MARKET RELEASE

4th April, 2017

NOVOGEN SHAREHOLDER INFORMATION BRIEFING SESSIONS - REMINDER

Sydney, 4rd April, 2017, Novogen Ltd (ASX: NRT; NASDAQ: NVGN), an Australian oncology-focused biotechnology company, wishes to remind shareholders of the upcoming information briefing sessions to discuss its clinical trials for GDC-0084 and Cantrixil, and recent updates in other areas.

Shareholder briefing sessions:

Shareholders wishing to register interest in attending one of the events outlined below, should RSVP by COB Thursday, 6th April 2017 by phoning Donna Cross on +61 2 9472 4101 or via the Novogen website, using this link: <http://www.novogen.com/common/contactus>. At the time of RSVP, please note your: name, email, contact number and which briefing session is of interest (Sydney or Melbourne.)

Melbourne:	Monday, 10 th April, 5:30-7:30pm Grant Thornton, The Rialto, Level 30, 525 Collins Street, Melbourne
Sydney:	Wednesday, 12 th April, 5:30-7:30pm Australian Institute of Company Directors, NSW Business Centre and Member Lounge, Level 1, 20 Bond Street, Sydney

Briefing webcast and Q+A session:

For those shareholders unable to attend the briefing sessions in person, Novogen will hold a question and answer session via webcast with CEO, Dr James Garner during the Sydney shareholder briefing session on Wednesday, 12th April at approximately at 5:30pm Australian Eastern Standard Time (AEST).

Shareholders are invited to submit questions ahead of the event for discussion during the session. To submit a question, please visit <http://www.novogen.com/common/contactus> and enter your question by close of business on Friday, 7th April.

To participate in the webcast, please visit:

<http://webcasting.boardroom.media/broadcast/58c79565596409733ddb670d>

to access the webcasting platform in time for a 5:30pm AEST start on Wednesday, 12th April, 2017.

About Novogen Limited

Novogen Limited (ASX: NRT; NASDAQ: NVGN) is an emerging oncology-focused biotechnology company, based in Sydney, Australia. Novogen has a portfolio of four development candidates, diversified across three distinct technologies, with the potential to yield first-in-class and best-in-class agents across a range of oncology indications.

The lead program is GDC-0084, a small molecule inhibitor of the PI3K / AKT / mTOR pathway, which is being developed to treat glioblastoma multiforme. Licensed from Genentech in late 2016, GDC-0084 is anticipated to enter phase II clinical trials in 2017. Three further molecules have been developed in-house from two proprietary drug discovery platforms (superbenzopyrans and anti-tropomyosins) to treat ovarian cancer and a range of solid tumours. Cantrixil, the most advanced of these, commenced a first-in-human clinical study in patients with ovarian cancer in late 2016, while Anisina and Trilexium are in preclinical development.
