MARKET OUTLOOK

Australian office markets

Relatively stable near term outlook

- Markets relatively well balanced due to low supply despite below average demand
- Anticipate recovery in demand from mid FY14 given impact of lower interest rates and improved white collar employment growth
- Vacancy in major markets not far from historic averages

MARKET OUTLOOK

Capital values to be supported by yield spreads

- Yield spreads are above average and demand is strong, putting downward pressure on cap rates for prime assets
- Values should increase provided fundamentals do not deteriorate
- Spreads between prime and secondary cap rates to persist in the short term

Pricing – wide cap rate spread over 10 yr bond

GLOSSARY

Distribution payout policy:	For FY12 the distribution paid was 70% of Funds From Operations (FFO). Commencing FY13 the distribution paid will be a range of between 70-80% of FFO.
Funds From Operations (FFO):	Funds From Operations (FFO) is often used as a measure of real estate operating performance after finance costs and taxes. DXS's FFO comprises profit/loss after tax attributable to stapled security holders measured under Australian Accounting Standards and adjusted for: property revaluations, impairments, derivative and FX mark-to-market impacts, amortisation of certain tenant incentives, gain/loss on sale of certain assets, straight-line rent adjustments, deferred tax expense/benefit and DEXUS RENTS Trust capital distribution.
Gearing:	Gearing is represented by Interest Bearing Liabilities (excluding deferred borrowing costs and including the fair value of cross currency swaps) less cash divided by Total Tangible Assets (excluding derivatives and deferred tax assets) less cash. Covenant gearing is the same definition but not adjusted for cash.
Non-cash items:	Includes property revaluations, impairment of goodwill, derivative MTM, gain on sale and deferred tax.
Operating EBIT:	Comprises net operating income, management EBIT and other income less Responsible Entity fees and other expenses paid.
Portfolio value:	Unless otherwise stated, portfolio value is represented by investment properties, development properties and investments accounted for using the equity method, and excludes cash and other assets.
Securities on issue:	FFO per security is based on the average weighted units on issue.
Weighted Average Lease Expiry (WALE):	A measure, in years, of the average term to expiry of in-place rent. Includes vacancies.
