The Manager  
ASX Market Announcements  
Australian Securities Exchange Limited  
Exchange Centre  
20 Bridge Street  
SYDNEY NSW 2000

Dear Sir/Madam

We attach the 2012 Adelaide Brighton Ltd Annual Report which will be dispatched to shareholders today.

Yours faithfully

**Marcus Clayton**  
Company Secretary

## Adelaide Brighton Limited Profile

Adelaide Brighton is a leading integrated construction materials and industrial lime producer which supplies a range of products into building, construction, infrastructure and mineral processing markets throughout Australia. The Company's principal activities include the production, importation, distribution and marketing of clinker, cement, industrial lime, premixed concrete, construction aggregates and concrete products. Adelaide Brighton originated in 1882 and is now an S&P/ASX100 company with 1,600 employees and operations in all Australian states and territories.

**Cement** Adelaide Brighton is the second largest supplier of cement and clinker products in Australia with major production facilities and market leading positions in the resource rich states of South Australia and Western Australia. It is also market leader in the Northern Territory. In addition to domestic production, the Company is the largest importer of cement, clinker and slag into Australia with an unmatched supply network that enables efficient access to every mainland capital city market. This network includes significant distribution joint ventures in Victoria and Queensland.

**Industrial Lime** Adelaide Brighton is the largest producer of industrial lime in Australia, with production assets in Western Australia and South Australia. Industrial lime is an important product for the mineral processing industry in resources rich markets, particularly for the production of alumina and gold, of which Australia is a leading producer.

**Concrete and Aggregates** Adelaide Brighton has a growing presence in the premixed concrete and aggregates industry in the eastern states of Australia, augmented by joint venture operations. It has strategic aggregates reserves west of Sydney, in regional New South Wales, south east Queensland and regional Victoria through its wholly owned and joint venture operations.

**Concrete Products** Adelaide Brighton holds the leading position in the Australian masonry products market, with operations in Queensland, New South Wales, Victoria, Tasmania and South Australia.

**Joint ventures and associates** Adelaide Brighton has a number of significant investments in joint ventures and associates in construction materials production and distribution. These include major cement distribution joint ventures in Queensland (Sunstate Cement), Victoria (Independent Cement and Lime) and New South Wales; regional concrete and aggregates positions in Victoria, Queensland and New South Wales; and a 30% investment in a Malaysian white cement and clinker producer (Aalborg Portland Malaysia), which supplies the Australian market.

**Sustainability** Adelaide Brighton's commitment to sustainable development is demonstrated through a range of actions implemented across a balanced program of initiatives. Adelaide Brighton believes that setting and achieving sustainability objectives throughout the organisation assists long term competitive business performance.

## Highlights and financial summary

Revenue of \$1,176.2 million - a 6.9% increase over the previous corresponding period (pcp)

Earnings before interest, tax, depreciation and amortisation of \$290.8 million - a 3.4% increase over pcp

Earnings before interest and tax of \$225.6 million - a 1.0% increase over pcp

Profit before tax of \$209.2 million - a 1.4% increase over pcp

Net profit attributable to members of \$154.2 million - an increase of 3.9% over pcp

Earnings per share increased by 3.9% to 24.2 cents (vs 23.3 cents pcp)

Final dividend of 9.0 cents per share, franked to 100%, in addition to the interim dividend of 7.5 cents per share, franked to 100%. Dividends for the full year of 16.5 cents per share (fully franked) versus 16.5 cents per share (fully franked) in the prior year

Cash flow from operations increased by \$35.2 million to \$186.5 million

Gearing<sup>1</sup> increased to 31.0% (vs 26.0% pcp) due to higher levels of capital expenditure

Interest cover improved to 13.8 times EBIT (vs 13.1 times EBIT pcp)

Adelaide Brighton's strategy has delivered consistent growth in shareholder returns with the Company ranked number one in total shareholder return versus companies in the S&P/ASX 200 index from 1 January 2001 to 31 December 2012.

**Year in review**

I am pleased to report that Adelaide Brighton achieved a record net profit after tax (NPAT) of \$154.1 million for the year to 31 December 2012, an increase of 3.8% compared to 2011. This result was achieved on record revenue of \$1,176.2 million, up 6.9% on the previous year.

The Board sees this as a good result considering weak demand in the building and construction sector, particularly on the east coast of Australia. Our earnings growth reflects the benefits of geographic and product diversification. Weakness in east coast construction has been balanced by healthier demand in the infrastructure and resource sectors in the central and western parts of the country, where your Company has market leading positions.

Total fully franked dividends declared for 2012 were 16.5 cents per share and ordinary dividends remain at historically high levels. Your Board again elected not to pay special dividends in 2012 given the significant capital investment program currently in train. The \$175 million we have invested in growth projects in the last two years underpins our long term competitive position and shareholder returns.

The balance sheet is healthy and this provides capacity to continue our well-established strategy of pursuing value enhancing bolt-on acquisitions and investments in our core businesses.

In 2012, Adelaide Brighton was included in the S&P ASX 100 Index, reflecting consistent strong growth in shareholder returns relative to the Australian market over the last decade.

**Strategy**

For more than a decade Adelaide Brighton has implemented a focused and effective strategy that has delivered market leading shareholder returns. This strategy has had three key areas of focus:

- > Continual operational improvement - in 2012, we delivered operating cost savings of \$8.5 million. The Company also made significant investments to improve the operational performance of our cement and clinker facilities.
- > Development of the lime business - we have made significant investments in upgrading the capacity and environmental performance of the lime business in Western Australia to meet demand growth from the resources sector.
- > Vertical integration - we continue to evaluate acquisition opportunities in downstream operations with a particular focus on construction aggregates. In 2012, our recent acquisitions were fully integrated and we further enhanced the highly strategic position of the Hartley quarry in New South Wales.

**Board**

Chris Harris retired from the Board in May 2012 following 16 years service as a Director with the Company, the last two years as Chairman. I would like to thank Mr Harris for his long and dedicated service and acknowledge the extensive contribution he made to Adelaide Brighton's proven corporate strategy, evidenced in part by the achievement of consistent growth in long term shareholder returns.

Directors continue to monitor and evaluate the composition of the Board to ensure the appropriate balance and range of experience and skills. The Board holds meetings at a range of Company sites across Australia in order to provide Directors with exposure to the diversity of the Group's operations and geographic spread.

**Governance**

The Board is committed to conducting business ethically and in accordance with high standards of corporate governance. Adelaide Brighton believes its policies and practices are consistent with good corporate governance appropriate for its current circumstances, including the ASX Corporate Governance Council Principles and Recommendations.

The Board has proactively engaged with key stakeholders in order to ensure remuneration policies are transparent and appropriate to maximise long term growth in shareholder returns. The Nomination and Remuneration committee of the Board engaged a consulting firm to advise on remuneration to ensure best practice and legal requirements are met.

**Sustainability and the environment**

Adelaide Brighton is committed to the sustainable operation of its business and minimising the environmental footprint of its operations.

We report key measures of sustainability to stakeholders each year and are subject to various Commonwealth, State and Territory laws concerning the environmental performance of our operations. We monitor environmental performance by site and business division, and performance is reviewed by senior management, the Board's Safety, Health & Environment Committee, and the Board.

Excellent progress has been made with regard to environmental compliance, with the completion of the Munster kiln 6 upgrade reducing particle emissions from the site. Compliance will be further enhanced as the upgrade to kiln 5 is completed later this year.

Les Hosking

**TSR ranking Adelaide Brighton vs companies in the S&P/ASX200**

1 Jan 2001 to 31 Dec 2012

Adelaide Brighton takes a proactive approach to community engagement through liaison groups and consultation with local community, government and regulatory authorities at sites where our operations have potential to impact the adjacent community. Development plans for the site, compliance with operating conditions and complaints are discussed in a co-operative effort to manage stakeholder expectations.

The introduction of a price on carbon by the Federal government in mid 2012 reinforces our commitment to reducing the carbon footprint through the use of alternate fuels, operational efficiency improvements and product development.

The Company was selected by the Department of Climate Change and Energy Efficiency to be part of its 2012 audit program for compliance with the National Greenhouse Energy Reporting (NGER). The Company's NGER report was audited by a party selected by the Department and an unqualified audit opinion was issued.

## **Risk Management**

Adelaide Brighton's risk management framework is a key factor in the Group's profitability performance. The Audit, Risk and Compliance committee of the Board oversees the Company's risk management framework encapsulating financial, operating, regulatory and environmental risks. These risks are reviewed and mitigation strategies modified on a regular basis to ensure that changes in risk are reflected appropriately.

## **People**

On behalf of your Directors, I would like to acknowledge the hard work and commitment of all employees over the past year. Additionally I would like to thank our Managing Director, Mark Chellew, for his dedication and strong leadership. I thank our customers and shareholders for their continuing loyalty and support.

Our Munster plant at Western Australia has supplied cement for the Fiona Stanley Hospital, Western Australia's flagship health facility and major tertiary hospital

A

delade Brighton's record net profit and revenue for 2012 reflects the benefits of our geographic and product diversification.

**Performance**

Adelaide Brighton's cement and lime exposure to resources and infrastructure helped to deliver a record net profit result despite residential and commercial building activity remaining weak, reflecting the benefits of geographic and product diversification.

Revenue of \$1,176.2 million was up 6.9% on 2011, supported by demand from resources and project work in Western Australia, South Australia and the Northern Territory. Building demand across the eastern states of Australia remained subdued and wet weather further impacted trading.

Earnings before interest and tax (EBIT) increased 1.0% to \$225.6 million. Volumes and prices increased in both cement and lime but much of this benefit was eroded by higher costs. Energy costs increased 8% from 2011, including the \$3 million after tax impact of the carbon tax.

Across our operations, energy costs are increasing much faster than inflation while the strong Australian dollar and subdued building demand have limited price increases to recover these costs. Operating cost savings of \$8.5 million only partially offset rising costs.

Cement margins declined slightly as a result of cost increases and production issues at Birkenhead in South Australia, which are now resolved, reducing EBIT by \$6 million in the second half.

The lime business enjoyed sales growth of more than 5%, supported by demand from alumina and gold producers, and the restart of a customer in the Northern Territory. Margins also increased in lime, supporting the recent and on-going significant investment in the business to improve capacity and environmental performance.

The pre-mixed concrete, aggregates and masonry businesses were impacted in 2012 by weak residential and commercial building activity on the east coast of Australia as well as cost pressures.

In addition to domestic production, Adelaide Brighton is Australia's largest importer of cementitious materials (cement, clinker and blast furnace slag) utilising more than 1.6 million tonnes of imported product in 2012 through its national distribution network. The level of imports is expected to grow in the medium-term due to demand growth and capacity rationalisation.

Adelaide Brighton's joint ventures and associates generally reported lower earnings in 2012 as a result of demand weakness and pricing pressure in the Queensland, New South Wales and Victorian construction markets.

The 2012 Group result included the non-taxable gain of \$7.6 million relating to fair value accounting adjustments of acquisitions undertaken in 2011, \$3.2 million in redundancy costs and a \$1.7 million non-taxable gain on the recently acquired stake in Aalborg Portland Malaysia Sdn. Bhd.

**Strategy**

Adelaide Brighton's strategy to grow shareholder returns over the last decade has been to focus on growing the lime business, operational improvement and investment in downstream activities. During 2012, we made significant progress on a number of strategic initiatives that are expected to support medium-term and long term returns.

Adelaide Brighton has substantially completed a \$119 million capital expenditure program to improve efficiency and sustainability in the cement and lime business. These projects included upgrades to the Munster plant in Western Australia, the Birkenhead plant in South Australia and the Darwin cement milling operation.

The upgrade to kiln 6 at Munster was completed during 2012 and, in addition to providing an improvement in environmental performance at the site, will expand annual lime production capacity by approximately 100,000 tonnes. This expansion of production capacity positions us to meet the growth in demand for lime in Western Australia by the mining and resource sectors.

The Company also signed major contracts with cement customers in Victoria, South Australia and Western Australia that underpin the utilisation and efficiency of the production and distribution network.

In addition, during the year we secured long term supply of imported clinker from Japanese producers at competitive prices. As demand grows to outstrip domestic production these contracts are expected to underpin our competitive position.

Adelaide Brighton made an important investment in a Malaysian white cement producer Aalborg Portland Malaysia in 2012, to secure product supply and potentially facilitate further rationalisation of our operations.

The Company has made progress on the development of surplus land released through the rationalisation program, such as depleted quarries. We have previously identified \$100 million in potential land sales over the next decade.

## Our people

The record profit for the year reflects the commitment and skills of our employees. I would like to thank our highly enthusiastic work force for their effort throughout the year.

In 2012, we rolled out a new Health, Safety and Environment management system to further support performance in this area. A consistent focus on safety over a number of years has resulted in lower incident rates, a positive trend that we will work to maintain.

## Outlook

Adelaide Brighton's strong cash flow and balance sheet, reflected in 31% net debt to equity, provides capacity to continue the well-established strategy of investing in capacity and efficiency in cement and lime as well as sensible downstream integration.

Demand for cement in 2013 is expected to be marginally lower than 2012 levels. Demand from projects in South Australia, Western Australia and the Northern Territory is likely to partially offset weakness in the residential and non-residential sectors.

The efficient operation of key cement assets and commissioning of capital upgrades and enhancements, in particular at Birkenhead in South Australia, will be a particular focus to support margins in the current financial year.

Lime sales volumes are expected to be marginally higher in 2013 given demand from the resources sector. However, the threat of small scale lime imports in Western Australia and the Northern Territory remains. The completion of the new Munster kiln 5 bag house in Western Australia remains an operational priority in 2013.

Management will pursue efficiency in masonry, pre-mixed concrete and aggregates, where demand growth remains subdued. The operations are positioning for any emergent cyclical recovery in housing and non-residential building activity. Further improvements in concrete and aggregate prices are expected.

The strong Australian dollar, competitive pressures and the threat of imports in some markets may limit the scope for price rises to recover expected cost increases.

The carbon tax is anticipated to reduce 2013 net profit after tax by approximately \$6 million before mitigation. Adelaide Brighton expects to significantly mitigate the impact of the carbon tax over the next five years by enhancing import flexibility, and thereby reducing reliance on domestic manufacture, and through the increase in the use of alternative fuels and cementitious substitutes.

# Significant investment in growth projects over the past two years has positioned Adelaide Brighton to continue to grow shareholder value.

## Sales and profits

In 2012, revenue of \$1,176.2 million increased 6.9%, supported by increased demand from resources and project work in South Australia, Western Australia and the Northern Territory. Revenue increased notwithstanding general weakness in both the residential and non-residential building sectors and adverse weather in some regions. Higher operating costs and a reduction in contribution from joint ventures reduced margins at the group level, restricting EBIT growth to just 1% despite strong sales growth. Net profit after tax (NPAT) increased by 3.8% to a record \$154.1 million.

Cost increases were experienced across most inputs but in particular, energy costs rose by 8%, including the \$3 million after tax cost of the carbon tax since its introduction in 1 July 2012. The loss of production at the Birkenhead plant in South Australia reduced EBIT by \$6 million. Other items included in the 2012 result were an accounting gain on a prior year acquisition of \$7.6 million and the recognition of tax losses in the recently acquired interest in Aalborg Portland Malaysia Sdn. Bhd. (APM) of \$1.7 million.

## EBIT margin

In 2012, group EBIT margin declined from 20.3% to 19.2%.

Lime margins improved due to price increases to a major customer and an increase in sales volumes of greater than 5%.

Cement margins were constrained due to increased energy and carbon costs, reduced clinker production at the Birkenhead plant and an increase in lower margin transport revenue as sales to projects in remote areas increased.

Group margins were also negatively impacted by a decline in the contribution from joint ventures due to market weakness in Victoria and south east Queensland.

Cost saving initiatives delivered benefits of \$8.5 million during the year. Savings were achieved through the management of energy costs, the use of cement substitutes and labour reductions.

## Shareholder returns

A final ordinary dividend for 2012 of 9.0 cents per share, franked to 100%, was declared. This followed an interim ordinary dividend of 7.5 cents per share declared in August 2012. The total full year dividend was 16.5 cents, fully franked. This was in line with the dividends declared in 2011 and reflects a payout ratio of 68.2%, within the Board's target payout range of 65% to 75% of net profit.

In 2012, EBIT return on funds employed was 18.0%, a decrease from 19.4% in 2011. This decline reflects the Company's significant capital expenditure in the last two years, the benefits of which are only beginning to be realised. Despite the decline, the group's rate of return remains ahead of its cost of capital.

Adelaide Brighton has maintained strong total shareholder return (capital appreciation plus dividends) over the last decade compared to its peer group. This consistent long term performance has led to the Company moving in 2012 into the S&P ASX 100 Index for the first time.

Michael Kelly  
Chief Financial Officer

Birkenhead plant in South Australia aerial footprint

### Cash flow

In 2012, cash flow from operating activities increased by \$35.2 million to \$186.5 million due to effective management of working capital and a reduction in income tax payments. Income tax payments in 2011 were higher than normal as a result of a catch up in tax instalments for prior years.

Group inventory was higher as a result of an increase in safety stock of critical materials and the introduction of new materials due to an expansion of the use of blast steel furnace slag. Overall, debtors value was in line with the prior year, though this was an improvement on 2011 when measured in debtors days.

Total capital expenditure increased by \$10.4 million to \$149.3 million in 2012. Expenditure on development projects and the acquisition of a minority share in APM totalled \$90.6 million. Stay in business expenditure of \$58.7 million represents 90% of depreciation and amortisation.

### Borrowings

Net debt increased by \$63.9 million to \$312.3 million, bringing net debt to equity gearing to 31.0%. This remains at the lower end of the Board's target range of 25% to 45% net debt to equity.

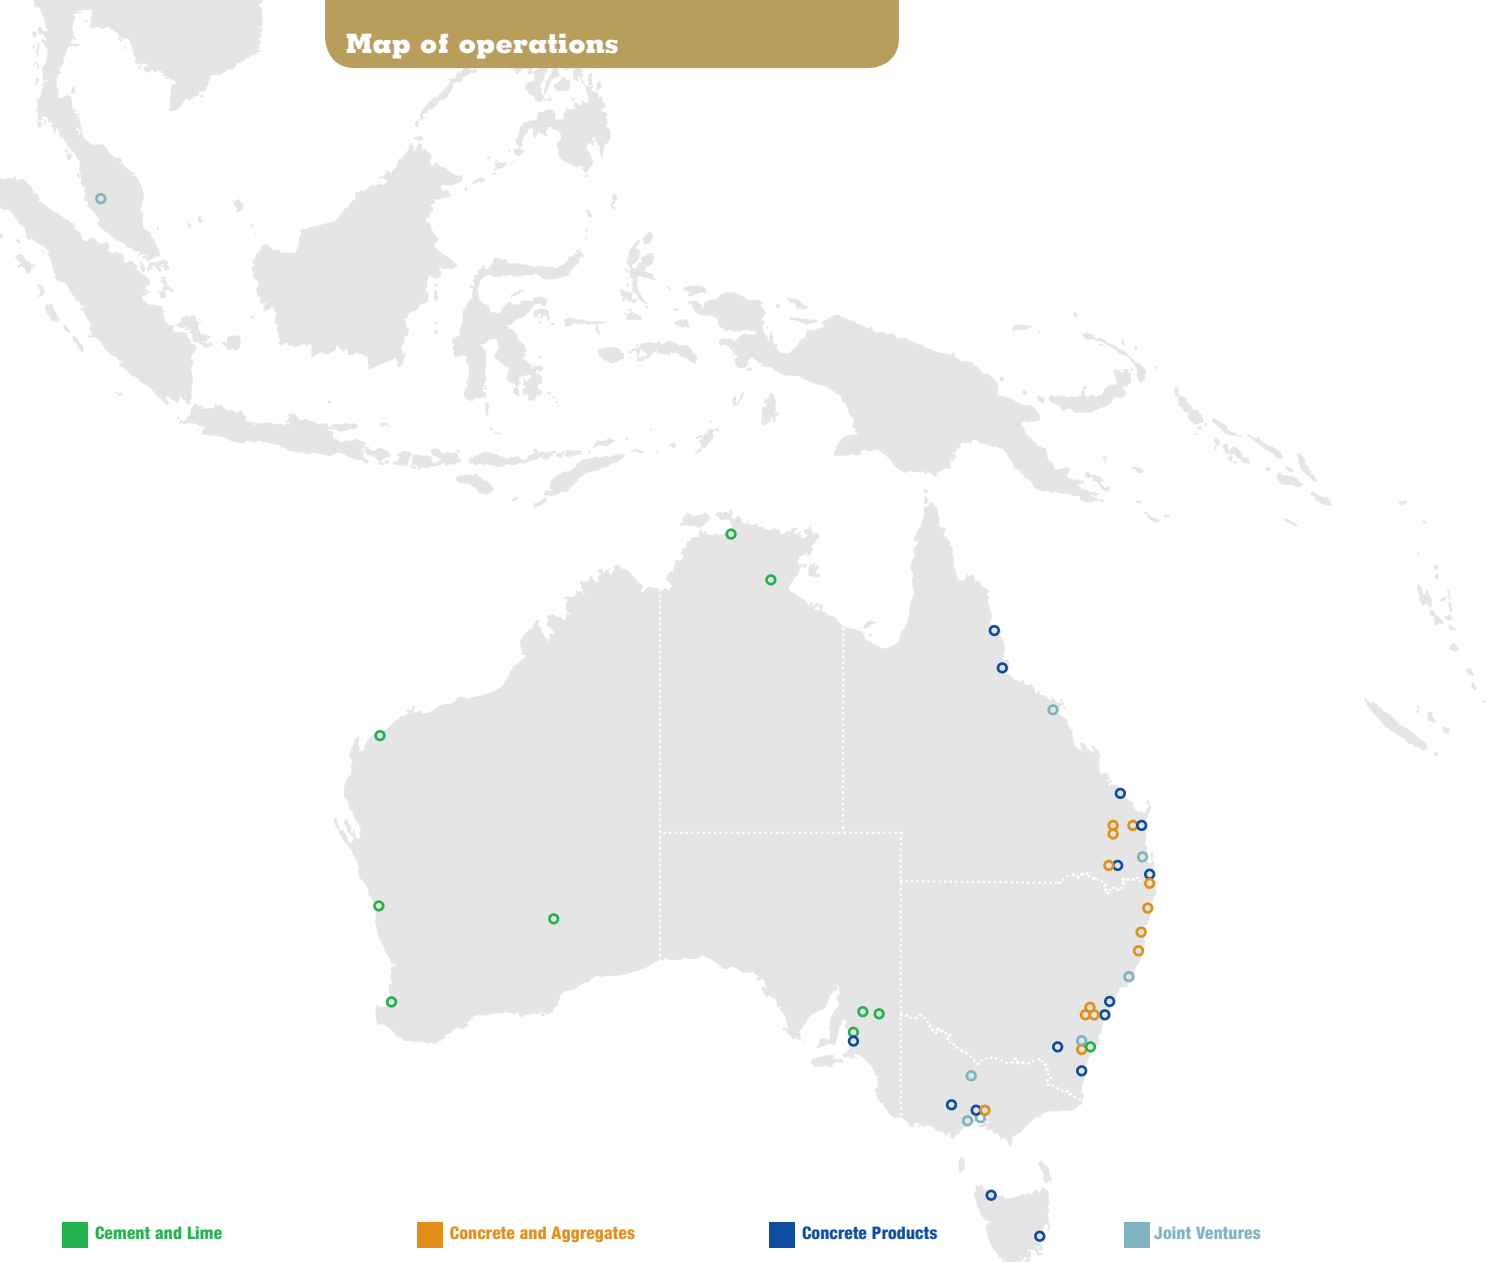

The Company has significant unused credit facilities. Total credit facilities of \$500 million have the following maturity profile: \$200 million maturing 1 July 2013; \$140 million maturing 1 July 2014; and \$160 million maturing 1 July 2015.

Preliminary discussions regarding the refinancing of facilities maturing on 1 July 2013 have commenced. The Company expects to successfully conclude these discussions during the first half of 2013.

### Interest and taxation

Net finance costs of \$16.4 million were \$0.6 million lower than 2011. Capitalised interest on the capital expenditure program was \$2.4 million. Average interest rates were lower than the corresponding period but inclusive of capitalised interest, interest paid increased broadly in line with average debt levels.

Tax expense of \$55.1 million decreased by \$2.9 million from 2011. The non-taxable gain on acquisition of \$7.6 million has led to a lower than expected effective tax rate of 26.3%, a decrease from 28.1% in 2011. The tax rate is expected to revert to a range of 27% to 28% in 2013.

# Review of operations

Adelaide Brighton supplies the Australian infrastructure, building and resources industries. The Company has market leading positions in cement and clinker, lime and concrete masonry and is an emerging force in pre-mixed concrete and aggregates. Adelaide Brighton is the largest importer of cementitious materials into Australia and through its efficient import supply chain has access to every mainland capital city market. Significant progress was made on the Company's investment program and important customer and supplier contracts that underpin the utilisation and efficiency of our production and distribution network were finalised.

**S**trong demand from mining, resources and infrastructure in Western Australia, South Australia and Northern Territory offset weakness in residential and commercial building.

Overall cement volumes increased marginally in 2012. Cement and clinker sales to Victoria and Queensland declined as a result of subdued market conditions. However, sales increased in South Australia, Western Australia and the Northern Territory.

Average cement selling prices increased slightly more than inflation with the strong Australian dollar and mixed demand restricting domestic price growth. Cement margins declined due to an 8% increase in energy costs including the impact of the carbon tax. Adelaide Brighton employs a number of strategies to mitigate rising energy costs including fixed price energy contracts for a portion of energy requirements, the use of alternative fuels and continual review for operational improvements.

Cement margins were also impacted by a reduction in clinker production of approximately 80,000 tonnes at the Birkenhead plant in South Australia, which resulted in a longer than anticipated maintenance shutdown period in August and September. The reliability issue has been resolved but the incident lowered pre-tax profit by approximately \$6 million.

The \$60 million upgrade and expansion of the Birkenhead (South Australia) site is nearing completion. The upgrade consists of increasing cement milling capacity by 750,000 tonnes per annum, upgrading of ship loading facilities, and installing facilities to process slag. This expansion will reduce the Group's reliance on imported cement and the upgrade to the ship loading facilities will bring environmental benefits through improved dust collection.

Lime sales volume increased by more than 5% in 2012 due to robust demand from the alumina and gold sectors. Margins improved due to price increases and efficiency improvements to alleviate the impact of rising input costs. Production and distribution costs remain competitive against imported product despite the high Australian dollar.

The upgrade of kiln 6 at the Munster (Western Australia) lime facility was successfully commissioned in 2012. The \$34 million investment consists of a new cooler bag house and replacing the electrostatic precipitator with a heat exchanger and bag filter. This is anticipated to improve the environmental performance of the facility through reduction in dust and odour emissions and increase lime production capacity by 100,000 tonnes per annum. Since commissioning, the upgraded plant has performed ahead of expectations.

As part of the renewal of the EPA licence for the site in 2012, the Group is required to install a bag house filter on the second Munster lime kiln (kiln 5) by 30 June 2013. The \$18 million project is well advanced and will further reduce emissions at the site.

As well as being a major domestic manufacturer of cement, clinker and lime, Adelaide Brighton is also Australia's largest importer of cementitious materials (cement, clinker and blast furnace slag), utilising more than 1.6 million tonnes of imported product in 2012. This industry leading position supports the supply chain efficiency in procurement, transport, storage and distribution. The use of imported materials allows us to supply customers with competitively priced product into a range of markets where demand exceeds the Company's manufacturing capacity.

In support of an efficient import operation, Adelaide Brighton entered into two clinker supply agreements with Japanese suppliers which underpin the long term position. These agreements secure a significant part of long term requirements from Japanese suppliers, with terms of seven and 10 years. The contracts represent the continuation of existing strong relationships, as well as a move to diversify the supply base, while at the same time reducing exposure to fluctuations in the exchange rate.

As part of the recent acquisition of a 30% stake in Aalborg Portland Malaysia (APM), an agreement with APM was executed for the supply of white clinker from Malaysia to Adelaide Brighton for a term of 10 years from 2015.

The Company executed major customer agreements during the year which support the utilisation of key manufacturing and distribution assets.

Adelaide Brighton reached agreement with a major cement customer in Western Australia and South Australia for the supply of cement through to 31 December 2014.

In December 2012, a contract was executed with Independent Cement and Lime (ICL) for the continuation of its exclusive supply arrangements for a period of 10 years from 1 January 2013. The supply arrangements appoint ICL as the exclusive distributor in Victoria and New South Wales for Adelaide Brighton.

Martin Brydon  
Executive General Manager  
Cement and Lime

**Adelaide Brighton cement ground**

**Adelaide Brighton lime production**

Aggregates demand supported by infrastructure projects but pre-mixed concrete volumes have been affected by weak residential and commercial building.

Concrete volumes were negatively impacted by adverse weather in the first half of the year and weak demand in the eastern states as the residential, commercial and industrial construction sectors continued to contract.

After adjusting for the inclusion of previously unreported concrete producers by the Australian Bureau of Statistics, Adelaide Brighton estimates that the market for concrete in the eastern states declined by 1.4% in 2012 compared to 2011. Earnings have been under pressure as a result of these factors. Despite the difficult operating environment, price rises were achieved for concrete in 2012 and further increases will come into effect in 2013.

Aggregate volumes increased as a result of project work associated with the Pacific Highway upgrade and the full year benefit from acquisitions in 2011. These offset overall market weakness and the impact of wet weather.

Average selling prices also improved over the prior year. Earnings improved compared to 2011 due to the higher volumes and prices, combined with the benefit from operational improvement projects.

The Company received an extension of the operating approvals for the Austen Quarry, located to the west of Sydney. This site represents an important long term source of aggregates for the Sydney market.

Integration of the businesses acquired in 2011 has been completed. We continued our operational improvement program, with a focus on matching our capacity to demand. Capital programs have also been adjusted to the lower demand environment to improve the cash flow generated from operations.

Austen Quarry at Hartley  
in New South Wales

Concrete Products revenue increased 2.9% despite soft market demand across the eastern states.

Adelaide Brighton is Australia's largest manufacturer of concrete masonry products, servicing key eastern seaboard building and construction markets. Market conditions remain difficult across the eastern states, with depressed demand from the residential and commercial sectors. Adverse weather also affected demand during the first half of the year. Demand has generally been weak and competition intense.

Despite these factors, the division increased revenue by 2.9% due to increased selling prices and localised project work. While profits declined from \$1.8 million in 2011 to \$0.4 million in 2012, the Company is well placed for a recovery in the market, although this is not expected in the near term.

Further rationalisation of the production footprint resulted in the mothballing of some manufacturing capacity to align with demand. In addition, restructuring of the workforce has led to an improvement in efficiency and improving the flexibility of the business to interact with changes in customer demand. The restructuring resulted in redundancy costs during the year and the full benefits from the lower cost base will be realised from 2013.

Customer orientated product development and use of alternate raw materials has provided Adelaide Brighton with a superior range of products. The growth in higher end masonry products continues, increasing the utilisation of our specialist equipment at the Stapylton plant in Queensland. This part of the market is expected to grow at a higher rate as overall demand recovers.

Steve Rogers

MASONRY

Adbri Masonry product display at the Ottoway plant in South Australia

A selection of Adbri Masonry concrete masonry products

**A**delaide Brighton's joint ventures form an integral part of the unmatched distribution network.

**Sunstate Cement (50%)**

*Sunstate Cement Limited is a joint venture between Adelaide Brighton and Boral Cement with a cement milling, storage and distribution facility at Fisherman Islands, Port Brisbane. Sunstate Cement is supplied with seaborne supply of clinker from the Adelaide Brighton Birkenhead and Angaston plants and imports from Asia. Sunstate Cement is a leading supplier to Queensland's construction industry.*

Continued weakness in the south east Queensland market and a reduction in purchases by its largest customer resulted in a decline in earnings in the year.

**Independent Cement and Lime Pty Ltd (ICL) (50%)**

*Independent Cement and Lime Pty Ltd (ICL), a joint venture between Adelaide Brighton and Barro Group Pty Ltd, is a specialist supplier of cement, cement blended products, and agricultural lime to a wide variety of industries, major retail outlets, and agricultural markets throughout Victoria and New South Wales.*

Earnings from ICL declined as the completion of a number of major projects and a softening in the residential market resulted in lower volumes. Competitive pressures restricted inflationary cost recovery price increases.

**Mawson Group (50%)**

*Mawson Group (Mawsons) is a joint venture between Adelaide Brighton and BA Mawson Pty Ltd. Mawsons is the largest premixed concrete and quarry operator in northern regional Victoria. Mawsons also operate in southern regional New South Wales and holds leading market positions in markets served.*

Volume declined as demand returned to normal levels following the finalisation of flood reconstruction work. This reduced earnings from the joint venture.

**Batesford Quarry (50%)**

*Batesford Quarry is an unincorporated joint venture between Adelaide Brighton, E&P Partners and Geelong Lime Pty Ltd. Batesford Quarry, situated at Fyansford Quarry near Geelong in Victoria, undertakes quarrying and manufacturing, marketing and distribution of various limestone and quarry products.*

Batesford Quarry earnings improved as volumes increased following the weather impacted result in the prior year.

**Burrell Mining Services (50%)**

*Burrell Mining Services is an unincorporated joint venture between Adelaide Brighton and Burrell Mining Products. With operations in New South Wales and Queensland, Burrell Mining Services manufactures a range of concrete products exclusively for the coal mining industry.*

Earnings from Burrell Mining were broadly in line with the prior year, as demand from the coal industry remained robust despite adverse weather.

**Aalborg Portland Malaysia Sdn. Bhd. (APM) (30%)**

*Aalborg Portland Malaysia Sdn. Bhd. is an integrated white clinker and white cement producer situated in Ipoh, on the west coast of the Malaysian Peninsula. It comprises a 180,000 tonne capacity per annum kiln, a circa 200,000 tonne capacity per annum grinding mill and a packaging plant. Adelaide Brighton has a 30% stake in APM, with the remaining 70% held by Aalborg Portland A/S, a wholly owned subsidiary of Cementir Holding SpA of Italy.*

Earnings from APM were positively impacted by the recognition of tax losses following the approval of the expansion of clinker capacity from 180,000 tonnes to 330,000 tonnes per annum.

Independent Cement and Lime Pty. Ltd.

# Sustainability

Adelaide Brighton recognises that the implementation of its strategy and the long term success of its business requires a commitment to managing the impact of its activities on the social, environmental and economic environments within which it operates. Opportunities for improvement are continually being sought through the detailed analysis of business unit activities and active consideration of the needs of stakeholders.

## Scope of this report

This Sustainability Report should be read in conjunction with other sections of this Annual Report and its financial statements. The Directors' Report, Corporate Governance Statement and reports on Remuneration and People, Health and Safety all contain information relevant to the sustainability performance of the Group.

The Adelaide Brighton Group includes Adelaide Brighton Limited and the entities it controls (the Group), as well as a number of joint ventures. This report excludes information about the joint ventures as the Group does not control their operations.

While the Group's financial year ends on 31 December, some statutory sustainability reporting requires information to be provided for the year to 30 June. So that statistical and graphical sustainability data provided here can be compared with other publicly available information, some of this is shown for the year ended 30 June 2012.

In developing this report, the following resources have been considered:

- > The Global Reporting Initiative *G3.1 Sustainability Reporting Guidelines*.
- > *ESG Reporting Guide for Australian Companies* prepared by the Australian Council of Superannuation Investors and the Financial Services Council.
- > The *Cement Sustainability Initiative* of the World Business Council for Sustainable Development
- > Relevant industry practice.
- > Energy and greenhouse gas emissions information complies with the definitions and boundaries contained in the National Greenhouse and Energy Reporting Act.

The Board oversees and approves the Company's sustainability framework key performance indicators and the scope of this report. The key performance indicators listed adjacent have been assessed to be the Group's material sustainability performance indicators.

For further information about the sustainability report email [adelaidebrighton@adbri.com.au](mailto:adelaidebrighton@adbri.com.au) or telephone (08) 8223 8005.

The Group has facilities in all states and territories of Australia and many operate in or near local communities or sensitive areas of the natural environment. Ensuring these operations minimise any negative impact on the environment is a key priority. Our manufacturing sites always aim to meet or exceed mandatory compliance standards, as well as internal performance targets.

The operating environment for the Group continues to become more demanding with regard to sustainable performance.

### Carbon emissions

Of all the products manufactured by Adelaide Brighton, clinker, cement and lime are the most emissions-intensive (refer to chart *Source of greenhouse gas emissions in a cement plant*).

Carbon emissions are generated in the manufacture of these products in three main ways:

- > Process emissions - about half are generated via the chemical reaction that occurs when raw materials are converted into products eg the conversion of limestone to calcium oxide;
- > Fuel - about 35% results from the use of fuel that is required to generate heat to initiate this chemical reaction; and
- > Other energy usage - about 15% relates to indirect emissions, mainly electricity which is used to grind raw materials and intermediate products.

Adelaide Brighton acknowledges the need to address the issue of carbon emissions. However, the implementation of a carbon tax in Australia - without similar action being taken by our major trading partners - reduces the ability of the local industry to compete in the global market.

Rising energy costs and the carbon tax have had a direct impact on the financial performance of the Group, as our cement and lime manufacturing facilities are subject to the Clean Energy legislation.

Adelaide Brighton has implemented, and continues to develop, a number of strategies to reduce its overall emissions, particularly across the Cement and Lime Division. Core strategies involve the use of alternative fuels and raw materials.

### Alternative fuels

Historically, the primary energy source for the cement and lime industry has been fossil fuels, typically natural gas and coal. The combustion of these energy sources depletes a finite resource and produces greenhouse gases that contribute to global warming.

Cement and Lime's alternative fuels program seeks to source and use suitable by-products from other industries as energy sources for kilns. Suitable fuels are carefully selected for quality, quantity, cost and consistency of supply. It is vital that they can be incorporated into the production process without affecting the plant's performance, maintain the quality of the end product and comply with operating licence conditions.

As part of utilising a new alternative fuel, a testing program is implemented at each site to prove environmental emissions calculations. Assessment reports from each trial are reviewed by state authorities and the results are discussed with the local community before any new fuel is approved for regular use. The refinement of fuels and processes is ongoing, to maximise energy efficiency.

The majority of our cement and lime kilns use alternative fuels as a partial replacement for fossil fuels. The alternatives include carbon powder, combustible materials from construction and demolition waste, and waste oil. Use of these materials not only reduces the Company's dependency on fossil fuels, but it also saves waste by-products ending up in landfill. As can be seen in the graph on page 19, Adelaide Brighton has increased its overall usage of alternative fuels from 6.7% in 2009 to 8.3% in 2012.

Total Scope 1<sup>#</sup> and Scope 2<sup>#</sup> greenhouse gas emissions declined 0.4% in the year to 30 June 2012, despite an increase in production of clinker and lime. This reflects the higher proportion of alternative fuels and an improvement in the methodology of greenhouse gas emission calculation.

### Alternative raw materials

Adelaide Brighton has a broad strategy to reduce the impact of its operations on the environment by replacing non-renewable natural materials with renewable sources, or by-products from other industries. These by-products include:

- > Fly ash - a waste product from coal-fired power stations used either as a partial replacement for cement or, in the case of bottom-ash, used as a sand replacement in masonry products.
- > Granulated blast furnace slag - a by-product from the manufacture of steel. The slag is either ground into a fine powder and used as a substitute for cement, or used as a replacement for aggregate in pre-mixed concrete.
- > Manufactured sand - a by-product from the manufacture of aggregates. It can be used as a replacement for natural sand in pre-mixed concrete and masonry products.

As most of the alternative raw materials used require little in the way of processing before being used as a construction material, their use produces fewer greenhouse gas emissions than traditional raw materials. Use of these by-products also avoids them being disposed of in landfill.

### Interaction with local communities

Three of Adelaide Brighton's cement and lime plants are close to residential developments - the Birkenhead and Angaston plants in South Australia and the Munster plant in Western Australian. Each site has at least one clinker or lime kiln and cement grinding mill. The plants operate in accordance with licence conditions designed to limit any potential negative impacts on the surrounding environment.

State legislation, the timing of approvals and site-specific issues mean the operating conditions differ from site to site. However, each undertakes a range of activities designed to inform and support its local community.

Energy by source\*

\*For year ended 30 June 2012

Source of greenhouse gas emission in a cement plant

50% of greenhouse gas emission occur as the raw meal is heated and carbon dioxide is driven off in order to form the necessary chemical conversion of limestone to calcium oxide: CaCO<sub>3</sub> > CaO + CO<sub>2</sub>. As long as cement making relies on the calcination of limestone, these emissions will be impossible to avoid.

35% of greenhouse gas emission occur as a result of burning fuels (coal, gas and diesel) to create thermal energy.

15% is produced as a result of the indirect emissions resulting from the use of electricity. Cement grinding is the largest single electricity user in the cement plant. Raw meal grinding and moving material around a plant are other significant sources of electricity use.

Source: Cement Industry Federation

<sup>#</sup>Under the National Greenhouse and Energy Reporting (NGER) scheme, Scope 1 emissions are the release of greenhouse gases into the atmosphere as a direct result of an activity, or series of activities (including ancillary activities) that constitute the facility. Scope 2 emissions are the release of greenhouse gases into the atmosphere as a direct result of one or more activities that generate electricity, heating, cooling or steam that is consumed by the facility but do not form part of the facility.

These include:

- > Community consultation - inviting representatives from the community to participate in an advisory group, and/or holding open meetings to provide updates and discuss community concerns. Advisory groups typically include:
  - Local residents;
  - Local council representatives (administrators and elected members);
  - Representatives from state environmental protection bodies;
  - Members of state parliament; and
  - Academics.
- > Community websites - each facility has its own website providing a wide range of information about its operations and licence conditions, updates on environmental issues, major events and community engagement initiatives.

### Improvement initiatives

Adelaide Brighton is committed to improving the environmental performance of all sites, thereby reducing the potential impact on the local communities in which it operates. Projects designed to specifically improve environmental performance include:

#### Munster plant

- > Approximately \$40 million spent between 2011 and mid-2013 on the installation of bag-house filters on Kilns 5 and 6 to reduce particulate emissions. The kiln 6 project was completed in 2012 and the kiln 5 project is scheduled for completion by mid-2013.
- > Testing of kiln 6 stack emissions since the commissioning of the filter has resulted in significant reduction in particulate emissions.

#### Birkenhead plant

- > An upgrade of ship loading facilities at the Birkenhead wharf to create a fully enclosed system incorporating the best available dust collection technology with improved environmental performance.
- > An upgrade of the raw materials handling system for cement milling, including the relocation of certain raw material open stockpiles to an undercover storage facility, thus reducing fugitive dust.
- > Installation of a slag dryer and product silo to enable the introduction of granulated blast furnace slag-blended cement to the market in South Australia. Substituting slag for clinker, which is the most energy and greenhouse intensive component in cement, reduces the per tonne greenhouse footprint of cement.

### Water usage

Adelaide Brighton uses water as part of its production process in all divisions. It comes from a mix of sources, including mains, stormwater run-off collected on-site, and from aquifers through bores. Innovation in site design has improved the amount of water collected and retained and this reduces the use of mains water and helps limit the amount of contaminated water exiting the site.

As can be seen in the graph *Mains water usage*, Adelaide Brighton has reduced mains water usage by 11.9% since 2009. Although acquisitions in 2011 led to an increase in water consumption for the Concrete and Aggregates Division, process improvements have reduced mains water demand in both the Cement and Lime and Concrete Products divisions.

### Waste to landfill

Adelaide Brighton aims to eliminate production waste sent to landfill. The main wastes generated are kiln dust from the production of clinker and lime, and waste concrete that remains following delivery to customers. Where possible, this waste is incorporated back into the production process. However, it is not possible to re-use all waste this way without affecting product quality.

Despite a program to reduce kiln dust and concrete waste sent to landfill, acquisitions in the Concrete and Aggregates division, has resulted in a 17.4% increase in process waste to landfill since 2009.

### Community support

Adelaide Brighton is committed to engaging with the community and supports a broad range of organisations with donations, public tours, community information and work experience programs.

The core purpose of Adelaide Brighton's community support program is to make a valued and sustainable contribution to the communities in which we operate by investing in carefully considered donation and sponsorship of primarily community and children services in the local communities in which we operate; support of specialised higher education programs; and environmental education through local schools participation in our Munster and Birkenhead wetlands.

Major community support provided by Adelaide Brighton includes:

- > Variety the Children's Charity - benefiting sick, disabled and disadvantaged children.
- > Undergraduate Scholarship in the School of Engineering at the University of Wollongong. The scholarship has been targeted towards a female as part of our long term strategy to encourage a higher proportion of women into engineering in industry. The scholarship recipient also has the opportunity for work placement experience in various Divisions of Adelaide Brighton.
- > Post Graduate scholarship in the School of Chemical Engineering with the University of Adelaide.
- > Indigenous Scholarship for secondary schooling.
- > Sydney Children's Hospital Foundation - children's therapist in the Outpatients and Emergency Departments.

#### Workplace giving program

In 2012, Adelaide Brighton has launched a Workplace Giving Program providing employees with a simple and effective way to regularly donate money to charity.

Adelaide Brighton has chosen Variety the Children's Charity as the inaugural charity to benefit from our Workplace Giving Program.

\*For year ended 30 June

Adelaide Brighton believes a safe, tolerant and diverse work environment helps employees reach their potential.

Adelaide Brighton employs a diverse workforce of approximately 1,600 people (including joint ventures) in all states and territories of Australia. We are committed to the health and safety of our people and those who come onto our sites.

Our structured approach to people management is administered divisionally within a structure of group policies and practices.

Everyone at Adelaide Brighton shares responsibility for practising high standards of ethical conduct and corporate governance. Our Code of Conduct articulates our commitment to successfully conduct our business in accordance with all applicable laws. Adherence to the code ensures that our business has a framework for decision-making and business behaviour which builds and sustains our corporate integrity, reputation and success.

**Diversity**

Adelaide Brighton considers workplace diversity an important factor in providing a balanced and inclusive working environment. We are committed to the promotion of diversity within our organisation, and recognise that removing barriers to diversity enables us to attract and retain the best people with the appropriate skills to contribute to the continuing success of our business.

Our Diversity Policy, on pages 30 to 31 of this report, outlines five core objectives which form the foundations of our approach to diversity and upon which we measure our performance in this area.

**Leading with Strengths training**

In 2012, we launched *Leading with Strengths*, a development program targeted at our female management and frontline employees.

The aim of the program is to develop individual leadership potential, focus on personal achievement to help women better manage business opportunities by recognising areas of individual strength and applying them to practical workplace solutions.

**Investing in skills for the future**

One of the elements of Adelaide Brighton's success is building future technical experts and leaders. Our two year Graduate program is aimed at attracting the next generation of engineering and commercial professionals to our business. During the two and a half year program, Graduates undertake project placements through the different divisions of the business. The projects undertaken are targeted towards Adelaide Brighton's goals and will provide the opportunity for Graduates to develop skills and knowledge with the aim for them to be sufficiently trained to be able to move into a permanent position at the end of the Graduate Program.

To entice potential Engineers to join the cement industry, Adelaide Brighton provides a University vacation program available to engineering students. During a two month period participants are assigned a dedicated business related project with supervision and are required to present a report at the conclusion of their assignment.

**Safety and health**

The safety of our employees and contractors continues to be an integral part of our business. Ongoing safety and health awareness and improvement in safety culture and systems is an important part of our business.

We seek continual improvement in our performance and aspire towards a goal of safe production. This goal is an important driver for ongoing improvement in health and safety performance across the Group. In 2012, we recorded a lost time injury frequency rate of 2.6, a significant reduction compared to 5.3 in the 2011.

The improvements to our comprehensive Health, Safety and Environment Management System continued in 2012. This system is risk based, relevant to our operations and adaptable as well as providing clarity and consistency of health and safety requirement throughout the Group. In 2012, the implementation of this system was further advanced throughout the Company.

Sam Toppenberg  
Executive General Manager  
Human Resources

### Safety leadership workshops

To support our safety systems and to develop employee culture where understanding of why safety is important and ownership is everybody's responsibility, one of the tools we are using is our safety leadership workshops. The workshops focus on helping our leaders, at all levels, understand how their behaviour influences and creates our safety culture.

This program continues to produce measurable results, at an individual level, where our people are taking more responsibility for safety at their sites. And system level, where hazard and incident reports have increased following the workshops.

The Board is committed to conducting the Company's business ethically and in accordance with high standards of corporate governance.

To this end, the Board (together with the Company's management) regularly reviews the Company's policies, practices and other arrangements governing and guiding the conduct of the Company and those acting on its behalf.

This statement provides an outline of the main corporate governance practices that the Company had in place during the past financial year.

The Board believes that the Company's policies and practices are consistent in all substantial respects with good corporate governance practice in Australia appropriate for the circumstances of the Company, including the ASX Corporate Governance Council Principles and Recommendations.

The Board has also reserved for itself the following specific responsibilities:

**1 The Board lays solid foundations for management and oversight**

**1.1 Role of the Board**

The role of the Board of Directors is to protect and optimise the performance of the Group and, accordingly, the Board takes accountability for reviewing and approving strategic direction, establishing policy, overseeing the financial position and monitoring the business and affairs of the Group on behalf of shareholders. Details of the skills, experience and expertise of each Director and their period of office are set out on page 32 and 33 of this report.

The Board operates in accordance with the general principles set out in its charter, which is available from the corporate governance section of the Company's website at [www.adbri.com.au](http://www.adbri.com.au)

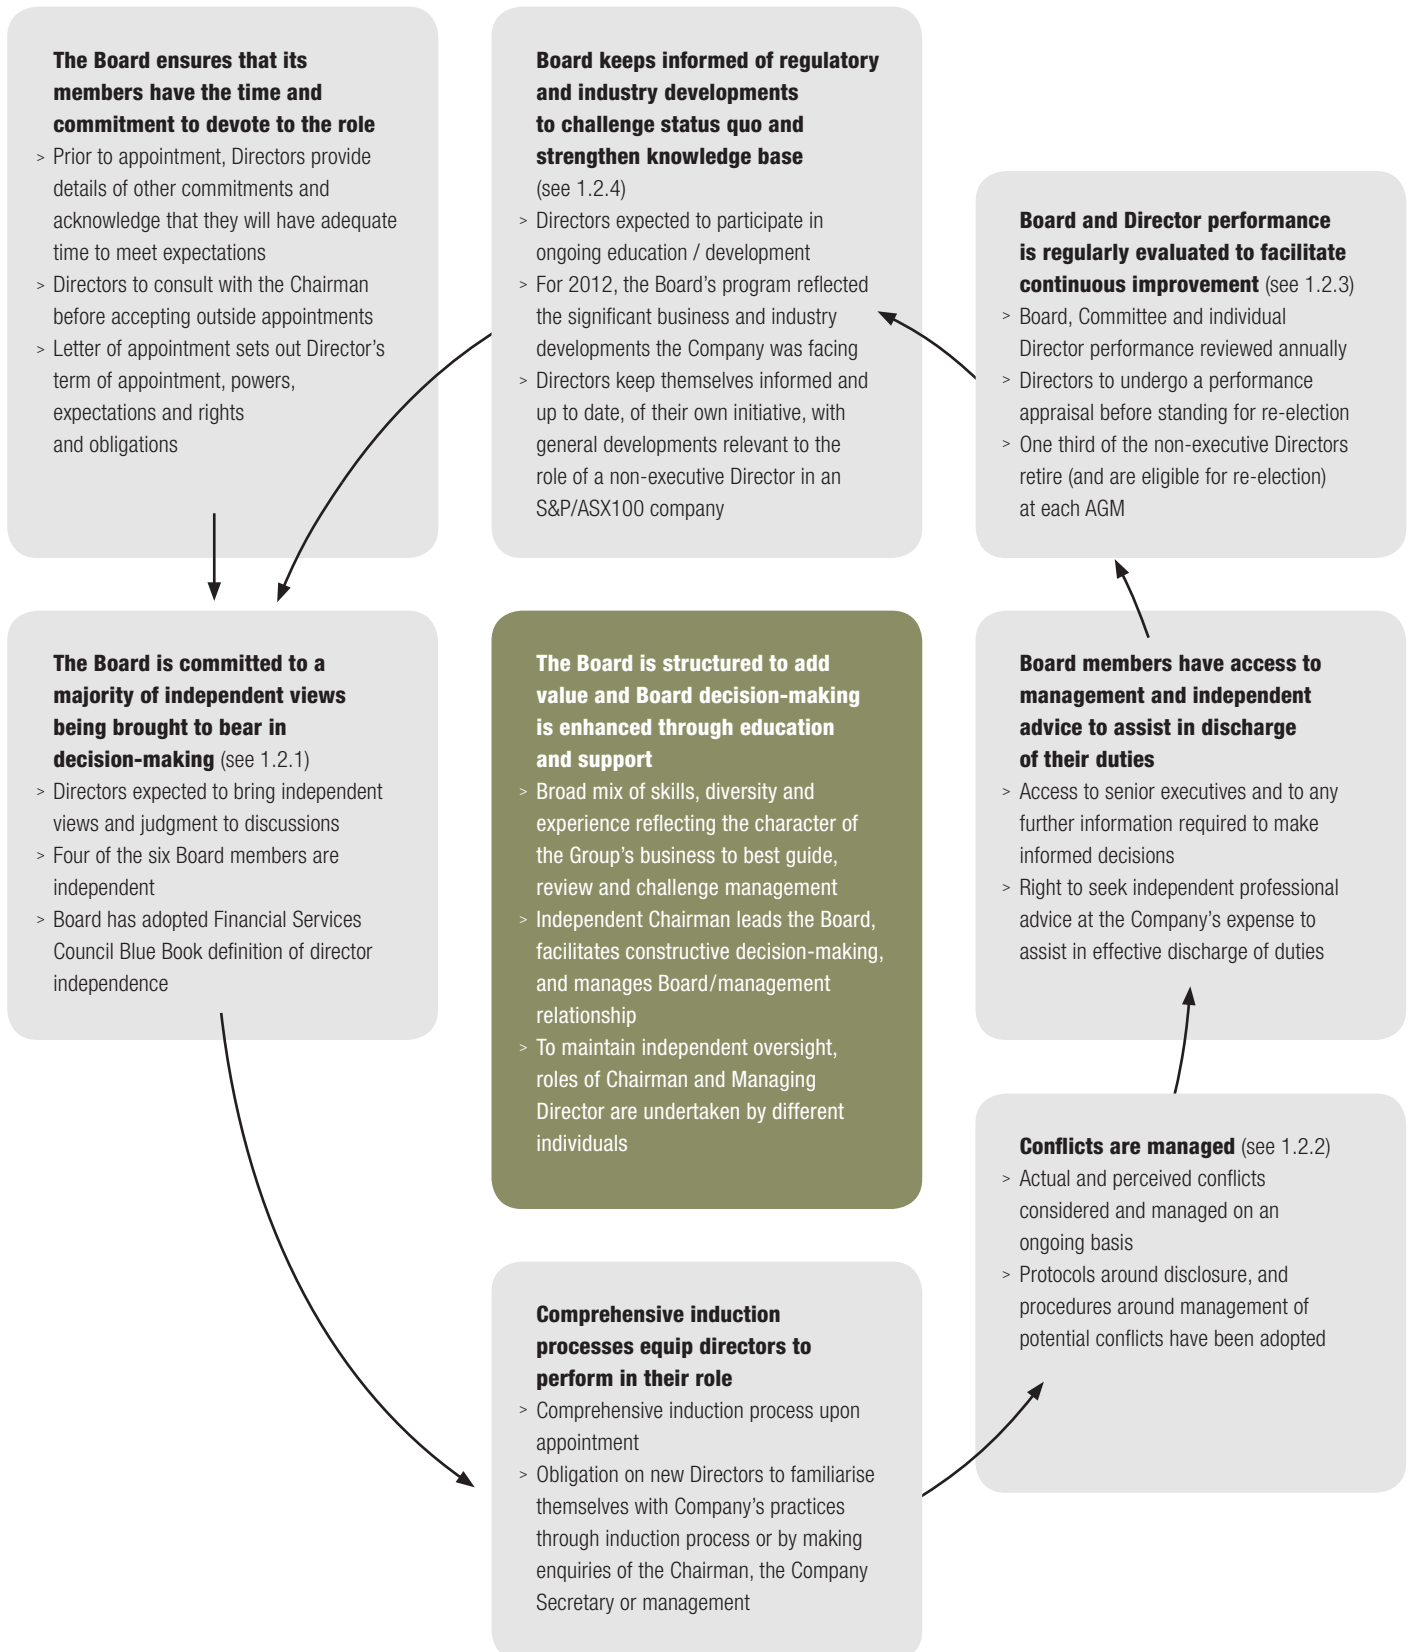

In accordance with the provisions of the Company's constitution, the Board has delegated a number of powers to Board committees (see section 2 following) and responsibility for the day-to-day management of the Company to the Managing Director and senior management. The respective roles and responsibilities of the Board and management are outlined further in the Board charter.

Marcus Clayton  
General Counsel and  
Company Secretary

<i>Strategy and monitoring</i>	<i>Monitoring the business and affairs / relations with management</i>	<i>Risk management, compliance and internal controls</i>
Input into and approval of management's development of corporate strategy, including setting performance objectives and approving operating budgets	Selecting, appointing and evaluating from time to time the performance of, determining the remuneration of, and planning for the successor of, the Group Managing Director	Reviewing and guiding systems of risk management and internal control and ethical and legal compliance
Monitoring and reviewing corporate performance and implementation of strategy and policy	Reviewing procedures for appointment of senior management, monitoring performance and reviewing executive development activities. This includes ratifying the appointment and the removal of the Chief Financial Officer and the Company Secretary	Monitoring and reviewing processes aimed at ensuring integrity of financial and other reporting, and providing assurance to approve the Group's financial reports
	Approving major capital expenditure, acquisitions and divestitures, cessation of any significant business activity and monitoring capital management	Monitoring and reviewing policies and processes in place relating to occupational health and safety, compliance with laws, and the maintenance of high ethical standards
		Input into and approval of the Company's policy in relation to, and monitoring implementation of, sustainable resource use and the impact of the Company's operations on the environment, community and stakeholders

## 1.2 The Board is structured to add value

### 1.2.1 Directors' independence

In general, Directors are considered independent where they are free of any interest and any business or other relationship which could, or could reasonably be perceived, to interfere materially with the Director's ability to act in the best interests of the Company. An assessment will be made on a case-by-case basis of whether the Director's ability to act in the best interests of the Company has been materially impaired.

In ensuring that the Board comprises Directors with a broad range of skills and experience reflecting the character of the Group's business, the Board may from time to time appoint Directors who are not considered to be independent. It is, however, the Board's policy that it should comprise a majority of independent Directors to ensure that independent oversight is maintained.

In the context of his executive position with the Company, Mr M Chellew is not considered to be independent. Having regard to the guidelines of independence adopted by the Board, the Directors are of the view that Mr R D Barro is the only non-executive Director who is not considered "independent" by virtue of his position as the Managing Director and a shareholder of Barro Group Pty Ltd, which has a 50% interest in the joint venture, Independent Cement & Lime Pty Ltd (ICL), and is a significant shareholder in the Company. ICL has an ongoing trading relationship with the Barro Group of companies.

### 1.2.2 Conflicts of interest

Directors are expected to avoid any action, position or interest which conflicts (or may be perceived to conflict) with their position as a Director of the Company. In particular, the Board is cognisant of Mr Barro's interest in Barro Group Pty Ltd, a significant shareholder in the Company and 50% joint venture partner in ICL.

During the year, in order to avoid actual and/or perceived conflicts of interest in Board decision-making, Board procedures were followed such that where the possibility of a material conflict arose, the Board considered the nature and extent of the potential conflict and whether it would be appropriate for the relevant Director to participate in Board discussion and decision-making in relation to the issue. Where there was a real potential for a conflict of interest, information was not provided to the Director, and, in accordance with the *Corporations Act 2001*, the Director did not participate in, or vote at, the meeting where the matter was considered.

In accordance with these Board procedures, Mr R D Barro did not take part in the Board's decision in relation to Adelaide Brighton executing contracts with ICL for the continuation of exclusive supply arrangements to ICL. The supply arrangement, which appoints ICL as the exclusive distributor for Adelaide Brighton Limited (and any related body corporate) in Victoria and New South Wales, was renewed for a period of 10 years from 1 January 2013 on substantially similar commercial terms to the terms that have been in operation.

Overall, the Board takes care to consider whether or not it is appropriate for Mr R D Barro to be involved in Board discussions or decisions that relate to the interests of the Barro Group.

### 1.2.3 Performance evaluation

For the 2012 financial year, a performance evaluation was led by the Chairman to assess the performance of individual Directors, the Board as a whole, various aspects of the Board committees such as their performance, membership, roles and charters, and the Board's and Directors' interaction with management.

As part of this comprehensive review of the Board's performance, processes and operations, the Chairman facilitates individual discussions with each Director which also reviews their individual performance. The discussions also included a peer review of the Board Chairman's performance by the other Directors.

The Chairman reports to the Board concerning the performance evaluation process and the findings of these reviews. As a result of recommendations arising from the internal Board review, initiatives are introduced to ensure the continued effectiveness of the Board's performance and to enable its sustained focus on key issues for the Company. The implementation of these initiatives is overseen by the Chairman.

Executives and managers are also subject to an annual performance review in which performance is measured against agreed business objectives. The performance of the Managing Director is assessed by the Board against objectives related to the Company's strategy, business plans and the financial performance of the business.

For the 2012 financial year, the performance of the Managing Director and the Managing Director's achievement of the agreed objectives was reviewed by the Chairman, the Nomination and Remuneration Committee and the Board. The performance of the Company's senior executives during 2012 was reviewed by the Managing Director, and by the Nomination and Remuneration Committee, led by the Managing Director and the Executive General Manager, Human Resources.

### 1.2.4 Ongoing education

The Board's ongoing education calendar incorporated site visits throughout the year to a number of the Company's operational facilities. Presentations were given by management and external experts concerning developments impacting, or likely to impact, the business. The Board is informed by leading expertise from within the Company on matters such as management of energy requirements, regulation of carbon emissions and business and product development. The Board held a number of sessions with senior personnel from organisations operating in a range of fields relevant to the Company's operations and future direction, in order to stay abreast of key and developing issues of significance to the Company.

## 1.2.5 Board and CEO succession planning

Since 2010, the Board has embarked on a process of Board renewal which has seen the appointment of two independent non-executive Directors - K B Scott-Mackenzie in 2010 and A M Tansey in 2011. Following the retirement of immediate past Chairman Mr C L Harris during 2012, the Board renewal process continues with the Board considering the appointment of an additional Director in the mid term. The Board believes that the addition of a new Director will bring fresh perspectives and broaden the range of experience and skills on the Board and continue to provide for orderly succession of its longer serving members.

The Board is continuing to engage with its largest shareholder, the Barro Group, in relation to future Board appointments.

The Board's intention following the retirement of Mr C L Harris was to review the structure and memberships of its Board Committees after appointing a new Director. Consequently, the Board considered it appropriate for L V Hosking to continue as Chairman of the Nomination and Remuneration Committee and Chairman of the Corporate Governance Committee in an acting capacity during 2012. However, as the new Director appointment did not eventuate in 2012, the Board has appointed AM Tansey as Chairman of Nomination and Remuneration Committee and Corporate Governance Committee, effective 19 February 2013.

During 2012, the Nomination and Remuneration Committee reviewed the succession plans for the senior management team, including the Managing Director, to ensure that appropriate plans have been implemented for the mid to long term.

## 1.2.6 Diversity

The Board, having adopted a Diversity Policy for the Group in 2011, has established measurable diversity objectives to enhance gender diversity across the organisation. Further information of the Group's progress with the gender diversity objectives (in accordance with the ASX Corporate Governance Council Principles and Recommendations) is set out on pages 30 to 31.

## 2 Committees of the Board

To assist the Board in fulfilling its responsibilities, the Board has established a number of committees with responsibility for particular areas.

Each committee has a specific charter or constitution. The charters for the Audit, Risk and Compliance Committee and the Nomination and Remuneration Committee are available on the corporate governance section of the Company's website at [www.adbri.com.au](http://www.adbri.com.au). The Board periodically reviews each Board committee's charter, role and responsibilities.

Generally, minutes of committee meetings are tabled at the next Board meeting after the minutes have been prepared. Additional requirements for specific reporting by the committees are addressed in the charter of the individual committees.

## 2.1 Key standing committees

	<i>Audit, Risk and Compliance Committee</i>	<i>Nomination and Remuneration Committee</i>
Members during 2012	G F Pettigrew (Chairman) L V Hosking A M Tansey C L Harris (retired on 17 May 2012)  Details of these Directors' qualifications are set out on page 32 and 33 of this report.	L V Hosking (acting Chairman to 19 February 2013) G F Pettigrew K B Scott-Mackenzie C L Harris (retired on 17 May 2012)  The Board appointed A M Tansey as Chairman of the Nomination and Remuneration Committee with effect from 19 February 2013, on which date L V Hosking ceased to be acting Chairman of the Committee but continues as a member. Details of these Directors' qualifications are set out on page 32 and 33 of this report.
Composition	<ul style="list-style-type: none"> <li>&gt; Consist of a minimum of 3 members, all of whom are independent non-executive Directors.</li> <li>&gt; The chair must be an independent non-executive Director who is not Chairman of the Board.</li> </ul>	<ul style="list-style-type: none"> <li>&gt; Consist of a minimum of 3 members, all of whom are independent non-executive Directors.</li> </ul>
Key functions	<ul style="list-style-type: none"> <li>&gt; To review, assess (and recommend to the Board for approval) the annual financial reports, the half-year financial report, including reviewing the results of external audit and assessing all external reporting for its adequacy for shareholder needs; and all other financial information published by the Company or released to the market;</li> <li>&gt; To review the appropriateness of accounting principles adopted by management in the composition and presentation of financial reports and to approve any change in the accounting principles applied in preparing the Company and Group reports;</li> <li>&gt; To evaluate the independence of both the non-executive Directors and external auditors and to monitor the implementation of the Board's policy in relation to the provision of non-audit services by the Company's auditor;</li> <li>&gt; To recommend to the Board the appointment, removal and remuneration of the external auditors, to review the terms of their engagement, the scope and quality of the audit and to assess performance;</li> </ul>	<ul style="list-style-type: none"> <li>&gt; To review (and recommend to the Board) the fees paid to non-executive Directors, and increases to the limits approved by shareholders;</li> <li>&gt; To review (and recommend to the Board) the compensation arrangements for the Managing Director, including short term and long term incentives;</li> <li>&gt; To review performance targets, and approve recommendations from the Managing Director on total levels of remuneration, for senior executives;</li> <li>&gt; To oversee the implementation of the Company's short term and long term incentive arrangements, including assessing the extent to which performance conditions are satisfied and making relevant awards;</li> <li>&gt; To review management succession planning and specifically the Managing Director and senior executives reporting to the Managing Director;</li> <li>&gt; Reviewing the appointments and terminations to senior executive positions reporting to the Managing Director;</li> <li>&gt; To assess the appropriate mix of skills, experience and expertise required on the Board and assess the extent to which these required skills are represented on the Board;</li> <li>&gt; To establish processes for the identification of suitable candidates for appointment to the Board, engage appropriate search firms to assist in</li> </ul>

*Audit, Risk and  
Compliance Committee*

*Nomination and  
Remuneration Committee*

- > To determine the scope of the internal audit function and ensure that it has adequate resources to fulfill its role, to assess its performance including independence, effectiveness and appropriate coordination with external auditors;
- > To determine whether new policies or training should be implemented to safeguard against possible risks or non-compliance with applicable laws, regulations or Company policies;
- > To monitor compliance with the Company's policies and procedures that recognise the Company's business, environmental and statutory responsibilities; and
- > To report the results of the Committee's review of risk management and internal compliance and control systems to the Board.

- identifying suitable candidates and make a recommendation regarding the most appropriate candidates to the Board which ultimately will appoint the new Directors;
- > To oversee or design induction and ongoing training and education programs for the Board to ensure that non-executive Directors are provided with adequate information regarding the operations of the business, the industry and their legal responsibilities and duties;
- > To monitor the tenure of Board members, considering succession planning and identifying the likely order of retirement by rotation of non-executive Directors; and
- > To establish processes for the review of the performance of individual non-executive Directors, the Board as a whole and the operation of Board committees.

Key activities  
during 2012

- > Ongoing review and consideration of financial and non-financial risks and the Company's system of identifying and managing risks;
- > Considering the impact arising from the implementation of the carbon tax and related regulatory requirements, and the Company's accounting for these;
- > Reviewing the Company's exposure to and management of slow paying debtors and bad debts;
- > Monitoring the performance, outcomes and actions of the Company's internal audit program;
- > Receiving the external auditors' reports, monitoring issues reported and actions taken;
- > Reviewing and overseeing of the Company's 2011 Full Year, 2012 Half Year and Full Year Financial Reporting and associated audit;
- > Establishing the internal audit plan for 2013 and reviewing and approving the internal and external auditors' fees;
- > Monitoring the Group's insurance renewal programme;
- > Reviewing the Group's Delegated Authorities; and

- > Establishing criteria, selecting, interviewing and assessing potential non-executive Director candidates, and reporting to the Board;
- > Overseeing, and receiving reports from the Chairman of the Board, concerning the reviews of the performance of individual non-executive Directors, the Board as a whole and the operation of Board Committees. Also overseeing and receiving a report from the Chairman of the Committee concerning the review of the performance of the Chairman of the Board;
- > Reviewing and recommending to the Board the level of annual fixed and incentive compensation arrangements for the Managing Director and the senior executive team;
- > Reviewing and recommending to the Board the Company's long term incentive ("LTI") awards to the Managing Director and the senior executive team in 2013, including levels of participation;
- > Reviewing the annual Functional component objectives applicable to the short term incentive ("STI") for the Managing Director and the senior executive team for 2012;
- > Reviewing the attainment of STI and LTI performance conditions by the Managing Director and the senior executive team;

	<i>Audit, Risk and Compliance Committee</i>	<i>Nomination and Remuneration Committee</i>
	<ul style="list-style-type: none"><li>&gt; Reviewing the Group's accounting policies and treatment of particular issues, including detailed review during the year of accounting for 2011 acquisitions, accounting for Defined Benefit Superannuation and taxation compliance.</li></ul>	<ul style="list-style-type: none"><li>&gt; Reviewing and recommending to the Board the base fees payable to non-executive Directors and additional fees payable for memberships of Board committees for 2013;</li><li>&gt; Overseeing the implementation of diversity measures to facilitate the achievement of the diversity objectives as contained in the Diversity Policy to address diversity in the Board's composition, the senior executive team and the broader Company;</li><li>&gt; Reviewing and reporting to the Board on the performance of the Managing Director and the senior executive team and succession plans for the Managing Director, senior executives and other key positions in the Company; and</li><li>&gt; Reviewing the Company's 2012 Remuneration Report and Diversity Report.</li></ul>
Attendance	Details of attendance at Audit, Risk and Compliance Committee meetings are set out on page 40 of this report. Representatives of the Company's external auditors, PricewaterhouseCoopers, including the lead audit partner, attend (either in person or by telephone) for the whole of the Committee's meetings. It is also the practice of the Committee to meet with the Company's auditors without any member of management present.	Details of attendance at Nomination and Remuneration Committee meetings are set out on page 40 of this report.
Consultation	Members of management may attend meetings of the Committee at the invitation of the Committee Chairman. It is the practice of the Committee that the Managing Director, the Chief Financial Officer and the Company Secretary attend all Audit, Risk and Compliance Committee meetings. The Group Risk Manager generally attends meetings of the Committee when non-financial risk management matters are considered. In fulfilling its responsibilities, the Committee has rights of access to management and to auditors (external and internal) without management present and may seek explanations and additional information.	It has been the practice of the Nomination and Remuneration Committee on occasions to invite other Directors to attend Committee meetings. Members of management, particularly the Executive General Manager, Human Resources or the Managing Director, may also attend meetings of the Committee at the invitation of the Committee Chairman, whenever particular matters arise that require management participation, such as reviewing senior executive performance. The Committee and the Chairman of the Committee directly without the involvement of the Company's executive management instruct expert professional advisors and obtain their advice concerning matters of executive remuneration and the selection of suitable candidates for appointment as independent non-executive Director.

## 2.2 Other Board committees

### 2.2.1 Safety Health and Environment Committee

The members of the Safety, Health and Environment Committee (SH&E Committee) during 2012 were K B Scott-Mackenzie (Chairman), G F Pettigrew, and R D Barro. M P Chellew (who ceased as a member of the Committee on 1 January 2012) attends meetings of the SH&E Committee in his executive position as Managing Director.

The Committee has a broad role in reviewing general and specific occupational health and safety and environmental matters across the Group. Committee meetings are also attended by the Company's Executive General Manager, Human Resources and Safety, Health and Environment, Chief Financial Officer and its General Counsel. Generally when the SH&E Committee meeting is held prior to a Board meeting, the SH&E Committee Chairman subsequently reports to the Board about the Committee's proceedings.

### 2.2.2 Corporate Governance Committee

The Corporate Governance Committee which in 2012 comprised of L V Hosking (Chairman) and A M Tansey, is responsible for overseeing the Company's implementation and compliance with best practice in corporate governance applicable to the circumstances of the Company. Committee meetings are also attended by the Company's Managing Director, the Company Secretary and General Counsel and the Chief Financial Officer, and are generally held in conjunction with Board meetings, so that all of the Company's Directors are present.

The Board appointed A M Tansey as Chairman of the Corporate Governance Committee with effect from 19 February 2013, on which date L V Hosking ceased to be acting Chairman of the Committee but continues as a member.

The Committee monitored relevant regulatory developments during 2012 and monitored the annual review of the Company's charters and policies to ensure they comply with regulatory requirements and remain up to date with good governance guidelines.

C L Harris retired from the Committee (and the Board) on 17 May 2012.

### 2.2.3 Independent Directors' Committee

The role of the Independent Directors' Committee is to investigate and consider corporate proposals made to the Company. The Committee comprises Directors who do not have any conflict of interest concerning the matters considered by the Committee. The members of the Committee during 2012 were C L Harris (Chairman and Committee member until his retirement on 17 May 2012), L V Hosking (Chairman from 17 May 2012), G F Pettigrew, K B Scott-Mackenzie and M P Chellew (Managing Director).

Details of members' attendance at each of these Committee meetings in 2012 are set out on page 40.

### 3 The Board recognises and manages risk and safeguards the integrity of financial reporting

3.1 Framework The Board has approved the following framework within which the Company discharges its risk management function:

#### Leading a culture of compliance and ensuring that risk management practices are appropriate and effective in the context of the Company's business objectives.

**Oversight:** The Board, through the Audit, Risk and Compliance Committee, is responsible for reviewing and guiding the Company's risk management policies and compliance and control systems. These policies and systems provide for management to identify and manage both financial and non-financial risks to the Company's businesses. The Board, through the Committee, regularly review the effectiveness of the Company's risk management system and management of identified business risks.

**Purpose:** The Company's risk management framework is designed to ensure strategic, operational, legal, reputation and financial risks are identified, assessed, effectively and efficiently managed and monitored to enable achievement of the Company's business objectives.

#### Internal controls framework

A robust control environment is fundamental to the effectiveness of the Company's risk management framework. Delegations of authority and Board and management accountability is clearly demarcated. All Directors, executives and employees are required to adhere to the Code of Conduct (described below) and the Board actively promotes a culture of quality and integrity. Accounting, financial reporting and internal control policies and procedures designed to manage business risks (both financial and non-financial) have been established at the Board and executive management levels. These are designed to safeguard the assets and interests of the Company, and ensure the integrity of financial reporting. The Board nonetheless acknowledges that it has ultimate responsibility for the accuracy and approval of the Group's financial reports. The Board acknowledges that it is also responsible for the overall internal control framework, and to assist in discharging this responsibility, the Board has instigated an internal control framework that can be described as follows:

#### Financial risk

The Managing Director and Chief Financial Officer have made the following certifications to the Board:

- > That the Company's financial reports present a true and fair view, in all material respects, of the financial position and performance of the Company and the consolidated entity and are in accordance with relevant accounting standards;
- > That the Company has adopted an appropriate system of risk management and internal compliance and control which implements the policies adopted by the Board and forms the basis for the statement given above; and
- > That the Company's risk management and internal compliance and control system to the extent it relates to financial reporting is operating efficiently and effectively in all material respects.

#### Non-financial risk

Management has also reported to the Board on strategic and operational issues, including an assessment of the material business risks facing the Company and the effectiveness of the systems and policies in place to manage those risks.

#### Financial reporting

- > Comprehensive budgeting system with an annual budget reviewed and approved by the Board
- > Monthly actual results are reported against budget and revised forecasts for the year are prepared regularly
- > Procedures to ensure that price sensitive information is reported to the ASX in a timely manner (see section 5 below)

#### Operating unit controls

- > Financial controls and procedures including information systems controls are in operation throughout the consolidated entity
- > Operating units confirm compliance with these procedures to the Board annually

#### Functional speciality reporting

The Group has identified a number of key areas which are subject to regular reporting to the Board, such as safety and environment, risk management, taxation, finance and administration

#### Investment appraisal

- > Clearly defined guidelines for capital expenditure
- > eg. annual budgets, detailed appraisal and review procedures, levels of delegated authority and due diligence requirements where businesses are being acquired or divested

#### Internal audit:

- > Assists the Board in ensuring compliance with internal controls
- > The Audit, Risk and Compliance Committee reviews and approves the selection and engagement of internal auditors, the internal audit program to be conducted, and the scope of the work to be performed at each location
- > Internal auditors provide the Committee with comments and recommendations about the identification of areas perceived to be of a greater level of risk than others, and any areas requiring particular scrutiny
- > The Committee receives and reviews the reports of the internal auditors

#### Delegated authorities and restrictions

Comprehensive procedure which provides a framework that enables employees to operate and act within clearly defined and communicated parameters.

### 3.2 Audit Services

The Company and Audit, Risk and Compliance Committee policy is to appoint external auditors who clearly demonstrate quality and independence. The performance of the external auditor is considered annually. PricewaterhouseCoopers remains the external auditor of the Company for the Group's financial report for the year ended 31 December 2012.

The Board has adopted a policy in relation to the provision of non-audit services by the Company's external auditor. It is based on the principle that work that may detract from the external auditor's independence and impartiality (or that may be perceived as doing so) should not be carried out by the external auditor. Details and the break down of fees for non-audit services and an analysis of fees paid or payable to external auditors are provided in Note 32 to the Financial Statements.

## 4 The Board is committed to promoting ethical and responsible decision-making

### 4.1 Code of conduct and whistleblower program

The Company is committed to upholding the highest ethical standards of corporate behaviour. A Code of Conduct has been adopted, which requires that all Directors, senior management and employees act with the utmost integrity and honesty. It aims to further strengthen the Company's ethical climate by promoting practices that foster the Company's key values of:

- > Acting with fairness, honesty and integrity;
- > Being aware of and abiding by laws and regulations;
- > Individually and collectively contributing to the wellbeing of shareholders, customers, the economy and the community;
- > Maintaining the highest standards of professional behaviour;
- > Avoiding or managing conflicts of interest; and
- > Striving to be a good corporate citizen, and to achieve community respect.

The Code of Conduct is publicly available on the Company's website at [www.adbri.com.au](http://www.adbri.com.au). During 2012, the Company undertook a review of, and updated the Code of Conduct, ensuring that the Code keeps relevant to the Company's values and practices. The Company has also adopted policies requiring compliance with (among others) occupational health and safety, environmental, privacy, equal employment opportunity and competition and consumer law. The Company monitors the effectiveness of these policies.

Employees are encouraged to attend training or seminars presented by the Company, or external service providers, to ensure that they remain up-to-date with relevant industry and regulatory developments.

The Code requires all officers, employees, contractors, agents or people associated with the Company to report any potential breaches to the Company Secretary under the whistleblower program. This may be done anonymously.

### 4.2 Shareholdings of Directors and employees

The Board has a policy that Directors and employees may not buy or sell Adelaide Brighton Ltd shares except within the period of one month following the annual and half year results announcements and the period from the release of

the Company's annual report until one month after the annual general meeting. The policy also defines certain periods (known as 'Trading Windows') in which Directors and employees may buy or sell Adelaide Brighton Ltd shares with approval from the Company. The policy complies with the requirements of the ASX Listing Rules and supplements the *Corporations Act 2001* provisions that preclude Directors and employees from trading in securities when they are in possession of "inside information".

The Board also has a policy that prohibits executives from hedging (or otherwise locking in a profit over) unvested securities issued under the Company's Share Plans. The Company's Share Trading Policy and the Award/Share Hedging Policy are available on the Company's website at [www.adbri.com.au](http://www.adbri.com.au)

## 5 The Board is committed to timely and balanced disclosure and respects the rights of shareholders

### 5.1 Continuous disclosure

The Company is committed to providing relevant and timely information to its shareholders and to the broader market, in accordance with its obligations under the *Corporations Act 2001* and the ASX continuous disclosure regime.

The Company's Continuous Disclosure Policy is available on the Company's website and sets out guidelines and processes to be followed in order to ensure that the Company's continuous disclosure obligations are met. Material information must not be selectively disclosed prior to being announced to the ASX. These policies and procedures are supplemented by the Shareholder Communications Policy (also published on the Company's website) which includes arrangements the Company has in place to promote communication with shareholders and encourage effective participation at general meetings.

The Company Secretary has been nominated as the person responsible for communicating with the ASX. This role includes responsibility for ensuring compliance with the continuous disclosure requirements and overseeing and coordinating (with the Group Corporate Affairs Adviser) information disclosure to the ASX, analysts, brokers, shareholders, the media and the public.

During 2012, the Company commenced a review of the Continuous Disclosure policy, and will consider if amendments are required to the Policy upon the ASX issuing its proposed new Guidance Note on continuous disclosure.

### 5.2 Communication with shareholders

The Company's website contains copies of annual reports, financial accounts, presentations, media releases and other investor relations publications. All relevant announcements made to the market, and any related information, are also posted on the Company's website.

The Board encourages full participation of shareholders at the Annual General Meeting in order to promote a high level of accountability and discussion of the Company and the Group's strategy and goals. The external auditor will attend the Annual General Meeting and be available to answer shareholder questions about the conduct of the audit and the preparation and content of the auditors' report.

Adelaide Brighton is committed to the promotion of diversity and recognises that removing barriers to diversity enables us to attract and retain the best people for our business.

Our Diversity Policy outlines five core objectives which form the foundations of our approach to diversity and upon which we measure our performance in this area. An overview of these objectives, and our progress towards achieving these objectives for the 2012 financial year, are set out below:

<i>Objective</i>	<i>Diversity measures to facilitate achievement of objectives</i>	<i>Progress</i>
To promote a culture of diversity (which includes gender, skills, experience, and cultural background)	Leadership programs targeted at our female management and frontline employees focussing on their strengths and contribution to the broader workplace to be rolled out across the organisation.	The programs were well received across the business with 70% of our total female staff in attendance. Follow up training programs planned for 2013.
	Company-wide training in workplace policies (including diversity, bullying and harassment, Equal Employment Opportunity).	Employee inductions include information on company policies such as equal employment opportunity and bullying.
	The Board and Nomination and Remuneration Committee review Adelaide Brighton's diversity achievements relative to the industry structure in which the Company operates.	In 2012, the Board and Nomination and Remuneration Committee discussed the Company's diversity measures and the need to develop a positive workplace culture.
To ensure that recruitment and selection processes are based on merit	Internal review of Adelaide Brighton's recruitment practices and systems to ensure that employment decisions are made without regard to factors that are not applicable to the inherent requirements of a position and that unconscious gender bias does not influence outcomes.	Recruitment mentoring training continues across the business with a view to eliminate any unconscious bias that may occur.  Selection of recruitment agencies employed by Adelaide Brighton is based on their commitment to providing diverse candidate pools.
To provide talent management and development opportunities for all employees	Ongoing talent recognition and in-house leadership programs for employees.	Various development programs provided for recognised employees and tailored to individual needs ranging from external training and education, mentoring and/or specific on the job training.
	Sponsor or encourage professional networking, coaching and mentoring programs to give female employees the opportunity to connect with other professionals.	Where identified, these programs are supported across the organisation.
	Sponsor MBA or post-graduate studies for high potential female employees.	Adelaide Brighton supports external study and development for high potential employees.
	In recognition of the low numbers of females entering into engineering and manufacturing vocations: <ul style="list-style-type: none"> <li>&gt; implement programs designed to engage female graduate engineers;</li> <li>&gt; offer undergraduate scholarship opportunities and sponsor vacation work programs to engage female students who are entering tertiary education to consider engineering as a career option; and</li> <li>&gt; strive for gender balance in the recruitment of graduates each year.</li> </ul>	Continued sponsorship of the Women in Engineering program at the University of Wollongong in 2012 that provides both a financial benefit and work placement opportunity.  In 2012, equal numbers of male and female graduates were offered positions.  The Company has attended career expos at Curtin University, the University of Adelaide and the University of Wollongong and sponsored Engineering awards at Wollongong University.

<i>Objective</i>	<i>Diversity measures to facilitate achievement of objectives</i>	<i>Progress</i>
To reward and remunerate fairly	<p>Adelaide Brighton has a policy to provide equal pay for equal work.</p> <hr/> <p>As part of the annual salary review process, Adelaide Brighton undertakes a review of pay parity.</p> <hr/> <p>Pay parity is also considered at the time of hiring new employees, to eliminate potential gaps in pay arising from hiring decisions.</p>	The gender pay parity review was completed in 2012 as part of Adelaide Brighton's annual remuneration review processes.
To provide flexible work practices	<p>Adelaide Brighton seeks to provide suitable working arrangements for employees returning from maternity leave.</p> <hr/> <p>Flexible working arrangements are available to all employees under our flexible work policy, to recognise that employees may have different domestic responsibilities throughout their career. This includes opportunities to work part time and from home or a remote location.</p> <hr/> <p>We also offer 12 weeks' paid parental leave for the primary carer.</p> <hr/> <p>Formal review of all part time work arrangements to ensure roles are appropriate to maintain career development.</p>	Of the women who commenced and finished maternity leave in 2012, 100% have returned to work in either a full or part time capacity.

Adelaide Brighton is committed to the regular review of its objectives to ensure that these continue to be appropriate and relevant. The Board is committed to build upon the achievements to date and reinforce the continued efforts in promoting and cultivating a culture of diversity and inclusiveness.

The proportion of women across Adelaide Brighton's workforce is reflective of the generally low level of female representation in the building, manufacturing and construction materials industries in which we operate. We recognise that the available pool of female candidates in engineering roles relevant to our business operations is limited, and this impacts our ability to increase the number of female new hires in the short term. In an effort to make our company (and industry) more attractive to women, we have focussed on measures designed to increase the proportion of female graduates and to support the leadership development of female employees who are recognised as having future potential.

We believe that, over time, our diversity objectives and measures will achieve an improvement in the level of female representation across the organisation.

The following table shows the proportional representation of women employees at various levels within the Adelaide Brighton Group (as at 31 December 2012):

Board	16%
Senior Executives (KMP's)	14%
Senior Managers (Direct reports to KMP's)	18%
Total workforce	12%

A copy of Adelaide Brighton's Diversity Policy is available in the corporate governance section of Adelaide Brighton's website.

**Directors' report**

The Directors present their report on the consolidated entity (the Group) consisting of Adelaide Brighton Ltd (the Company) and the entities it controlled at the end of, or during, the year ended 31 December 2012.

**Directors**

The Directors of the Company, at any time during or since the end of the financial year and up to the date of this report, are:

L V Hosking  
 R D Barro  
 G F Pettigrew  
 K B Scott-Mackenzie  
 A M Tansey  
 M P Chellew  
 C L Harris (retired 17 May 2012)

**Principal activities**

During the year the principal activities of the Group consisted of the manufacture and distribution of cement, and cementitious products, lime, premixed concrete, aggregates, sand and concrete products.

**Review of operations**

A summary of the financial results for the year ended 31 December 2012 is set out below:

<i>(\$ Million)</i>	<i>2012</i>	<i>2011</i>
<b>Revenue</b>	<b>1,176.2</b>	1,100.4
Depreciation and amortisation	<b>(65.2)</b>	(57.8)
<b>Earnings before interest and tax ("EBIT")</b>	<b>225.6</b>	223.4
Net interest	<b>(16.4)</b>	(17.0)
<b>Profit before tax</b>	<b>209.2</b>	206.4
Income tax expense	<b>(55.1)</b>	(58.0)
<b>Net profit after tax</b>	<b>154.1</b>	148.4
Attributable to:		
Members of Adelaide Brighton Ltd	<b>154.2</b>	148.4
Non-controlling interests	<b>(0.1)</b>	-
Basic earnings per share (cents)	<b>24.2</b>	23.3
Ordinary dividend per share (cents)	<b>16.5</b>	16.5
Franking (%)	<b>100%</b>	100%
Net debt	<b>312.3</b>	248.4
Net debt/equity (%)	<b>31.0%</b>	26.0%

2012 net profit after tax attributable to members of the Company increased 3.9% compared to the prior year to \$154.2 million. Revenue of \$1,176.2 million increased by 6.9% primarily due to stronger demand from resource and project work in South Australia, Western Australia and the Northern Territory which offset general weakness in both the residential and non-residential building sectors.

Earnings before interest and tax (EBIT) increased by 1.0% to \$225.6 million. Higher energy costs, including the impact of the introduction of the price on carbon, a reduction in equity accounted contribution from joint ventures and a mix shift toward projects in regional areas, which include a low margin freight component, negatively impacted margins despite cost saving initiatives that delivered \$8.5 million in benefits.

Profit before tax increased 1.4% to \$209.2 million. Net interest decreased by 3.5% to \$16.4 million as higher levels of capitalised interest, driven by major capital project expenditure, and lower interest rates offset the impact of higher levels of debt.

**Cement**

Cement sales increased from the prior year as demand from mining, resources and projects in South Australia, Western Australia and the Northern Territory more than offset weakness in the residential and non-residential sectors. Declining residential demand in Victoria led to lower cement sales in Victoria, while clinker sales were impacted by depressed market conditions in Queensland.

Cement average selling prices increased at slightly higher than inflationary levels, constrained by the high Australian dollar, with cost increases offsetting the benefits of higher selling prices. Energy costs increased by 8% including the \$3 million after tax impact of the carbon tax. Cement margins were also impacted by the reduction in clinker production of approximately 80,000 tonnes at the Birkenhead plant in South Australia, as reliability issues resulted in longer maintenance shutdown periods than planned. This resulted in sales to Independent Cement and Lime being supplemented by imported product. The cost of imports and higher maintenance impacted pre-tax profits by approximately \$6 million. Quality issues associated with alternative fuel, the cause of the deterioration in reliability, have been resolved and production has returned to normal.

Adelaide Brighton is Australia's largest importer of cement and clinker and has an unmatched network of import terminals that provide cost competitive access to all mainland capital city markets and regional north west Western Australia. Adelaide Brighton imports of cementitious products, including cement clinker, cement and blast furnace slag, were approximately 1.6 million tonnes in 2012.

The high Australian dollar had a favourable impact on import margins of \$1 million compared to the prior year.

#### *Lime*

Lime sales volume increased by over 5% compared to 2011 due to robust demand from the alumina and gold sectors, as well as the resumption of operations at a major customer in the Northern Territory. Margins improved due to increased prices and efficiency improvements that alleviated rising input costs.

The performance of the recently installed bag house filter to kiln 6 at Munster has exceeded expectations for improvement to production capacity.

#### *Concrete and Aggregates*

Adverse weather in the first half of the year and weak demand in the eastern states, combined with the continued contraction in the residential, commercial and industrial sectors negatively impacting on concrete volumes. Aggregate volumes increased due to demand from the Pacific Highway upgrade and the full year benefit from acquisitions in 2011.

Price increases were achieved despite the difficult operating environment, with further announced price rises effective in 2013.

#### *Concrete Products*

Soft demand in the eastern states, particularly housing and commercial sectors, resulted in depressed trading conditions across the masonry markets. Despite the difficult market, revenue increased 2.9% due to improved prices and isolated project work.

Structural changes were implemented within the business following a review of production capacity and key processes, lowering production and overhead costs. These savings were only partly realised within the current year.

#### *Joint Ventures and Associates*

Independent Cement and Lime (ICL) reported a decline in earnings as demand softened due to lower residential activity and completion of major infrastructure projects. ICL's market remains subdued and competitive pressures have restricted price increases, limiting the recovery of inflationary cost pressures.

Sunstate Cement reported lower earnings due to weakness in South East Queensland demand and a reduction in off-take from the joint venture's largest customer.

The Mawsons concrete and aggregates joint venture reported a decline in earnings. The reduction reflects a return to normal trading following the lift in volumes as a result of demand from reconstruction work of flood damaged infrastructure.

Adelaide Brighton acquired a 30% interest in Aalborg Portland Malaysia Sdn. Bhd. (APM) on 5 December 2012. APM is a white clinker manufacturer based in Ipoh, Malaysia. During December, the board of APM approved a US\$18.6 million project to expand white clinker capacity from 180,000 to 300,000 tonnes per annum. Following this, APM recorded a \$5.7 million tax benefit recognising that previously granted government investment allowances would be utilised to reduce future tax. Adelaide Brighton's share of this benefit totalled \$1.7 million.

#### *Operational results*

Cash flow from operations increased by \$35.2 million to \$186.5 million due to effective working capital management and a decrease in income tax payments.

Overall working capital increased in line with sales growth, with inventory and trade and other receivables increasing by \$10.8 million and \$0.7 million respectively, while trade and other payables decreased \$4.0 million. Capital expenditure of \$149.3 million included:

- \$28.7 million for the acquisition of a 30% interest in APM;
- \$48.0 million on the upgrade of Birkenhead, including new cement mill and upgrade of ship loading facilities; and
- \$20.5 million for the upgrade of Munster kiln 5 and 6 projects.

Net debt increased \$63.9 million to \$312.3 million, bringing net debt to equity gearing to 31.0%, which is within the Board's target range of 25% to 45%.

#### **Dividends paid or declared by the Company**

During the 2012 financial year, the following dividends were paid:

- A final dividend in respect of the year ended 31 December 2011 of 9.0 cents per share (fully franked) was paid on 10 April 2012. This dividend totalled \$57,265,003.
- An interim dividend in respect of the year ended 31 December 2012 of 7.5 cents per share (fully franked) was paid on 8 October 2012. This dividend totalled \$47,804,087.

Since the end of the financial year the Directors have approved the payment of a final dividend of 9.0 cents per share (fully franked) to be paid on 16 April 2013.

#### **State of affairs**

No significant changes occurred in the state of affairs of the Group during the financial year.

#### **Events subsequent to the end of the financial year**

As at the date of this report, no other matter or circumstance has arisen since 31 December 2012 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

#### **Likely developments and expected results of operations**

Likely developments in the operations of the Group, known at the date of this report, and the expected results of those operations, have been covered generally within the financial report.

Further information on likely developments in the operations of the Group and the expected results of operations in the future financial years have not been included in this report because the Directors believe it would be likely to result in unreasonable prejudice to the Group.

## Environmental performance

The Group is subject to various Commonwealth, State and Territory laws concerning the environmental performance of Adelaide Brighton's operations.

The Group monitors environmental performance by site and business division, and information about the Group's performance is reported to and reviewed by the Group's senior management, the Board's Safety, Health & Environment Committee, and the Board.

The Company was selected by the Department of Climate Change and Energy Efficiency to be part of its 2012 audit program for compliance with the National Greenhouse Energy Reporting (NGER). The Company's 2010/11FY NGER report was audited by a party selected by the Department and an unqualified audit opinion was issued.

In 2012 the Group's quarrying activities received three penalty infringement notices, for \$1,500 each, and two official cautions. In each case, rectification works or remedial action was taken.

Cockburn Cement Limited ("Cockburn") has an ongoing dialogue with the WA Department of Environment and Conservation ("DEC") concerning its Munster operations, and responds as required to investigations and requests for information. DEC has asserted non-compliance with Cockburn's environmental licence and alleged breaches of the *Environment Protection Act 1986* (WA). Consequently Cockburn is defending legal proceedings brought by DEC in the Magistrates Court of WA arising from the conduct of a contractor at Munster in 2010.

Cockburn issued a Marine Pollution Report to the WA Department of Transport over a fluid spillage at Woodman Point in December 2012, for which prompt responsive action was undertaken and no environmental impact was observed.

## Director profiles

Information relating to Directors' qualifications, experience and special responsibilities are set out on page 32 and 33 of the Annual Report.

Director	Board Meetings		Audit, Risk and Compliance Committee		Nomination and Remuneration Committee		Corporate Governance Committee		Independent Directors' Committee		SH&E Committee

A Number of meetings attended

H Number of meetings held during period of office

<sup>1</sup> C L Harris retired on 17 May 2012

Throughout 2012, the general business of the Corporate Governance Committee was dealt with at the Company's Board Meetings and no separate committee meetings were held.

Particulars of the Company's corporate governance practices, including the roles of each Board Committee, are set out on pages 22 to 29 of this report.

## Directors' interests

The relevant interest of each Director in the share capital of the Company at the date of this report is as follows:

	Ordinary shares
L V Hosking	4,739
R D Barro	193,307,036
G F Pettigrew	7,739
K B Scott-Mackenzie	5,000
A M Tansey	5,000
M P Chellew	448,366

## Directors' meetings

The number of Directors' meetings and meetings of committees of Directors held during the financial year and the number of meetings attended by each Director is as follows:

Full details of the interests in share capital of Directors of the Company are disclosed in Note 31 to the Financial Statements on page 92 of this report. Full details of the interests in Awards of Directors of the Company are set out in the Remuneration Report on pages 42 to 52 of this report.

## Director and executive remuneration

Details of the Company's remuneration policies and the nature and amount of the remuneration of the Directors and certain senior executives are set out in the Remuneration Report on pages 42 to 52 of this report.

## Company Secretaries

The Company's principal Company Secretary is Marcus Clayton, who has been employed by the Company in the two separate offices of General Counsel and Company Secretary since 24 February 2003. He is a legal practitioner admitted in South Australia with 24 years experience.

Two other employees of the Company also hold the office of Company Secretary to assist with secretarial duties should the principal Company Secretary be absent: the Company's Chief Financial Officer, Michael Kelly, a Certified Practising Accountant who has been a Company Secretary since 23 November 2010 and the Group's Corporate Affairs Adviser, Luba Alexander, who has been a Company Secretary since 22 March 2001.

### Indemnification and insurance of officers

Rule 9 of the Company's constitution provides that the Company indemnifies each person who is or who has been an "officer" of the Company on a full indemnity basis and to the full extent permitted by law, against liabilities incurred by that person in their capacity as an officer of the Company or of a related body corporate.

Rule 9.1 of the constitution defines "officers" to mean:

- Each person who is or has been a Director, alternate Director or executive officer of the Company or of a related body corporate of the Company who in that capacity is or was a nominee of the Company; and
- Such other officers or former officers of the Company or of its related bodies corporate as the Directors in each case determine.

Additionally the Company has entered into Deeds of Access, Indemnity and Insurance with all Directors of the Company, its wholly owned subsidiaries, and nominee Directors on the Board of Independent Cement & Lime Pty Ltd. These deeds provide for indemnification on a full indemnity basis and to the full extent permitted by law against all losses or liabilities incurred by the person as an officer of the relevant Company. The indemnity is a continuing obligation and is enforceable by an officer even if he or she has ceased to be an officer of the relevant Company or its related bodies corporate.

The Company was not liable during 2012 under such indemnities.

Rule 9.5 of the constitution provides that the Company may purchase and maintain insurance or pay or agree to pay a premium for insurance for "officers" (as defined in the constitution) against liabilities incurred by the officer in his or her capacity as an officer of the Company or of a related body corporate, including liability for negligence or for reasonable costs and expenses incurred in defending proceedings, whether civil or criminal and whatever their outcome.

During the year the Company paid the premiums in respect of Directors' and Officers' Liability Insurance to cover the Directors and Secretaries of the Company and its subsidiaries, and the General Managers of each of the divisions of the Group, for the period 1 May 2012 to 30 April 2013. Due to confidentiality obligations under that policy, the premium payable and further details in respect of the nature of the liabilities insured against cannot be disclosed.

### Proceedings on behalf of the Company

No person has applied for leave of the Court to bring proceedings on behalf of the Company or to intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings. The Company was not a party to any such proceedings during the year.

### Non-audit services

The Company may decide to employ the auditor on assignments additional to their statutory audit duties where the auditor's experience and expertise with the Company and the Group are important.

Details of the amounts paid or payable to PricewaterhouseCoopers for audit and non-audit services provided during the year are set out in Note 32 to the Financial Statements on page 93 of this report.

The Board of Directors has considered the position and, in accordance with the advice received from the Audit, Risk and Compliance Committee, is satisfied that the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*. The Directors are satisfied that the provision of non-audit services by the auditor, as set in note 32, did not compromise the auditor's independence requirements of the *Corporations Act 2001* for the following reasons:

- All non-audit services have been reviewed by the Audit, Risk and Compliance Committee to ensure they do not impact the impartiality and objectivity of the auditor; and
- None of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants.

### Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the *Corporations Act 2001* is set out on page 102.

### Rounding off

The Company is of a kind referred to in ASIC Class Order 98/100 relating to the "rounding off" of amounts in the Directors' report. In accordance with that Class Order, amounts in the financial report and Directors' report have been rounded off to the nearest one hundred thousand dollars, unless otherwise stated.

### Shares under option

The details of shares under option at the date of this report are set out in Notes 30 and 31.

### Registered Office

The registered office of the Company is Level 1, 157 Grenfell Street, Adelaide, SA 5000.

Dated 7 March 2013

Signed in accordance with a resolution of the Directors

Mark Chellew  
Managing Director

The Remuneration Report is set out under the following main headings:

**Introduction** - 2012 overview

**Section 1** - Policy and structure of executive remuneration

**Section 2** - Group performance 2012

**Section 3** - Managing Director and senior executive remuneration

**Section 4** - Non-executive Directors' fees

## Introduction: 2012 overview

The Directors of Adelaide Brighton Limited present the Remuneration Report for Adelaide Brighton Limited (the Company) and the Group for the year ended 31 December 2012 in accordance with section 300A of the *Corporations Act*. This Remuneration Report, which forms part of the Directors' Report, has been audited by PricewaterhouseCoopers.

This report sets out remuneration information for key management personnel, which encompasses the non-executive Directors, the Managing Director (and CEO) and members of the senior executive team, and explains how the Group's performance for the 2012 financial year has driven remuneration outcomes for senior executives.

## Summary of remuneration matters in 2012

The Nomination and Remuneration Committee has taken time this year to engage with and listen to a range of our shareholders on remuneration matters. We have sought to simplify the Remuneration Report disclosures again this year to help shareholders understand our remuneration policies and practices and to more clearly show the alignment between executive reward and Company performance.

The Board seeks to appropriately motivate, reward and retain our senior executive team in the context of the broader community sentiment regarding executive pay. In this context, the Board's current remuneration policies and practice reflect the fact that our executive team has been very stable over a long period and that the team has delivered very strong results for shareholders over an extended period.

We believe that our remuneration practices represent a balance that has kept our successful executive team together and provided rewards for those executives over a number of years reflecting their performance in strategically growing revenue and profit which has resulted in strong growth in total shareholder return. The Company's Total Shareholder Return (TSR) performance has placed the Company in the top quartile of the S&P/ASX200 over the period in which Mr Chellew has been Managing Director. The Board believes that the Managing Director's total remuneration reflects his and the Group's outstanding long term performance, particularly in challenging market conditions over the past three years.

A summary of the key remuneration outcomes for the 2012 financial year and certain other changes approved by the Board is set out below.

## Fixed remuneration

Following a two year freeze on fixed remuneration for the Managing Director during 2010 and 2011, the Nomination and Remuneration Committee reviewed the fixed remuneration of the Managing Director and the senior executives.

Effective 1 January 2012, the Managing Director's fixed remuneration was increased by 12% to \$1,680,000. While the Board recognises that this is a sizeable increase, it came after a two year freeze on his remuneration, is reflective of his outstanding performance record over the previous 10 years and places the Managing Director at the 75th percentile of his peer group.

## Short Term Incentive (STI)

As in previous years, the annual short term incentive comprised 80% financial targets and 20% functional targets in 2012. As a result of generating a solid profit, which was above 110% of budget, in an unpredictable economic environment, the financial target was met at Tier 4, resulting in STI opportunities for the Managing Director and senior executives of 100% and 80% respectively.

Functional targets for the Managing Director and senior executives were met at between 65% and 89% for the year.

## Long Term Incentive (LTI)

As foreshadowed last year, as part of the transition to making annual grants under the Executive Performance Share Plan with a single four year performance period, a transitional Award was made under the Plan in 2012. This comprised two tranches, one eligible to vest in 2015 and the other in 2016, both vesting subject to achieving relative total shareholder return and earnings per share growth targets. Awards have previously been granted in batches comprising three tranches.

During 2012, Tranche 1 of the 2010 Awards were tested in May 2012. These vested at 99.3%, having exceeded the 75th percentile against the relative total shareholder return performance condition and having just missed maximum vesting against the annual growth in EPS target of 7.9% per annum (actual EPS growth over the performance period was 7.8%).

## Non-executive Directors

The fees payable to non-executive directors for the 2012 financial year increased from \$890,719 to \$906,572, within the maximum aggregate amount of \$1,100,000 per annum approved by shareholders at the 2010 Annual General Meeting.

## Overview of remuneration components

An overview of the components of remuneration for Directors and senior executives is set out below:

	Remuneration component	Directors			Senior Executives	Discussion in Remuneration Report
		Non-Executive	Executive			
Fixed remuneration	Fees	✓	✗	✗	pages 51, 52	
	Salary	✗	✓	✓	pages 46, 51	
At-risk remuneration	Short term incentive	✗	✓	✓	pages 46-48	
	Long term incentive	✗	✓	✓	pages 48-50	
Post-employment	Superannuation	✓	✓	✓	pages 51, 52	
	Notice periods & termination payments	✗	✓	✓	page 50	

### Key activities during 2012 and outcomes for 2013

- Senior executive remuneration** - During the latter part of 2012, the Nomination and Remuneration Committee undertook a review of senior executive remuneration (including the Managing Director's remuneration) and has approved a modest 3.5% increase to the fixed remuneration of all senior executives which became effective on 1 January 2013.
- Managing Director remuneration** - Following the review of the Managing Director's total remuneration, the Board has determined that the Managing Director's fixed remuneration for 2013 also be increased by 3.5% (to \$1,738,800 per annum).
- LTI** - As previously disclosed, following a comprehensive review of the structure of the LTI Plan in 2011, the Board decided to transition from its practice of making a grant of three years worth of LTI Awards to senior executives every three years, to annual grants of Awards over a performance period of 4 years from 2013. The

transitional 2012 Award (granted in May 2012) was considered necessary to achieve continuity in the Company's LTI Plan following expiry of the last tranche of the 2010 Award in 2014, while moving to a schedule under which annual grants of Awards are made 4 years before they are tested. The 2013 Award will be first annual grant made to senior executives, in May 2013 - subject to a single 4 year performance period, and with testing and vesting in May 2017. Shareholder approval will be sought at the 2013 Annual General Meeting for LTI Awards proposed to be granted to the Managing Director in May 2013.

- Non-executive Director remuneration** - The Nomination and Remuneration Committee reviewed the level of fees for membership of the Board and of the Board's committees during 2012. The Board has approved a 3.5% increase to the level of these fees effective from 1 January 2013, to be in line with market median rates.

As the above outcomes do not form part of the remuneration of executives in 2012, further details will be reported in next year's Remuneration Report for the 2013 financial year.

## Section 1 - Policy and structure of executive remuneration

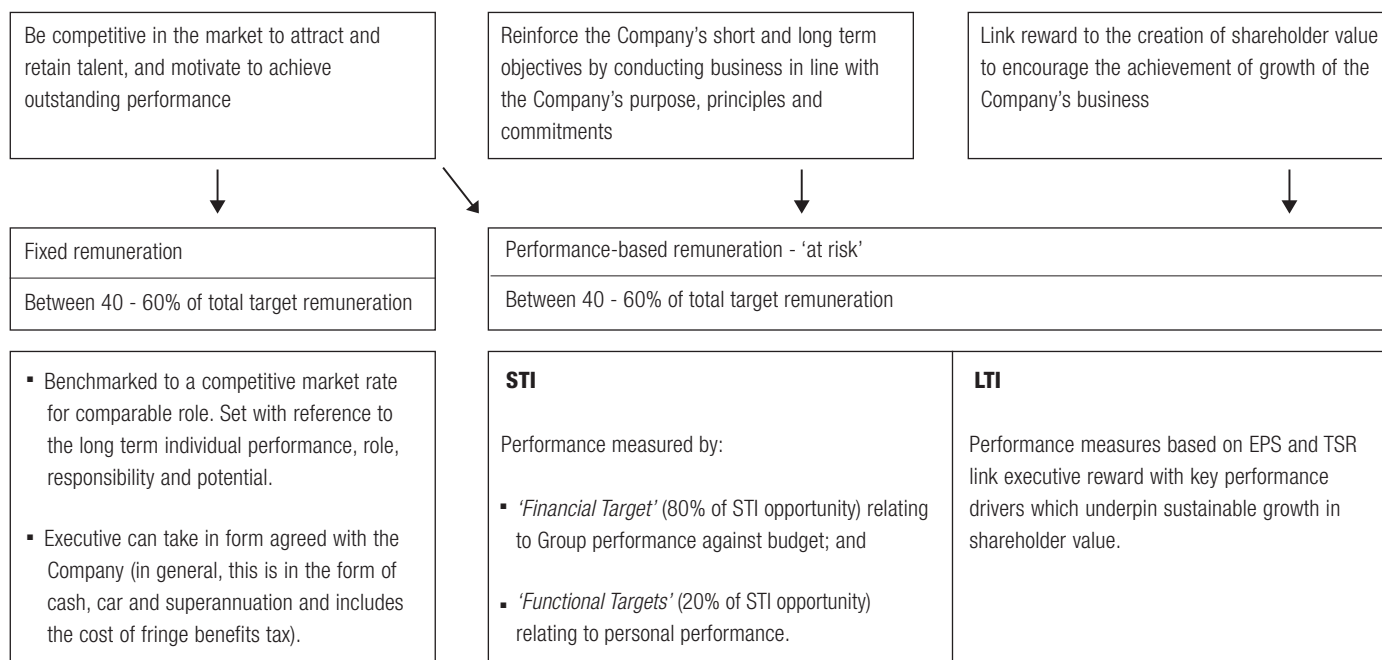

### 1.1 Executive remuneration policy and objectives

The Company's remuneration strategy and policy are set by the Board and overseen by the Nomination and Remuneration Committee.

In determining the executive remuneration framework, the Board has adopted a policy that aims to:

- be competitive in the markets in which the Group operates in order to attract, motivate and retain a highly capable executive team (and each individual's remuneration is set with reference to the degree of individual performance, role, responsibility and future potential within the Group);
  - drive leadership performance and behaviours that reinforce the Group's short and long term strategic objectives;
  - provide a common interest between executives and shareholders by linking the rewards that accrue to executives to the creation of value for shareholders;
  - have regard to market practice and market conditions; and
  - provide transparency and clarity on what is paid, to whom and on what basis remuneration has been paid.
- The remuneration policy seeks to support the Group's objective to be perceived as "an employer of choice" by:
- offering remuneration levels which are competitive relative to those offered by comparable employers; and
  - providing strong and transparent links between individual and Group performance and rewards.

The Board aims to achieve a balance between fixed and performance related (or 'at-risk') components of remuneration for each role and seniority level. The diagram below shows the policy implementation and remuneration arrangements as they apply to executives:

## 1.2 Responsibility for setting remuneration

The Nomination and Remuneration Committee is responsible for reviewing and making recommendations to the Board on Director and executive remuneration policy and structure.

The Board, based on the recommendations of the Nomination and Remuneration Committee, establishes the remuneration of the Managing Director, including his participation in the short term and long term incentive schemes.

The Nomination and Remuneration Committee, based on the recommendations of the Managing Director, approves the remuneration of senior executives reporting to the Managing Director, including their participation in both short term and long term incentive schemes.

The Nomination and Remuneration Committee follows protocols around the engagement and use of external remuneration consultants to ensure on-going compliance with executive remuneration legislation. This is to ensure that any remuneration recommendation from an external consultant is free from the undue influence by any member of the Company's key management personnel to whom it relates.

In 2012, the Committee undertook an internal review of the remuneration of senior executives and non-executive Directors, and also engaged jws consulting to provide independent governance and legal advice in relation to senior executive remuneration.

## Section 2 - Group performance 2012

### 2.1 The link between performance and the long term incentive (LTI)

The Company's long term incentive arrangements for the Managing Director and senior executives (described in section 3.4 below) are judged against two performance measures - total shareholder return (TSR) and earnings per share (EPS). The Board believes these performance conditions align executive rewards with the long term creation of shareholder wealth, through which senior executives focus on medium to longer term strategic decision making.

### Shareholders' wealth improvement from year 2009 to year 2012

Financial year ended 31 December	2012	2011	2010	2009
Closing share price (\$ as at 31 December)	3.12	2.89	3.30	2.75
Total dividends per share (cents)	16.5	16.5	21.5	13.5
Franked dividends	100%	100%	100%	100%
Operating cash flow	\$186.5m	\$151.3m	\$188.5m	\$188.1m
Earning per share – EPS (cents)	24.2	23.3	23.9	20.4

As can be seen from the table above, the Company has:

- Generated an average annual increase in EPS of 5.9% since 2009; and
- Maintained a strong dividend payout ratio to profit earned.

TSR measures the change in shareholder wealth over time - being the dividends paid by the Company, changes in share price and any return of capital over the relevant period.

EPS divides earnings by the number of shares on issue (which includes the effect of capital raisings).

The table below shows details of dividends paid, the closing price of Adelaide Brighton shares on 31 December in each of the past four years and details of operating cash flow.

Tranche 1 of the 2010 Awards granted to senior executives was measured at 99.3% based on performance against the applicable TSR and EPS performance conditions measured over period commencing 1 January 2010 and ending on 31 December 2011.

Looking at the Company's long term performance, the graph below shows the performance of Adelaide Brighton's share price, with dividends reinvested, versus the S&P/ASX200 Accumulation Index from 1 January 2002 to 31 December 2012. The Adelaide Brighton share price has outperformed S&P/ASX200 Accumulation Index, reflecting the strength of its core markets in the resources and construction materials sectors and the success of the Group's strategy.

Source: ASX/First Advisers Pty Ltd

## 2.2 The link between annual earnings and the short term incentive (STI)

In 2012, Adelaide Brighton reported record sales revenue growth, an increase in earnings before interest and tax (EBIT) and net profit after tax (NPAT) as demand from projects offset weakness in the residential sector.

The Group's profit before tax (PBT) for 2012 was \$209.2 million. The Managing Director and senior executives satisfied the Financial Component of the performance conditions applicable to the 2012 STI as the Group achieved above 110% of budgeted PBT after exceptional, abnormal and extraordinary items (no adjustment for exceptional, abnormal and extraordinary items was made in 2012). Tier 4 of the STI was reached, resulting in an STI opportunity equal to 80% of fixed remuneration for senior

executives and 100% of fixed remuneration for the Managing Director.

In accordance with the STI program detailed further in section 3.3 below, 80% of the maximum STI opportunities were payable based on the achievement of Financial Targets and 20% of the maximum Functional Target opportunities were determined on each individual's success in achieving personal targets. The achievement of these personal targets by the individuals varied between 65% and 89% of the Functional Targets.

The table below sets out the Group's performance over a number of key performance indicators - sales revenue, earnings before interest and tax (EBIT), EBIT Margin, profit before tax (PBT) and net profit after tax (NPAT) - over the past four financial years.

### Earnings improvement from 2009 to 2012

Financial year ended 31 December	2012	2011	2010	2009
Sales revenue - \$ million	1,176.2	1,100.4	1,072.9	987.2
Earnings before interest and tax (EBIT) - \$ million	225.6	223.4	216.2	185.3
EBIT margin - %	19.2%	20.3%	20.2%	18.8%
Profit before tax (PBT) - \$ million	209.2	206.4	202.2	168.6
Net profit after tax (NPAT) - \$ million	154.1	148.4	151.5	123.1

The Group's committed executive team, has overseen a consistent strategy over the four year period shown in the table above, have delivered strong results over the past four years:

- an improvement in EBIT from \$185.3 million in 2009 to \$225.6 million in 2012, a 21.7% increase;
- PBT increase from \$168.6 million in 2009 to \$209.2 million in 2012, a 24.1% increase; and
- an increase in NPAT from \$123.1 million in 2009 to \$154.1 million in 2012, a 25.2% increase.

As a result of securing long term customer contracts, supply contracts for clinker and the successful implementation of the Company's capital expenditure program, management is confident that the Group is strategically well positioned to continue to maximise shareholder returns.

### Section 3 - Managing Director and senior executive remuneration

The following remuneration information is provided for the Managing Director and members of the senior executive team on the basis that these executives had the authority and responsibility for planning, directing and controlling the activities of the Company and the Group during the 2012 financial year. These individuals are the key management personnel (KMP) for the 2012 financial year.

<i>Executives</i>	<i>Position</i>
<b>Managing Director</b>	
M P Chellew	Managing Director and CEO
<b>Senior executives</b>	
G Agriogiannis	Executive General Manager, Concrete and Aggregates
M Brydon	Executive General Manager, Cement and Lime
M R D Clayton	General Counsel and Company Secretary
M Kelly	Chief Financial Officer
S B Rogers	Executive General Manger, Concrete Products
S J Toppenberg	Executive General Manger, Human Resources

#### 3.1 Components of executive remuneration

The executive remuneration framework for the Managing Director and all senior executives consists of the following components:

- **Fixed remuneration** - guaranteed base salary (inclusive of superannuation) expressed as a dollar amount that the executive may take in a form agreed with the Company.
- **Performance based remuneration** - incentive or 'at-risk' components which comprise an annual short term incentive and long term incentives, awarded at set levels for target or stretch (outstanding) performance.

#### 3.2 Fixed remuneration

The amount of fixed remuneration for an individual executive is set with regard to the size and nature of an executive role, the long term performance of an individual and his or her future potential within the Group. Executives may elect to have a combination of benefits provided out of their fixed remuneration, including cash, additional superannuation and the provision of a motor vehicle. The fixed remuneration of the Managing Director and senior executives for 2012 is outlined in section 3.6.

*What is the maximum amount the executives can earn?*

#### Maximum STI opportunity

<i>2012 Group performance against budget</i>	<i>% of fixed remuneration</i>		
	<i>Managing Director</i>	<i>Senior executives</i>	
Initial Target (Tier 1)	90% - 99%	12%	10%
Target (Tier 2)	100%	60%	50%
Partial Stretch (Tier 3)	101% - 109%	64% - 96%	53% - 77%
Stretch (Tier 4)	110% or greater	100%	80%

Fixed remuneration is reviewed annually under normal circumstances, as provided under the Service Agreements for executives. Fixed remuneration is benchmarked against comparable roles within comparable companies.

The Board notes that Mr Chellew's fixed remuneration has been set above the median of his ASX peers. This is in accordance with the Company's remuneration policy (detailed in section 1.1) on the basis that the Company and its shareholders have enjoyed outstanding returns over the period Mr Chellew has been Managing Director.

#### 3.3 At-risk remuneration - Short Term Incentive (STI)

##### 3.3.1 Summary of STI program

*What is the STI and who participates?*

The STI program links specific annual performance targets (predominantly financial) with the opportunity to earn cash incentives based on a percentage of fixed remuneration.

Participation in the STI is generally offered to the Managing Director and senior executives who are able to have a direct impact on the Group's performance against the relevant performance hurdles.

#### *How are performance criteria set?*

The performance criteria are set by the Board and agreed with the executive, in general, by the end of February in each year.

#### *What were the performance conditions for the 2012 STI program?*

For the 2012 financial year, the performance conditions comprised a mix of financial and non-financial performance measures:

- 1 80% is tested on the Group's performance against budget (Financial Target); and
- 2 20% is tested on both the Group's performance against its budget and the senior executive/Managing Director meeting personal targets agreed with the Managing Director/Board (Functional Targets).

Accordingly, the cash bonus is dependent on both the Group's performance and the individual's performance.

#### *Why were these performance conditions chosen?*

The key financial measure used is Profit Before Tax, which the Board believes is an appropriate annual performance target, aligned to Group budget.

Profit Before Tax (PBT) is defined for STI purposes as net profit after interest but before income tax expense which may be adjusted for exceptional, abnormal, extraordinary items and the effect of acquisitions made during the financial period. A percentage of the executive's 2012 STI is also subject to additional personal (functional) performance hurdles appropriate to each executive's role.

#### *What are personal or functional performance hurdles?*

Personal or Functional (performance) Targets for each financial year are agreed with the Managing Director and the senior executives, and are set to drive leadership performance and behaviours consistent with achieving the Group's objectives.

These include the development and execution of strategic plans, investigations and implementation of value adding growth options (including acquisitions and organic growth initiatives), safety performance, succession planning, individual business unit profit targets, negotiation of certain significant long term and short term customer and supply contracts, compliance with regulatory authorities' requirements and other specific personal or functional performance objectives which align the interests of Company executives and shareholders. Further details of the achievement of these performance targets by senior executives in 2012 are set out in section 3.3.2 below.

#### *How is performance against the performance conditions assessed?*

In respect of the Financial Targets, the Board reviews the budgeted targets for the year, focusing on the PBT financial measure, and assesses the degree to which the Group met these targets. Where applicable, abnormal, extraordinary or unanticipated factors, which may have affected the Group's performance during the year, are considered and where necessary, the Group's performance is adjusted for the purposes of assessing performance against the target.

The Board also considers the Nomination and Remuneration Committee's assessment of the Managing Director's performance against the agreed Functional Targets, and that of the senior executives (based on the recommendation of the Managing Director).

#### *When is performance against criteria determined and the cash award paid?*

Assessment of performance against the performance hurdles for the relevant year is determined at the first meeting of the Nomination and Remuneration Committee and the Board subsequent to the balance date, in conjunction with finalisation of the Group's full year results (generally in February), and is normally paid to the executive by March.

#### *What happens to the STI award on cessation of employment?*

In general, where an executive's employment is terminated by the Company (other than for cause) during the course of a performance year, the executive is entitled to a pro-rata STI for that proportion of the current financial year elapsed on the termination date. In general, where an executive's employment ceases by reason of resignation, any STI opportunity lapses.

### **3.3.2 2012 STI outcomes**

As indicated in section 2.2, the Financial Target component of the STI, comprising 80% of the opportunity is assessed against the Group's PBT, which at \$209.2 million, achieved above 110% of budget. The remaining 20% of the STI opportunity which is assessed against Functional Targets were determined on each individual's success in achieving personal targets. During 2012, the senior executives accomplished a number of objectives and projects which contributed to the Group's performance in 2012 and which will reinforce future performance. These include:

- significant enhancement in safety performance across the Group's business divisions;
- negotiating and executing cement and lime supply arrangements with major customers in South Australia and Western Australia;
- concluding negotiations and executing contracts with the Company's Independent Cement & Lime joint venture for cement supply arrangements in New South Wales and Victoria;
- developing relationships leading to the Group executing agreements securing new long term commitments for the Group's imports of clinker, which underwrite the Group's import strategy;
- successful commissioning of a number of capital works in the Group's Cement and Lime Division resulting in improved efficiency, sustainability, environmental and operational performance, including the Munster Kiln 6 Bag House Filter and Cooler Bag, and resulting in enhanced product offerings, including the Cement Mill 7 at Birkenhead and the slag blending facility at Darwin;
- extension of approvals for the Austen Quarry; and
- successful, low cost implementation of SAP in the Group's Concrete and Aggregates Division.

These accomplishments contributed to individuals achieving their personal targets, which varied between 65% and 89% of the Functional Targets.

Overall, the achievement of the Financial and Functional Targets resulted in the STI opportunity being awarded at Tier 4 of the STI.

Specific information relating to the percentage of the 2012 and 2011 STI which was paid and the percentage that was forfeited for the Managing Director and senior executives of the Company and Group is set out in the table below.

## STI for the 2012 and 2011 financial years

Managing Director & senior executives <sup>5</sup>		STI opportunity as % of fixed remuneration <sup>1</sup>	Actual STI as a % of STI opportunity <sup>1</sup>	% of STI opportunity <sup>1</sup> payment not achieved <sup>2</sup>	Actual STI payment <sup>3</sup>
Year		%	%	%	\$
M P Chellew	<b>2012</b>	<b>100.0</b>	<b>97.7</b>	<b>2.3</b>	<b>1,641,360</b>
	2011	96.0	98.6	1.4	1,419,840
G Agriogiannis <sup>4</sup>	<b>2012</b>	<b>80.0</b>	<b>93.0</b>	<b>7.0</b>	<b>340,752</b>
	2011	77.0	<b>96.4</b>	3.6	163,302
M Brydon	<b>2012</b>	<b>80.0</b>	<b>97.1</b>	<b>2.9</b>	<b>714,656</b>
	2011	77.0	98.2	1.8	571,642
M R D Clayton	<b>2012</b>	<b>80.0</b>	<b>97.8</b>	<b>2.2</b>	<b>367,728</b>
	2011	77.0	98.8	1.2	338,919
M Kelly	<b>2012</b>	<b>80.0</b>	<b>97.7</b>	<b>2.3</b>	<b>511,948</b>
	2011	77.0	98.5	1.5	467,205
S B Rogers	<b>2012</b>	<b>80.0</b>	<b>93.8</b>	<b>6.2</b>	<b>341,057</b>
	2011	77.0	92.2	7.8	310,102
S J Toppenberg	<b>2012</b>	<b>80.0</b>	<b>97.4</b>	<b>2.6</b>	<b>312,070</b>
	2011	77.0	97.8	2.2	289,928

1 STI opportunity for 2012 is based on Tier 4 stretch (2011 Target STI was at partial stretch STI Tier 3).

2 Where the actual STI payment is less than maximum potential, the difference is forfeited and does not become payable in subsequent years.

3 2012 and 2011 STI constituted a cash bonus granted during 2012 and 2011 respectively. The 2012 STI was determined in conjunction with the finalisation of 2012 results and paid in February 2013. Similarly, the 2011 STI was determined in conjunction with the finalisation of 2011 results and paid in February 2012.

4 G Agriogiannis commenced employment on 27 June 2011.

5 M A Finney ceased employment effective 9 May 2011 and did not receive a 2011 STI payment.

### 3.4 At-risk remuneration - Long Term Incentive (LTI)

#### 3.4.1 Summary of the Executive Performance Share Plan

##### What is the Plan and who participates?

The Group's LTI arrangements are designed to link executive reward with sustainable growth in shareholder value.

The Plan provides for grants of Awards to eligible executives, each Award being an entitlement to a fully paid ordinary share in Adelaide Brighton Ltd, subject to the satisfaction of performance conditions, on terms and conditions determined by the Board.

Participation in the Plan is generally offered to the Managing Director and executives who are able to influence the generation of shareholder wealth and thus have a direct impact on the Group's performance against the relevant performance hurdles.

The current Awards that have been issued under the Plan are the "2010 Awards" and "2012 Awards". The Board intends to make a grant as the "2013 Awards" in May 2013.

##### What are the performance conditions and why were they chosen?

Awards are measured against a TSR performance condition (as to 50% of each Award) and an EPS performance condition (as to the other 50%).

The Board considers these performance conditions to be appropriate because they ensure that a proportion of each executive's remuneration is linked to the generation of profits (expressed on a per share basis) and shareholder value.

In particular, the use of a relative TSR based hurdle:

- ensures alignment between comparative shareholder return and reward for the executive; and
  - provides a relative, external market performance measure, having regard to those companies with which the Group competes for capital, customers and talent.
- An absolute EPS growth based hurdle:
- links executive reward to a fundamental indicator of financial performance; and
  - links directly to the Group's long term objectives of maintaining and improving earnings.

The use of dual performance measures combines a strong external market based focus through share price growth and dividends (TSR), and a non-market based measure aimed at driving improved Company results and the creation of shareholder wealth (EPS).

##### What happens on the exercise of Awards?

Awards become exercisable (subject to satisfaction of relevant performance conditions) on 1 May of the relevant year. Shares are delivered to the executive on exercise of the Awards. Awards are granted at no cost to the executive and no amount is payable by the executive on exercise of the Awards. See section 3.4.2 below for details of the relevant earliest exercise date of Awards and expiry date of unexercised Awards for the 2010 Awards, 2012 Awards and 2013 Awards.

##### Is re-testing permitted?

No. Re-testing of either of the performance conditions applicable to a tranche of Awards is not permitted.

##### What happens to Awards that are not yet exercisable on cessation of employment?

If an executive resigns or is terminated for cause, the Awards in respect of any tranche that is not exercisable will generally be forfeited.

The Plan Rules provide that in other circumstances a pro rata number of Awards, reflecting the part of the LTI earned or accrued up to termination, may become exercisable either at the time of termination of employment or at the end of the original performance period applicable to a tranche.

In addition, a number of executives with pre-2009 contracts have a specific entitlement built into their Service Agreement, which entitles them to pro rata vesting of Awards in the event of Company initiated termination of employment.

##### Is there a claw-back provision?

Yes. The Plan Rules allow the Board to claw-back any Awards on offer to an executive and to make adjustments to any unvested Awards, if considered appropriate.

##### What other conditions apply to the Awards?

An executive's entitlement to shares under an Award may also be adjusted to take account of capital reconstructions and bonus issues. In the event of a takeover bid (or other transaction likely to result in a change in control of the Company), an executive will only be allowed to exercise his or her Awards to the extent determined by the Board as provided in the Plan Rules.

The Plan Rules contain a restriction on removing the 'at-risk' aspect of the instruments granted to executives. Plan Participants may not enter into any transaction designed to remove the 'at-risk' aspect of an instrument before it becomes exercisable (eg. hedging the Awards).

Any shares allocated to the executive following exercise of an Award may only be dealt with in accordance with the Company's Share Trading Policy and subject to the generally applicable insider trading prohibitions.

### 3.4.2 Current Awards - 2010, 2012 and 2013 Awards

As explained in last year's Remuneration Report, the Board decided to move towards making annual grants of Awards under the LTI Plan with a single 4 year performance period, to all senior executives who are eligible to participate in the LTI Plan. The annual grants of Awards will commence in the 2013 financial year.

As the Board's previous practice has been to approve a grant of Awards to senior executives every three years, with the grant divided into 3 tranches vesting over 2, 3 and 4 year performance periods (such as the 2010 Awards) - the Board considered it appropriate to approve a transitional grant (being the 2012 Awards) which is divided into 2 tranches vesting over a 3 and 4 year performance period.

#### 2010 Awards

The 2010 Awards were granted in May 2010 with effect from 1 January 2010 (to coincide with the start of the performance period) and are divided into 3 tranches as follows:

- Tranche 1: 30% of Award - became exercisable on 1 May 2012
- Tranche 2: 30% of Award - earliest exercise date is 1 May 2013
- Tranche 3: 40% of Award - earliest exercise date is 1 May 2014

Any unexercised 2010 Awards will expire on 30 September 2014.

#### 2012 Awards

As a transitional measure, the 2012 Awards were granted in May 2012 with effect from 1 January 2012 (to coincide with the start of the performance period) and are divided into 2 tranches as follows:

- Tranche 1: 50% of Award - earliest exercise date is 1 May 2015
- Tranche 2: 50% of Award - earliest exercise date is 1 May 2016

Any unexercised 2012 Awards will expire on 30 September 2016.

#### 2013 Awards

The Board intends to make the first grant of annual Awards in May 2013, with effect from 1 January 2013:

- 100% of Award - earliest exercise date is 1 May 2017

These 2013 Awards will be subject to a single 4 year performance period and will be tested and become exercisable to the extent of any vesting from 1 May 2017. Any unexercised 2013 Awards will expire on 30 September 2017.

### 3.4.3 2010 Awards - vesting of Tranche 1

As indicated in section 2.1 above, overall 99.3% of Tranche 1 of the 2010 Awards vested on 1 May 2012.

50% of this vesting resulted from the Company's relative TSR performance for the period 1 January 2010 to 31 December 2011 resulting in full vesting of that component having achieved ranking at

TSR growth relative percentile ranking	% of Awards subject to TSR hurdle to vest
Below 50%	Nil
50%	50%
Between 50% and 75%	Pro rata
75% or above	100%

#### How is the EPS performance condition for the 2012 Awards measured?

The EPS performance hurdle requires the compound annual growth in EPS of the Company over the relevant performance period (being, from 1 January 2012 to 31 December 2014 for Tranche 1, and 1 January 2012 to 31 December 2015 for Tranche 2) to equal or exceed 5% per annum before any Awards will vest.

The 2012 Awards are to vest progressively in accordance with the following scale:

Compound annual growth in EPS	% of Awards subject to EPS hurdle to vest
Below 5% per annum	Nil
5% per annum	50%
Between 5% and 10% per annum	Pro rata
10% per annum or above	100%

the 83rd percentile against the S&P / ASX 200 Accumulation Index (XJO AI), excluding all Global Industry Classification Standard (GICS) Financial companies and selected resources companies.

The remaining 49.3% of the Awards that vested arose as the Company's average annual compound EPS growth over the two year performance period was 7.8%, which nearly achieved the 7.9% rate required for full vesting.

For further details of the requisite target ranges for vesting of the TSR and EPS performance conditions of the 2010 Awards, please refer to the Company's 2010 Remuneration Report.

### 3.4.4 2012 Awards - granted in 2012

The terms of the 2012 Awards were considered by shareholders at the 2012 Annual General Meeting.

As set out in section 3.4.1 above, the 2012 Awards are subject to the TSR and EPS performance hurdles, which are independent and to be tested separately.

#### How is the TSR performance condition for the 2012 Awards measured?

The Company's TSR performance must equal or exceed the growth in the returns of the median company of the S&P / ASX 200 Accumulation Index (XJO AI), excluding all GICS Financial companies and selected resources companies, over the period 1 January 2012 to 31 December 2014 (for Tranche 1) and 1 January 2012 to 31 December 2015 (for Tranche 2).

The 2012 Awards are to vest progressively in accordance with the following scale:

### 3.4.5 Movements in Awards during 2012

Details of the movement in Awards held by the Managing Director and senior executives during the 2012 financial year is set out below.

#### Movement in Awards during the year

<i>Managing Director &amp; senior executives</i>	<i>Balance at 31 Dec 2011</i>	<i>Granted 2012 Awards<sup>1</sup></i>	<i>Exercised/ vested Tranche 1 2010 Awards<sup>2</sup></i>	<i>Number of Awards lapsed/ forfeited during the year</i>	<i>Balance at 31 Dec 2012<sup>3</sup></i>	<i>Value of Awards at grant date<sup>4</sup></i>	<i>Value per share at the date of exercise<sup>5</sup></i>	<i>Value at lapse date<sup>6</sup></i>
M P Chellew	1,800,000	1,456,648	536,220	3,780	2,716,648	1,999,250	3.0362	11,471
G Agriogiannis <sup>7</sup>	227,500	198,554	-	-	426,054	272,516	-	-
M Brydon	600,000	531,792	178,740	1,260	951,792	729,885	3.0754	3,824
M R D Clayton	300,000	203,758	89,370	630	413,758	279,659	2.9804	1,912
M Kelly	500,000	378,612	148,950	1,050	728,612	519,645	3.1111	3,186
S B Rogers	325,000	197,038	96,818	682	424,538	270,435	3.3377	2,070
S J Toppenberg	200,000	173,628	59,580	420	313,628	238,305	3.0362	1,275
<b>Total</b>	<b>3,952,500</b>	<b>3,140,030</b>	<b>1,109,678</b>	<b>7,822</b>	<b>5,975,030</b>	<b>4,309,695</b>	<b>-</b>	<b>23,738</b>

1 As the Awards granted in 2012 only vest on satisfaction of performance conditions which are to be tested in future financial periods, none of the 2012 Awards as set out above vested or were forfeited during the year.

2 All 1,109,678 Awards which were exercisable during 2012 were in fact exercised, being Tranche 1 of the 2010 Awards. The number of Awards vested during the period and exercisable at 31 December 2012 is nil. The number of Awards vested but not yet exercisable at 31 December 2012 is nil.

3 The maximum value of currently approved Awards is determined by the maximum number of shares that can be achieved from all unvested Awards under 2010 Awards and 2012 Awards as at 31 December 2012. Refer to note 30(b) for details of the balance of these Awards.

4 Value of Awards granted during 2012 as at grant date.

5 The value per share at the date of exercise is the Value Weighted Closing Price which is the average of the closing price and number of Adelaide Brighton Limited shares traded on the Australian Securities Exchange for the five trading days before the exercise date, but not including the day of exercise. The aggregate value of Awards that vested during the year is \$3,411,571 based on the Value Weighted Closing Price.

6 The value at lapse date of options that were granted as part of remuneration and that lapse during the year because a vesting condition was not satisfied. The value is determined at the time of lapsing, but assuming the condition was satisfied.

7 As G Agriogiannis commenced employment on 27 June 2011, the Board approved a pro-rata grant for him to participate in Tranche 2 and Tranche 3 of the 2010 Award (not Tranche 1).

### 3.5 Service Agreements and termination payments

The remuneration and other terms of employment for the Managing Director and senior executives are set out in formal employment contracts referred to as Service Agreements. All Service Agreements are for an unlimited duration and details of the executives entitlements on termination are set out below.

The Service Agreements of current senior executives other than M Kelly and G Agriogiannis were entered into prior to 24 November 2009, and are not subject to the new limits on termination payments introduced under the *Corporations Act 2001* (with effect from that date). The Company intends honouring its pre-existing contractual commitments to those executives upon separation, as permitted by law. The Service Agreements for M Kelly and G Agriogiannis were entered into during 2010 and 2011 respectively, and the payments made to each on termination under their individual Service Agreements will be within the legislative limit of one times 'base salary' (as defined in the *Corporations Act*).

<i>Name</i>	<i>Notice periods</i>	<i>Separation payments<sup>1</sup></i>
G Agriogiannis	3 months notice by either party (or payment in lieu) May be terminated immediately for serious misconduct	9 months total remuneration where Company terminates on notice
Other senior executives <sup>3</sup> (including Managing Director)	3 months notice by executive 5 weeks notice by Company (or payment in lieu) May be terminated immediately for serious misconduct	12 months total remuneration where Company terminates on notice, or where executive is able to terminate for 'Fundamental Change' <sup>2</sup> Entitlement under the Company Redundancy Policy (if applicable)

1 In the case of resignation, no separation payment is made to the executive (only amounts due and payable up to the date of ceasing employment including accrued leave entitlements and unpaid salary).

2 A 'Fundamental Change' includes circumstances where there has been a substantial diminution of responsibility, a material reduction in status or a relocation of the relevant position (and only certain executive roles have this entitlement).

3 Under an arrangement entered into some time ago, M Brydon is also entitled to an ex-gratia payment of \$10,000 upon termination, as well as payment of accrued sick leave.

On termination of employment for any reason, the Managing Director and other senior executives (other than M Kelly and G Agriogiannis) are prohibited from engaging in any activity that would compete with the Group for a period of up to six months in order to protect the Group's business

interests. During the period of the restraint the executive will be paid a monthly amount equivalent to the executive's monthly fixed remuneration at the time of termination. These restraint arrangements apply to M Kelly in the event he resigns.

### 3.6 2012 Remuneration

Details of the remuneration paid to the Managing Director and key management personnel of the Company and the Group, during the 2012 financial year is set out below.

#### Remuneration for the 2012 and 2011 financial years

	2011	4,453,016	3,560,938	140,737	54,926	-	1,279,815	9,489,432	

1 In accordance with the requirements of the Accounting Standards, remuneration includes a proportion of the notional value of equity compensation granted or outstanding during the year. The notional value of equity instruments which do not vest during the reporting period is determined as at the grant date and is progressively allocated over the vesting period. The amount included as remuneration is not related to or indicative of the benefit (if any) that individual executives may ultimately realise should the equity instruments vest. The notional value of Awards as at the date of their grant has been determined in accordance with the accounting policy note 1(v)(iv).

2 % of remuneration for the financial year which consists of the amortised annual value of Awards issued under the Adelaide Brighton Limited Executive Performance Share Plan.

3 M A Finney ceased employment effective 9 May 2011.

4 G Agriogiannis commenced employment on 27 June 2011, and received a sign-on payment and relocation benefits that were not paid until 2012.

#### Section 4 - Non-executive Directors' fees

##### 4.1 Board policy on non-executive Director fees

The total amount of fees paid to non-executive Directors is determined by the Board on the recommendation of its Nomination and Remuneration Committee within the maximum aggregate amount approved by shareholders. The remuneration of the non-executive Directors consists of Directors' fees, committee fees and superannuation contributions. These fees are not linked to the performance of the Group in order to maintain the independence and impartiality of the non-executive Directors.

In setting fee levels, the Nomination and Remuneration Committee, which makes recommendations to the Board, takes into account:

- the Group's existing remuneration policies;
- independent professional advice;
- fees paid by comparable companies;
- the general time commitment and responsibilities involved;
- the risks associated with discharging the duties attached to the role of Director; and
- the level of remuneration necessary to attract and retain Directors of a suitable calibre.

Total fees, including committee fees, were set within the maximum aggregate amount of \$1,100,000 per annum approved at the 2010 Annual General Meeting.

Non-executive Director base fees were increased by approximately 2%, and the Chairman's fee increased 3.9%, for the 2012 financial year.

Fees payable to non-executive Directors in the 2012 financial year are set out below (and are inclusive of contributions to superannuation).

## Non-executive Directors' fees for 2012<sup>2</sup>

	<i>Chairman</i>	<i>Member</i>
	\$	\$
Board	342,750 <sup>1</sup>	100,000
Audit, Risk and Compliance Committee	24,000	13,500
Nomination and Remuneration Committee	24,000	13,500
Safety, Health and Environment Committee	15,000	10,000
Corporate Governance Committee	10,000	7,500

<sup>1</sup> The Chairman of the Board receives no additional fees for Committee work.

<sup>2</sup> At present, there are no fees payable for the Independent Directors' Committee.

The Group's policy is to support non-executive Director retirement through superannuation contributions.

In accordance with the Company's constitution, Directors are also permitted to be paid additional fees for special duties or exertions. Such fees may or may not be included in the aggregate amount approved by shareholders, as determined by the Directors. No such fees were paid during the year.

Directors are also entitled to be reimbursed for all business related expenses, including travel, as may be incurred in the discharge of their duties.

## 4.2 Fees paid to Non-executive Directors

Details of fees paid to non-executive Directors for the years ended 31 December 2012 and 31 December 2011 are set out below.

## Non-executive Directors' remuneration for the 2012 and 2011 financial years

<i>Non-executive Director</i>	<i>Year</i>	<i>Fees and allowances</i>		<i>Post-employment benefits</i>

## 1 Summary of significant accounting policies

Adelaide Brighton Ltd (the Company) is a company limited by shares, incorporated and domiciled in Australia whose shares are publicly traded on the Australian Securities Exchange (ASX).

The financial report was authorised for issue by the Directors on 7 March 2013. The Directors have the power to amend and reissue the financial statements.

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below.

With the exception of the introduction of an accounting policy for carbon emissions (note 1(ab)), these policies have been consistently applied to all the years presented, unless otherwise stated. The financial statements are for the consolidated entity consisting of Adelaide Brighton Ltd and its subsidiaries.

### (a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the *Corporations Act 2001*. The Company is a for-profit entity for the purpose of preparing the financial statements.

Comparative information has been re-stated to reflect the current year classification of expenses in the Income Statement and cash flow definitions in the Statement of Cash Flows.

#### *Historical cost convention*

These financial statements have been prepared under the historical cost convention, except for the circumstances when fair value method has been applied as detailed in the accounting policies below.

#### *Compliance with IFRS*

The consolidated financial statements of Adelaide Brighton Limited also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

### (b) Principles of consolidation

#### *(i) Subsidiaries*

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries controlled by Adelaide Brighton Ltd as at 31 December 2012 and the results of all subsidiaries for the year then ended. The Company and its subsidiaries together are referred to in this financial report as "the Group".

Subsidiaries are all those entities over which the Group has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one-half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases. The acquisition method of accounting is used to account for business combinations by the Group (refer to note 1(h)).

Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

#### *(ii) Employee Share Trust*

The Group has formed a trust to administer the Group's employee share scheme. The company that acts as the Trustee is consolidated as the company is controlled by the Group. The Adelaide Brighton employee share plan trust is not consolidated as it is not controlled by the Group.

#### *(iii) Joint venture and associate entities*

The interest in joint ventures and associates is accounted for using the equity method, after initially being recorded at cost. Under the equity method, the share of the profits or losses of the joint venture or associate is recognised in the income statement, and the share of post-acquisition movements in reserves is recognised in other comprehensive income. Profits or losses on transactions establishing the joint ventures and associates and transactions with the joint venture and associate are eliminated to the extent of the Group's ownership interest until such time as they are realised by the joint ventures or associate on consumption or sale, unless they relate to an unrealised loss that provides evidence of the impairment of an asset transferred.

#### *(iv) Non-controlling interests*

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated income statement and balance sheet respectively. The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. For purchases from or sales to non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is deducted from equity.

### (c) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director.

## 1 Summary of significant accounting policies (e) Revenue recognition

(continued)

### (d) Foreign currency translation

#### (i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Australian dollars, which is Adelaide Brighton Ltd's functional and presentation currency.

#### (ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

#### (iii) Foreign operations

The results and financial position of all the foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- Income and expenses for each income statement and statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- All resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, a proportionate share of such exchange differences is reclassified to profit or loss, as part of the gain or loss on sale where applicable.

Revenue is measured at the fair value of consideration received or receivable. Amounts disclosed as revenue are net of returns, trade allowances and duties and taxes paid. Revenue is recognised for the major business activities as follows:

#### (i) Sales revenue

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue is recognised when the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is considered probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods and the amount of revenue can be measured reliably. Sales of services are recognised in the accounting period in which the services are rendered.

#### (ii) Deferred income

Income received in advance in relation to contracts is deferred in the balance sheet and recognised as income on a straight-line basis over the period of the contract.

#### (iii) Interest income

Interest income is recognised using the effective interest rate method.

#### (iv) Dividends

Dividends are recognised as revenue when the right to receive payment is established.

### (f) Income tax

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to apply when the assets are recovered or liabilities are settled, based on those tax rates which are enacted or substantively enacted for each jurisdiction. The relevant tax rates are applied to the cumulative amounts of deductible and taxable temporary differences to measure the deferred tax asset or liability. An exception is made for certain temporary differences arising from the initial recognition of an asset or a liability. No deferred tax asset or liability is recognised in relation to these temporary differences if they arose in a transaction, other than a business combination, that at the time of the transaction did not affect either accounting or taxable profit or loss.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses. Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in controlled entities where the parent entity is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit and loss, except to the extent it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

#### Tax consolidation

Adelaide Brighton Ltd and its wholly owned Australian subsidiaries implemented the tax consolidation legislation as of 1 January 2004. Adelaide Brighton Ltd, as the head entity in the tax consolidated group, recognises current tax liabilities and tax losses (subject to meeting the "probable test") relating to all transactions, events and balances of the tax consolidated group as if those transactions, events and balances were its own.

## 1 Summary of significant accounting policies

(continued)

### (f) Income tax (continued)

The entities in the tax consolidated group are part of a tax sharing agreement which, in the opinion of the Directors, limits the joint and several liability of the wholly-owned entities in the case of default by the head entity, Adelaide Brighton Ltd. Amounts receivable or payable under an accounting tax sharing agreement with the tax consolidated entities are recognised separately as tax-related amounts receivable or payable. Expenses and revenues arising under the tax sharing agreement are recognised as a component of income tax expense.

The wholly-owned entities fully compensate Adelaide Brighton Ltd for any current tax payable assumed and are compensated by Adelaide Brighton Ltd for any current tax receivable and deferred tax assets relating to unused tax losses or unused tax credits that are transferred to Adelaide Brighton Ltd under the tax consolidation legislation. The funding amounts are determined by reference to the amounts recognised in the wholly-owned entities' financial statements.

Individual tax consolidated entities recognise tax expenses and revenues and current and deferred tax balances in relation to their own taxable income, temporary differences and tax losses using the separate taxpayer within the group method. Entities calculate their current and deferred tax balances on the basis that they are subject to tax as part of the tax consolidated group.

Deferred tax balances relating to assets that had their tax values reset on joining the tax consolidated group have been remeasured based on the carrying amount of those assets in the tax consolidated group and their reset tax values. The adjustment to these deferred tax balances is recognised in the consolidated financial statements against income tax expense.

### (g) Leases

Leases of property, plant and equipment where the Group, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the lower of the fair value of the leased property and the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The property, plant and equipment acquired under finance leases is depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if there is no reasonable certainty that the Group will obtain ownership at the end of the lease term.

The interest element of the finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

### (h) Business combinations

The acquisition method of accounting is used to account for all business combinations, including business combinations involving equities or businesses under common control, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration transferred also includes the fair value of any contingent consideration arrangement and the fair value of any pre-existing equity interest in the subsidiary. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net identifiable assets.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the Group's share of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the subsidiary acquired and the measurement of all amounts has been reviewed, the difference is recognised directly in profit or loss as a bargain purchase.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in the income statement.

### (i) Impairment of assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows which are largely independent of the cash flows from other assets or groups of assets (cash generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

## 1 Summary of significant accounting policies

(continued)

### (j) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, term deposits and deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

### (k) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost, less provision for doubtful receivables. Trade receivables are typically due for settlement no more than 30 to 45 days from the end of the month of invoice.

The collectibility of trade receivables is reviewed regularly. Debts which are known to be uncollectible are written off by reducing the carrying amount directly. A provision for doubtful receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the estimated cash flows. Cash flows relating to short term receivables are not discounted if the effect of discounting is immaterial.

The amount of the provision is recognised in the income statement. When a trade receivable for which a provision for doubtful receivables has been recognised becomes uncollectible in a subsequent period, it is written off against the provision account. Subsequent recoveries of amounts previously written off are credited against expenses in the income statement.

### (l) Inventories

Raw materials and stores, work in progress and finished goods are stated at the lower of cost and net realisable value. Cost comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Costs are assigned to individual items of inventory on the basis of weighted average costs.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

### (m) Financial assets

The Group classifies its financial assets in the following categories: loans and receivables, and financial assets at fair value through profit or loss. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

#### (i) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date, which are classified as non-current assets. Loans and receivables are included in trade and other receivables in the balance sheet.

#### (ii) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are classified as held for trading unless they are designated as hedges. Assets in this category are classified as current assets where they are expected to be realised within 12 months of balance sheet date.

### (n) Derivatives

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. Derivative instruments entered into by the Group do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the income statement and are included in income or finance expense.

### (o) Non-current assets (or disposal groups) held for sale

Non-current assets (or disposal groups) are classified as held for sale and stated at the lower of their carrying amount and fair value less costs to sell if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable.

An impairment loss is recognised for any initial or subsequent write down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Non-current assets (including those that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

## 1 Summary of significant accounting policies

(continued)

### (p) Property, plant and equipment

Property, plant and equipment are shown at historical cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

#### (i) Mineral reserves

Mineral reserves are amortised based on annual extraction rates over the estimated life of the reserves. The remaining useful life of each asset is reassessed at regular intervals. Where there is a change during the period to the useful life of the mineral reserve, amortisation rates are adjusted prospectively from the beginning of the reporting period.

#### (ii) Complex assets

The costs of replacing major components of complex assets are depreciated over the estimated useful life, generally being the period until next scheduled replacement.

#### (iii) Leasehold property

The cost of improvements to or on leasehold properties is amortised over the unexpired period of the lease or the estimated useful life, whichever is the shorter. Amortisation is over 5 - 30 years.

#### (iv) Other fixed assets

Freehold land is not depreciated. Depreciation on other assets is calculated using the straight line method to allocate their cost or deemed cost amounts, over their estimated useful lives, as follows:

▪ Buildings	20 - 40 years
▪ Plant and equipment	3 - 40 years
▪ Leased plant and equipment	6 - 10 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 1(i)). Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the income statement.

### (q) Intangible assets

#### (i) Goodwill

Goodwill is measured as described in note 1(h). Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill on acquisition of joint ventures is included in investments in joint ventures.

Goodwill is not amortised. Instead, goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold. Goodwill is allocated to cash-generating units which are expected to benefit from the business combination in which the goodwill arose, for the purpose of impairment testing. Each of those cash-generating units are consistent with the Group's reporting segments.

#### (ii) Lease rights

Lease rights acquired have a finite useful life. Amortisation is calculated using the straight-line method to allocate the cost over their estimated useful lives, which varies from 2 to 20 years.

#### (iii) IT development and software

Costs incurred in developing products or systems and costs incurred in acquiring software and licences that will contribute to future period financial benefits through revenue generation and/or cost reduction are capitalised to software and systems. Costs capitalised include external direct costs of materials and service and direct payroll and payroll related costs of employees' time spent on the project. Amortisation is calculated on a straight-line basis over periods generally ranging from 5 to 10 years.

IT development costs include only those costs directly attributable to the development phase and are only recognised following completion of technical feasibility and where the Group has an intention and ability to use the asset.

### (r) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the income statement over the period of the borrowings using the effective interest method. Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

### (s) Borrowing costs

Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed.

### (t) Trade and other payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 - 60 days of recognition.

### (u) Provisions

Provisions are recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the reporting date. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

## 1 Summary of significant accounting policies (v) Employee benefits

(continued)

### (u) Provisions (continued)

#### (i) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the period but not distributed at balance date.

#### (ii) Workers' compensation

Certain entities within the Group are self insured for workers compensation purposes. For self-insured entities, provision is made that covers accidents that have occurred and have been reported together with an allowance for incurred but not reported claims. The provision is based on an actuarial assessment.

#### (iii) Restructuring costs

Liabilities arising directly from undertaking a restructuring program, not in connection with the acquisition of an entity, are recognised when a detailed plan has been developed, implementation has commenced, by entering into binding sales agreement or making detailed public announcements such that the affected parties are in no doubt that the restructuring program will proceed. The cost of a restructuring program provided for is the estimated future cash flows from implementation of the plan.

#### (iv) Provisions for close down and restoration costs

Close down and restoration costs include the dismantling and demolition of infrastructure and the removal of residual materials and remediation of disturbed areas. Provisions for close down and restoration costs do not include any additional obligations which are expected to arise from future disturbance. The costs are estimated on the basis of a closure plan. The cost estimates are reviewed annually during the life of the operation, based on the net present value of estimated future costs.

Estimate changes resulting from new disturbance, updated cost estimates, changes to the lives of operations and revisions to discount rates are capitalised within property, plant and equipment. These costs are then depreciated over the lives of the assets to which they relate.

The amortisation or 'unwinding' of the discount applied in establishing the net present value of provisions is charged to the income statement in each accounting period. The amortisation of the discount is shown in finance costs.

#### (i) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave expected to be settled within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liability for annual leave and accumulating sick leave is recognised in the provision for employee benefits. All other short-term employee benefit obligations are presented as payables.

#### (ii) Other long-term employee benefit obligations

The liability for long service leave and annual leave which is not expected to be settled within 12 months after the end of the period in which the employees render the related service is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the end of the reporting period on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

#### (iii) Retirement benefit obligations

Except those employees that opt out of the Group's superannuation plan, all employees of the Group are entitled to benefits from the Group's superannuation plan on retirement, disability or death. The Group has a defined benefit section and defined contribution section within its plan. The defined benefit section provides defined lump sum benefits on retirement, death, disablement and withdrawal, based on years of service and final average salary. The defined benefit plan section is closed to new members. The defined contribution section receives fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions.

A liability or asset in respect of defined benefit superannuation plans is recognised in the balance sheet, and is measured as the present value of the defined benefit obligation at the reporting date less the fair value of the superannuation fund's assets at that date and any unrecognised past service cost.

The present value of the defined benefit obligation is based on expected future payments, which arise from membership of the fund to the reporting date, calculated annually by independent actuaries using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service.

Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, outside profit or loss directly in the statement of comprehensive income.

Past service costs are recognised immediately in profit or loss, unless the changes to the superannuation fund are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past service costs are amortised on a straight-line basis over the vesting period.

Contributions to the defined contribution fund are recognised as an expense as they become payable. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

#### (iv) Share-based payments

Share-based compensation benefits are provided to executives via the Adelaide Brighton Ltd Executive Performance Share Plan ("the Plan").

The fair value of Awards granted under the Plan is recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date and recognised over the period during which the employees become unconditionally entitled to the Awards.

The fair value at grant date is independently determined using a pricing model that takes into account the exercise price, the term of the Award, the vesting and performance criteria, the impact of dilution, the non-tradeable nature of the Award, the share price at grant date, the expected dividend yield and the risk-free interest rate for the term of the Award.

## 1 Summary of significant accounting policies

(continued)

### (v) Employee benefits (continued)

The fair value of the Awards granted excludes the impact of any non-market vesting conditions (e.g. earnings per share). Non-market vesting conditions are included in assumptions about the number of Awards that are expected to become exercisable. At each balance sheet date, the entity revises its estimate of the number of Awards that are expected to become exercisable. The employee benefit expense recognised each period takes into account the most recent estimate. The impact of the revision to original estimates, if any, is recognised in the income statement with a corresponding entry to equity.

The Plan is administered by the Adelaide Brighton employee share plan trust; see note 1(b)(ii).

### (v) Short-term incentives

The Group recognises a liability and an expense for short-term incentives available to certain employees on a formula that takes into consideration agreed performance targets. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

### (vi) Termination benefits

Termination benefits are payable when employment is terminated before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits when it is demonstrably committed to either terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after balance sheet date are discounted to present value.

### (w) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or options, for the purpose of acquisition of a business, are not included in the cost of the acquisition as part of the purchase consideration.

### (x) Earnings per share

#### (i) Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the year.

#### (ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assuming conversion of all dilutive potential ordinary shares.

### (y) Rounding of amounts

The Company is of a kind referred to in Class Order 98/100, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the financial report. Amounts in the financial report have been rounded off in accordance with that Class Order to the nearest one hundred thousand dollar, unless otherwise stated.

### (z) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the balance sheet.

Cash flows are presented on a gross basis.

The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the taxation authority, are presented as operating cash flows.

### (aa) Financial guarantee contracts

Financial guarantee contracts are recognised as a financial liability at the time the guarantee is issued. The liability is initially measured at fair value and subsequently at the higher of the amount determined in accordance with AASB 137 *Provisions, Contingent Liabilities and Contingent Assets* and the amount initially recognised less cumulative amortisation, where appropriate.

### (ab) Carbon Accounting

An entity within the Group is a Liable Entity under the Clean Energy Legislation (the Scheme) and also qualifies for assistance under the Jobs and Competitiveness Program (JCP). The Group is required to surrender eligible emission units to the Clean Energy Regulator (the Regulator) for covered emissions, while units are available based upon production volumes of eligible products.

#### (i) Provision for Carbon Emissions

Where a facility is anticipated to produce covered emissions in excess of the threshold in an assessment year, a provision is recognised for the cost of eligible emission units as covered emissions are emitted. A provision for unit shortfall charges is recognised at the time a shortfall in units surrendered to the Regulator occurs or at the time a shortfall has been identified. The provision is recognised in the income statement as incurred unless qualifying for an alternative treatment under another accounting standard or policy.

The measurement of the provision for carbon emissions is in accordance with the Group's accounting policy for provisions, see note 1(u).

#### (ii) Carbon Unit Asset

An asset is recognised at fair value for JCP units as they are received or become receivable. Units received in advance are recognised as deferred income and released to the income statement as eligible production activity is undertaken.

During the initial fixed price period of the Clean Energy Legislation, units purchased from the Regulator are automatically surrendered to the Regulator as a remission of liability under the scheme and are recognised as a reduction of the provision for carbon emissions.

Carbon units are classified into current and non-current based upon the anticipated timing of disposal of the unit, either through remission of liability under the Scheme or sale.

## 1 Summary of significant accounting policies

(continued)

### (ac) Parent entity financial information

The financial information for the parent entity, Adelaide Brighton Limited ("the Company"), disclosed in note 40 has been prepared on the same basis as the consolidated financial statements, except as set out below.

#### (i) Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries, associates and joint venture entities are accounted for at cost in the financial statements of the Company. Such investments include both investments in shares issued by the subsidiary and other parent entity interests that in substance form part of the parent entity's investment in the subsidiary. These include investments in the form of interest-free loans which have no fixed repayment terms and which have been provided to subsidiaries as an additional source of long term capital. Trade amounts receivable from subsidiaries in the normal course of business and other amounts advanced on commercial terms and conditions are included in receivables. Dividends received from associates are recognised in the parent entity's profit or loss, rather than being deducted from the carrying amount of these investments.

#### (ii) Tax consolidation legislation

The Company and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation.

The Company and the controlled entities in the tax consolidated group account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a stand alone taxpayer in its own right.

In addition to its own current and deferred tax amounts, the Company also recognises the current tax liabilities (or assets) and the deferred assets arising from unused tax losses and unused tax credits assumed from controlled entities in the tax consolidated group.

The entities have also entered into a tax funding agreement under which the wholly-owned entities fully compensate the Company for any current tax payable assumed and are compensated by Adelaide Brighton Limited for any current tax receivable and deferred tax assets relating to

unused tax losses or unused tax credits that are transferred to Adelaide Brighton Limited under the tax consolidation legislation. The funding amounts are determined by reference to the amounts recognised in the wholly-owned entities' financial statements.

The amounts receivable/payable under the tax funding agreement are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of each financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

Assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as current amounts receivable from or payable to other entities in the group.

Any difference between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

#### (iii) Financial guarantees

Where the Company has provided financial guarantees in relation to loans and payables of subsidiaries for no compensation, the fair values of these guarantees are accounted for as contributions and recognised as part of the cost of the investment.

#### (iv) Share based payments

The grant by the Company of options over its equity instruments to employees of subsidiary undertakings in the Group is treated as a receivable from that subsidiary undertaking.

### (ad) New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2012 reporting periods. The Group's assessment of the impact of these new standards and interpretations is set out below.

- AASB 9 *Financial Instruments*, AASB 2009-11 *Amendments to Australian Accounting Standards arising from AASB 9*, AASB 2010-7 *Amendments to Australian Accounting Standards arising from AASB 9 (December 2010)* and AASB 2012-6 *Amendments to Australian Accounting Standards - Mandatory Effective Date of AASB 9 and Transition Disclosures* (effective for annual reporting periods beginning on or after 1 January 2015)

AASB 9 *Financial Instruments* addresses the classification, measurement and derecognition of financial assets and financial liabilities. The standard is not applicable until 1 January 2015 but is available for early adoption. When adopted, the standard will not have a material impact on the financial statements. The Group has not yet decided when to adopt AASB 9.

- AASB 1053 *Application of Tiers of Australian Accounting Standards* and AASB 2010-2 *Amendments to Australian Accounting Standards arising from Reduced Disclosure Requirements* (effective 1 July 2013)

On 30 June 2010 the AASB officially introduced a revised differential reporting framework in Australia. Under this framework, a two-tier differential reporting regime applies to all entities that prepare general purpose financial statements. The Company is listed on the ASX and is therefore not eligible to adopt the new Australian Accounting Standards - Reduced Disclosure Requirements. As a consequence, the two standards will have no impact on the financial statements of the Group.

- AASB 10 *Consolidated Financial Statements*, AASB 11 *Joint Arrangements*, AASB 12 *Disclosure of Interests in Other Entities*, revised AASB 127 *Separate Financial Statements* and AASB 128 *Investments in Associates and Joint Ventures*, AASB 2011-7 *Amendments to Australian Accounting Standards arising from the Consolidation and Joint Arrangements Standards* and AASB 2012-10 *Amendments to Australian Accounting Standards - Transition guidance and other Amendments* (effective 1 January 2013)

In August 2011, the AASB issued a suite of five new and amended standards which address the accounting for joint arrangements, consolidated financial statements and associated disclosures.

AASB 10 replaces all of the guidance on control and consolidation in AASB 127 *Consolidated and Separate Financial Statements*, and Interpretation 12 *Consolidation - Special Purpose Entities*. The core principle that a consolidated entity presents a parent and its subsidiaries as if they are a single economic entity remains unchanged, as do the mechanics of consolidation. However, the standard introduces a single definition of control that applies to all entities. It focuses on the need to have both power and rights or exposure to variable returns before control is present. Power is the current ability to direct the activities that significantly influence returns. Returns must vary and can be positive, negative or both. There is also new guidance on participating and protective rights and on agent/principal relationships.

## 1 Summary of significant accounting policies

(continued)

### (ad) New accounting standards and interpretations (continued)

AASB 11 introduces a principles based approach to accounting for joint arrangements. The focus is no longer on the legal structure of joint arrangements, but rather on how rights and obligations are shared by the parties to the joint arrangement. Based on the assessment of rights and obligations, a joint arrangement will be classified as either a joint operation or joint venture. Joint ventures are accounted for using the equity method, and the choice to proportionately consolidate will no longer be permitted. Parties to a joint operation will account their share of revenues, expenses, assets and liabilities in much the same way as under the previous standard. AASB 11 also provides guidance for parties that participate in joint arrangements but do not share joint control.

AASB 12 sets out the required disclosures for entities reporting under the two new standards, AASB 10 and AASB 11, and replaces the disclosure requirements currently found in AASB 128. Application of this standard by the Group will not affect any of the amounts recognised in the financial statements, but will impact the type of information disclosed in relation to the Group's investments.

AASB 127 is renamed *Separate Financial Statements* and is now a standard dealing solely with separate financial statements. Application of this standard by the Group will not affect any of the amounts recognised in the financial statements.

Amendments to AASB 128 provide clarification that an entity continues to apply the equity method and does not remeasure its retained interest as part of ownership changes where a joint venture becomes an associate, and vice versa. The amendments also introduce a "partial disposal" concept.

Application of the standards is not anticipated to have a material impact on the financial statements. The Group will adopt the new standards from 1 January 2013, therefore they will be applied in the financial statements for the annual reporting period ending 31 December 2013.

- AASB 13 *Fair Value Measurement* and AASB 2011-8 *Amendments to Australian Accounting Standards arising from AASB 13* (effective 1 January 2013)

AASB 13 was released in September 2011. It explains how to measure fair value and aims to enhance fair value disclosures. The Group does not use fair value measurements extensively. It is therefore unlikely that the new rules will have a significant impact on any of the amounts recognised in the financial statements. However, application of the new standard will impact the type of information disclosed in the notes to the financial statements. The Group will adopt the new standard from its operative date, which means that it will be applied in the annual reporting period ending 31 December 2013.

- Revised AASB 119 *Employee Benefits*, AASB 2011-10 *Amendments to Australian Accounting Standards arising from AASB 119 (September 2011)* and AASB 2011-11 *Amendments to AASB 119 (September 2011) arising from Reduced Disclosure Requirements* (effective 1 January 2013)

In September 2011, the AASB released a revised standard on accounting for employee benefits. It requires the recognition of all re-measurements of defined benefit liabilities/assets immediately in other comprehensive income (removal of the so-called 'corridor' method) and the calculation of a net interest expense or income by applying the discount rate to the net defined benefit liability or asset. This replaces the expected return on plan assets that is currently included in profit or loss. The standard also introduces a number of additional disclosures for defined benefit liabilities/assets and could affect the timing of the recognition of termination benefits. The amendments will have to be implemented retrospectively. The application of the standard will not have a material impact on the financial statements. The Group will adopt the new standard when it becomes operative, being from 1 January 2013.

- AASB 2011-9 *Amendments to Australian Accounting Standards - Presentation of Items of Other Comprehensive Income* (effective 1 July 2012)

In September 2011, the AASB made an amendment to AASB 101 *Presentation of Financial Statements* which requires entities to separate items presented in other comprehensive income into two groups, based on whether they may be recycled to profit or loss in the future. This will not affect the measurement of any of the items recognised in the balance sheet or the profit or loss in the current period. The Group intends to adopt the new standard from 1 January 2013.

- AASB 2011-4 *Amendments to Australian Accounting Standards to Remove Individual Key Management Personnel Disclosure Requirements* (effective 1 July 2013)

In July 2011 the AASB decided to remove the individual key management personnel (KMP) disclosure requirements from AASB 124 *Related Party Disclosures*, to achieve consistency with the international equivalent standard and remove a duplication of the requirements with the *Corporations Act 2001*. While this will reduce the disclosures that are currently required in the notes to the financial statements, it will not affect any of the amounts recognised in the financial statements. The amendments apply to reporting periods beginning from 1 July 2013 and cannot be adopted early.

## 1 Summary of significant accounting policies

(continued)

### (ad) New accounting standards and interpretations (continued)

- AASB Interpretation 20 *Stripping Costs in the Production Phase of a Surface Mine* and AASB 2011-12 *Amendments to Australian Accounting Standards arising from Interpretation 20* (effective 1 January 2013)

Interpretation 20 sets out the accounting for overburden waste removal (stripping) costs in the production phase of a mine (quarry). It states that these costs can only be recognised as an asset if they can be attributed to an identifiable component of the ore body (reserve), the costs relating to the improved access to that component can be measured reliably and it is probable that future economic benefits associated with the stripping activity (improved access to the reserve) will flow to the entity. The costs will be amortised over the life of the identified component of the reserve.

This is different to the Group's current accounting policy which is to capitalise stripping costs and amortise the costs at a specific rate over the life of the quarry. The interpretation must be applied retrospectively and the Group will have to write off existing stripping cost asset balances to retained earnings on the date of transition, unless they relate to an identifiable component of the reserve. Management estimates that the total amount capitalised as at 31 December 2012 of \$4.2 million will need to be written off, reducing total assets and retained earnings by the appropriate after tax amounts.

The group will adopt the interpretation from 1 January 2013.

- AASB 2012-3 *Amendments to Australian Accounting Standard - Offsetting Financial Assets and Financial Liabilities* and AASB 2012-2 *Disclosures - Offsetting Financial Assets and Financial Liabilities* (effective 1 January 2014 and 1 January 2013 respectively)

In June 2012, the AASB approved amendments to the application guidance in AASB 132 *Financial Instruments: Presentation*, to clarify some of the requirements for offsetting financial assets and financial liabilities in the balance sheet. These amendments are effective from 1 January 2014. They are unlikely to affect the accounting for any of the Group's current offsetting arrangements. However, the AASB has also introduced more extensive disclosure requirements into AASB 7 which will apply from 1 January 2013. When they become applicable, the Group will have to provide a number of additional disclosures in relation to its offsetting arrangements. The Group intends to apply the new rules for the first time in the financial year commencing 1 January 2013.

- AASB 2012-5 *Amendments to Australian Accounting Standard arising from Annual Improvements 2009-2011 cycle* (effective for annual periods beginning on or after 1 January 2013)

In June 2012, the AASB approved a number of amendments to Australian Accounting Standards as a result of the 2009-2011 annual improvements project. The Group will apply the amendments from 1 January 2013. Management does not believe that the application of the standard will have a material impact on the financial statements.

## 2 Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that are significant to the carrying amounts of assets and liabilities in the next financial year are discussed below.

### (a) Provisions for close down and restoration costs

Restoration provisions are based on estimates of the cost to rehabilitate currently disturbed areas based on current costs and legislative requirements. The Group progressively rehabilitates as part of the mining process. Cost estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The detailed accounting treatment is set out in note 1(u)(iv).

Provisions for close down and restoration costs at the end of the year was \$32.2m (2011: \$32.1m).

### (b) Impairment of assets

The Group tests annually whether goodwill, other intangible assets with an indefinite life and other non-current assets have suffered any impairment, in accordance with the accounting policies stated in notes 1(i) and 1(q). The recoverable amounts of cash generating units have been determined based on value-in-use calculations. These calculations require the use of assumptions. For detailed assumptions refer to note 14.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Group and that are believed to be reasonable under the circumstances.

**(d) Tax losses**

Unused tax losses for which no deferred tax asset has been recognised:		
Capital losses	<b>17.4</b>	17.3

This benefit for tax losses will only be obtained if:

- (i) the Group derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deductions for the losses to be realised,
- (ii) the Group continues to comply with the conditions for deductibility imposed by tax legislation, and
- (iii) no changes in tax legislation adversely affect the Group in realising the benefit from the deductions for the losses.

The accounting policy in relation to tax consolidation legislation is set out in note 1(f).

(\$ Million)

2012 2011

**6 Current assets - cash and cash equivalents**

Cash at bank and in hand	5.1	9.1
Term deposits	1.9	1.9
Cash and cash equivalents	7.0	11.0

**(a) Reconciliation to cash at the end of the year**

The above figures are reconciled to cash at the end of the financial year as shown in the statement of cash flows as follows:

Balances as above	7.0	11.0
Bank overdrafts	-	-
Balances per statement of cash flows	7.0	11.0

**(b) Risk exposure**

The Group's exposure to interest rate risk is discussed in note 27. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of cash and cash equivalents mentioned above.

**7 Current assets - trade and other receivables**

Trade receivables	147.2	145.2
Provision for doubtful receivables	(0.7)	(1.8)
	146.5	143.4
Amounts receivable from joint ventures	14.8	15.6
Prepayments	5.5	6.6
Other receivables	2.8	3.3
	169.6	168.9

**(a) Past due but not impaired**

Included in the Group's trade receivables balance are debtors with a carrying value of \$7.7 million (2011: \$7.9 million) which are past due but not impaired. The Group has not provided for these amounts as there has not been a significant change in credit quality or the amounts relate to debtors for which there is no recent history of default. The Group believes these amounts are still recoverable. The ageing analysis is as follows: 60 days \$7.2 million, over 90 days \$0.5 million (2011: 60 days \$7.8 million, over 90 days \$0.1 million).

**(b) Impaired trade receivables**

As at 31 December 2012 current trade receivables of the Group with a nominal value of \$1.2 million (2011 - \$2.3 million) were impaired. The amount of the provision was \$0.7 million (2011 - \$1.8 million). The individually impaired receivables mainly relate to customers which are in unexpectedly difficult economic situations. It was assessed that a portion of the receivables is expected to be recovered.

(\$ Million)

2011

**7 Current assets - trade and other receivables** (continued)**(b) Impaired trade receivables** (continued)

The ageing of these receivables is as follows:

1 to 3 months	-	0.1
3 to 6 months	<b>0.2</b>	-
Over 6 months	<b>1.0</b>	2.2
	<b>1.2</b>	2.3

**Movement in provision for doubtful receivables**

Opening balance at 1 January	<b>1.8</b>	2.1
Amounts written off during the year	<b>(2.2)</b>	(0.8)
Provision for doubtful receivables recognised during the year	<b>1.1</b>	0.5
Closing balance at 31 December	<b>0.7</b>	1.8

**(c) Fair value and credit, interest and foreign exchange risk**

Due to the short-term nature of these receivables, their carrying value is assumed to approximate their fair value. All receivables are denominated in Australian dollars. Information concerning the fair value and risk management of both current and non-current receivables is set out in note 27.

**8 Current assets - inventories**

Engineering spare parts stores	<b>30.4</b>	27.3
Raw materials and work in progress	<b>44.7</b>	42.5
Finished goods	<b>63.6</b>	58.1
	<b>138.7</b>	127.9

**9 Current assets - assets classified as held for sale**

Land & Buildings	<b>1.9</b>	-
------------------	------------	---

**10 Non-current assets - receivables**

Loans to joint ventures	<b>25.5</b>	22.3
Other non-current receivables	<b>4.1</b>	4.9
	<b>29.6</b>	27.2

Details of the fair values, effective interest rate and credit risk are set out in note 27. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of receivables mentioned above.

**(a) Impaired receivables and receivables past due**

None of the non-current receivables are impaired or past due but not impaired.

## 11 Non-current assets - investments accounted for using the equity method

Interests in joint ventures and associates are accounted for in the Group's financial statements using the equity method and are carried at cost by the respective parent entity.

### (a) Carrying amounts

Name of joint venture or associate	Principal activity	Ownership interest		Group's share of Net Assets Consolidated	
		2012 %	2011 %	2012 \$ Million	2011 \$ Million
Sunstate Cement Ltd	Cement manufacture	50	50	17.9	18.4
Independent Cement and Lime Pty Ltd	Cement distribution	50	50	46.9	45.8
E.B. Mawson & Sons Pty Ltd and Lake Boga Quarries Pty Ltd	Concrete and quarries	50	50	33.7	30.0
Burrell Mining Services JV	Mining industry products	50	50	1.5	2.0
Batesford Quarry	Quarry products	50	50	1.6	1.0
Aalborg Portland Malaysia Sdn Bhd	Cement manufacture distribution	30	-	30.5	-
				<b>132.1</b>	97.2

The Group acquired a 30% interest in Aalborg Portland Malaysia Sdn Bhd (APM) on 5 December 2012 for \$28.7 million. APM is a white cement clinker manufacturer based in Ipoh, Malaysia and is considered an associate of the Group.

Each of the above joint ventures and associates is incorporated with the exception of Batesford Quarry and Burrell Mining Services JV which are not incorporated. Except APM which has a 31 December balance date, all have a balance sheet date of 30 June which is different to the Group's balance sheet date of 31 December. Financial reports prepared as at 31 December are used for equity accounting purposes.

(\$ Million)	Consolidated

2012

2011

**14 Non-current assets - intangible assets** (continued)**(a) Impairment tests for goodwill**

Goodwill is allocated to the Group's cash-generating units (CGUs) identified according to business segments.

A segment level summary of the goodwill allocation on a non-aggregation basis is presented below.

Cement and Lime	<b>131.0</b>	131.0
Concrete	<b>30.8</b>	30.8
Cement, Lime and Concrete CGU	<b>161.8</b>	161.8
Concrete Products CGU	<b>8.8</b>	8.8
	<b>170.6</b>	170.6

The recoverable amount of a CGU is determined based on value-in-use calculations. These calculations use cash flow projections based on 2012 actual results and 2013 financial budgets approved by management. The growth rate does not exceed the long-term average growth rate for the business in which the CGU operates.

**(b) Key assumptions used for value-in-use calculations**

	Gross margin <sup>1</sup>		Growth rate <sup>2</sup>		Discount rate <sup>3</sup>	
	2012	2011	2012	2011	2012	2011
	%	%	%	%	%	%
Cement, Lime and Concrete	<b>38.3</b>	36.9	<b>1.7</b>	2.0	<b>10.3</b>	9.9
Concrete Products	<b>26.9</b>	25.5	<b>1.2</b>	1.6	<b>10.3</b>	9.9

1 Budgeted gross margin (excluding fixed production costs)

2 Weighted average growth rate used to extrapolate cash flows beyond the specific market forecast period of up to 8 years.

3 Pre-tax discount rate applied to cash flow projections

The assumptions have been used for the analysis of each CGU within the business segment. Management determined budgeted gross margin based on the past performance and its expectations for the future. The discount rates used are pre-tax and reflect specific risks relating to relevant segments.

**15 Carbon asset and liability****(a) Background**

The Federal Government introduced a price on carbon emissions from 1 July 2012 through the introduction of the Clean Energy Legislation (the Scheme). An entity within the Group is a Liable Entity under the Scheme and is required to surrender eligible emission units to the Clean Energy Regulator (the Regulator) in order to satisfy its liability for carbon emissions. The Group is also eligible to receive assistance under the Jobs and Competitiveness Program (JCP), where the Scheme provides units to industries that qualify as Emissions Intensive Trade Exposed.

The Scheme requires entities with operational control of a facility where certain emissions exceed 25,000 tonnes of carbon dioxide equivalence (tCO<sub>2</sub> -e) to remit to the Regulator an equivalent number of eligible emission units to pay for their emissions. Eligible emission units can be purchased from the Regulator, which during the 2012 / 13 year are priced at \$23 per unit. During the initial years of the Scheme, restrictions are placed on utilising eligible emission units that are not issued by the Regulator.

The Group has operational control of a large number of facilities across Australia, however as a result of the threshold, only a limited number of sites related to the production of cement clinker and lime are directly liable under the Scheme. The production of cement clinker and lime require energy use to heat raw materials to produce chemical reactions necessary for the manufacturing process. Both the energy use for heat and the chemical reaction produce emissions that are covered by the Scheme.

The accounting policy for carbon is set out in note 1 (ab).

The Group is directly liable for certain emissions associated with sites that exceed the threshold. In addition to this, the Group incurs non-direct costs associated with the Scheme as a result of suppliers passing on the cost through higher charges. These costs form part of operating costs such as electricity charges.

Additional provision recognised - charged to asset retirement cost	<b>1.4</b>
Provisions reclassified to current	<b>(3.3)</b>
Closing balance at 31 December 2012	<b>27.4</b>

**23 Non-current liabilities - retirement benefit obligations****(a) Superannuation plan**

The majority of the Company employees are members of the consolidated superannuation entity being the Adelaide Brighton Group Superannuation Plan ("the Plan"), a sub-plan of the Mercer Super Trust ("MST"). The MST is a superannuation master trust arrangement governed by an independent trustee, Mercer Investment Nominees Ltd. The Plan commenced in the MST on 1 August 2001.

Membership is in either the Defined Benefit or Accumulation sections of the Plan. The accumulation section receives fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions. The following sets out details in respect of the defined benefit section only.

Defined benefit members receive lump sum benefits on retirement, death, disablement and withdrawal. The defined benefit section of the Plan is closed to new members. All new members receive accumulation only benefits. During the 12 months to 31 December 2012, all new employees, who are members of this fund, have become members of the accumulation category of the Plan. Employees who are not members of the Plan are in complying superannuation funds as specified by the Enterprise Bargaining Agreements (WA and Victoria Award covered employees) that cover their employment or other complying funds as allowed under the choice of fund provisions.

(\$ Million)

2012

2011

**23 Non-current liabilities - retirement benefit obligations** (continued)**(b) Balance sheet amounts**

Present value of the defined benefit obligation	<b>60.0</b>	60.6
Fair value of defined benefit plan assets	<b>(51.0)</b>	(49.7)
Net liability in the balance sheet	<b>9.0</b>	10.9

The Group has a legal obligation to make quarterly contributions of \$150,000 to finance the deficit with a view to return the Plan to a satisfactory financial position by 30 June 2015.

**(c) Reconciliations**

*Reconciliation of the present value of defined benefit obligation, which is wholly or partially funded:*

Opening balance at 1 January	<b>60.6</b>	55.4
Current service costs	<b>2.2</b>	2.0
Interest costs	<b>2.1</b>	2.7
Actuarial losses (gains)	<b>2.0</b>	3.9
Contributions by plan participants	<b>1.3</b>	1.4
Benefits, expenses and insurance premium paid	<b>(8.2)</b>	(4.9)

The amounts recognised in the statement of comprehensive income are as follows:

Actuarial (gain)/ loss recognised in the year	<b>(0.3)</b>	8.8
Cumulative actuarial losses recognised in statement of comprehensive income	<b>19.2</b>	19.5

(\$ Million)

2012 2011

**23 Non-current liabilities - retirement benefit obligations** (continued)**(e) Categories of plan assets**

The major categories of plan assets are as follows:

Australian Equity	<b>13.3</b>	13.9
International Equity	<b>14.8</b>	14.4
Fixed income	<b>9.7</b>	7.0
Property	<b>7.0</b>	8.0
Cash	<b>3.6</b>	4.0
Other	<b>2.6</b>	2.4
	<b>51.0</b>	49.7

Consolidated

(% )

2012 2011

**(f) Principal actuarial assumptions**

The principal actuarial assumptions used were as follows:

Discount rate	<b>2.80</b>	3.20
Expected return on plan assets	<b>7.25</b>	7.25
Future salary increases	<b>3% then 4.0% pa thereafter</b>	4.00

The expected rate of return on assets is based on historical and future expectations of returns for each of the major categories of asset classes (equities, property, fixed interest and cash) as well as the expected actual allocation of plan assets to these major categories. This resulted in the selection of a 7.25% rate of return net of tax and expenses. The discount rate used to value the defined benefit obligation is based on the 10 year government bond rate, adjusted to reflect the cash flow profile of the obligation.

**(g) Employer contributions**

Employer contributions to the defined benefit section of the plan are based on recommendations by the plan's actuary. Actuarial assessments are made at no more than three yearly intervals, and the last assessment was made as at 1 July 2010.

Total employer contributions expected to be paid by Group companies for the year ended 31 December 2013 are \$2.5 million.

## 24 Contributed equity

### (a) Share capital

Issued and paid up capital 637,387,488 (2011: 636,277,810) ordinary shares, fully paid	<b>696.6</b>	694.6
---	--------------	-------

### (b) Movements in ordinary share capital

Opening balance at 1 January	<b>694.6</b>	692.7
1,109,678 shares issued under Executive Performance Share Plan (2011: 1,145,000) (i)	<b>2.0</b>	1.9
Closing balance at 31 December	<b>696.6</b>	694.6

(i) Ordinary shares issued under the Adelaide Brighton Ltd Executive Performance Share Plan (refer note 30).

### (c) Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up the Company in proportion to the number of and amounts paid on the shares held. On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote and, on a poll, each share is entitled to one vote.

Ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

### (d) Dividend reinvestment plan

In February 2010 the Company suspended the dividend reinvestment plan with immediate effect until further notice.

### (e) Capital risk management

The Group's objectives when managing capital are to safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue shares as well as issue new debt or redeem existing debt. The Group monitors capital on the basis of the gearing ratio.

The Company has an implied BBB+ credit rating and chooses not to apply for an official credit rating. The gearing ratio at 31 December 2012 and 31 December 2011 was as follows:

	Consolidated	
(\$ Million)	2012	2011
Total borrowings	<b>319.3</b>	259.4

2011

**26 Dividends****Dividends paid during the year**

2011 final ordinary dividend of 9.0 cents (2010 - 9.0 cents) per fully paid ordinary share, franked at 100% (2010 - 100%) paid on 10 April 2012	<b>57.3</b>	57.2
2010 special dividend of 2.5 cents per fully paid ordinary share, franked at 100% paid on 11 April 2011. No special dividend has been declared or paid in relation to the 2011 or 2012 years.	<b>-</b>	15.9
2012 interim dividend of 7.5 cents (2011 - 7.5 cents) per fully paid ordinary share, franked at 100% (2011 - 100%) paid on 8 October 2012	<b>47.8</b>	47.7
Total dividends paid in cash	<b>105.1</b>	120.8

**Dividend not recognised at year end**

Since the end of the year the Directors have recommended the payment of a final dividend of 9.0 cents (2011 - 9.0 cents) per fully paid share, franked at 100% (2011 - 100%). The aggregate amount of the proposed final dividend to be paid on 16 April 2013, not recognised as a liability at the end of the reporting period, is

<b>57.4</b>	57.3
-------------	------

## 26 Dividends (continued)

### Franked dividend

The franked portion of the dividend proposed as at 31 December 2012 will be franked out of existing franking credits or out of franking credits arising from the payment of income tax in the year ending 31 December 2013.

(\$ Million)	Consolidated	
	2012	2011
Franking credits available for subsequent financial years based on a tax rate of 30% (2011 - 30%)	89.0	80.6

The above amounts represent the balance of the franking account as at the end of the financial year, adjusted for:

- (a) franking credits that will arise from the payment of any current tax liability.
- (b) franking debits that will arise from the payment of dividends recognised as a liability at the reporting date.
- (c) franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date.

The impact on the franking account of the dividend recommended by the Directors since year end, but not recognised as a liability at year end, will be a reduction in the franking account of \$24.6 million (2011: \$24.6 million).

## 27 Financial risk management

The Group's activities expose it to a variety of financial risks: market risk (including currency risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group.

The Board approves written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments and investment of excess liquidity. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Group uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and other price risks, and ageing analysis for credit risk. The Group uses derivative financial instruments in the form of foreign exchange forward contracts to hedge certain currency risk exposures.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured at their fair value at each reporting date. The Company does not utilise hedge accounting as permitted under Australian Accounting Standards.

The Group's Corporate Treasury Function provides services to the business, co-ordinates access to domestic financial markets and monitors and manages the financial risks relating to the operations of the Group. The Group Corporate Treasury Function reports on a monthly basis an analysis of exposures by degree and magnitude of risk.

### (a) Market risk

#### (i) Foreign exchange risk

The Group's activities through its overseas cement, clinker, slag and equipment purchases expose it to foreign exchange risk arising from various currency exposures, primarily with respect to the US Dollar and the Japanese Yen.

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities that are denominated in a currency that is not the entity's functional currency. The risk is measured using sensitivity analysis and cash flow forecasting.

The Group enters into foreign exchange forward contracts to hedge its foreign exchange risk on these overseas trading activities against movements in the Australian dollar.

The Group Treasury's risk management policy is to hedge commitments for purchases for up to six months forward. Longer hedge positions are deemed too expensive versus the value at risk due to the respective currencies' interest rate spread. Derivative instruments entered into by the Group do not qualify for hedge accounting.

#### (ii) Interest rate risk

The Group's main interest rate risk arises from bank borrowings. Borrowings issued at variable rates expose the Group to interest rate risk. Due to the historically low levels of gearing, Group policy is to take on senior debt facilities on a one to five year term with fixed bank lending margins associated with each term. Cash advances to meet short and medium term borrowing requirements are drawn down against the senior debt lending facilities on a 30, 60 or 90 day basis, at a variable lending rate comprising the fixed bank margin applied to the daily bank bill swap rate effective at the date of each bank bill. During both 2012 and 2011, the Group's borrowings at variable rates were denominated in Australian Dollars.

The Group analyses its interest rate exposure on a dynamic basis. Periodically, various scenarios are simulated taking into consideration refinancing, renewal of existing positions, alternative financing and hedging. Based on these scenarios, the Group calculates the impact on forecast profit and loss of a defined interest rate shift. The scenarios are run only for liabilities that represent the major interest-bearing positions. Based on the latest calculations performed, the impact on profit and equity of a 100 basis-point movement would be a maximum increase/decrease of \$2.2 million (2011: \$1.8 million). A 100 basis-point sensitivity has been selected as this is considered reasonable given the current level of both short term and long term Australian dollar interest rates.

## 27 Financial risk management (continued)

### (a) Market risk (continued)

#### (iii) Summarised sensitivity analysis

The following table summarises the sensitivity, on a pre-tax basis, of the Group's financial assets and financial liabilities to interest rate risk and foreign exchange risk.

2012	(\$ Million)	Notes	Consolidated Carrying value	Interest rate risk		Foreign exchange risk	
				-1.0%	+1.0%	-10%	+10%
				Consolidated Profit before tax		Consolidated Profit before tax	
<b>Financial assets</b>							
Cash		6	7.0	(0.1)	0.1	-	-
Receivables		7 & 10	199.2	(0.3)	0.3	-	-
			<b>206.2</b>	<b>(0.4)</b>	<b>0.4</b>	<b>-</b>	<b>-</b>
<b>Financial liabilities</b>							
Borrowings		17 & 20	319.3	3.2	(3.2)	-	-
Payables		16	94.5	-	-	-	-
			<b>413.8</b>	<b>3.2</b>	<b>(3.2)</b>	<b>-</b>	<b>-</b>
Total increase/(decrease)				<b>2.8</b>	<b>(2.8)</b>	<b>-</b>	<b>-</b>

2011	(\$ Million)	Notes	Consolidated Carrying value	Interest rate risk		Foreign exchange risk	
				-1.0%	+1.0%	-10%	+10%
				Consolidated Profit before tax		Consolidated Profit before tax	
<b>Financial assets</b>							
Cash		6	11.0	(0.1)	0.1	-	-
Receivables		7 & 10	196.1	(0.3)	0.3	-	-
			<b>207.1</b>	<b>(0.4)</b>	<b>0.4</b>	<b>-</b>	<b>-</b>
<b>Financial liabilities</b>							
Borrowings		17 & 20	259.4	2.6	(2.6)	-	-
Payables		16	98.5	-	-	-	-
			<b>357.9</b>	<b>2.6</b>	<b>(2.6)</b>	<b>-</b>	<b>-</b>
Total increase/(decrease)				<b>2.2</b>	<b>(2.2)</b>	<b>-</b>	<b>-</b>

Foreign currency risk is immaterial due to the majority of sales and assets denominated in Australian Dollars, while the Group's purchases that are in foreign currency are settled at the time of the transaction, consequently payables are generally in Australian Dollars. All borrowings are denominated in Australian Dollars.

## 27 Financial risk management (continued)

### (b) Credit risk

Credit risk is managed on a group basis using delegated authority limits. Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions.

For banks and financial institutions, only independently rated parties with a minimum rating of 'A' are accepted. For trading credit risk, Credit Control assesses the credit quality of the customer, taking into account its financial position, past experience, external credit agency reports and credit references. Individual risk limits are set based on internal or external ratings in accordance with delegated authority limits set by the Board. The compliance with credit limits by

credit approved customers is regularly monitored by line credit management. Sales to non-account customers are settled either in cash, major credit cards or electronic funds transfer, mitigating credit risk.

Credit risk further arises in relation to financial guarantees given to certain parties. Such guarantees are only provided in exceptional circumstances and are subject to appropriate approval.

The Group has no significant concentration of credit risk. The Group has policies and procedures in place to ensure that sales are made to customers with an appropriate credit history. In relation to a small number of customers with uncertain credit history, the Group has taken out personal guarantees in order to cover credit exposures. As at 31 December 2012, the Group held no collateral over outstanding debts. Consequently, the maximum exposure to credit risk represents

the carrying value of receivables and derivatives. Derivative counterparties and cash transactions are limited to high credit quality institutions.

### (c) Liquidity risk

The ultimate responsibility for liquidity risk management rests with the Board which has established an appropriate risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group's Corporate Treasury Function manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. Included below is a statement of undrawn facilities that the Group and Company has at its disposal to further reduce liquidity risk.

	<i>Consolidated</i>

	94.5	20.5	313.4	-	428.4
<b>31 December 2011</b>					
Trade payables	98.5	-	-	-	98.5
Lease liabilities	-	0.7	-	-	0.7
Bank borrowings	-	-	274.2	-	274.2
	98.5	0.7	274.2	-	373.4

### (d) Fair value measurements

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes. The fair value of forward exchange contracts is determined using forward exchange market rates at the balance sheet date.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values due to their short-term nature. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

The carrying amounts of financial assets and liabilities of the Group and the Company at balance date approximates fair values. Fair value is exclusive of costs which would be incurred on realisation of an asset, and inclusive of costs which would be incurred on settlement of a liability.

The carrying amount of the non-current assets is based predominantly on the recoverable loan amount to joint ventures and external parties.

(\$ Million)

2012

2011

**28 Contingencies**

Details and estimates of maximum amounts of contingent liabilities are as follows:

**(a) Guarantees**

Bank guarantees	<b>14.3</b>	14.2
-----------------	-------------	------

**(b) Litigation**

At the time of preparing this financial report some companies included in the Group are parties to pending legal proceedings, the outcome of which is not known. The entities are defending, or prosecuting, these proceedings. The Directors have assessed the impact on the Group from the individual actions.

No material losses are anticipated in respect of any of the above contingent liabilities.

**29 Commitments for expenditure****(a) Capital commitments - Property, plant & equipment**

Capital expenditure contracted for at the reporting date but not recognised as liabilities is as follows:

Within one year	<b>17.9</b>	29.4
-----------------	-------------	------

**(b) Lease commitments***(i) Finance leases*

Commitments in relation to finance leases are payable as follows:

Within one year	-	0.7
Later than one year but not later than five years	-	-
Minimum lease payments	-	0.7
Less: Future finance charges	-	-
Recognised as a liability	-	0.7
Representing lease liabilities:		
Current (note 17)	-	0.7
	-	0.7

*(ii) Operating leases*

Commitments in relation to operating leases contracted for at the reporting date, but not recognised as liabilities, are payable as follows:

Within one year	<b>5.6</b>	4.4
Later than one year but not later than five years	<b>14.1</b>	13.6
Later than five years	<b>22.4</b>	27.6
	<b>42.1</b>	45.6

Commitments for operating lease payments relate mainly to rental leases on property. The Group leases various properties under non-cancellable operating leases which contain varying terms, escalation clauses and renewal rights. On renewal, the terms of the leases are either renegotiated or the expiry date is extended under pre-negotiated terms.

### 30 Share-based payment plans

#### (a) Employee Share Plan

The establishment of the Adelaide Brighton Ltd Employee Share Plan was approved by special resolution at the Annual General Meeting of the Company held on 19 November 1997. All full time employees of the Company and its controlled entities who have been continuously employed by the Company or a controlled entity for a period of one year are eligible to participate in the plan. Casual employees and contractors are not eligible to participate in the Plan.

No shares were issued under the Employee Share Plan during the year (2011 - nil). In subsequent years, the Board will decide whether, considering the profitability of the Company and the demands of the business, further invitations to take up grants of shares should be made.

#### (b) Executive Performance Share Plan

The Adelaide Brighton Ltd Executive Performance Share Plan ("the Plan" or "EPSP") provides for grants of Awards to the Managing Director and eligible executives. This plan was approved by shareholders at the Annual General Meeting held on 19 November 1997. In accordance with the requirements of the ASX Listing Rules, the Awards since granted to the Managing Director have been approved by shareholders.

Under the Plan, eligible executives are granted Awards (each being an entitlement to a fully paid ordinary share of Adelaide Brighton Ltd, subject to the satisfaction of performance conditions) on terms and conditions determined by the Board.

#### *2012 Award*

Under the Plan, Participants were invited to apply to take up an Award up to a maximum number of shares, divided into two equal tranches exercisable no earlier than 1 May 2015 and 1 May 2016 respectively. The total number of Awards granted under the 2012 Award was 3,140,030 with nil exercised by 31 December 2012. During the period 3,140,030 Awards (2011: nil) were granted. The grant date of the 2012 Awards is set out on page 90.

#### *2010 Award*

Under the Plan, Participants were invited to apply to take up an Award up to a maximum number of shares, divided into three tranches exercisable no earlier than 1 May 2012, 1 May 2013 and 1 May 2014 respectively. The total number of awards originally granted under the 2010 Award was 4,155,000 with 1,109,678 exercised during the period. During the period, nil Awards (2011: 227,500) were granted and 7,822 Awards lapsed. The grant date of the 2010 Awards is set out on page 91.

#### *Performance conditions*

Detailed discussion of 2012 Award and 2010 Award performance conditions is set out in the Remuneration Report on pages 48 to 49.

During 2012, 1,109,678 shares were issued under the Plan on the exercise of Tranche 1 under the 2010 Award, following the Board's determination that:

- Earnings per share exercise condition applicable to 98.5% of exercisable Awards had been satisfied for Tranche 1; and

- Total Shareholder Return exercise condition applicable to 100% of exercisable Awards had been satisfied for Tranche 1.

The value per share at the date of exercise is the Value Weighted Closing Price which is the average of the closing price and number of Adelaide Brighton Limited shares traded on the Australian Securities Exchange for the five trading days before the exercise date, but not including the day of exercise. The aggregate value of Awards exercised during the year is \$3,411,571 (2011: \$3,468,734).

#### *Balance of Awards*

As at 31 December 2012, if the exercise conditions are satisfied and the remaining balance of all currently approved Awards are exercised, the Company would be obliged to transfer:

- 2,835,000 shares to the Participants, under the 2010 Award (2011 - 3,952,500 shares)
- 3,140,030 shares to the Participants, under the 2012 Award (2011 - nil shares)

The Plan does not entitle the Participants to participate in any other share issues of the Company and the unexercised Awards do not attract dividend or voting rights. The Plan is accounted for by the Company in accordance with note 1(v)(iv), with \$1,206,942 (2011 - \$1,377,937) recognised as an expense during the year.

The weighted average remaining contractual life of Awards outstanding at the end of the period was 1.9 years (2011: 1.5 years).

2012

2011

**31 Key management personnel disclosures****(a) Compensation of key management personnel**

Short-term employee benefits	<b>9.1</b>	8.0
Post-employment benefits	<b>0.1</b>	0.1
Share-based payments	<b>1.2</b>	1.3
Termination benefits	<b>-</b>	0.1
	<b>10.4</b>	9.5

The Company has applied the exemption under Amendment to Australian Accounting Standard - Key Management Personnel Disclosures by Disclosing Entities which exempts disclosing companies from the application of AASB 124 paragraphs AUS 29.2 to AUS 29.6 and AUS 29.7.1 and AUS 29.7.2 as the requirements are now incorporated into the *Corporations Act* and are provided in the section titled Remuneration Report included in the Directors' Report designated as audited on pages 42 to 52.

**(b) Award holdings of key management personnel**

The number of Awards granted as compensation and details of Awards vested, exercised or lapsed during the year are disclosed in the Remuneration Report on page 50.

For the purposes of pricing model inputs, the share price for calculation of the Award value is based on the closing published share price at grant date. The assessed fair value at grant date of Awards granted to the individuals is allocated equally over the period from grant date to vesting date. Fair values at the grant date are independently determined using a pricing model that takes into account the exercise price, the term of the Awards, the lack of marketability, the impact of TSR vesting condition (applicable to 50% of Awards), the expected future dividends and the risk free interest rate for the term of the Award.

### 35 Deed of cross guarantee

As at the date of this report, Adelaide Brighton Ltd, Adelaide Brighton Cement Ltd, Cockburn Cement Ltd, Adelaide Brighton Cement Investments Pty Ltd, Adelaide Brighton Management Ltd, Northern Cement Ltd, Premier Resources Ltd, Hy-Tec Industries Pty Ltd, Hy-Tec Industries (Victoria) Pty Ltd, Hy-Tec Industries (Queensland) Pty Ltd, Morgan Cement International Pty Ltd, Adbri Masonry Group Pty Ltd, C&M Masonry Products Pty Ltd, Adbri Masonry Pty Ltd and Hurd Haulage Pty Ltd are parties to a Deed of Cross Guarantee (the Deed) under which each Company guarantees the debts of the others. Hurd Haulage Pty Ltd entered into the deed of cross guarantee on 20 November 2012. By entering into the Deed, the wholly-owned entities have been relieved from the requirement to prepare a financial report and Directors' report under Class Order 98/1418 (as amended) issued by the Australian Securities & Investments Commission. The above companies represent a "Closed Group" for the purposes of the Class Order, and as there are no other parties to the Deed that are controlled by the Company, they also represent the "Extended Closed Group".

Set out below is a consolidated balance sheet as at 31 December 2012 of the Closed Group.

### 38 Events occurring after the balance sheet date

As at the date of this report, no other matter or circumstance has arisen since 31 December 2012 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

### 39 Segment reporting

#### (a) Description of segments

Management has determined the operating segments based on the reports reviewed by the Managing Director. These reports are evaluated regularly in deciding how to allocate resources and in assessing performance.

The two reportable segments have been identified as follows;

- Cement, Lime and Concrete
- Concrete Products

The operating segments Cement and Lime and separately Concrete individually meet the quantitative thresholds required by AASB 8 as well as meeting the aggregation criteria allowing them to be reported as one segment. Concrete Products meets the quantitative threshold therefore is reported as a separate segment. The Cement, Lime and Concrete Products Joint Ventures form part of the above two reportable segments as they meet the aggregation criteria.

The major end-use markets of Adelaide Brighton's products include residential and non-residential construction, engineering construction, alumina and steel production and mining.

### 39 Segment reporting (continued)

#### (b) Segment information provided to the Managing Director

The segment information provided to the Managing Director for the reportable segments for the year ended 31 December 2012 is as follows:

##### 2012

(\$ Million)	<i>Cement, Lime and Concrete</i>	<i>Concrete Products</i>	<i>All other segments</i>	<i>Total</i>
Total segment operating revenue	<b>1,147.3</b>	<b>123.7</b>	<b>86.1</b>	<b>1,357.1</b>
Inter-segment revenue	<b>(37.1)</b>	-	-	<b>(37.1)</b>
Revenue from external customers	<b>1,110.2</b>	<b>123.7</b>	<b>86.1</b>	<b>1,320.0</b>
Depreciation and amortisation	<b>49.9</b>	<b>7.9</b>	<b>7.4</b>	<b>65.2</b>
EBIT	<b>219.1</b>	<b>0.4</b>	<b>6.1</b>	<b>225.6</b>

##### 2011

(\$ Million)	<i>Cement, Lime and Concrete</i>	<i>Concrete Products</i>	<i>All other segments</i>	<i>Total</i>
Total segment operating revenue	1,124.9	120.2	77.3	1,322.4
Inter-segment revenue	(40.7)	-	-	(40.7)
Revenue from external customers	1,084.2	120.2	77.3	1,281.7
Depreciation and amortisation	42.9	8.0	6.9	57.8
EBIT	225.2	1.8	(3.6)	223.4

Sales between segments are carried out at arms length and are eliminated on consolidation.

The operating revenue assessed by the Managing Director includes revenue from external customers and a share of revenue from the joint ventures and associates in proportion to the Group's ownership interest, excluding freight, interest and royalty revenue. A reconciliation of segment operating revenue to revenue from continuing operations is provided as follows:

(\$ Million)	<i>Consolidated</i>	
	<b>2012</b>	2011
Total segment operating revenue	<b>1,357.1</b>	1,322.4
Inter-segment revenue elimination	<b>(37.1)</b>	(40.7)
Freight revenue	<b>129.4</b>	102.7
Interest revenue	<b>2.6</b>	2.4
Royalties	<b>0.5</b>	1.2
Elimination of joint venture and associate revenue	<b>(276.3)</b>	(287.6)
Revenue from continuing operations	<b>1,176.2</b>	1,100.4

The Managing Director assesses the performance of the operating segments based on a measure of EBIT. This measurement basis excludes the effect of net interest. A reconciliation of the EBIT to operating profit before income tax is provided as follows:

EBIT	<b>225.6</b>	223.4
Net interest	<b>(16.4)</b>	(17.0)
Profit before income tax	<b>209.2</b>	206.4

#### (c) Other segment information

Revenues of approximately \$144.2 million (2011: \$136.5 million) are derived from a single customer. These revenues are attributable to the Cement, Lime and Concrete segment.

**40 Parent entity financial information****(a) Summary financial information**

**(b) Guarantees entered into by the parent entity**

Bank guarantees	<b>2.1</b>	2.1
-----------------	------------	-----

**(c) Contingent liabilities of the parent entity**

The parent entity did not have any contingent liabilities as at 31 December 2012 or 31 December 2011 other than the Bank guarantees detailed above.

**In the Directors' opinion:**

- (a) the financial statements and notes set out on pages 53 to 101 are in accordance with the *Corporations Act 2001*, including:
- (i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
- (ii) giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and of its performance for the financial year ended on that date; and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable; and
- (c) at the date of this declaration, there are reasonable grounds to believe that the members of the Extended Closed Group identified in note 35 will be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the Deed of Cross Guarantee described in note 35.

Note 1(a) confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The Directors have been given the declarations by the Managing Director and Chief Financial Officer required by section 295A of the *Corporations Act 2001*.

This declaration is made in accordance with a resolution of the Directors.

Mark Chellew  
Managing Director  
Dated 7 March 2013

**Auditor's Independence Declaration**

As lead auditor for the audit of Adelaide Brighton Ltd for the year ended 31 December 2012, I declare that to the best of my knowledge and belief, there have been:

- a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Adelaide Brighton Ltd and the entities it controlled during the period.

## Report on the financial report

We have audited the accompanying financial report of Adelaide Brighton Limited (the company), which comprises the balance sheet as at 31 December 2012, and the income statement, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration for both Adelaide Brighton group (the consolidated entity). The consolidated entity comprises the company and the entities it controlled at the year's end or from time to time during the financial year.

## Directors' responsibility for the financial report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accountant Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with *International Financial Reporting Standards*.

## Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

Our procedures include reading the other information in the Annual Report to determine whether it contains any material inconsistencies with the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

## Auditor's opinion

In our opinion:

- (a) the financial report of Adelaide Brighton Limited is in accordance with the *Corporations Act 2001*, including:
  - (i) giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and of its performance for the year ended on that date; and
  - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*; and
- (b) the financial report and notes also comply with International Financial Reporting Standards as disclosed in Note 1.

## Report on the Remuneration Report

We have audited the remuneration report included in pages 8 to 22 of the directors' report for the year ended 31 December 2012. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

## Auditor's opinion

In our opinion, the remuneration report of Adelaide Brighton Limited for the year ended 31 December 2012, complies with section 300A of the *Corporations Act 2001*.
