About IMX Resources Limited

IMX Resources Limited is an Australian-based exploration company, listed on the Australian Securities Exchange and Toronto Stock Exchange ('**TSX**'), with projects located in Tanzania, east Africa.

In Tanzania, IMX controls (85%) the Nachingwea Property in south-eastern Tanzania. The Nachingwea Property covers an area of 5,800 km² and lies in the world-class Mozambique Belt which is prospective for graphite, nickel, gold and copper mineralization. The Company's Chilalo Graphite Project, Kishugu Gold Prospect and Ntaka Hill Nickel Project are located on the Nachingwea Property.

At Chilalo, IMX's high-grade graphite deposit, Shimba, contains an Inferred Mineral Resource of 7.4 million tonnes grading 10.7% Total Graphitic Carbon (TGC), for 792,000 tonnes of contained graphite (using a cut-off grade of 5% TGC) (ASX announcement 7 April 2015). The Shimba deposit also exhibits excellent metallurgical characteristics, capable of producing a coarse flake, high-grade concentrate with excellent recoveries (ASX announcement 30 March 2015). IMX continues to fast track development work on its Chilalo Graphite Project.

IMX has entered into a Memorandum of Understanding with China-Base Ningbo Foreign Trade Co. Ltd. ('**China-Base Ningbo**') for the sale of Chilalo graphite concentrate. The MOU contemplates a binding offtake agreement for the supply of at least 25,000 tonnes of Chilalo graphite concentrate per year for five years. China-Base Ningbo is one of China's Top 500 Companies, Top 100 Trading Enterprises, and Top 10 Private Trading Enterprises.

Since announcing the Mineral Resource estimate on 7 April 2015 and exploration results on 30 March 2015, IMX confirms that it is not aware of any new information or data that materially affects the information included in those announcements and that all material assumptions and technical parameters underpinning the Mineral Resource estimate in that announcement continue to apply and have not materially changed.

IMX is also carrying out gold exploration at its Kishugu and Naujombo gold targets as well as conducting exploration elsewhere on the large, underexplored Nachingwea Property.

IMX has entered into a Project Acquisition Agreement (the '**Agreement**') with Loricatus Resource Investments, an investment vehicle on behalf of Mauritius-based mining private equity fund, Fig Tree Resources Fund II ('**Fig Tree**'), for a joint venture covering its Ntaka Hill Nickel Project.

Under the Agreement, Fig Tree will acquire a 70.65% stake in Ntaka Hill from the IMX-managed Nachingwea JV between IMX (85%, MMG Limited 15%) for consideration of US\$6 million in cash, of which US\$2 million is paid upon receipt of key regulatory approvals and US\$4 million is paid upon successful completion by Fig Tree of additional geotechnical studies.

Fig Tree will have the right to maintain its 70.65% interest in Ntaka Hill upon sole funding all work to completion of a Definitive Feasibility Study within 5 years. If Fig Tree does not complete the study, its interest in Ntaka Hill will reduce to 50%. Should the geotechnical studies be unsuccessful, Fig Tree will then hold a 30% interest in the joint venture. The geotechnical studies are expected to be completed by August 2015.
