ASX RELEASE

For Immediate Release: 30 May 2017

REMSAFE launches breakthrough mobile isolation system - 'REMSAFE Mobile'

Orbital Corporation Limited (ASX: OEC) ("Orbital" or "the Company") is pleased to announce that its wholly owned subsidiary, REMSAFE Pty Ltd ("REMSAFE"), has developed a breakthrough mobile isolation system, REMSAFE Mobile, expanding and complementing the existing REMSAFE range of electrical isolation solutions. This latest innovation demonstrates the continued evolution of the REMSAFE business and its ongoing focus on delivering market leading solutions for its clients.

REMSAFE Mobile, which was recently launched at the Austmine 2017 Conference held in Perth, is a fully portable, battery operated device with the capability to perform wireless and fully mobile electrical and mechanical isolations and de-isolations of plant equipment. In addition to delivering substantial reductions in client implementation costs, the system offers significant efficiency benefits by enabling technicians to quickly perform isolations from either the point of equipment failure or elsewhere on site. Importantly, REMSAFE Mobile delivers these benefits while retaining the highest level of safety inherent in all of REMSAFE's products.

Key features of REMSAFE Mobile include:

- Portable wireless operation (unit size is equivalent to a small suit case)
- Compliant with international safety standard IEC 61508 for the safe isolation of all energy sources
- Verified for electrical, pneumatic or hydraulic isolations in three minutes or less
- Compliant with lock out tag out isolation safety procedures familiar to regulators and users of heavy machinery

Having undergone extensive distance and transmission testing prior to its first customer demonstration last week at Austmine 2017, the system is now ready to be marketed. In addition a number of patent applications have been made to protect the unique features key to the functionality of the system.

Orbital CEO, Mr. Terry Stinson, stated; "REMSAFE Mobile is a product evolution that provides customers with a fully portable, low cost isolation solution compatible with the highest level of safety standards."

About Orbital

ORBITAL is an innovative industrial technology company.

ORBITAL invents and builds smart technology that delivers improved performance outcomes for our clients in the aerospace, mining & industrial and consumer sectors.

ORBITAL operates on a global scale and is headquartered in Perth, Western Australia. From a world class facility, ORBITAL's innovation magic takes shape – from research and design to development, manufacturing and implementation.

Delivering state-of-the-art products and services within the industrial technology sector is what we do.

ORBITAL's technology leadership is exemplified by the patented REMSAFE remote isolation system for global mining and industrial applications and Orbital's® UAVE business that produces and supplies engine and propulsion systems for unmanned aerial vehicles.

Forward Looking Statements

This release includes forward-looking statements that involve risks and uncertainties. These forward-looking statements are based upon management's expectations and beliefs concerning future events. Forward-looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of the Company that could cause actual results to differ materially from such statements. Actual results and events may differ significantly from those projected in the forward-looking statements as a result of a number of factors including, but not limited to, those detailed from time to time in the Company's Annual Reports. Orbital makes no undertaking to subsequently update or revise the forward-looking statements made in this release to reflect events or circumstances after the date of this release.
