ASX Announcement

Tuesday 19 June 2012

COE190612a

Dear Shareholders,

Christies-6 Successful

We are pleased to announce that Christies-6 has been drilled to a total depth of 1,713 metres and wireline logs have confirmed that it has intersected a 3.8 metre gross oil column in mid-Namur sandstone that was the primary objective of the well.

Encouraging oil shows were also encountered in the secondary objective Birkhead sandstone. These shows and wireline log response were similar to those observed in producing Birkhead sands in other Christies wells. The Birkhead therefore remains a target for future completion.

The well will be cased and suspended for future completion as an oil producer and will be tied-back to the Christies production facilities. The rig will be moved to the next development well Christies-7 drill site.

Joint Venture Participants are Cooper Energy (25%) and Beach Energy (75% and Operator).

Yours faithfully,
Cooper Energy Limited

David Maxwell
Managing Director
