO and Company Secretary (02) 9452-8600

About Hercules:

Hercules products are manufactured by Guillemot Corporation which is headquartered in Carentoir, France. With a history stretching back to 1984, Hercules offers compelling multimedia products which have been fastidiously researched in terms of performance and produced with quality as a prime objective.

About Amber Technology:

Established in 1987, Amber Technology is one of Australia's largest and most respected distributors of high technology equipment solutions to the home entertainment and professional broadcast, recording & live production markets. Our expertise fully and uniquely encompasses the supply, production and delivery of today's rich audio visual experience.
