

## ASX Announcement

16 October 2015

# LiveTiles launches new software product – LiveTiles Build

LiveTiles is pleased to announce the launch of a new software product, LiveTiles Build.

LiveTiles Build is an industry-first software tool that automatically and rapidly generates Microsoft SharePoint site architecture.

LiveTiles Build guides users through a series of simple natural language statements, such as *“I want to share Marketing Documents with the Marketing Team”*, before converting user responses into code and generating the site architecture.

CEO and Co-Founder Karl Redenbach said: “Out of the box SharePoint requires very specific developer expertise to set up, which has typically seen it underutilised in small to mid-sized organisations. LiveTiles Build unlocks SharePoint for this market by simplifying configuration down to a few human questions.”

“It’s the first tool of its kind to quickly and easily generate SharePoint site architecture in this manner.”

In addition to the solution’s broad SMB market appeal, LiveTiles expects its partner channel to use LiveTiles Build as a way to streamline project deployment.

LiveTiles Build will be officially launched in the Asia-Pacific region this month, followed by launches in North America and UK/Europe by the end of calendar 2015. LiveTiles Build will be offered for an annual subscription licence fee of US\$950 per organisation.

LiveTiles now has three software products:

- LiveTiles Design (launched in 2014)
- LiveTiles Build
- LiveTiles Mosaic for the K-12 education market (launched in 2014).

LiveTiles Build operates independently of LiveTiles Design, however the two products are highly complementary.

LiveTiles’ products are actively targeting the large installed base of Microsoft SharePoint which has an estimated 200 million users globally.
