Ambertech Awarded Australian Broadcasting Commission ("ABC") Contract

The Board of Ambertech is delighted to advise investors that it has secured a contract with the ABC for the supply, integration and support of file based studio record and source ingest systems.

The contract was awarded after an extended evaluation process, and will result in the replacement of tape machines in the ABC's studio recording environment with disc-based recorders and a large central storage system.

Amber will be supplying products from several of their key suppliers, notably EVS, Snell, Telestream and Storage DNA.

The contract will provide revenue to Ambertech in excess of \$4 million and is expected to be completed during the 2012-13 financial year.
