IMX Terminates Revolving Line of Credit

Perth, Australia: IMX Resources Limited (ASX: IXR, TSX: IXR, IXR.WT) ('IMX' or the 'Company') is pleased to announce that the Linq Resources Revolving Line of Credit (the '**Line of Credit**'), which was fully repaid by Termite Resources NL in December 2012, has now been terminated.

The Line of Credit was due to expire on 30 May 2013 but was fully repaid in December 2012, well short of the facility's term. The early repayment and termination of the Line of Credit reflects the strong positive cash flow generated by iron ore sales from the Cairn Hill Iron Ore Mine over the previous year and the significant reductions in operating costs and improvement in iron ore prices in the previous two quarters.

Neil Meadows, Managing Director of IMX said, *"The termination of the Line of Credit reflects the Company's reduced requirement for such a facility given the strong positive cash flows being generated by Cairn Hill. The Termite joint venture between IMX and Taifeng is now debt free."*

IMX and Taifeng enjoy a very positive and constructive joint venture partnership and we are both keen to see the proceeds of our hard work and success at Cairn Hill flow into creating even bigger opportunities for growth, particularly in our Tanzanian projects".

NEIL MEADOWS
Managing Director

About IMX Resources Limited

IMX Resources Limited is an Australian based mining and base and precious metals exploration company, listed on the Australian Securities Exchange ('ASX') and Toronto Stock Exchange ('TSX'), with exploration projects located in Australia, Africa and North America.

In Africa, IMX owns and operates the highly prospective Nachingwea Exploration Project in south-east Tanzania, which includes the potentially world-class Ntaka Hill Nickel Sulphide project. Nachingwea is highly prospective for nickel and copper sulphide, gold and graphite mineralisation. The Ntaka Hill Nickel Sulphide Project is one of the world's best undeveloped nickel sulphide projects and has the potential to produce a very clean, high quality premium nickel concentrate.

In Australia, IMX operates and owns 51% of the Cairn Hill Mining Operation, located 55 kilometres south-east of Coober Pedy in South Australia, where it produces a premium coarse-grained magnetite-copper-gold DSO product at a rate of 1.8Mtpa.

IMX is actively developing the Mt Woods Magnetite Project on the highly prospective Mt Woods Inlier in South Australia. IMX currently has a JORC Inferred Resource of 569Mt @ 27% Fe at the Snaefell Magnetite Deposit and a Global Exploration Target of between 200-380Mt @ 25-35% Fe elsewhere in the project. Studies indicate that coarse grained concentrates that could be produced at Snaefell have the potential to produce a direct sinter feed product which has the potential to attract a significant price premium.

IMX has a joint venture with OZ Minerals (the Mt Woods Copper-Gold Joint Venture Project) to explore the Mt Woods tenements for copper and gold. OZ Minerals is spending a minimum of \$20M for a 51% interest in the non-iron rights, with IMX retaining a 49% interest in the non-iron rights and 100% of the iron ore rights.

IMX owns 25.65% of Uranex (ASX: UNX), a dedicated uranium exploration company, which is developing the Mkuju Uranium project in southern Tanzania.

Cautionary Statement: The TSX does not accept responsibility for the adequacy or accuracy of this release. No stock exchange, securities commission or other regulatory authority has approved or disapproved the information contained herein.

Forward-looking Statements: This News Release includes certain "forward-looking statements". Forward-looking statements and forward-looking information are frequently characterised by words such as "plan," "expect," "project," "intend," "believe," "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may", "will" or "could" occur. All statements other than statements of historical fact included in this release are forward-looking statements or constitute forward-looking information. There can be no assurance that such information of statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such information. Important factors could cause actual results to differ materially from IMX's expectations.

These forward-looking statements are based on certain assumptions, the opinions and estimates of management and qualified persons at the date the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements or information. Such factors include fluctuating metal prices, uncertainty in equity markets and other factors. Mineral resources that are not mineral reserves do not have demonstrated economic viability.

IMX undertakes no obligation to update forward-looking statements or information if circumstances should change. The reader is cautioned not to place undue reliance on forward-looking statements or information. Readers are also cautioned to review the risk factors identified by IMX in its regulatory filings made from time to time with the ASX, TSX and applicable Canadian securities regulators.
