About Superloop

Established in 2014, Superloop is an infrastructure provider of dark fibre connectivity services to large network providers and enterprises operating in the Australian and Singapore markets. Bringing innovation to infrastructure, Superloop is building a new independent dark fibre network connecting key points of presence in key Asian markets.

Superloop's initial key assets include a 15-year exclusive right to a 130 kilometre fibre network within Brisbane, Sydney and Melbourne connecting many of the key data centres within those metropolitan areas.

The Company owns and operates a strategic underground duct network spanning approximately 120 kilometres in the Asian telecommunications hub of Singapore. The Singapore fibre optic network interconnects major data centre and submarine cable landing station locations including Equinix SG1, SG2, Global Switch and Digital Realty (Jurong), and will soon connect to the Katong and Tuas Cable Landing Stations and Equinix SG3.
