GALOC-5H AND GALOC-6H DRILLING COMMENCES

Highlights:

- Commencement of drilling with the spud of the Galoc-5H and 6H development wells

Otto Energy Limited ("Otto") (ASX:OEL), as operator of the producing Galoc oilfield joint venture offshore the Philippines, provides the following update on the Galoc-5H and Galoc-6H drilling campaign in SC14C, part of the Galoc Phase II development approved in 2012.

Progress

Otto is pleased to advise that at 1300 hours on 4 June 2013, the Ocean Patriot semi-submersible drilling rig commenced drilling the Galoc-5H and 6H development wells. Drilling is expected to take approximately 115 days including the flowing of the wells for clean-up.

Forward Plan

The forward plan is to drill the 36" (914 mm) hole to 392 metres and install the 30" conductor prior to drilling the 17^{1/2}" (444 mm) hole to 950 metres.

Otto will provide weekly updates on drilling progress commencing on Wednesday 12 June 2013.

OTTO AT A GLANCE

- ASX-listed oil and gas company with a strategy to grow its integrated oil and gas business across exploration, development and production
- Focused on South East Asia and East Africa
- Operator of the producing Galoc oil field in the Philippines, which provides cashflow
- Opportunity rich with substantial exploration prospects and leads

Location and Proposed Depth

The Galoc field is located in Service Contract SC14C (Galoc Sub Block) in 290m of water approximately 65km North West of Palawan Island and 350km south of Manila in the Republic of the Philippines. The Galoc-5H and Galoc-6H development wells are being drilled within the existing producing field that has delivered over 10 MMbbls of production since the field was commissioned in 2008.

The wells are being batch drilled in 311 metres of water. It is planned that the Galoc-5H and Galoc-6H development wells will be drilled to a total vertical depth of 2,190 with approximately 2,000 of horizontal completion. Drilling is expected to take approximately 115 days including the flowing of the wells for clean-up.

After drilling of both Galoc-5H and Galoc-6H is completed, the DOF operated Skandia Hercules construction vessel will be used to install the subsea equipment and complete the hook-up of both wells to the FPSO Rubicon Intrepid.

First oil from the Phase II wells is expected during Q4 2013.

APPENDIX A: SUMMARY

SC14C Galoc-5H and Galoc-6H Development Wells	
Location	Palawan Basin, Philippines
Permit	SC14C
Well Type	Horizontal development wells
Target	Turbiditic sandstone in Miocene Galoc Classic Unit
Water Depth	Approximately 311 metres
Planned total depth	Approximately 2,190 metres vertical Total drilled length approximately 5,000 metres for each well
Duration	115 days (including well clean-up flow)

Note: Depth is measured in metres below the rig rotary table or drilling floor

Joint Venture Partners:

<u>Participant</u>	<u>Participating Interest %</u>
Galoc Production Company W.L.L. (Operator) (Wholly owned subsidiary of Otto Energy Ltd (ASX: OEL))	33.00000
