1-PAGE ANNOUNCES NINE ANNUAL ENTERPRISE CONTRACTS

- 1-Page signs 9 annual contracts for Sourcing Platform
- These annual contracts range between US\$50,000 - \$US300,000 (A\$417,716¹) (varies based on the size of the corporation)
- The 9 enterprises are expected to quickly scale to an average revenue generating contract of more than US\$300,000
- 1-Page will provide Curated Talent Pools to fill existing and future open roles of the new clients
- The clients' requirements have already started to expand beyond the contracted minimums as additional pools have been requested and will continue to expand as more pools are requested by clients
- These clients are from various industries including financial services, technology, insurance, and construction and average in excess of 20,000 employees per company
- The clients have an average of more than 1,700 open roles at any time, demonstrating that the delivery of 25 pools per month is conservative relative to hiring intentions, given it is less than 1.5% of open roles.

1-Page Limited (ASX:1PG) ("1-Page"), the enterprise cloud-based talent acquisition platform is pleased to advise it has signed annual contracts with nine enterprises to utilise the 1-Page Sourcing Platform.

The 1-Page Sourcing Platform will provide the enterprises with an innovative sourcing platform, enabling them to seamlessly find, attract, and engage talented candidates.

The annual contracts to provide a minimum number of Curated Talent Pools, charged at US\$1,000 per pool per month, provide a significant opportunity to scale a client to a much larger contract size beyond that signed initially. The annual contract size for an enterprise with 10,000 employees is expected to commence at US\$300,000.

1-Page will provide pre-filled Curated Talent Pools, which are pools with identified prospective candidates based on the specific requirements from the client for these open roles, and which are deemed to have the greatest affinity to the client. These curated pools immediately equip recruiting teams with candidates to solve their talent acquisition needs.
