"Size, Scalability, Market and Pricing"

Disclaimer

Certain statements included in this release constitute forward looking information. This information is based upon a number of estimates and assumptions made on a reasonable basis by the Company in light of its experience, current conditions and expectations of future developments, as well as other factors that the Company believes are appropriate in the circumstances. While these estimates and assumptions are considered reasonable, they are inherently subject to business, economic, competitive, political and social uncertainties and contingencies.

Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of, the Company. Such factors include, among other things, risks relating to additional funding requirements, gas prices, exploration, acquisition, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward-looking information is no guarantee of future performance and, accordingly, investors are cautioned not to put undue reliance on forward-looking information due to the inherent uncertainty therein. Forward-looking information is made as at the date of this release and the Company disclaims any intent or obligation to update publicly such forward-looking information, whether as a result of new information, future events or results or otherwise.

The purpose of this presentation is to provide general information about the Company. No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its officers, employees and advisers expressly disclaims any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission therefrom.

This presentation should be read in conjunction with the Annual Financial Report as at 31 December 2013, the half year financial statements together with any ASX announcements made by the Company in accordance with its continuous disclosure obligations arising under the Corporations Act 2001 (Cth).

Sustained Natural Gas Demand

Strong Market Fundamentals

Increasing Demand

Forecasts indicate strong and increasing demand for natural gas

Pricing robust with domestic prices set by government policy at ~US\$ 10.80/mscf for non-residential use

Domestic Production Shortfall

Shortfall to continue as unconventional gas production slowly ramps up (tight gas, CBM, shale gas)

Sino Gas well positioned

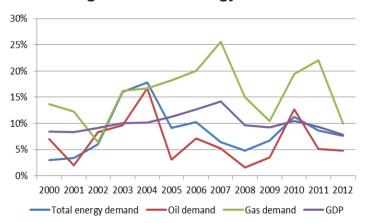

World class gas assets at pre-development stage move to early production in 2H of 2014

Commercialisation

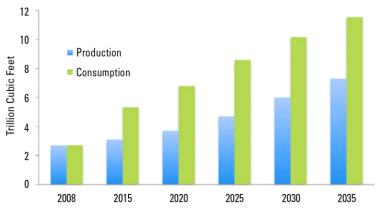

Infrastructure, services, equipment and water readily available in Ordos Basin

Sino Gas is well advanced and on track to commence pipeline production and sales in 2014

Y/Y change in GDP & Energy Demand in China¹

China Domestic Market Outlook2²

Project Overview

Size & Scale

Sino Gas' PSCs are approximately 3,000km² or 741,000 acres

≈ Exploration Upside

Substantial acreage yet to be fully explored (~30% remaining)

Geology

Gas sourced from deep coal – redeposited to ~2,000m, with gas migration to adjacent sands

Stacked Multiple Pay-Zones

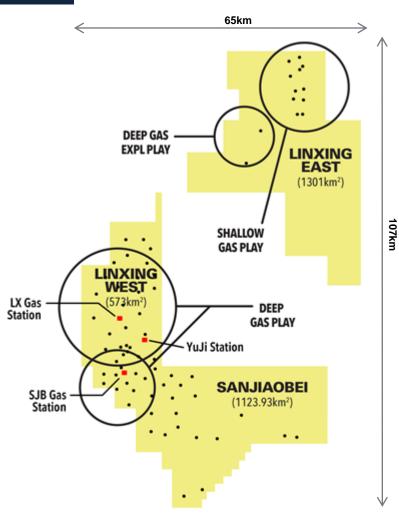

River channel depositional environment, up to 16 pay-zones per well evidenced

Surrounded by Prolific Production

Ordos Basin has been on large-scale oil & gas production since the 1980s e.g. Changqing oil and gas field alone producing 2.8 bcf/day gas in 2012 (27% of China's total gas production). Sulige tight gas field achieved peak production of 1.7 bcf/day in 2012

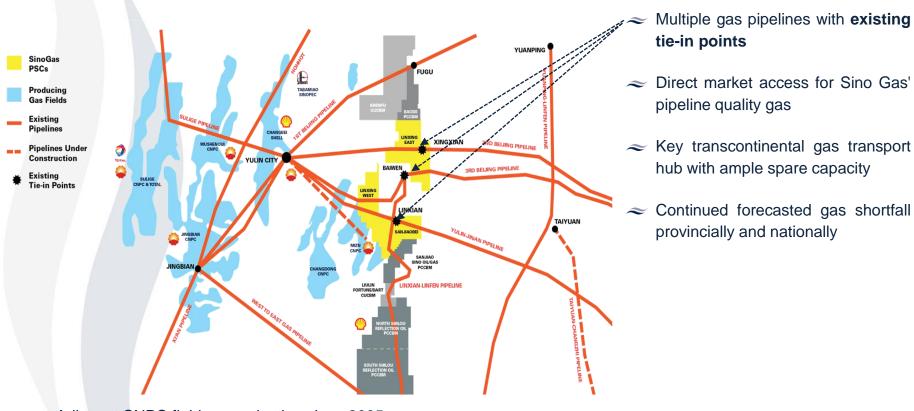

Commercialisation

Sino Gas is well advanced and on track to commence pilot pipeline production and sales in 2014

Existing Infrastructure & Market

- Adjacent CNPC field on production since 2005
- ∼ CNPC is the SOE PSC Partner with Sino Gas in the adjacent Sanjiaobei PSC

Resource Statement

Sino Gas & Energy Holdings Limited (ASX:SEH, "Sino Gas", "the Company") holds a 49% interest in Sino Gas & Energy Limited (SGE) through a strategic partnership completed with MIE Holdings Corporation ("MIE" SEHK: 1555) in July 2012 to develop two blocks held under Production Sharing Contracts (PSCs) with CNPC and CUCBM. SGE has been established in Beijing since 2005 and is the operator of the Sanjiaobei and Linxing PSCs in Shanxi province.

The statements of resources in this release have been independently determined to Society of Petroleum Engineers (SPE) Petroleum Resource Management Systems (PRMS) standards by internationally recognized oil and gas consultants RISC (announced 4 March 2014) using probabilistic estimation methods. These statements were not prepared to comply with the China Petroleum Reserves Office (PRO-2005) standards or the U.S. Securities and Exchange Commission regulations and have not been verified by SGE's PSC partners CNPC and CUCBM. EMV is the probability weighted net present value (NPV), including the range of project NPVs and the risk of the project not progressing. Project NPV10 is based on a mid-case wellhead gas price of \$US8.79/Mscf and lifting costs (opex+capex) of ~ US\$1.5/Mscf for mid-case Reserves, Contingent & Prospective Resources. All resource figures quoted are unrisked mid-case unless otherwise noted. Sino Gas' attributable net Reserves & Resources assumes PSC partner back-in upon ODP approval, CBM Energy's option to acquire an interest of 5.25% in the Linxing PSC (by paying 7.5% of back costs) is exercised, and MIE fulfil funding obligations under the strategic partnership agreement. Reserves & Resources are net of 4% in-field fuel for field compression and field operations. Reference point is defined to be at the field gate. No material changes have occurred in the assumptions and subsequent work program exploration and appraisal results have been in line with expectations.

Information on the Resources in this release is based on an independent evaluation conducted by RISC Operations Pty Ltd (RISC), a leading independent petroleum advisory firm. The evaluation was carried out by RISC under the supervision of Mr Peter Stephenson, RISC Partner, in accordance with the SPE-PRMS guidelines. Mr Stephenson has a M.Eng in Petroleum Engineering and 30 years of experience in the oil and gas industry. RISC consents to the inclusion of this information in this release.

RISC is an independent advisory firm that evaluates resources and projects in the oil and gas industry. RISC offers the highest level of technical, commercial and strategic advice to clients around the world. RISC services include the preparation of independent reports for listed companies in accordance with regulatory requirements. RISC is independent with respect to Sino Gas in accordance with the Valmin Code, ASX listing rules and ASIC requirements.

Reserves & Resources

RISC's independent mid-case assessment up to 31 December 2013 identified:

- ≈ 227% increase in Gross Project 2P Reserves to 1,068 bcf, with Sino Gas' share at 291 bcf¹
- Gross Project Contingent Resources increased 32% to 2.9 tcf, with Sino Gas' share increasing to 850 bcf¹
- Gross Project Prospective Resources increased 25% to 4.0 tcf, with Sino Gas' share increasing to 1.0 tcf¹
- Sino Gas' share of project EMV has increased by a further 45% to US\$2.3 billion²

Sino Gas' Attributable Net Reserves & Resources are summarised below:

Sino Gas' Attributable Net Reserves & Resources ¹	1P RESERVES (Bcf)	2P RESERVES (Bcf)	3P RESERVES (Bcf)	2C CONTINGENT RESOURCES ³ (Bcf)	P50 PROSPECTIVE RESOURCES ³ (Bcf)	EMV ₁₀ (\$USm)²
March 2014 (Announced 4 March 2014)	129	291	480	850	1,023	2,258
March 2013 (Announced 20 March 2013)	32	94	199	653	885	1,556
TOTAL 2013 CHANGE (+/-)%	+21	1% (2P Reserv	/es)	+30%	+16%	+45%
Total Project March 2014	466	1,068	1,786	2,941	3,978	N/A

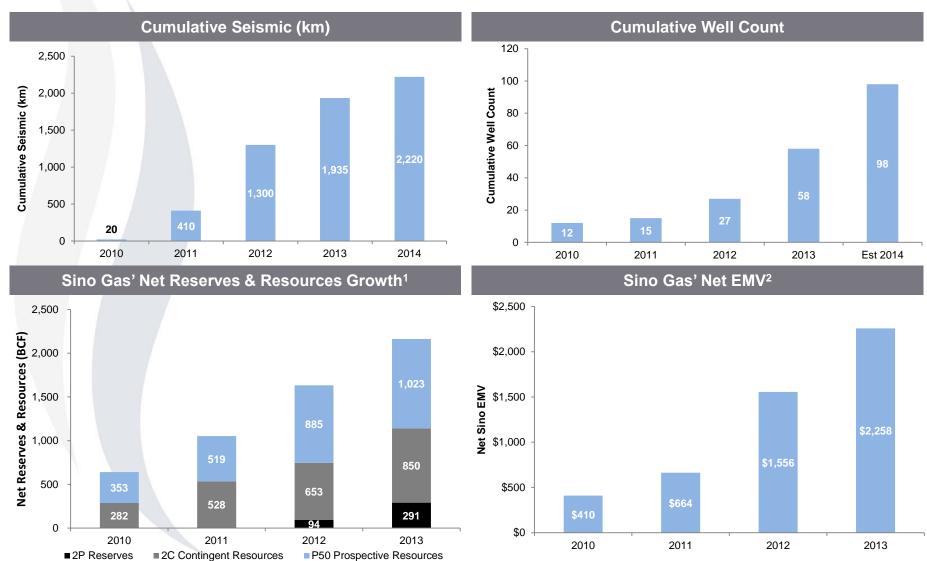

Note 3: Contingent and Prospective Resources have not been risked for the risk of development and discovery. The estimated quantities of petroleum may potentially be recovered by the application of future development project(s) relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration and appraisal is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.

Sino Gas' share of the project's success case Net Present Value (NPV) and risk weighted EMV are summarised below:

SINO GAS' ATTRIBUTABLE ECONOMIC VALUE ²	NPV ₁₀ (\$USm)	EMV ₁₀ (\$USm)²
Reserves	625	653
Contingent Resources	828	754
Prospective Resources	1,350	851
TOTAL		2,258

SEH provides an opportunity to invest in the China energy growth story

≈ Reserves & Resources

A growing reserve and resource base (Gross Project 2P Reserves at 1,068 bcf¹) in **one of the world's largest gas** basins

Market Demand

Natural gas consumption in China planned to double by 2018

Tier 1 partners (CNPC / CUCBM) and attractive PSC fiscal regime

Equipment Availability / Central Gathering

Competitive well and operating costs - US\$1.50/mscf¹, extensive rig and service industry availability – delivery infrastructure in place providing access to a **large domestic market**

Sales Secured

Pilot pipeline gas sales **second half 2014** from both PSCs with attractive pricing US\$7.00/mscf under GSA for first year, expected to move in line with national pricing – circa US\$10.80+/mscf

SEH provides an opportunity to invest in the China energy growth story

∼ Upside Remaining

Horizontal well development and substantial acreage yet to be explored

US\$57.7m cash at 30 September 2014 plus a further US\$40m debt facility in place

≈ Supportive Macro Environment

Chinese government policy is supportive of domestic gas producers. The recently announced gas supply agreement between Russia and China is a significant vote of confidence in the Chinese move towards gas.

Board of Directors

Philip Bainbridge Chairman

- ─ More than 30 years experience in the oil and gas industry, 23 years with the BP Group
- Former COO of Oil Search and Executive General Manager LNG responsible for gas growth and exploration
- Currently a member of the Board of PNG Sustainable Development Program and a non-executive director of Drill Search Energy Company
- Extensive gas project development and management experience
- Member of the Australian Institute of Company Directors

Gavin Harper Non-Executive Director

- More than 37 years experience in the oil and gas industry, 25 years with Chevron
- Former MD of Chevron's Korean Gas Business Development
- Previously business manager Chevron Australia Gorgon Project and led the project to integrate Chevron's Australian & PNG operations
- Extensive worldwide project management experience
- Member of the Australian Institute of Company Directors

Bernie Ridgeway Non-Executive Director

- Over 23 years corporate experience with public and private companies as owner, director and manager
- Current MD of ASX-listed Imdex Limited (ASX: IMD)
- Member of the Institute of Chartered Accountants Australia
- Member of the Australian Institute of Company Directors

Colin Heseltine Non-Executive Director

- 40 year career with Australian Department of Foreign Affairs and Trade (1969-2008)
- Australian Ambassador to Republic of Korea (2001-2005); Director of Australian Commerce and Industry Office in Taiwan (1992-1997); Deputy Head of Mission in the Australian Embassy Beijing (1982-1985 and 1988-1992)
- Recently retired secretary of APEC and currently a senior associate with the Nautilus Institute and vice chairman of the Australia Korea Business Council
- Member of the Australian Institute of Company Directors
