DECMIL GROUP LIMITED FINALISES TERMS TO ACQUIRE EASTCOAST DEVELOPMENT ENGINEERING PTY LTD

Key points:

- **Brisbane-based oil & gas and resources focused piping, vessel and tank fabrication & installation business**
- **Strong growth potential, particularly in Queensland coal seam gas sector**
- **Proven and respected management team**

Leading design, civil engineering and construction company Decmil Group Limited (ASX: DCG) is pleased to announce it has agreed terms to acquire specialist engineering business, Eastcoast Development Engineering Pty Ltd (EDE).

Brisbane-based EDE services the energy and resource industry throughout Australia and in Pacific island nations. The company specialises in the fabrication and installation of high pressure pipes, vessels and tanks which are used for a range of applications in the oil and gas, mining and minerals, heavy industrial, water and power generation industries.

With current annual turnover in excess of \$80 million, EDE is experiencing significant growth in servicing the coal seam gas industry in Queensland. Decmil anticipates the price negotiated with EDE's shareholders will imply an acquisition multiple of less than 3 times FY13 EBITDA.

CEO Scott Criddle said: "This acquisition is very much in line with our strategy of diversifying our revenue base and earnings.

"We believe EDE will complement our existing offering, by allowing us to broaden the range of services we can offer our clients, particularly within the oil and gas sector."

The Company anticipates finalisation of the due diligence program in the first half of March 2013, which if satisfactory to Decmil, will lead to completion of the acquisition at that time. The acquisition will be funded from within DGL's existing financial resources.
