3D Oil Limited

QUARTERLY ACTIVITIES REPORT FOR THE THREE MONTHS ENDED 31 MARCH 2015

Key Points

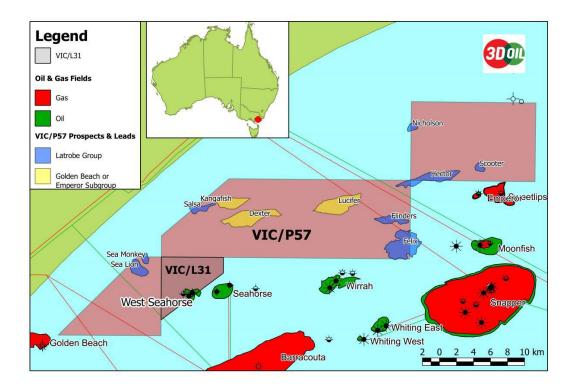

- The West Telesto drilling rig has been mobilised to Victoria and is scheduled to commence the Sea Lion-1 well mid 2015 in VIC/57.
- The completion the Flanagan 3D seismic data in T/49P and the processing of data is 60% completed ahead of prospect mapping which is expected during the third quarter of 2015.

Exploration

VIC/P57 and VIC/L31, Gippsland Basin, offshore Victoria

3D Oil Limited (ASX: 'TDO') has a 24.9% interest in the Vic/P57 exploration permit which contains a number of prospects and leads identified on 3D seismic.

In VIC/P57 TDO is focussing on the upcoming Sea Lion-1 well where the company's share of well costs are being carried up to the extent of US\$7.5 million. Together with joint venture operator Hibiscus Petroleum, TDO is finalising the operational and regulatory preparation for Sea Lion-1. The well is scheduled to be drilled mid-2015, once the West Telesto jack-up rig is released from its current drilling programme for Origin Energy at the Yolla gas field offshore Tasmania.

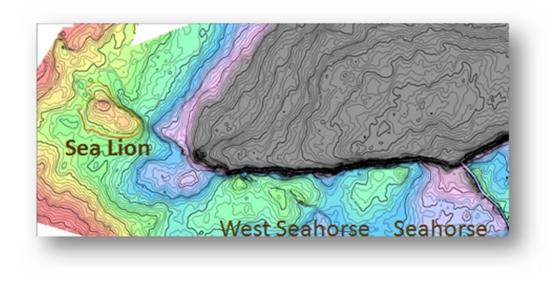

Location map for VIC/P57 and VIC/L31

Sea Lion is considered highly prospective as it is on a proven oil-producing trend, and represents one of the last undrilled 4-way dip closures at the prolific 'Top Latrobe' level in the Gippsland Basin. The combination of prominent mapped depth structure and the likely presence of thick high quality reservoir sands overlain by the regional seal provides the ingredients of a high quality target.

An independent report has assessed the Sea Lion most likely (P50) Prospective Resource at 11.0MMbbl of oil (combined probabilistic estimate for the three main target levels).

The drilling of the Sea Lion-1 well will meet the VIC/P57 Year 3 permit commitment.

Structural map of Sea Lion

TDO Managing Director Noel Newell commented:

"The Sea Lion-1 well is an excellent oil exploration near field target. Despite the current low oil prices an oil discovery of this potential magnitude, with productive Gippsland reservoirs located in shallow water would be a valuable asset. Such a discovery could be transformative for TDO and, in the case of Sea Lion, there is also potential for any discovery to be efficiently co-developed with the adjacent West Seahorse field."

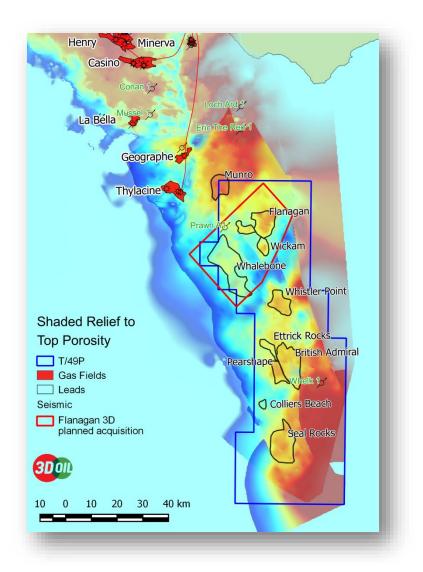

West Telesto drilling rig on transport ship

T/49P, Otway Basin, offshore Tasmania

In December 2014, 3D Oil Limited TDO concluded the acquisition of the 974 sq km Flanagan 3D seismic survey.

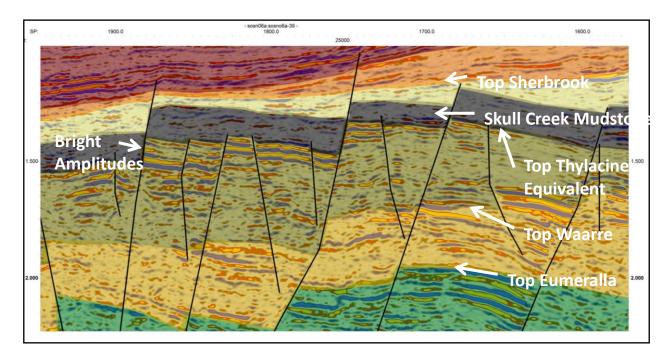

The seismic data, recorded by the seismic vessel Polarcus Asima, is being processed by DownUnder GeoSolutions (in Perth). Data processing of the 3D seismic, which is a sophisticated process, is currently approximately 60% complete. The final products are expected to be available in mid 2015. Early indications are that the data is of very good quality.

Interpretation and assessment of the geology and prospectivity of the area is continuing in parallel with detailed mapping of the pre-existing 2D seismic data set. Particular focus has been applied to reviewing paleo depositional environments since the beginning of the year

Location of leads and the Flanagan Survey, T/49P Offshore Tasmania

and has now incorporated the basement architecture leading to a more comprehensive interpretation of the palaeogeographical setting. These new concepts have resulted in a refinement of the initial interpretation of the 2D data over T/49P with the addition of several newly interpreted horizons. This work provides confidence that supports the presence of good seal rocks over the key prospects within the 3D survey area.

2D seismic line and interpretation over Seal Rocks Lead

TDO intends to leverage the results of the Flanagan survey to attract the best possible farmin terms for future exploration in this highly prospective gas exploration area. The recent deals with Beach have allowed TDO to retain a large pre-drilling interest and operatorship in T/49P, while reducing cash exposure to the Flanagan survey. Farmout activities are expected to commence during the third quarter of 2015. The continued strengthening of Eastern Australian gas markets is also expected to contribute to the appetite for the farmout.

TDO Petroleum Tenement Holdings

As at 31 March 2015, TDO petroleum tenement holdings were:

Tenement and Location	TDO beneficial interest at 31Dec14	Beneficial interest acquired / (disposed)	TDO beneficial interest at 31Mar15
VIC/P57 offshore Gippsland Basin, Victoria	24.9%	nil	24.9%
T/49P offshore Otway Basin, Tasmania	70%	nil	70%

Notes

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- Issued and quoted securities The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- The definitions in, and provisions of, AASB 1022: Accounting for Extractive Industries and AASB 1026: Statement of Cash Flows apply to this report.
- Accounting Standards ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
