

## Praemium's FY14 revenue up 28%

**27 August 2014, Melbourne**: Praemium (ASX: PPS) has delivered its annual results for the financial year ending 30 June 2014. In summary, Praemium achieved:

- > Revenue increase of 28% to \$18.0 million;
- > Growth in SMA funds on platform of 42% to \$2.5 billion;
- > Underlying\* EBITDA loss improvement of 56% to \$0.4 million; and
- > Net loss before tax of \$0.85 million, compared to \$0.35 million for the corresponding period.

Commenting on the full-year results, CEO Michael Ohanessian stated, "We are very pleased with the growth of the business achieved this year. We recorded significant fund growth on our global SMA platforms from a healthy pipeline of new financial advisors. We launched a new SuperSMA to target retail superannuation in Australia and established an in-house investment team in London, Smart Investment Management, to deliver a ready-to-use range of risk weighted model portfolios."

Mr Ohanessian added, "In addition to solid top-line growth, we are also pleased to report the Company's first year of positive operating cashflow. Throughout the year we continued to invest in the business with major projects in Australia associated with Self-Managed Superannuation Funds (SMSF) and retail superannuation, as well as global initiatives such as a new mobile interface designed for investors to see their portfolios on any device, at any time."

The group achieved revenue growth of 28%, with growth across all products and regions in which Praemium operates (Australia, UK and Asia). In particular revenue from Praemium's SMA investment platforms rose 64% from the prior year, with record fund inflows across the Australian and International platforms resulting in Funds on Platform rising by 42% to \$2.5 billion.

Underlying\* EBITDA loss was \$0.4 million for the year, a 56% improvement on the prior year. Revenue growth was absorbed by cost investments across the business to position the Company for its next phase of growth. These cost investments are now largely completed, with the Company looking to maximise its scalable operating leverage in future periods.

The Company also recorded its first positive operating cashflow for the 12 months to 30 June 2014. Closing cash was \$8.56 million, 6% higher than the prior year, with positive operating cash flow achieved in 7 of the last 9 quarters.

Praemium's Australian business generated a 48% increase in segment profit and, as a result, incurred a liability to pay tax. The resultant tax liability has been offset by a reduction of \$2.7 million in the Deferred Tax Asset created in the previous financial year, and the reported Net Loss After Tax (NPAT) for the Company as a whole was \$3.5 million.
