- 14 Major Changes to the Investment Portfolio
- 15 Portfolio Performance
- 16 Company Particulars
- 17 Shareholder Meetings

SUMMARY OF RESULTS FOR THE SIX MONTHS TO 31 DECEMBER 2011

Reported Profit After Tax

Profit after tax for the half year was \$4.9 million versus \$5.0 million over the corresponding period last year. These figures include the movement in the unrealised value of the Company's investment in Hastings Diversified Utilities Fund, as required under current accounting standards.

Net Operating Result

Net operating result which measures the income generated from the investment and trading portfolios was \$3.0 million versus \$3.3 million last year.

Earnings Per Share

Earnings per share based on net operating result were 1.44 cents compared with 1.69 cents last year.

Total Portfolio Return

Total portfolio return during the six months to 31 December 2011 (change in net asset backing per share plus dividend) was positive 0.5 per cent whereas the S&P/ASX 200 Accumulation Index was negative 9.7 per cent over the corresponding period.

Total Shareholder Return

Total shareholder return measured by change in share price plus dividends over the six month period was positive 1.5 per cent.

Total Portfolio

Total portfolio at market value at 31 December 2011 was \$155.1 million. This includes cash of \$4.5 million.

Management Expense Ratio

Management expense ratio on an annualised basis was 0.85 per cent. The figure for the corresponding period last year was 0.83 per cent.

Net Asset Backing

Net asset backing per share at 31 December 2011 was 74 cents. At 30 June 2011 the net asset backing was 78 cents.

REVIEW OF OPERATIONS

For the six month period to 31 December 2011 in which the Australian equity market was down and risk averse, AMCIL delivered a positive portfolio return of 0.5 per cent. This was approximately 10 per cent ahead of the S&P/ASX 200 Index return of negative 9.7 per cent. For the calendar year, AMCIL's portfolio return was negative 0.9 per cent against the Index which was negative 10.5 per cent. With a small concentrated investment portfolio, AMCIL's approach is to focus on where it sees the best medium to long term value in either small or large companies.

Major contributors to the positive performance of the portfolio for the half year were gains in Hastings Diversified Utilities Fund, which is now the largest holding in the portfolio and subject to a takeover offer from the APA Group, Senex Energy, Telstra, Transurban, and Eastern Star Gas. Furthermore, AMCIL has limited exposure to the discretionary retail and the smaller resources sectors, both of which have been hard hit through the recent market downturn.

AMCIL was an active participant in the market through this volatile period as a number of opportunities arose to purchase companies that in our opinion represent good investments at attractive prices. Major purchases during the period were in Ansell, Origin Energy, Wesfarmers, Woodside Petroleum, Orica, Incitec Pivot and Engenco. Of these the following are new to the portfolio:

- Ansell which is a global company providing healthcare barrier protection products. Ansell operates under three divisions: Medical Solutions – surgical and examination gloves; Industrial Solutions – body protection for industry; and Consumer Healthcare. Operations span across the Americas, Europe, and Asia Pacific.
- Orica which is a manufacturer of industrial and specialty chemicals, commercial explosives and mining chemicals in Australasia. Following the 2010 demerger of the consumer products business, DuluxGroup, Orica has three business groups; Mining Services, Orica Chemicals and Minova.
- Wesfarmers which is a diversified company covering Coles supermarkets, department stores, home improvement and office supplies; coal mining; insurance; chemicals, energy and fertilisers; and industrial and safety products.
- Woodside Petroleum which is an operator of oil and gas production in Australia. Woodside has operations encompassing the production of liquefied natural gas, domestic gas, condensate, crude oil and liquefied petroleum gas. WPL has six business units including international, Australia,

North West Shelf, Pluto, Browse and Sunrise. Currently, the production is obtained from North West Shelf and Australia Oil (Enfield, Vincent and Stybarrow).

There were also a number of sales from the portfolio during the half year as some companies no longer fitted the investment criteria for a high conviction portfolio like AMCIL and other investment opportunities emerged. Major sales were in Iluka Resources as the share price rose strongly through

the period, Eastern Star Gas which was under a takeover offer from Santos, Trust Company, Peet Limited, Perpetual Trustees and Alumina. Other than Iluka all of these sales represented a complete disposal from the investment portfolio.

AMCIL continues to be well positioned with cash of \$4.5 million as well as access to \$10 million of debt facilities to take advantage of attractive opportunities that can arise in volatile markets.

Portfolio Return - Per Annum Return to 31 December 2011*

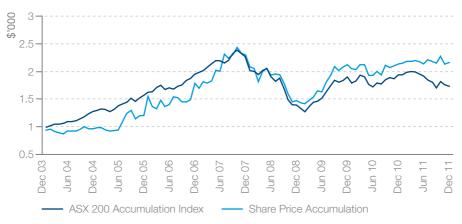

^{*} All figures annualised other than the six month returns.

[#] Return on capital is measured by the change in net asset backing plus reinvested dividends and adjusting for the additional cash received from the exercise of options since recapitalisation of the Company in January 2004.

REVIEW OF OPERATIONS CONTINUED

The Value of \$1,000 Invested in AMCIL at Recapitalisation*

^{*} Assumes a shareholder reinvested dividends paid. It also assumes a shareholder received the option of 50 cents per share, exercisable on 28 February 2007, as part of the recapitalisation in January 2004.

Profit and Dividend

Profit for the half year was \$4.9 million, which is marginally down on last year's result of \$5.0 million. These figures include the movement in the unrealised value of the Company's investment in Hastings Diversified Utilities Fund, which is required under current accounting standards.

The Net Operating Result, which represents the income generated from the investment and trading portfolios, was \$3.0 million versus \$3.3 million last year. Dividends and distributions were

generally in line with the corresponding period last year. The primary reason for the fall was the negative contribution of \$0.5 million from the trading portfolio versus the positive contribution last year of \$0.3 million.

In line with the Company's current practice the Board has not declared an interim dividend. The Company's policy of paying dividends is to maximise the distribution of franking credits having regard to the profit for the year.
