Hansen's Chief Executive Officer, Andrew Hansen said "I am pleased to be reporting another strong period of performance for the company which is in line with the update announced on 18 December 2015.

Hansen has continued to benefit from its international expansion with the results reflecting the first full six months contribution from the TeleBilling business purchased in May 2015. The TeleBilling business has been successfully integrated and continues to deliver opportunities within the Northern European market.

We have also seen double digit organic growth on a constant currency basis in our core billing business as we delivered on new customer projects as well as product enhancements from within the existing customer base. Hansen continues to invest in its people and its products delivering new opportunities in India in the Pay TV market and in Japan in the Retail Energy sector.

The decline of the Australian dollar against most currencies has also had a positive impact on our results. It is important however to acknowledge that Hansen now operates significant business off shore, somewhat offsetting the positive impact of foreign exchange on the business's margin.

We continue to execute on our strategic initiatives that are aligned to our overarching goals of achieving consistent organic revenue growth, while maintaining margins in our target range and building our global platform.

In line with previous guidance, we believe that Revenue and EBITDA achieved in these results will broadly be replicated in the second half of the year provided favourable trading terms are maintained”.
