(2) As 31 December 2013

COOPER ENERGY

Well resourced with strong balance sheet

Key features

High margin, strong cash generating operations

- Oil production from Cooper Basin Western Flank
- 500,000+ barrels pa Cooper Basin oil with netback of A$97/bbl[1] after costs
- Fifth largest Australian onshore oil producer

Strong balance sheet and financial resources

- Cash and financial assets of $65.7 million[2]
- Supported by financial facilities of $40 million

Prospective & strategic exploration acreage

- Cooper, Otway - conventional and unconventional oil and gas
- Material upside in prospective Indonesian acreage
- Monetisation opportunity from prospective Tunisian portfolio and resources

Experienced & proven management & board

- Management team experienced in Australian onshore and offshore basins
- Proven capabilities in developing and commercialising gas
- Record of success in large and small Australian and international companies

Disciplined strategy focused on TSR & Australia

- Focusing financial strength and capabilities on Australian energy opportunities
- Require the right commercial and technical fundamentals for TSR

[1] COE Cooper Basin 2014 first half netback after costs
[2] As at 31 December 2013

Earnings, cash, production and management

Business model and focus

Focus on returns & care through disciplined application of resources to core skills

Total Shareholder Return

and

Health Safety Environment Community

Strategy

- High margin oil
- Build gas supply & demand portfolio
- Fundamentals focus: market, technical, cost & commercial
- Leverage and grow strengths

People

- Extensive knowledge
- Delivery record
- Remuneration & results linked

Funding

- Strong balance sheet
- Robust cash flow
- Finance facilities

Assets

- Cooper Basin
- Otway Basin
- Gippsland Basin investment
- South Sumatra, Indonesia

Oil & Gas
Australia and Indonesia

COOPER ENERGY

Leveraging strengths for TSR

FY14 First half results

$ million unless otherwise indicated	**H1 14**	H1 13		
Production *MMbbl*	**0.30**	0.21	▲	+ 41%
Sales volume *MMbbl*	**0.29**	0.21	▲	+ 37%
Sales revenue	**37.0**	23.4	▲	+ 58%
Net profit after tax	**13.6**	4.6	▲	+ 198 %
Cash flow from operations	**24.2**	2.1	▲	+1,034%
Total cash and investments [1]	**65.7**	68.1[2]	▼	- 4%

- H1 14 was Cooper Energy's best half year result to date
- Record profit driven by increased production, prices and reduced costs
- Resource upside identified at Worrior Patchawarra (Cooper Basin) and Hammamet West-3 (Tunisia)

[1] Cash and Investments as at 31 December 2013

COOPER ENERGY

Increased margin, profit and cash flow

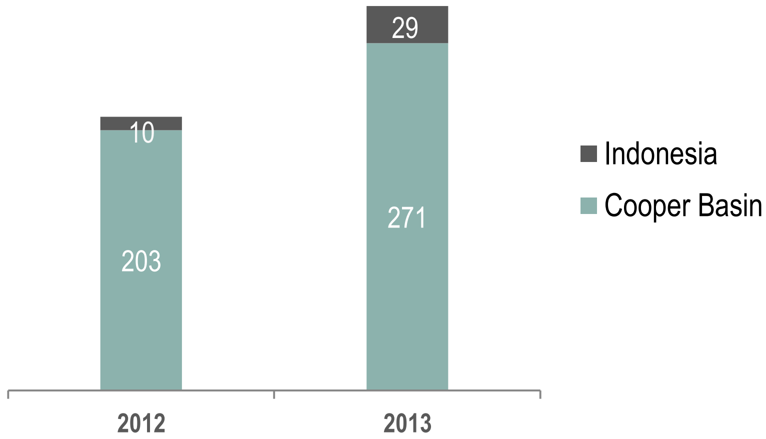
Oil production

First half record with growth from both Cooper Basin and Indonesia

Half year production
kbbl six months to December

- Highest first half production yet for Cooper Energy
- 41% higher than 2013 first half

Half year production by region
kbbl six months to December



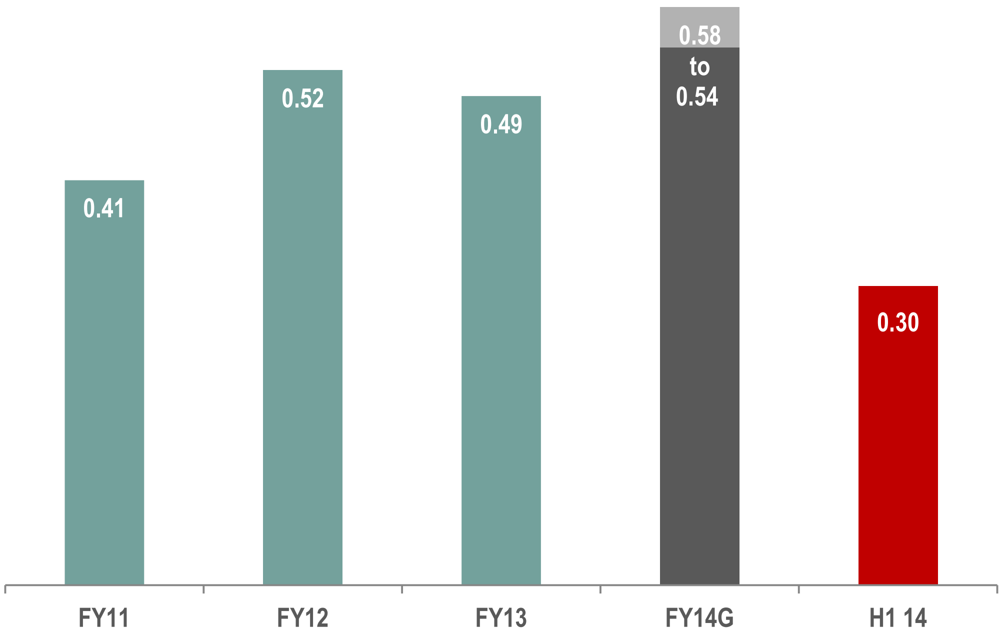
- Production growth from both Cooper Basin and Indonesia
- Cooper Basin: pipeline, well tie-ins
- Indonesia: well workover program

Record output, Cooper and Indonesia both up

FY14 production

On track for full year guidance

FY14 production guidance and historical
MMbbl



- FY14 production forecast to increase by 10% - 18% on FY13
- Increased output from Cooper Basin and Indonesia
- Guidance for production of 0.54 – 0.58 MMbbl
- First half production of 0.30 MMbbl

Trending at upper end of guidance

COOPER ENERGY

Strategy elements

Value creation is being pursued through 4 avenues

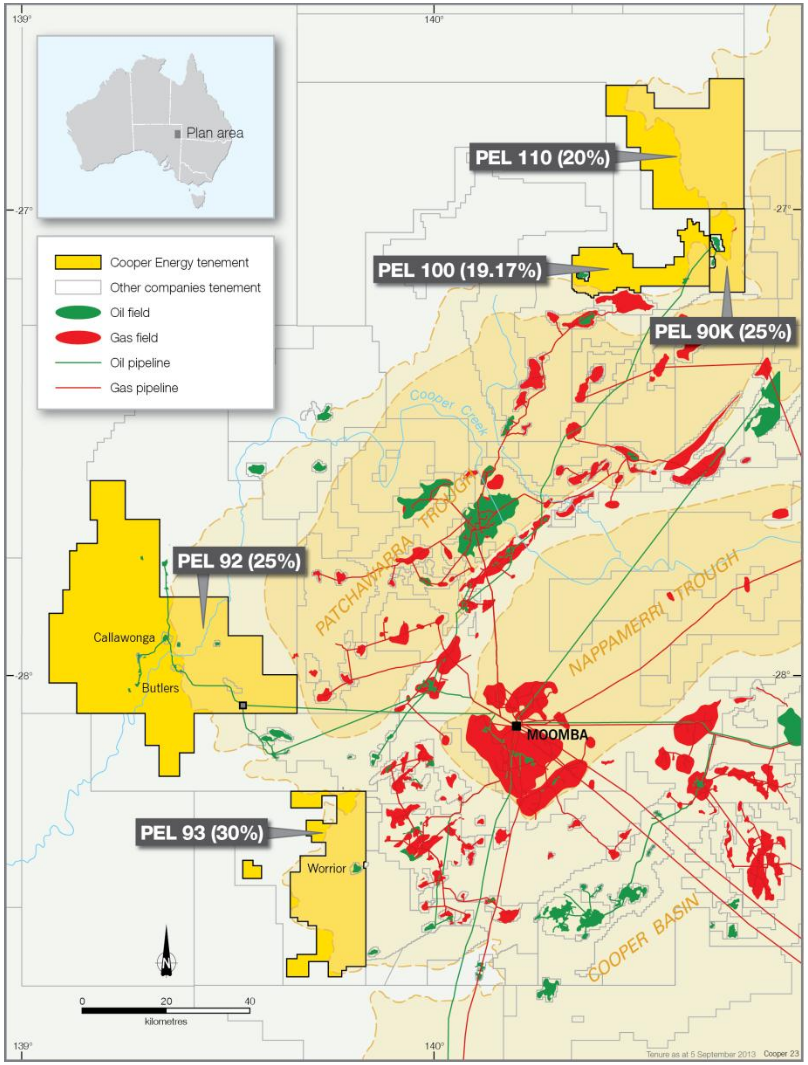
Core business strong	Gas strategy	Indonesia growth	Tunisia monetisation
Cooper Basin	Market driven	Basin focussed strategy	Hammamet West resource
Production: >0.5 MMbbl/a	Cooper Basin	Production growth	Large prospective acreage (12,600 km^2)
High margin oil production	Otway Basin	Low risk value-add	Attractive fiscal terms
Sustained exploration success	Gippsland Basin	Material exploration opportunities	Shareholder return driven
Cash and investments: $66 million	Buyer portfolio	CSG and shale potential	Divestment strategy
Zero debt	Acquisitions	Introduce partners	
Finance facilities $40 million			

Priority on technical, commercial and operational fundamentals in all ventures

Core business: Cooper Basin

Prime acreage on prolific western flank

- Oil production and exploration
  - current approximately 1,500 bopd (net)
- Exploration and development continues to add reserves
  - exploration and development replacing production
  - 2 new field discoveries from 6 wells in FY13
  - Cooper Energy Cooper Basin cumulative exploration success rate of 33% from FY03 – FY13
- Extensive seismic acquisition in CY 2013 for drilling in 2014-15 including:
  - Dundinna 3D across northern permits PEL 90, 100 & 110
  - Caseolus 3D in PEL 92



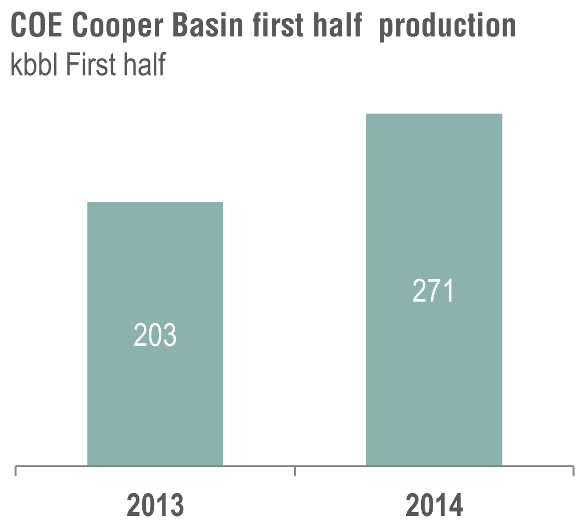
Valuable production + high success rates

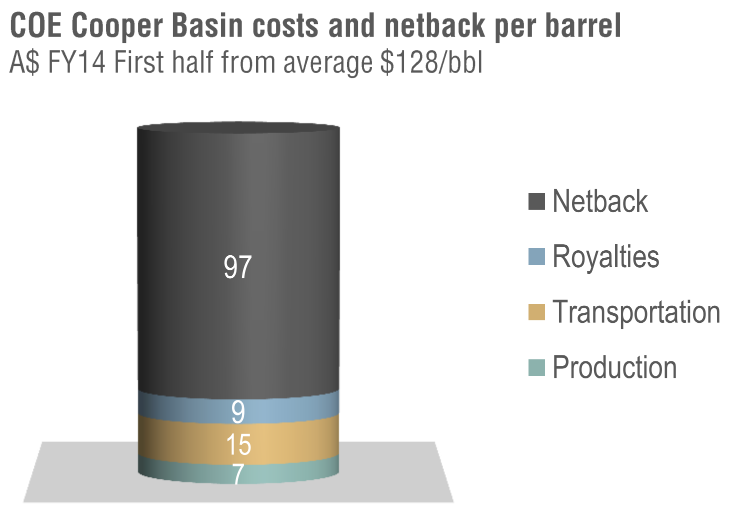
COOPER ENERGY

Core business strong

First half results illustrate Cooper Basin asset quality and strength

- Record half year production from Cooper Basin, up 34%
- Oil price of A$128/bbl (FY14 first half average)
- Netback of A$97/bbl after costs from FY14 first half
- Completion of successful 4 well development program in PEL 92
- Worrior 8: identified new oil pool in Patchawarra to be appraised





Gas strategy

Portfolio approach built around the fundamentals of cost and market

Focus on fundamentals

- cost curve and location determines development sequence
- technical and commercial robustness

Cooper Basin

- gas potential

Otway Basin

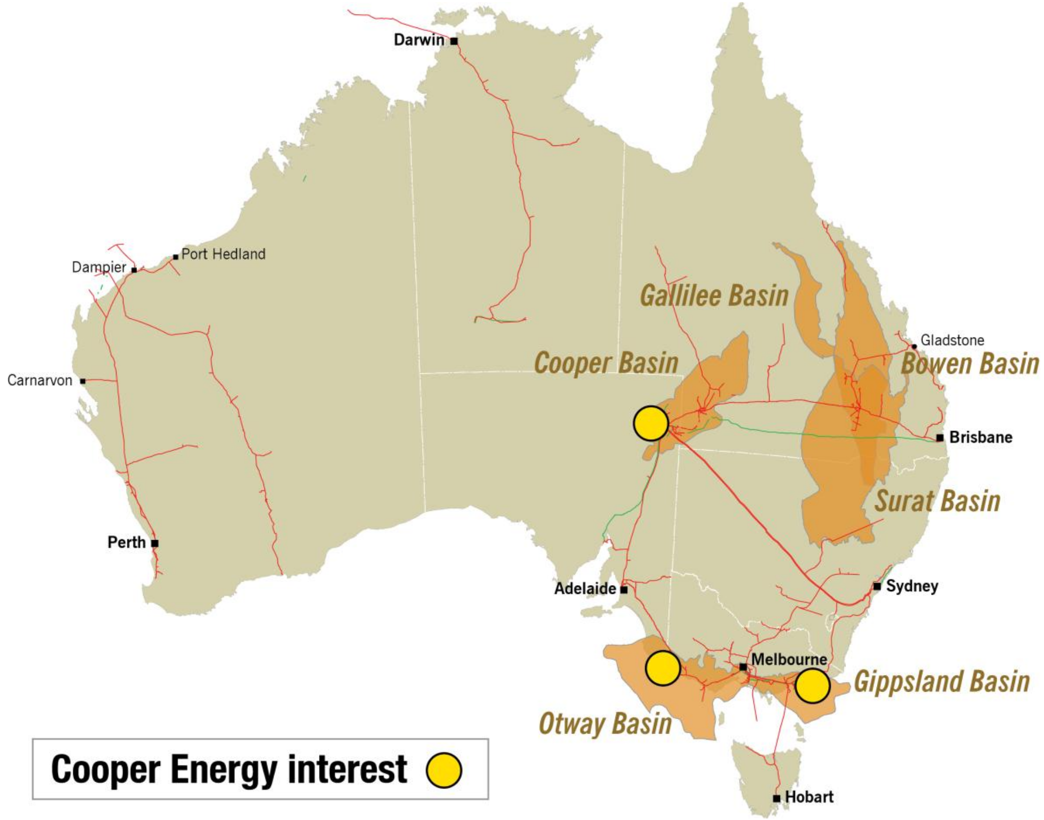
- conventional and unconventional
- close to infrastructure and markets

Gippsland Basin

- gas opportunities
- close to infrastructure and markets

Acquisitions

- reviewing and screening opportunities

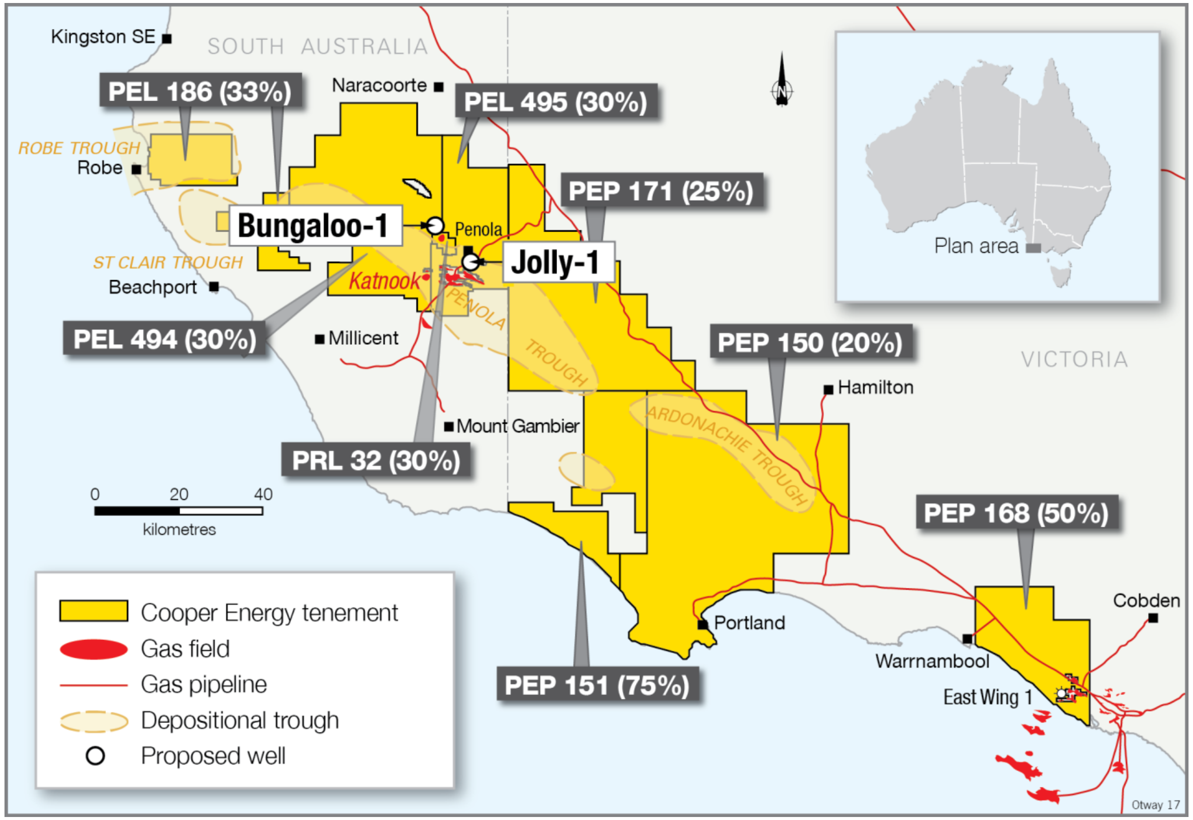


Developing portfolio built around markets

Gas strategy: Otway Basin

Exploration in well-located, gas producing basin

- Strong position across Penola Trough
- Proven basin for conventional plays
- Close to markets and infrastructure
- Jurassic source rocks are gas prone with liquids potential
- 2 deep (approx 4,000m) wells drilled from January 2014 assessing unconventional plays in the Casterton formation
  - Jolly-1 currently drilling followed by Bungaloo-1
  - cores to be collected and analysed

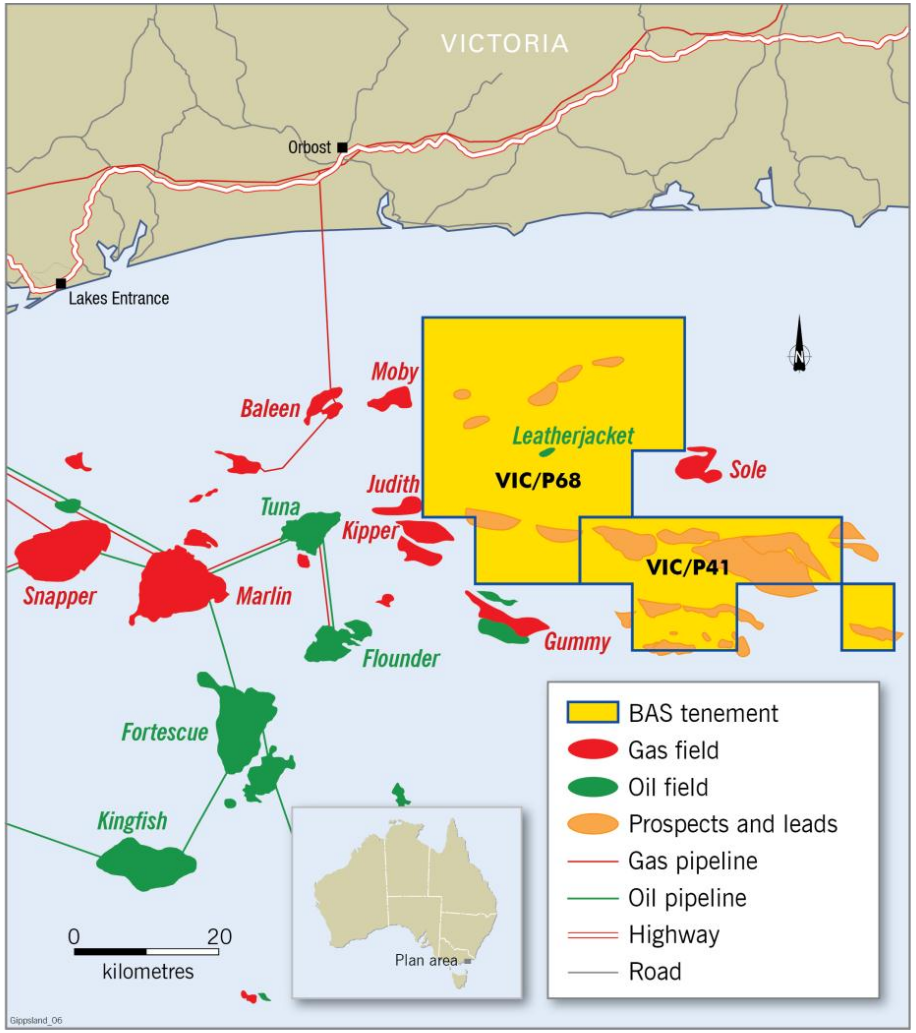


Strong fundamentals and valuable

Gas strategy: Gippsland Basin

Prime gas supply source for Eastern Australia

- 22.9% interest in Bass Strait Oil Company (BAS)
- BAS assets include offshore Gippsland Basin permits Vic/P41,42, 68
  - gas exploration potential along northern margin
  - sizeable prospects
- Range of development and market opportunities
- Conventional
- Proximity to existing infrastructure
- Opportunities under review



Conventional gas close to market

Indonesia - South Sumatra

Production and exploration - low risk acreage in proven prolific basin

Sukananti KSO (COE 55%)

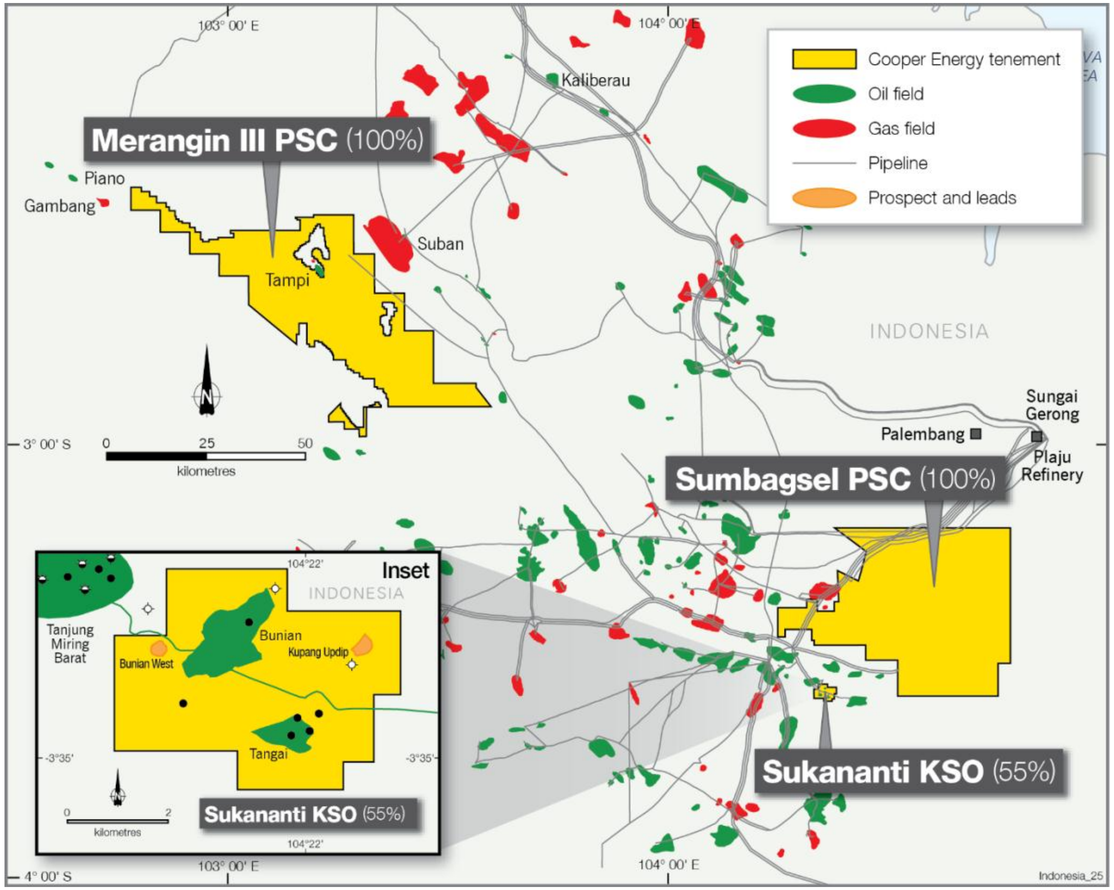
- currently ~300 bopd (100% basis)
- multiple low risk opportunities with existing available infrastructure
- short pay-back periods
- contractor share: oil 15%; gas 20% (after tax)

Sumbagsel PSC (COE 100%)

- shallow oil targets (1-5 MMbbls)
- CSG potential
- farm-out planned
- equity hydrocarbons share: oil 25%; gas 40% (after tax)

Merangin III PSC (COE 100%)

- highly prospective with identified large prospects
- oil and gas targets
- CSG and shale gas potential
- farm-out planned with strong interest already received
- equity hydrocarbons share: oil 30%; gas 35% (after tax)



Prolific oil and gas basin

Indonesia

Sukananti KSO

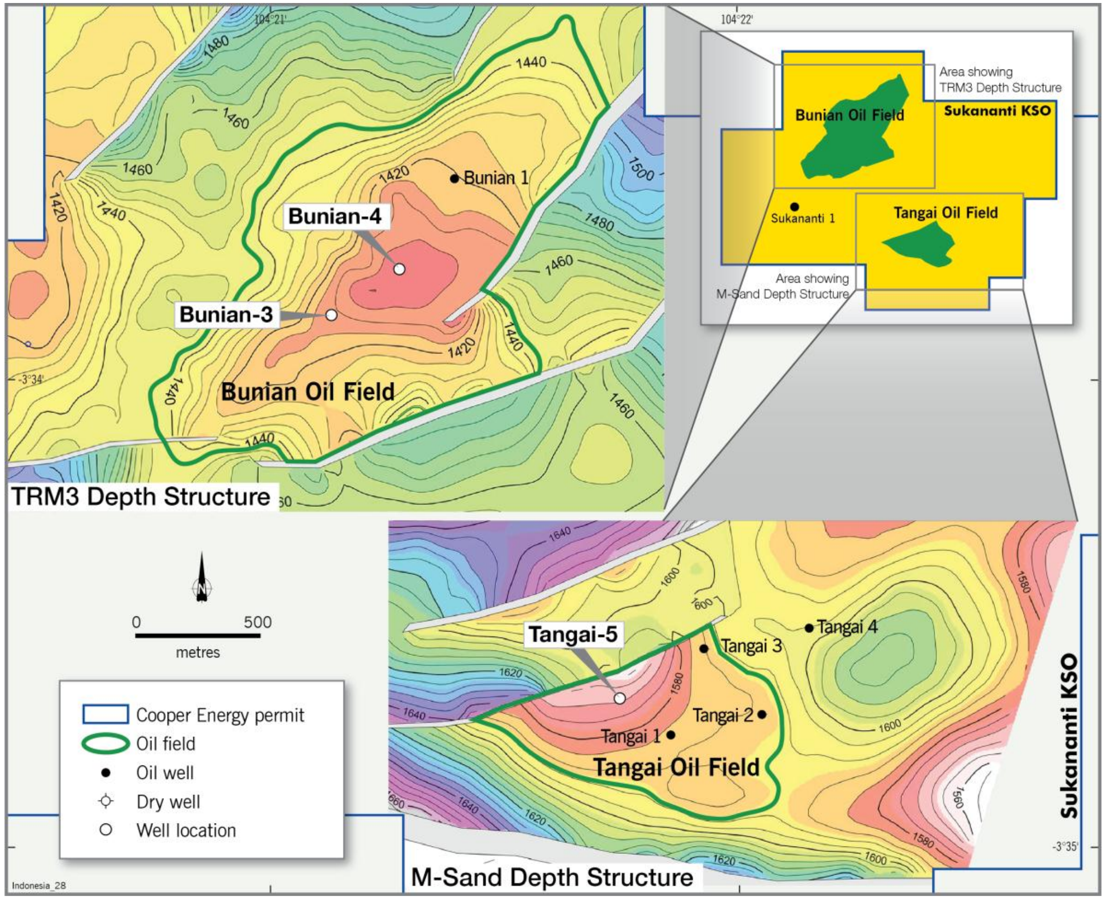
- first half production up from 54 bopd to 158 bopd (COE share) due to successful workover initiative
- 2 workovers planned for second half FY14
- development/appraisal drilling planned from mid 2014
- targeting further production growth

Sumbagsel PSC

- identifying best drilling targets from 2013/14 seismic
- planned farm out from 100% interest for capital effective drilling in FY15

Merangin III PSC

- reprocessing seismic to inform planning for seismic acquisition FY15
- planned farm out from 100% interest



Production, exploration and development

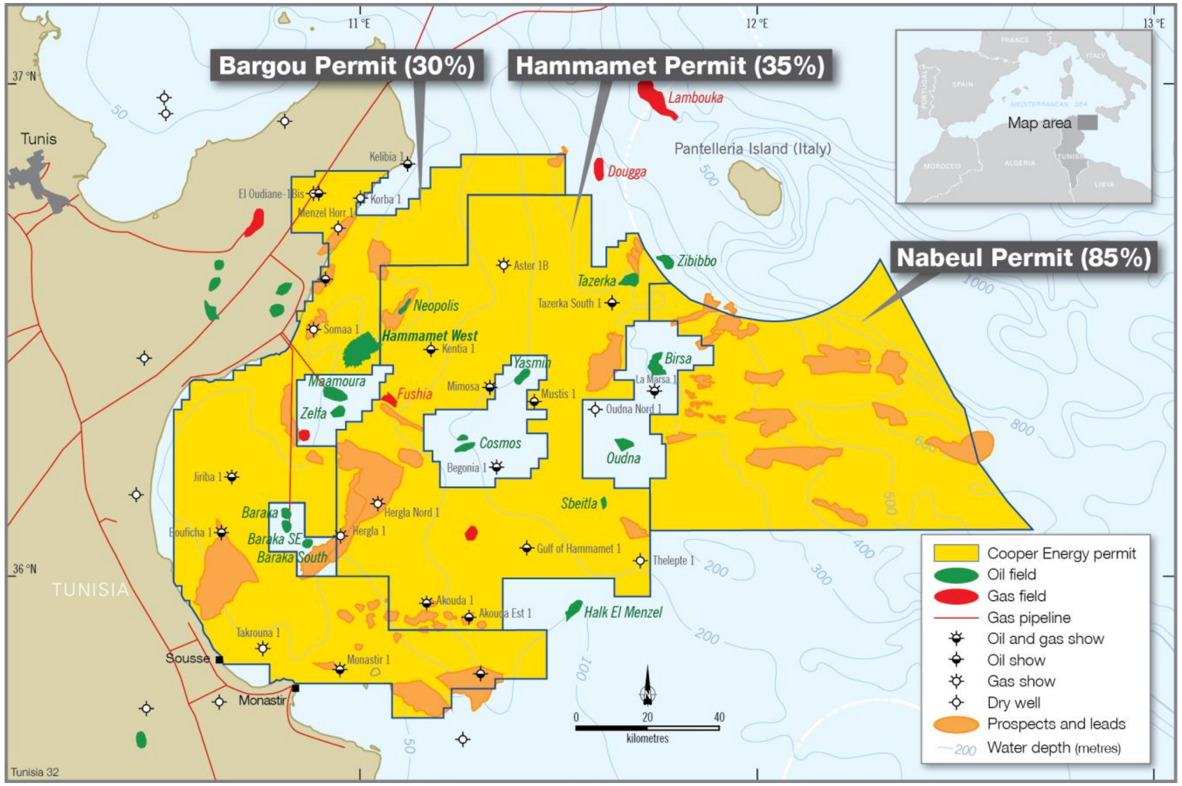
Tunisian portfolio

Attractive & substantial portfolio of greater value to African focused investors

- 3 contiguous permits, 12,600 km^2
  - – equivalent in size to the South Australian Cooper Basin
- Hammamet West oil discovery, a near term development opportunity
- Multiple prospects and emerging fractured carbonate play potential proved by Hammamet West-3 ST-1
- Nearby producing oil and gas fields
- Competitive fiscal terms

Divestment plan

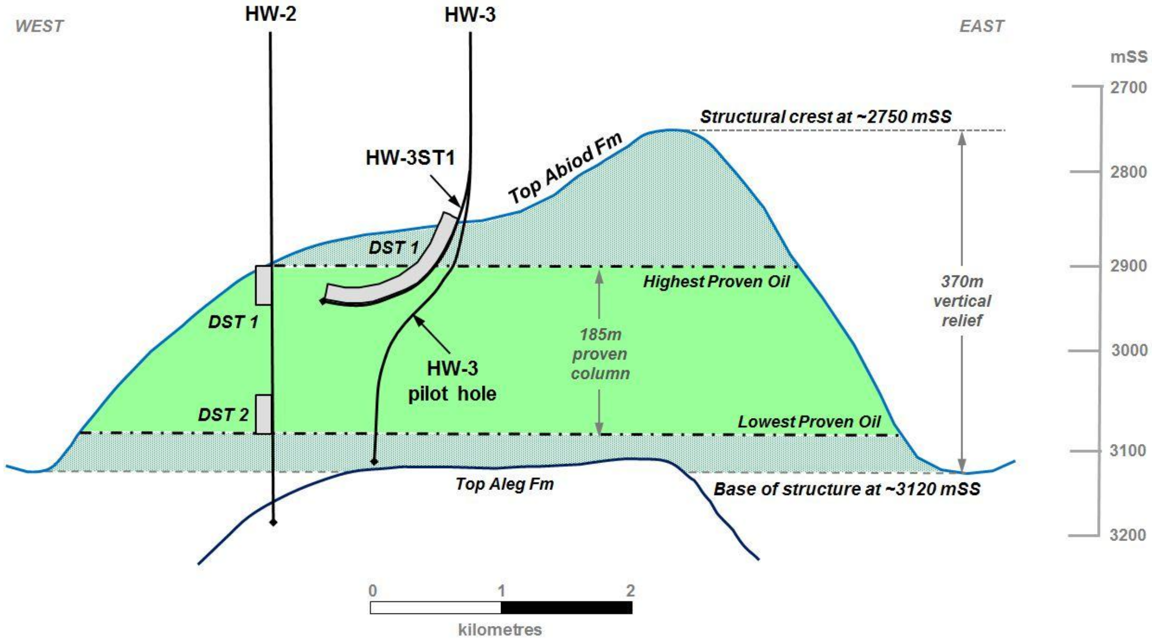
- data room to open March 2014
- HW-3 ST-2 expected second half of CY14
- pursuing best value for Cooper Energy shareholders
- targeting completion within CY14



Strategic exit - focussing core skills

Tunisia: Hammamet West

- Horizontal well confirmed pre-drill fracture reservoir model
- Production test unable to be completed
- Planning for ST-2 in second half CY14 to complete production test
- Independent contingent resource review being prepared



Hammamet West structure

- maximum closure area 40 km^2
- oil recovered at HW-2 and HW-3 ST-1 over 185 metre interval

Potentially significant resource

Exploration and development activities, Q3 – Q4 FY14

Location	License	Operator	March Qtr	June Qtr	
Cooper Basin	PEL 92	Beach Energy			3 exploration wells
	PEL 90, 100,110	Senex	3D Processing		Dundinna 3D processing
	PPL 207	Senex			Worrior-10 (Patchawarra appraisal well)
Otway Basin	PEL 494, PRL 32	Beach Energy			Jolly-1 and Bungaloo-1, deep unconventional wells
	PEP 150,168, 171	Beach Energy	2D Seismic		2D seismic acquisition
	PEP 151	Bridgeport Energy		2D	2D seismic acquisition
Indonesia	Sukananti KSO	Cooper Energy			Workover of Sukananti-1 & Tangai-3,development wells, facilities upgrade
	Sumbagsel PSC	Cooper Energy			Seismic processing and interpretation
	Merangin III PSC	Cooper Energy	2D Interpretation		2D interpretation prior to 2D acquisition in FY15
Tunisia	Bargou	Cooper Energy		HW-3 ST-2 planning & prep	Hammamet West-3 Sidetrack-2 expected 2nd half of CY14
	Hammamet	Storm International	3D		Tazerka 3D reprocessing
	Nabuel	Cooper Energy	3D Interpretation		3D interpretation

Workover

Contingent well

Firm seismic

Firm development

Strategy outcomes targeted

Strategy to deliver further growth from 2014 around 3 business streams

Australian oil: **maintain and grow strong core business**
- ongoing Cooper Basin western flank production
- low cost/high margin
- exploration and development to support growth and value add

Australian gas: build near term supply for existing and long term gas market opportunities
- long term production and cash flow
- conventional & unconventional
- portfolio of well placed competitive supply sources
- acquisitions
- fits Cooper Energy skill set

Indonesia: increasing oil production and 'company-changer' exploration
- production growth from low risk value-add
- exposure to high potential exploration at low cost to Cooper Energy via farm-outs
- oil and gas opportunities, CSG and shale potential
- build value maintaining capital discipline

Value uplift anticipated as plans implemented
- realise Tunisia portfolio value via divestment
- corporate activity where it adds shareholder value and opportunities
- production growth
- reserves & resources growth

COOPER ENERGY

Summary and outlook

- **Cooper Energy will continue to be fundamentals-driven:**
  - technical and commercial + care
  - capital-prudent management
- **Record production and financial results for first half FY14**
- **Full year production guidance re-affirmed**
- **Strong balance sheet retained with $65.7 million cash and investments**
- **Advancing acquisition opportunities consistent with strategy**
- **Significant events for further value catalysts over next 18 months includes**
  - Cooper Basin: drilling in PEL 92 and 93, exploration wells in northern permits
  - Otway Basin: current 2 well program targeting unconventional gas
  - Indonesia: workovers and development drilling targeting further production, exploration well in Sumbagsel
  - Tunisia: working to monetisation
