MONADELPHOUS SECURES \$250M OF GAS CONTRACTS IN QUEENSLAND

Leading engineering company Monadelphous Group Limited (ASX:MND) ("Monadelphous") today announced it has secured three contracts with the Australia Pacific LNG Project¹ (the "Project"), for the construction of upstream gas processing and compression facilities associated with its coal seam gas (CSG) to LNG project in Queensland. The contracts have a combined value of approximately \$250 million.

The largest of the contracts is for the construction of an upstream gas processing facility that will process gas from the Project's gathering network for delivery to its main pipeline.

The other contracts comprise the installation of a pipeline compression facility and an interconnect facility, enabling the transfer and metering of gas between networks. Work will be completed in line with APLNG's schedule to deliver first LNG in mid-2015.

"We are extremely pleased to be working with Australia Pacific LNG on this significant coal seam gas project in Queensland," Monadelphous Managing Director Rob Velletri said.

"These contracts further strengthen our reputation in the delivery of major oil and gas projects in Australia and overseas."
