MATUKU-1 WEEKLY PROGRESS REPORT No. 2

PEP 51906 - OFFSHORE TARANAKI BASIN, NEW ZEALAND

Octanex N.L. *(ASX Code: OXX)* (Company) has been advised by OMV New Zealand Limited, the Operator of the Matuku-1 exploration well being drilled in the offshore Taranaki Basin permit PEP 51906, that at 06:00 hours (NZST) on Tuesday, 17 December 2013, the well was at a depth of 2002m MDRT (measured depth below rotary table) and drilling ahead in the 12½" hole.

Planned operations over the coming week are to complete drilling of the 12½" hole section and then run and cement in the 95%" casing string prior to drilling the 8½" hole.

Matuku-1 is programmed as a vertical well that is being drilled by the Kan Tan IV semi-submersible rig in water depths of approximately 130m. Dependent upon the results while intersecting the zones of interest (as detailed below), the well will be drilled to a potential total depth (**TD**) of approximately 4750m MDRT.

Matuku-1 is scheduled to take 45 days to drill to TD and then abandon.

The well is targeting the hydrocarbon potential of the Kapuni Group Farewell Formation F sandstone reservoir (T10 sands); with sandstones of the Kapuni Group Kaimiro Formation D Sand (T20 sands) and Pakawau Group North Cape Formation (K90) being secondary targets – see the attached Figure 1 *Prospect Map* of Matuku and the well targets.

The Company's wholly-owned subsidiary, Octanex NZ Limited, holds a 22.5% participating interest in the PEP 51906 permit and this interest is being free carried by OMV through the drilling of the Matuku-1 well – see the attached Figure 2 *Location Map* for the Permit and Matuku-1.

The participants in the PEP 51906 permit and its Joint Venture are:

OMV New Zealand Limited 65.0%

Octanex NZ Limited 22.5%

Australia and New Zealand Petroleum Limited 12.5%

(Subsidiary of New Zealand Oil & Gas Ltd (ASX Code: NZO))

On behalf of the Board

J.G. TuohyCompany Secretary

17 December 2013
