Trading update

BRISBANE, Thursday 1 May 2014: The board of directors of Data#3 Limited (ASX: DTL) today updated the market in relation to the company's outlook.

The previous guidance provided with Data#3's half-year results on 19 February 2014 indicated that 'activity levels are very high and, with pipeline building, our original 2H FY14 target, while aggressive, is not beyond reach'.

Today the board indicated that, while activity levels still remain high and the pipeline of opportunity continues to build, it was not sufficiently strong to allow the company to achieve this target. Forecasts are significantly dependent on trading toward the end of the period, with a range of potential outcomes, and as a result the board indicated there is not enough certainty at this time to provide further guidance. It was however, confident that the company's second half profit would exceed the first half's profit.
