E&A Limited Subsidiaries Secure Contracts

E&A Limited (EAL) is pleased to announce that its wholly owned subsidiary Blucher (Australia) Pty Ltd (Blucher) has been awarded an initial \$1.8 million contract to provide service piping to Laing O'Rourke on the APLNG waste water treatment plants for the Reedy Creek and Condabri sites.

Furthermore, Blucher has secured an additional \$1.2 million order to supply the offsite manufacture of pipe racking for these sites. Delivery of these projects is expected to be completed by July 2013 and will assist Blucher in delivering turnover and profitability growth in FY13 as previously advised to the market.

The Executive Chairman of EAL, Mr Young, advised that Blucher, together with other EAL operating subsidiaries, was excited to be increasing its involvement with the significant growth in South East Queensland LNG opportunities.

Mr Young was also pleased to announce that E&A Contractors and Ottoway Engineering, under the joint leadership of Chief Executive, Bryan Tidswell, had secured a \$3.2 million contract with Leightons to supply materials, fabrication, surface treatment and mechanical installation for the construction of a Permanent Build Products Berth associated with the Whyalla Port Expansion Project.

Fabrication work associated with the project is due to commence immediately, with contract completion expected by the end of May 2013.
