

(Incorporated in Papua New Guinea) ARBN – 055 079 868

# OIL SEARCH 2012 FIRST HALF RESULTS 21 August 2012

#### **HIGHLIGHTS**

- Oil Search (ASX: OSH; ADR: OISHY) reports that profit after tax for the six months to 30 June 2012 was US\$107.5 million, compared to US\$114.5 million in the corresponding period of 2011. Sales revenue increased by 7%, due to higher gas sales and rig income, underwritten by continued strong oil production and a healthy oil price, with the 6% fall in profitability largely reflecting an increase in expensed exploration costs.
- Operating cash flow for the first six months was US\$198.3 million, which was used to fund Oil Search's active exploration and development drilling programme. PNG LNG Project expenditures were funded from cash and by drawdowns from the PNG LNG Project finance facility.
- During the first half of the year, continued progress was made on the construction of the PNG LNG Project, operated by Esso Highlands Limited, an affiliate of ExxonMobil Corporation. Milestones included the installation of several of the key items of LNG train equipment, including the Train 1 main cryogenic heat exchanger, and the completion of the offshore pipeline. The US\$15.7 billion Project remains on track for first LNG sales in 2014.
- A key highlight for the period was the discovery of a substantial gas accumulation at P'nyang South. With resource evaluation and preliminary analysis of development options now underway, Oil Search believes the P'nyang field could provide a key underpinning volume for LNG expansion.
- The Company has embarked on one of the largest drilling programmes in its long history, with the objective of finding oil and gas resources to underwrite further growth beyond the present two train PNG LNG development. P'nyang South was the first well in this programme, with two high potential wells currently being drilled. Trapia 1, an exploration well in the PNG Highlands, is targeting a gas structure east of the Hides and Angore gas fields, while Taza-1, located in the Kurdistan region of Iraq, is drilling a substantial oil prospect. Success in either well could have a significant impact on Oil Search's value.
- The exploration programme will continue over the balance of 2012 and into 2013, with Mananda 6 in the Highlands, the Gulf of Papua offshore programme and the Semda-1 well in Tunisia.
- Oil Search's balance sheet remains very solid. At the end of June 2012, the Company had a cash balance of US\$852.7 million while US\$2,349.2 million had been drawn down under the PNG LNG Project finance facility. The Company's revolving credit facility, totalling US\$217.5 million at the end of June, remained undrawn.

#### AUSTRALIAN REGISTERED OFFICE

- Significant progress has been made in refinancing the Company's existing corporate debt facility, with strong support received from a range of domestic and international banks. Committed offers have been received for in excess of US\$500 million and the facility is expected to be finalised shortly. The new facility will provide additional funding flexibility with a term beyond the commencement of cash flows from the PNG LNG Project.
- The Board has approved the payment of an unfranked interim dividend for 2012 of two US cents per ordinary share, payable on or around 8 October 2012. The dividend payment will be funded by the Company's fully underwritten Dividend Reinvestment Plan.

#### Commenting on the first half results, Peter Botten, Oil Search's Managing Director, said:

"Oil Search performed well in the first half of 2012, achieving a net profit after tax of US\$107.5 million, which was only a little lower than in the corresponding period of 2011. Oil production remained strong in the first half, with a number of new wells and workovers contributing to the result, partially offset by a two week scheduled facilities shut-down for PNG LNG related work. Oil and gas sales were similar to first half 2011 levels, due to the timing of oil shipments. Global oil prices remained firm for most of the half year, with the Company realising an average price of US\$115.48 per barrel, comparable to the corresponding period of 2011.

The Board has approved the payment of a 2012 interim dividend of two US cents per share, the same as the 2011 interim and final dividends. The Company's shares will commence trading exdividend on 7 September 2012, the record date for the dividend is 13 September 2012 and payments will be made to shareholders on or around 8 October 2012. A fully underwritten Dividend Reinvestment Plan will fund this payment."

#### PNG LNG Project construction activities making good progress

"Construction activities at the many PNG LNG Project operating sites continued apace during the period. Some of the milestones achieved included the completion of the outer shells and roof installation for the two LNG tanks, installation of key vessels and equipment on the LNG trains and the completion of the 2.4-kilometre jetty trestle and the offshore pipeline lay. Pleasingly, the recent Government elections caused no significant disruptions to activities at any of the work fronts.

The Project's construction activities have now reached their peak level, with a workforce in excess of 17,600 people. At the end of June 2012, more than 8,500 PNG citizens had received training for both construction and production roles across the Project and more than 1,300 local businesses had been supported through training and business development programmes. This leaves a strong legacy of skills and experience for use on future major developments, both in PNG and elsewhere.

While substantial construction activities still remain to be completed, the Project is presently on track to meet the revised budgeted capital cost of US\$15.7 billion and continues to make good progress towards the 2014 delivery window."

#### Early success in Oil Search's gas expansion drilling programme

"Oil Search's new drilling programme has had an excellent start, with the discovery of a major gas resource at the P'nyang South prospect. Work is presently underway on further defining the resource and analysing various development options. Based on data to date, Oil Search believes that P'nyang has the potential to be a key underpinning resource for LNG expansion, particularly in combination with the gas reserves upside in the Associated Gas fields.

The second well in the gas expansion programme, Trapia 1, is currently drilling. This is a higher risk, exploration play but the prospect lies close to the existing PNG LNG fields and infrastructure

so, if successful, would be a very valuable source of gas. There are a number of additional structures on trend with Angore and Trapia, which provide independent follow-up.

In the offshore Gulf of Papua farm-down process, the data room has closed and bidding has concluded, with a range of competitive offers received. Discussions with preferred farm-in partners are at an advanced stage and a farm-down is expected to be concluded shortly. The Stena Clyde drillship is now scheduled to be on-site and start drilling in January 2013."

#### High potential oil exploration underway

"The Taza 1 exploration well in the Kurdistan region of Iraq commenced drilling in early July. The well is targeting a substantial four-way dip closed structure, which lies on structural trend with the giant producing Jambur field to the northwest, with reported reserves of over one billion barrels of oil, and the Western Zagros Sarqala oil field to the southeast. If successful, the Taza structure has the potential to contain recoverable oil reserves of between 250 – 500 million barrels. If this well is a discovery, it could have a meaningful value impact on Oil Search, which holds a 60% participating interest in the PSC. The well is expected to reach total depth early in the fourth quarter of 2012."

#### **Revised Hides Gas to Electricity contract terms**

"The Hides Gas to Electricity Project contract, under which gas is sold to Barrick Energy to generate electricity for the Porgera Gold Mine, expired in late 2011. An interim sales agreement has been in place since the beginning of 2012 and a new long term contract is expected to be signed shortly. This long term agreement will provide the Porgera Gold Mine with energy supply certainty into the 2020s."

#### Safety performance

"The Company achieved a Total Recordable Incident Frequency Ratio (TRIFR) of 3.20 per million hours worked for the first half of 2012, compared to a TRIFR of 1.47 in the same period of 2011. The increase in safety incidents is disappointing, given it follows several years of top quartile safety performance. This reflects a combination of increased activity levels in higher risk construction activities, with a significant number of contractor personnel having less experience of operations in PNG and a less well developed safety culture. There was also a greater proportion of work being conducted at very remote locations. A major safety-focus programme, including visits to, and workshops at, operational locations involving the whole senior management team, has been initiated, aimed at improving performance."

#### **New Government in PNG**

"Elections in PNG have recently concluded, with the Hon. Mr Peter O'Neill returned as Prime Minister, leading a strong coalition Government. We would like to congratulate Mr O'Neill on his reappointment and look forward to working with him and his new ministerial team.

PNG has an excellent track record of fiscal stability and of delivering a predictable operating environment. This has attracted unprecedented investment in the resources sector. We are confident that under the new Government, PNG will remain an attractive country in which to invest, with Oil Search itself spending some US\$2 billion in PNG in 2012.

Government and landowner revenues are poised to increase markedly with the commencement of cash flows from the PNG LNG Project in 2014, so improving the systems, transparency and governance of the delivery and distribution of the considerable benefit streams is a key focus for both the Project developers and the Government in PNG. Dialogue on benefits distribution is expected to recommence shortly, with a focus on ensuring the benefits not only reach the landowners in the Project region but are also shared appropriately across the rest of the country."

#### **Health Foundation Launch**

"Building on our reputation as a socially responsible operator, the Company launched the Oil Search Health Foundation in March this year. The Foundation, in partnership with the PNG Government and with funding from the Global Fund, AusAID and others, is now carrying out a range of programmes for the prevention and treatment of HIV/AIDS, malaria and the improvement of child and maternal health across PNG.

The development of this private/public partnership between the Company, Government and aid agencies is seen as a new and positive way these organisations can work together to deliver positive change to communities in which we work."

#### OUTLOOK

On the outlook for the second half of 2012, Mr Botten said the following:

#### **PNG LNG Project activities**

"During the second half of the year, PNG LNG Project activity is expected to include the following:

- Continued construction of Trains 1 and 2, the marine jetty and associated facilities at the LNG plant site near Port Moresby.
- Continuation of the onshore pipe lay, past Kutubu and towards Hides.
- The first flights into the Komo Airfield and the commencement of equipment installation at the Hides Gas Conditioning Plant.
- Continued drilling and well pad development at the Hides field.
- Completion of the key components of the Associated Gas Project by Oil Search."

#### **Production outlook for 2012**

"The strong underlying oil field performance recorded in the first half of 2012 is expected to continue in the second half of the year, with continued good contributions from 2011 development wells and from recent successful workovers. Partly offsetting this, production will be impacted by the recent shut-in to allow an inspection of the Kumul loading system, as well as a planned two-week shutdown of the Gobe oil fields in the fourth quarter to allow tie-in work for the PNG LNG Project to be completed (the last of the scheduled shutdowns).

Following the observation of a very small quantity of oil droplets on the water surface during an oil tanker loading in July, loading was suspended as a precautionary measure, pending an inspection of the Kumul loading line. The Company carried out a comprehensive testing programme which included an inspection and analysis of line integrity with pressure testing at twice the normal operating levels. No source of any leak in the oil export system has been found and oil loading and production is due to recommence imminently. Due to the shut-in of production, approximately 0.3 mmbbl has been deferred. The Company took the opportunity provided by the shutdown to undertake some maintenance work on the fields and facilities, originally planned for later in the year.

As a result of the GPF shutdown and the Kumul incident, second half production is expected to be slightly lower than in the first half. Nonetheless, production for the 2012 full year is still expected to be within the previous guidance range of between 6.2 - 6.7 mmboe.

Development activities planned for the second half include drilling the Moran MA well, targeting the Toro C and Digimu sands downdip of Moran 6 and 14, and the Agogo ADT A well, a further appraisal of the Toro hanging wall reservoir. There will also be ongoing work-over activity in the Kutubu, Usano, Agogo and Moran fields."

#### **Exploration activity**

"As previously highlighted, the Trapia well in the Highlands of PNG and the Taza well in Kurdistan are both currently drilling ahead and expected to reach target depth late in the third quarter/early fourth quarter. Success in either well would have a meaningful impact on Oil Search. The Company's largest ever exploration drilling programme will continue in the fourth quarter of 2012, with the Semda 1 well in the Tajerouine PSC in Tunisia, and into early 2013 with the commencement of the offshore drilling programme in the Gulf of Papua and the spudding of Mananda 6, a follow-up well to the Mananda 5 oil discovery.

In addition, a seismic survey over a number of leads adjacent to, and on trend with, the Angore gas field is now underway. The results will assist in maturing further gas prospects in this region of the PNG Highlands.

The 2012/13 drilling programme is targeting multi-tcf of potential gas resources and several hundred million barrels of oil potential."

#### Refinancing of corporate facility

"The refinancing of Oil Search's corporate debt facility, which is due to expire in late 2013, has made significant progress, with strong support from a range of domestic and international banks. The refinancing has been oversubscribed and committed offers have been received for in excess of US\$500 million, for a five year, non-amortising revolving facility. The terms of the facility are very attractive and provide funding flexibility to well beyond the commencement of cash flows from the PNG LNG Project.

The high level of interest and commitment from the banking community has been very pleasing and is a strong endorsement of the Company's prospects and the positive outlook for PNG. The refinancing is expected to be completed shortly."

#### Cost guidance for the 2012 full year

"Normalised cash operating costs in the second half are expected to be higher than in the first half, due to an increased level of work-over activity and the timing of some key work programmes. Operating costs for the 2012 full year are forecast to be in the range of US\$23 – 25 per boe. Additional cash costs related to the new PDL 1 Hides GTE contract are expected to be comparable to those incurred in the first half, of US\$18.7 million, assuming a similar oil price. Second half non-cash charges, comprising depreciation, amortisation and site restoration, are expected to be slightly higher than the first half charge of US\$8.57 per boe, reflecting a full period of a two-rig drilling programme.

Total investing capital expenditure for the 2012 full year is forecast to be approximately US\$2.0 billion. Expenditure on the PNG LNG Project is anticipated to be in the range of US\$1.55 – 1.65 billion, depending on phasing of construction activities and cash calls from the Operator. Due to higher work-over activity, spending on production activities is expected to rise in the second half, with total spend for the year of US\$130 – 140 million. The Company has an extremely active exploration and evaluation programme planned for the second half of 2012, including the Trapia, Taza and Semda wells, preparations for the start of Gulf and Mananda 6 drilling and seismic acquisition. Total exploration expenditure for the full year, including gas growth, is forecast to be between US\$270 - 290 million.

PNG LNG expenditures will continue to be funded 30% from our existing cash position, presently a healthy US\$850 million, and 70% from ongoing draw-downs from the PNG LNG project finance

facility. Other expenditures will be funded largely from the continued strong cash flows being generated by our oil operations. The new corporate facility, which is expected to be finalised shortly, will provide further head-room for our ability to finance medium term demands for capital. Oil Search remains in a very strong financial position to fund all current activities as well as pursue growth opportunities"

Peter Botten, CBE Managing Director OIL SEARCH LIMITED

21 August 2012

#### FINANCIAL SUMMARY

| Six months to June                        | 2011    | 2012    | % change |
|---|---------|---------|----------|
|   |         |         |          |
| SALES DATA                                |         |         |          |
| Total oil and gas production (mmboe)      | 3.558   | 3.259   | -8       |
| Total saleable oil production (mmbbl)     | 2.978   | 2.738   | -8       |
| Total oil liftings (mmbbl)                | 2.838   | 2.863   | +1       |
| Gas equivalent sales (mmscf)              | 2,876   | 2,701   | -6       |
| Total oil and gas sales (mmboe)           | 3.334   | 3.329   | -        |
| Realised oil price (US\$/bbl)             | 116.89  | 115.48  | -1       |
| FINANCIAL DATA (US\$m)                    |         |         |          |
| Revenue from operations                   | 371.1   | 398.5   | + 7      |
| Operating expenses                        | (45.8)  | (73.0)  | +59      |
| Royalties and levies                      | (5.9)   | (6.7)   | +13      |
| Other expenses                            | (12.1)  | (8.8)   | -28      |
| EBITDAX                                   | 307.3   | 310.1   | +1       |
| Exploration costs expensed                | (38.9)  | (56.5)  | +45      |
| Site restoration                          | (1.1)   | (5.6)   | +415     |

| Basic EPS                                 | 8.7     | 8.1     | -7       |
| Diluted EPS                               | 8.7     | 8.1     | -7       |
| Net Operating Cash Flow per share         | 17.7    | 14.9    | -15      |
| Interim Dividend                          | 2.0     | 2.0     | unch     |

#### Notes:

- Numbers and percentage moves may not match due to rounding.
- In accordance with IFRS 8 "Accounting Policies Changes in Accounting Estimates and Errors", prior year comparatives have been restated where applicable.

#### **FACTORS AFFECTING THE RESULTS**

#### Oil production/sales

Oil Search's oil and gas production in the first half of 2012 was 3.26 million barrels of oil equivalent, of which 87% was oil and liquids and the balance gas. After internal usage, oil production available for sale was 2.74 million barrels. 2.86 million barrels were sold during the period, resulting in a decline in inventory levels, from 0.20 million barrels at the end of December 2011 to 0.06 million barrels at the end of June 2012.

#### Realised oil prices

Oil Search realised an average oil price of US\$115.48 per barrel for the first half of 2012, compared to US\$116.89 per barrel in the previous corresponding period. No hedging was undertaken during the period.

#### Revenue

Total revenue from operations was US\$398.5 million, 7.4% higher than in the first half of 2011. The increase was driven by substantially higher gas sales revenue, reflecting the terms of an interim sales agreement for the Hides GTE Project, and a rise in rig revenue, with both of Oil Search's rigs in operation for much of the period.

| Revenue (US\$ million)           |       |       |          |
|----------------------------------|-------|-------|----------|
| Six months to June               | 2011  | 2012  | % change |
|                                  |       |       |          |
| Sale of oil                      | 331.7 | 330.6 | -        |
| Sale of gas and refined products | 23.7  | 48.0  | +102     |
| Other revenue*                   | 15.6  | 20.0  | +28      |
| Total                            | 371.1 | 398.5 | +7       |

<sup>\*</sup> Primarily tariff and rig income

#### Cash costs

| Cash operating costs (US\$ million) |      |       |          |
|-------------------------------------|------|-------|----------|
| Six months to June                  | 2011 | 2012  | % change |
| Oil field costs                     | 38.5 | 47.5  | +23      |
| Hides field costs                   | 4.7  | 4.5   | -4       |
| Gas purchase costs                  | -    | 18.7  | na       |
| Other opex                          | 8.5  | 9.0   | +6       |
| Net corporate costs                 | 11.1 | 8.9   | -20      |
| FX (gains)/losses                   | 1.0  | (0.2) | -120     |
| Cash operating costs                | 63.8 | 88.4  | +39      |

On an absolute basis, total cash costs were 39% higher than in the previous corresponding period. This was primarily due to the interim gas purchase agreement with the PDL 1 Joint Venture relating to the Hides GTE project, which resulted in US\$18.7 million of gas purchase costs (matched by proportionately higher sales revenue). Oil operating costs increased by US\$9.0 million, reflecting the adverse impact of Kina appreciation relative to the US dollar and increased wages, camp and maintenance costs due to PNG inflation.

Cash costs, on a per barrel of oil equivalent basis, increased from US\$19.24 per boe in the first half of 2011 to US\$21.04 per boe in the first half of 2012 on a normalised basis and to US\$26.68 per boe inclusive of the gas purchase costs.

#### Non-cash costs

| Non-cash costs<br>(US\$ million) |      |      |          |
|----------------------------------|------|------|----------|
| Six months to June               | 2011 | 2012 | % change |
| Amortisation                     | 19.2 | 16.6 | -13      |
| Depreciation                     | 6.1  | 6.2  | +1       |
| Site restoration                 | 1.1  | 5.6  | +415     |
| Total                            | 26.4 | 28.4 | +8       |

Depreciation, amortisation and site restoration increased from US\$26.4 million to US\$28.4 million. This was primarily due to higher site restoration amortisation, driven by an increase in estimated future asset values, and increased depreciation relating to higher rig utilisation.

#### **Exploration expense**

During the first half of 2012, exploration and evaluation expenditure was US\$125.7 million. This included expenditure on the P'nyang South 1 and P'nyang South ST1 wells (US\$31.7 million), Trapia site preparation and early drilling costs (US\$31.4 million) and the exploration component of the IDT 25 well (US\$8.0 million). In addition, US\$6.2 million was spent on site preparations for the Taza well.

In line with the Successful Efforts accounting policy, all costs associated with unsuccessful drilling, seismic work and other support costs related to exploration were expensed, resulting in a charge of US\$56.5 million. This included US\$20.8 million of current and past costs in relation to the unsuccessful IDT 25 Koi lange test, US\$25.2 million on PNG seismic costs and US\$10.5 million related to general exploration expenses.

As at 30 June 2012, carried forward exploration costs totalled US\$397.1 million (US\$296.8 million at June 2011).

US\$6.0 million of business development costs, comprising evaluation of gas commercialisation options and other growth assessment activities, were expensed during the half year.

#### Interest income/expense

Interest income in the first half of 2012 was US\$3.0 million. While the Company maintained a high cash balance throughout the period, these funds are invested in short term US dollar deposit accounts, with US deposit rates at historically low levels. Amortisation of upfront fees and expensing of commitment fees related to the Company's revolving credit facility totalled US\$1.5 million compared to US\$1.8 million in the first half of 2011. Including a US\$2.7 million time-value charge for future site restoration commitments, total financing costs were US\$4.2 million (US\$3.9 million in the first half of 2011). Interest and finance fees on the PNG LNG Project continue to be capitalised until completion of the Project.

#### **Taxation expense**

Tax expense of US\$110.6 million was 10% lower than in the corresponding period of 2011, primarily due to a reduction in pre-tax profit. The effective tax rate for the period was 50.7%, slightly above the PNG statutory rate of 50% for oil profits, due to the non-deductibility of exploration expenses in MENA.

#### Operating cash flows

2012 first half operating cash flows were 15% lower than in 2011, due to working capital movements and an increase in tax payments.

Over the first half of 2012, Oil Search's net investing cashflow included:

- Expenditure of US\$77.7 million on exploration and evaluation, compared to US\$30.9 million in the first half of 2011.
- US\$802.6 million on the PNG LNG Project (US\$515.7 in the first half of 2011).
- US\$55.6 million on producing activities (US\$60.9 million in first half of 2011).
- US\$2.0 million on property, plant and equipment (US\$3.4 million in first half of 2011).

| Cash Flow (US\$ million)                     |         |         |          |
|--|---------|---------|----------|
| Six months to June                           | 2011    | 2012    | % change |
| Net Receipts                                 | 316.8   | 292.5   | -8       |
| Net Interest income/(expense)                | 2.4     | 1.9     | -22      |
| Tax Paid                                     | (55.1)  | (69.4)  | +26      |
| Expensed exploration and evaluation business | (31.6)  | (26.7)  | -16      |
| development and site restoration             |         |         |          |
| Operating Cash Flow                          | 232.5   | 198.3   | -15      |
| Net Investing cash flow                      | (610.9) | (941.4) | +54      |
| Net financing cash flow                      | 344.1   | 548.4   | +59      |
| Net Cash flow                                | (34.3)  | (194.7) | +468     |
|  |         |         |          |
| Net Operating Cash Flow/share (US cents)     | 17.7    | 14.9    | -15      |

Net cashflows from financing activities included the drawdown of US\$544.7 million under the PNG LNG project finance facility (excluding capitalised interest and financing fees) and US\$14.6 million of proceeds received from the underwriter of the Dividend Reinvestment Plan. The balance of the 2011 final dividend was funded via shareholder reinvestments.

#### **Balance Sheet**

| Balance Sheet (US\$ million) |           |          |           |
|------------------------------|-----------|----------|-----------|
| As at                        | June 2011 | Dec 2011 | June 2012 |
| Cash and cash equivalents    | 1,229.3   | 1,047.5  | 852.7     |
| Debt                         | 1,321.0   | 1,747.6  | 2,349.2   |
| Shareholders' Equity         | 2,921.3   | 3,017.2  | 3,133.6   |

At the end of June 2012, Oil Search had a net debt position of US\$1,497.0 million. This comprised US\$852.2 million in cash, US\$0.5 million in Joint Venture balances and US\$2,349.2 million in debt (all of which represented PNG LNG project finance facility debt).

#### **DIVIDENDS**

The Board of Directors announced an interim dividend for 2012 of two US cents per share. The shares will commence trading ex-dividend on 7 September 2012, the record date for the dividend is 13 September 2012 and payments will be made to shareholders on or around 8 October 2012.

The Company's Dividend Reinvestment Plan will operate for the interim dividend and it is intended that the reinvestment shortfall will be underwritten.

#### FIRST HALF 2012 PRODUCTION SUMMARY

Until his retirement in mid 2010, Dr Kantsler worked with Woodside Petroleum for 15 years, where he was most recently the Executive Vice President Health, Safety and Security. Prior to this, Dr Kantsler was Woodside Petroleum's Executive Vice-President Exploration & New Ventures from 1996 to 2009. Before joining Woodside Petroleum, Dr Kantsler had extensive experience with the Shell Group of companies working in various exploration roles in Australia and internationally. Dr Kantsler has been a Director of Forte Consolidated Limited. He was also Councillor and Director of the Australian Petroleum Production and Exploration Association (APPEA) for 15 years, where, as well as being chairman of several of APPEA's committees, he was Chairman from 2000 to 2002. In 2005, Dr Kantsler was awarded the APPEA Reg Sprigg Medal for his outstanding contribution to the oil and gas industry in Australia. Dr Kantsler was also a founding member of the Australian Government's Council for Australian Arab Relations (CAAR), where he served for two terms. He is Director of Savcor Group Limited and the Chamber of Commerce & Industry, WA.

#### **GROUP SECRETARY**

Mr Gardiner joined Oil Search Limited in 2004, after a twenty year career in finance at two of Australia's largest multinational construction materials companies and a major Australian telecoms company. Mr Gardiner's roles at Oil Search have covered senior corporate finance responsibilities. In April 2011, Mr Gardiner was appointed to the role of Executive General Manager, Corporate Sustainability and Services and also assumed Acting Chief Financial Officer responsibilities in late June 2012. He is also the Group Secretary of Oil Search, a role he has held since May 2009. *Ordinary shares, fully paid: 151,420; Options: nil; Performance Rights: 185,060; restricted shares: 8,178* 

#### **Directors' report**

#### RESULTS AND REVIEW OF OPERATIONS

#### **Financial**

During the period, the consolidated entity made a net profit after tax of US\$107.5 million (June 2011: US\$114.5 million). The net profit was after providing for income tax of US\$110.6 million (June 2011: US\$123.0 million).

#### **Operations**

Revenue from operations for the first six months of 2012 was US\$398.5 million, 7.4% higher than the first half 2011 outcome of US\$371.1 million. This result reflected higher oil volumes and gas prices, compared to the previous corresponding period. The average realised oil price for the first half of 2012 was US\$115.48 per barrel, or US\$1.41 lower than the US\$116.89 price realised in the first half of 2011. The Company did not establish any oil hedges during the period and remains unhedged to oil price movements.

Total oil, gas and condensate production for the first half of 2012 was 3.259 million barrels of oil equivalent, or 8.4% lower than in the first half of 2011 (3.558 million barrels of oil equivalent). Closing oil inventory at 30 June 2012 was 56,000 barrels. Operating expenses were US\$27.2 million higher at US\$73.0 million, compared to US\$45.8 million in the previous corresponding period, largely reflecting higher gas purchase costs.

Amortisation and depreciation charges increased by 7.7% or US\$2.0 million from US\$26.4 million to US\$28.4 million, due to the decrease in the US Bond rate and higher rig utilisation.

Exploration and evaluation costs expensed in the first half of 2012 totalled US\$56.5 million compared to US\$38.9 million in the previous corresponding period, due to increased exploration activity in the current period and expensing of prior period expenditure. As at 30 June 2012, total carried forward exploration costs totalled US\$397.1 million (December 2011: US\$337.6 million).

Income tax expense decreased to US\$110.6 million in the first half of 2012 compared to US\$123.0 million in the prior corresponding period, due to the impact of increased exploration and business development expenses resulting in lower pre tax earnings and representing an effective tax rate of 51% (2011: 52%).

Operating cash flow of US\$198.3 million (June 2011: US\$232.5 million) was received during the half-year, a decrease of 14.7% on the corresponding period in 2011. At 30 June 2012 the Company held cash of US\$852.7 million (December 2011: US\$1,047.5 million) inclusive of joint venture cash balances. Debt totalled US\$2,349.2 million (December 2011: US\$1,747.6 million), representing drawdowns under the PNG LNG Project finance facility.

#### **Directors' report**

#### **DIVIDENDS**

Subsequent to balance date, the directors have approved the payment of an unfranked interim dividend of US 2 cents per ordinary share to ordinary shareholders in respect of the half-year ended 30 June 2012. The due date for payment is 8 October 2012 to all holders of ordinary shares on the Register of Members on 13 September 2012. Dividends paid and declared during the period are recorded in note 8 to the financial statements.

The Company's Dividend Reinvestment Plan will operate for the interim dividend and the reinvestment shortfall will be fully underwritten.

#### AUDITOR'S INDEPENDENCE DECLARATION

Deloitte Touche Tohmatsu's Independence Declaration is included on page 6.

#### **ROUNDING**

The majority of amounts included in this report are rounded to the nearest US\$1,000 (where rounding is applicable).

Signed in accordance with a resolution of the Directors.

**Dear Directors** 

#### **Oil Search Limited**

I am pleased to provide the following declaration of independence to the directors of Oil Search Limited.

As lead audit partner for the review of the financial report of Oil Search Limited for the financial half-year ended 30 June 2012, I declare that to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the Corporations Act 2001 in relation to the review; and
- (ii) any applicable code of professional conduct in relation to the review.

Yours sincerely

DELOITTE TOUCHE TOHMATSU

| Cash and cash equivalents at the end of the period <sup>3</sup>          | -    | 852,734                                     | 1,229,308                                   |

<sup>&</sup>lt;sup>1</sup> Prior year comparatives have been restated in accordance with IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" upon adoption of the "Improvements to IFRS's", specifically IAS 7 "Statement of Cash Flows".

The consolidated statement of cash flows should be read in conjunction with the accompanying notes.

<sup>&</sup>lt;sup>2</sup> Total dividend payments including cash and dividend reinvestment was \$26.5 million (2011: \$26.3 million). Total dividend payments net of dividends reinvested under the dividend reinvestment plan was \$14.6 million (2011: \$18.9 million).

<sup>&</sup>lt;sup>3</sup> Includes US\$22.5 million (2011: \$22.5 million) in a debt service reserve account held with Australian & New Zealand Banking Group Limited, as required by the US\$435 million revolving facility agreement. Also includes US\$409.4 million (2011: US\$622.2 million) held in escrow with ANZ, secured to the lenders of the PNG LNG project, as required by the LNG project financing facility.

### Notes to the financial statements for the half-year ended 30 June 2012

#### 1 Summary of significant accounting policies

#### (a) Reporting entity

Oil Search Limited (Oil Search) is a company domiciled in PNG. The Consolidated Interim Financial Report (Half-Year Financial Report) of Oil Search as at and for the six months ended 30 June 2012 comprises Oil Search and its subsidiaries (Oil Search Group) and the Oil Search Group's interest in jointly controlled entities.

#### (b) Statement of compliance

The Half-Year Financial Report is presented in US dollars and is a general purpose interim Financial Report which has been prepared in accordance with the reporting requirements of the Australian Securities Exchange Listing Rules and IAS 34: "Interim Financial Reporting". The Half-Year Financial Report does not include all of the information required for a full Annual Financial Report and should be read in conjunction with the Consolidated Annual Financial Report of the Oil Search Group for the year ended 31 December 2011. This report should also be read in conjunction with any public announcements made by Oil Search during the half year in accordance with the continuous disclosure requirements arising under the ASX Listing Rules. This Half-Year Financial Report was authorised for issue by the directors on 20 August 2012.

#### (c) Basis of preparation

The concise consolidated financial statements have been prepared on the basis of historical cost. Cost is based on the fair values of the consideration given in exchange for assets. All amounts are presented in US dollars, unless otherwise noted.

#### (d) Rounding of amounts

The majority of amounts included in this report are rounded to the nearest US\$1,000 (where rounding is applicable).

#### (e) Significant accounting policies

The accounting policies applied by the Oil Search Group in this Financial Report are the same as those applied by the Oil Search Group in the Consolidated Financial Report for the year ended 31 December 2011.

Oil Search has signed a Sales and Purchase Agreement to sell its 40% interest in Block 3 (Gardan) in Yemen to Total S.A. of France (Total), for a consideration of US\$44.0 million. As a part of this transaction, Total will assume Operatorship of Block 3.

The completion of the transaction is subject to approvals from the Yemen Government. Oil Search expects to recognise a profit on completion of the sale.

|---|---|---|---|
| 7 | Earnings per share  |   | _   |
|   | Basic earnings per share  | 8.09  | 8.70  |
|   | Diluted earnings per share  | 8.07  | 8.67  |
|   | Weighted average number of ordinary shares (diluted) Weighted average number of ordinary shares (basic) | 1,327,493,682                               | 1,315,832,829                               |
|   | Effect of employee share options/share appreciation rights  | 225,606                                     | 525,826                                     |
|   | Effect of employee performance rights   | 4,228,844                                   | 4,786,802                                   |
|   | Weighted average number of ordinary shares (diluted)  | 1,331,948,132                               | 1,321,145,457                               |

Basic earnings per share have been calculated on a net profit after tax of US\$107.5 million (2011: US\$114.5 million).

Diluted earnings per share have been calculated on a net profit after tax of US\$107.5 million (2011: US\$114.5 million). There are 241,042 options (2011: 596,617), 1,385,100 share appreciation rights (2011: 1,466,800) and 6,012,249 performance rights (2011: 5,336,450) which are dilutive potential ordinary shares and are therefore included in the number of shares for the calculation of diluted earnings per share.

The average market value of the company's shares for the purpose of calculating the dilutive effect of share options and rights was based on quoted market prices for the period 1 January 2012 to 30 June 2012.

|   | in respect of previous year  | 26,511                                      | 26,253                                      |

On 20 August 2012, the directors declared an interim unfranked dividend in respect of the current half-year, of US 2 cents per ordinary share, to be paid to the holders of ordinary shares on 8 October 2012. The proposed dividend is payable to all holders of ordinary shares on the Register of Members on 13 September 2012. The estimated dividend to be paid is US\$26,627,121 and has not been included as a liability in these financial statements.

As Oil Search Limited is a Papua New Guinea incorporated company, there are no franking credits available on dividends.

### Notes to the financial statements for the half-year ended 30 June 2012

#### 12 Segment reporting

#### Information about reportable segments

The Group's segments are arranged primarily by location of operation (e.g. Papua New Guinea (PNG), Middle East and North Africa (MENA) and Australia (Corporate)) followed by the commodity (e.g. oil, gas or LNG).

Each managed segment has a management team that is accountable to the Managing Director.

The Group's Executive Management team evaluates the financial performance of the Group and its segments principally with reference to earnings before interest and tax, and capital expenditure on exploration and evaluation assets, oil and gas assets, and property, plant and equipment.

#### Geographical segments

The Oil Search Group operates primarily in PNG but also has activities in Yemen, Iraq, Tunisia (collectively MENA) and Australia. Production from the designated segments is sold on commodity markets and may be sold to other geographical segments.

In presenting information on the basis of geographical segments, segment revenue and segment assets are based on the location of operating activity.

|           | Revenues |         | Non-cui   | rrent assets |
|-----------|----------|---------|-----------|--------------|
|           | 30 Ju    | ne      | 30 June   | 31 December  |

| Total     | 398,545  | 371,132 | 5,373,524 | 4,406,856    |

#### **Major customers**

There are two customers with revenues exceeding 10% of the Group's total oil and gas sales revenue.

Revenue from one customer represents approximately \$330.6 million or 87% of the Group's total oil and gas sales revenues (2011: \$281.6 million, 79%) and 83% of the Group's total revenue of \$398.5 million (2011: 76% of \$371.1 million).

Revenue from one other customer represents approximately \$39.9 million or 11% of the Group's total oil and gas sales revenues (2011: \$16.1 million, 4.5%) and 10% of the Group's total revenue of \$398.5 million (2011: 4.4% of \$371.1 million).

Revenue from each of the other customers is less than 10% of total revenue for the Group.

#### 14 Events after balance sheet date

#### (a) Dividends

Subsequent to balance date, the Directors declared an unfranked interim dividend of US 2 cents per share in respect of the current half-year to the holders of ordinary shares, to be paid on 8 October 2012.

#### (b) Dividend Reinvestment Plan (DRP)

A DRP is currently in operation. It provides shareholders with the option of reinvesting all or part of their dividends in additional Oil Search shares. The DRP will be fully underwritten for the 2012 interim dividend.

There were no other significant events after balance date.

#### **Directors' Declaration**

In accordance with a resolution of the Directors of Oil Search Limited, the Directors declare that:

- (a) the attached financial statements and notes thereto of the consolidated entity:
  - (i) give a true and fair view of the consolidated entity's financial position as at 30 June 2012 and its performance for the half year ended on that date; and
  - (ii) comply with International Financial Reporting Standards; and
  - (iii) the attached financial statements and notes thereto comply with the reporting requirements of the Australian Securities Exchange Listing Rules; and
- (b) in the opinion of the Directors, there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due or payable.

This declaration has been made after receiving unqualified declarations from the Managing Director and the Chief Financial Officer, that are consistent with requirements under section 295A of the Australian Corporations Act 2001, for the half year ended 30 June 2012.

Signed in accordance with a resolution of the Directors.

On behalf of the Directors

B. F. Howard

### **Independent Auditor's Review Report** to the members of Oil Search Limited

We have reviewed the accompanying half-year financial report of Oil Search Limited, which comprises the statement of financial position as at 30 June 2012, and the statement of comprehensive income, statement of cash flows, statement of changes in equity for the half-year ended on that date, selected explanatory notes and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the end of the half-year or from time to time during the half-year as set out on pages 7 to 19.

Directors' Responsibility for the Half-Year Financial Report

The directors of the company are responsible for the preparation and fair presentation of the half-year financial report in accordance with International Financial Reporting Standards (including the interpretations of the IFRS Interpretations Committee) and the *Companies Act* 1997. This responsibility includes establishing and maintaining internal control relevant to the preparation and fair presentation of the half-year financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

#### Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with International Standard on Review Engagements ISRE 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the Companies Act 1997 including: giving a true and fair view of the consolidated entity's financial position as at 30 June 2012 and its performance for the half-year ended on that date; and complying with International Accounting Standard IAS 34 Interim Financial Reporting and the Companies Act 1997. As the auditor of Oil Search Limited, ISRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Liability limited by a scheme approved under Professional Standards Legislation.

Member of Deloitte Touche Tohmatsu Limited.

### **Deloitte**

#### Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Oil Search Limited is not in accordance with the *Companies Act 1997*, including:

- (a) giving a true and fair view of the consolidated entity's financial position as at 30 June 2012 and of its performance for the half-year ended on that date; and
- (b) complying with International Accounting Standard IAS 34 *Interim Financial Reporting* and the *Companies Act 1997*.

#### Other Information

We have no interest in the company or any relationship other than that of the auditor of the company.

# OIL SEARCH LIMITED 2012 Interim Dividend and Dividend Reinvestment Plan

Oil Search Limited will pay an interim dividend of US\$0.02 (two US cents) per ordinary share on Monday, 8 October 2012.

The record date is Thursday, 13 September 2012 and the ordinary shares will trade exdividend from Friday, 7 September 2012.

The dividend will be paid in PNG Kina for those shareholders domiciled in Papua New Guinea, in GB Pounds for those shareholders that have lodged direct credit details requesting a GB Pounds credit and in Australian dollars for all other shareholders.

The exchange rates used for converting the US dollar dividend into the payment currencies will be the rates on the record date.

The dividend will be unfranked and no withholding tax will be deducted.

The Company also advises the continuation of its Dividend Reinvestment Plan (DRP) for eligible shareholders, currently being all shareholders with a registered address in Australia, Papua New Guinea, the United Kingdom, New Zealand, Hong Kong or Singapore. It is intended that the DRP will be fully underwritten for the 2012 interim dividend.

The specific terms of the DRP for the 2012 interim dividend will be as follows:

- The period for calculating the issue price of DRP shares will be the volume weighted average price (VWAP) over the period from and including Monday, 17 September 2012 to Friday, 28 September 2012;
- The price of shares issued under the DRP will be at a 2.0% discount to the VWAP;
- The issue price of the DRP shares will be announced on Tuesday, 2 October 2012;
   and
- The DRP shares will be issued on Monday, 8 October 2012.

Shareholders that have not elected to participate in the DRP, but wish to do so, must notify Oil Search's share registry, Computershare, by way of an election notice, of their intention to participate in the DRP before 5.00pm (AEST) on Thursday, 13 September 2012.

Yours faithfully OIL SEARCH LIMITED

**STEPHEN GARDINER** 

**Group Secretary**
