Acquisition growth strategy

The Australian security industry is highly fragmented with around 6,500 businesses nationally generating approximately \$6.3 billion revenue in 2014. Alarm monitoring represents around 16% of this and is Threat Protect's primary focus.

The Company believes the industry is conducive to consolidation, given its stable revenue streams and fixed infrastructure cost model. Threat Protect's acquisition growth strategy is focused on leveraging the largely fixed cost infrastructure and significant capacity of its existing extensive security control room through acquisition of monitored security client bases across Australia.

Threat Protect has completed 6 acquisitions since listing on the ASX and is in the process of conducting due diligence on several opportunities. The new funding package significantly increases the Company's acquisition capability and positions it well to progress the execution of its growth strategy.
