The Manager Company Announcements Platform Australian Stock Exchange Ltd

Ottoway Engineering Secures \$6.4M Pipeline Contract

E&A Limited (EAL) is pleased to announce that its wholly owned subsidiary Ottoway Engineering Pty Ltd (Ottoway) has been awarded a \$6.4 million contract to construct the Docklines Pipeline Project from a new Terminal being constructed at Pelican Point through to the Wharf at Outer Harbour, in the north-western suburbs of Adelaide.

The project consists of the construction of two (2) buried pipelines of approximately 2.6 kilometres each. Ottoway will be responsible for the delivery of the complete turn-key scope, including civil, welding and installation of the pipelines, installation of two (2) marine loading arms, testing and commissioning.

Works are planned to commence in January 2013 and continue through to the end of August 2013.

Bryan Tidswell, Chief Executive Officer of Ottoway Engineering, advised he is excited with the growth of Ottoway, with a number of keynote projects in the pipeline.

In order to support its growth, Ottoway has expanded its Adelaide based fabrication facilities by securing an additional 4,500sqm of fabrication capacity under the hook at 67 Plymouth Road, Wingfield. It is expected that Ottoway will be operating out of this facility by mid January 2013, along with maintaining its existing fabrication operations out of Duncan Court, Ottoway.

In addition, Mr Tidswell advised that Ottoway have secured a larger fabrication facility in Dalby, Queensland, that will double Ottoway's current capacity in that area and ensure it is well poised to capitalise on significant growth opportunities in South East Queensland.

Mr Tidswell said it is an exciting time for the EAL group of companies.
