ASX ANNOUNCEMENT –12 November 2012

Outage at Mount Isa Sulphuric Acid Plant

Incitec Pivot Limited (**ASX: IPL**) today announced that the Sulphuric Acid plant at Mount Isa, Queensland, suffered a failure of the Waste Heat Boiler on Friday, 9 November 2012.

Over the weekend, a physical assessment of the Waste Heat Boiler was undertaken. Following this, it is anticipated that the plant will remain offline for up to one month to allow repairs to be made.

The outage will reduce production of Sulphuric Acid from the Mount Isa plant, resulting in the Ammonium Phosphate plant at Phosphate Hill operating at reduced rates during this period.

The estimated impact is a reduction in the expected production of Ammonium Phosphates at that plant for the financial year ended 30 September 2013 to 900,000 tonnes.

If offline for a month, the financial implication of higher costs of sulphuric acid, repairs and under-absorption of fixed costs is estimated to be in the region of \$25 million before tax.
