LETTER FROM THE CHAIRMAN AND MANAGING DIRECTOR

Dear Unitholder

Rural Funds Management Limited (“RFM”), as responsible entity and manager of Rural Funds Group (“RFF”), is pleased to offer you the opportunity to participate in a fully underwritten 2 for 9 accelerated non-renounceable entitlement offer of new units in RFF (**New Units**) at an offer price of \$1.70 per New Unit (**Offer Price**).

Entitlement Offer

On 7 June 2017, RFM announced its intention to raise approximately \$78.6 million via a fully underwritten 2 for 9 accelerated non-renounceable entitlement offer (**Entitlement Offer**) at the Offer Price.

The Entitlement Offer comprises:

- > an offer to Eligible Institutional Unitholders (**Institutional Entitlement Offer**); and
- > an offer to Eligible Retail Unitholders (**Retail Entitlement Offer**) to which this Retail Offer Booklet relates.

The Institutional Entitlement Offer was successfully completed on 7 June 2017 and raised approximately \$18.6 million.

The Entitlement Offer is fully underwritten by UBS AG, Australia Branch, Bell Potter Securities Limited and Wilsons Corporate Finance (**Underwriters**) subject to the terms of an underwriting agreement (see section 5.11 for more details).

Use of proceeds

RFF will use the proceeds of the Entitlement Offer to reduce gearing from 42.7% to 29.5%¹, following the debt funded acquisition of two key assets over the past six months. Lynora Downs, a cotton property located in central Queensland, was purchased for \$26.5 million in December 2016. The property has significant development potential, including underutilised water entitlements.

During the same month, RFF acquired 9,549 ML of Murrumbidgee River high security water entitlements. This asset is a cornerstone resource for RFF’s next horticultural development and, in the interim, the water allocation will be sold on the temporary market on an annual basis.

The reduction in gearing will create balance sheet capacity to further build RFF’s portfolio of quality agricultural assets and RFM is currently undertaking due diligence on an asset of significant scale within the Australian cattle sector. This asset is similar in functionality to RFF’s other cattle assets, providing the potential lessee, an arm’s length party, with an integrated breeding and backgrounding operation.

Strategic rationale

The recent purchases of Lynora Downs and the Murrumbidgee River high security water entitlement, as well as the cattle assets that have been identified by RFM will provide a number of benefits to RFF, including:

- > increased exposure to natural resource “growth” assets that contain productivity improvement potential;
- > are in sectors that Australia possesses both comparative and competitive advantages, longevity and scale;

¹ Gearing shown on a pro forma basis. For more information see slide 5 of the Investor Presentation

- > the Murrumbidgee River high security water entitlement is a strategic asset as it may be used in time to seed a large horticultural development of greater value;
- > enhancing RFF's scale, sector and climatic zone diversification; and
- > RFM as manager has direct operational knowledge in all sectors to which acquisitions pertain.

RFM is pleased to provide Eligible Retail Unitholders with an opportunity to increase their investment in RFF and participate in the expected benefits of the acquisitions and long-term growth of RFF.

Retail Entitlement Offer

This letter relates to the Retail Entitlement Offer, which will raise approximately \$60.0 million. Under the Retail Entitlement Offer, Eligible Retail Unitholders can subscribe for 2 New Units for every 9 Units they hold as at the Record Date at an Offer Price of \$1.70 per New Unit. The Offer Price under the Retail Entitlement Offer is the same Offer Price as for the Institutional Entitlement Offer, and represents a:

- > 4.0% discount to RFF's last close price on 6 June 2017 of \$1.77
- > 4.8% discount to RFF's 5-day volume weighted average price (VWAP) to 6 June 2017 of \$1.79
- > 3.3% discount to the theoretical ex-rights price (TERP) of \$1.76
- > forecast FY18 AFFO yield of 12.5% and FY18 distribution yield of 5.9%

New Units issued will rank equally with existing Units in RFF and will be fully entitled to the distribution for the quarter ending 30 June 2017, which is expected to be 2.41 cents per Unit.

The number of New Units which you are entitled to subscribe for under the Retail Entitlement Offer (**Entitlement**) is set out in your personalised Entitlement and Acceptance Form that will accompany this Retail Offer Booklet when it is dispatched to Eligible Retail Unitholders on 14 June 2017.

If you wish to participate in the Retail Entitlement Offer you must ensure that your Application Monies are received before 5.00pm (AEST) on 26 June 2017 (**Final Retail Closing Date**), otherwise your rights under the Retail Entitlement Offer will lapse. Instructions for how to pay your Application Monies are set out in your personalised Entitlement and Acceptance Form that will accompany this Retail Offer Booklet when it is dispatched to you. Additionally, you have the opportunity to apply and pay for your Entitlements before 5.00pm (AEST) on 20 June 2017 (**Early Retail Closing Date**), and your New Units will be allotted on 22 June 2017.

You should seek appropriate professional advice before making any investment decisions. If you have any questions about the Retail Entitlement Offer, please contact RFM Investor Services on 1800 026 665 (from within Australia) or +61 2 6203 9700 (from outside Australia) from 8.30am to 5.00pm (AEST), Monday to Friday prior to the Final Retail Closing Date.

If you do not wish to take up any of your Entitlement, you do not have to take any action.

The RFM Directors encourage you to participate in the Entitlement Offer and thank you for your continued support.

Yours faithfully

Guy Paynter

Risks

The key risks associated with an investment in RFF are set out in the Investor Presentation in section 3 of this Retail Offer Booklet.

WHAT SHOULD YOU DO?

1. Read this Retail Offer Booklet and the accompanying Entitlement and Acceptance Form

This Retail Offer Booklet and the accompanying personalised Entitlement and Acceptance Form contain important information about the Retail Entitlement Offer. You should read them carefully and in their entirety before deciding whether or not to participate in the Retail Entitlement Offer.

Eligible Retail Unitholders will receive a personalised Entitlement and Acceptance Form, accompanying this Retail Offer Booklet, setting out their Entitlement. Those Unitholders who have elected to receive notices by email, will receive an email with a direct link to their personalised Entitlement and Acceptance Form and the Retail Offer Booklet. Those Unitholders who have not elected to receive notices by email will receive both documents by post.

The Retail Entitlement Offer is not being made under a product disclosure statement and therefore does not contain all of the information that must be disclosed in a product disclosure statement. The Retail Entitlement Offer is being made pursuant to provisions of the *Corporations Act 2001*, which allow rights issues and related issues to be made by providing certain confirmations to the market on the basis that all information that investors and their professional advisers would reasonably require to make an informed investment decision in relation to the Retail Entitlement Offer, when read with this Retail Offer Booklet and the accompanying information, is publicly available. You should read the publicly available information on the Fund and the Entitlement Offer (for example, available on www.ruralfunds.com.au/rural-funds-group/ or www.asx.com.au) prior to deciding whether to accept your Entitlement and apply for New Units.

2. Consider the Retail Entitlement Offer in light of your particular investment objectives and circumstances

The Responsible Entity recommends that you seek appropriate professional advice before making an investment decision.

An investment in New Units is subject to investment risks as well as other known and unknown risks, some of which are beyond the control of the Responsible Entity, including the possible loss of income and principal invested. The Responsible Entity does not guarantee any particular rate of return or the performance of the Fund, nor does it guarantee the repayment of capital from the Fund or any particular tax treatment. In considering an investment in New Units, investors should have regard to (amongst other things) the 'Key Risks' section in the Investor Presentation located at section 3 of this Retail Offer Booklet and the disclaimers outlined in this Retail Offer Booklet.

3. What are your options?

If you are an Eligible Retail Unitholder, you have three options in relation to the Retail Entitlement Offer. You may subscribe for all, some, or none of your Entitlement. **Eligible Retail Unitholders are not able to subscribe for more than their Entitlement.**

Allotment of New Units offered under the Early Retail Entitlement Offer will take place on 22 June 2017 and the allotment of New Units offered under the Retail Entitlement Offer will take place on 30 June 2017.

Eligible Retail Unitholders who do not participate in the Retail Entitlement Offer, or participate for an amount less than their Entitlement, will have their percentage holding in the Fund reduced.

Eligible Retail Unitholders who fully participate in the Retail Entitlement Offer will see their percentage holding in the Fund remain the same.

This is an accelerated non-renounceable Entitlement Offer, and Entitlements cannot be traded or otherwise transferred on the ASX or any other exchange or privately. If you do not participate in the Retail Entitlement Offer, you will not receive any value for your Entitlement.

4. Apply for new Units

To participate in the Retail Entitlement Offer, you must complete and lodge a valid Entitlement and Acceptance Form and Applicable Monies for New Units, or make a payment via BPAY, by 5.00pm (AEST) on 26 June 2017. You can also apply and pay by the Early Retail Closing Date, and be allotted New Units on 22 June 2017. See section 1.3 for more information.

If you take no action, your Entitlement under the Retail Entitlement Offer will lapse.

5. Questions

If you have any questions relating to the Retail Entitlement Offer, you can contact Rural Funds Management Limited on 1800 026 665 (from within Australia) or +61 2 6203 9700 (from outside Australia) from 8.30am to 5.00pm (AEST), Monday to Friday.

OVERVIEW OF THE ENTITLEMENT OFFER

1.1 Overview

Rural Funds Group (RFF) is a stapled security comprising two trusts: Rural Funds Trust and RF Active. Rural Funds Trust holds the majority of RFF's assets including the agricultural land, water and infrastructure from which it derives a passive income stream. RF Active holds around 9.15% of RFF's assets, comprising Murrumbidgee River high security water entitlements, breeding cattle and plant and equipment. RF Active assets are considered to be operational in nature.

The Responsible Entity is offering Eligible Unitholders the opportunity to subscribe for 2 New Units for every 9 Existing Units held on the Record Date at an issue price per New Unit of \$1.70. The Entitlement Offer is non-renounceable, which means that the Entitlements are non-transferable and cannot be sold or traded. The Entitlement Offer comprises:

- > the Institutional Entitlement Offer; and
- > the Retail Entitlement Offer (to which this Retail Entitlement Offer Booklet relates).

The Entitlement Offer is fully underwritten, and seeks to raise approximately \$78.6 million. The Offer Price under the Retail Entitlement Offer is the same as the Offer Price under the Institutional Entitlement Offer.

RFF raised approximately \$18.6 million through the Institutional Entitlement Offer² and is seeking to raise approximately \$60.0 million under the Retail Entitlement Offer.

The Entitlement Offer is non-renounceable which means that the Entitlements cannot be traded or otherwise transferred on the ASX or any other exchange or privately. If you do not participate in the Entitlement Offer, you will not receive any value for your Entitlement.

All New Units issued under the Entitlement Offer will be eligible to receive the quarterly distribution for the period ending 30 June 2017.

Information regarding the Entitlement Offer is contained in the ASX Announcement and the Investor Presentation at section 3 of this Retail Entitlement Offer Booklet.

1.2 Institutional Entitlement Offer

On 7 June 2017, Eligible Institutional Unitholders were given the opportunity to take up all or part of their Entitlement under the Institutional Entitlement Offer.

The Institutional Entitlement Offer to raise approximately \$18.6 million, at an Offer Price of \$1.70 per New Unit was successfully conducted on 7 June 2017. New Units are expected to be allotted on 22 June 2017 under the Institutional Entitlement Offer.

1.3 Retail Entitlement Offer

Eligible Retail Unitholders are being sent by email or post this Retail Entitlement Offer Booklet with a personalised Entitlement and Acceptance Form so that they may subscribe for all or part of their Entitlement.

The Retail Entitlement Offer constitutes an offer only to Eligible Unitholders, being Unitholders on the Record Date who have a registered address in Australia or New Zealand, and are eligible under all

² Subject to settlement of the Institutional Entitlement Offer, which is scheduled to occur on 21 June 2017. The Institutional Entitlement Offer is fully underwritten (refer to section 5.11 for a description of key terms of the Underwriting Agreement)

applicable laws to receive an offer under the Retail Entitlement Offer. A person in the United States or acting for the account or benefit of a person in the United States or an Institutional Unitholder is not entitled to participate in the Retail Entitlement Offer.

Eligible Retail Unitholders have the opportunity to be allotted New Units up to their Entitlement at the same time as Eligible Institutional Unitholders under the Institutional Entitlement Offer, if they submit an Application and their relevant Application Monies are received by 5.00pm (AEST) on 20 June 2017. Otherwise, the Retail Entitlement Offer closes at 5.00pm (AEST) on 26 June 2017, with New Units to be allotted on 30 June 2017.

1.4 Ranking of New Units

New Units will be issued on a fully paid basis and will rank equally with Existing Units.

1.5 Reconciliation and fractional entitlements

The Responsible Entity may need to issue a small quantity of additional New Units to ensure all Eligible Institutional Unitholders and Eligible Retail Unitholders have the opportunity to receive their full Entitlement. The price, at which these Units will be issued, will be the same as the Offer Price of \$1.70.

The Responsible Entity may reduce the number of New Units allocated to Eligible Institutional Unitholders and Eligible Retail Unitholders if their Entitlement claims prove to be overstated.

To the extent that application of the offer ratio of 2 New Units for every 9 Existing Units results in a fractional entitlement to New Units for a particular Unitholder, that Unitholder's Entitlement shall be rounded down to the next whole number of New Units.

1.6 Control

Whilst some existing Unitholders may take a sub-underwriting position for the Entitlement Offer, RFM does not consider the issue of the New Units under the Entitlement Offer will have a material impact on the control of RFF.

1.7 Underwriting

The Entitlement Offer is fully underwritten by UBS AG, Australia Branch, Bell Potter Securities Limited and Wilsons Corporate Finance Limited. See section 5.11 for further information regarding the underwriting arrangements.

1.8 Use of funds

RFF will use the proceeds of the Entitlement Offer to reduce gearing from 42.7% to 29.5%³, following the debt funded acquisition of two key assets over the past six months.

In December 2016, RFF acquired Lynora Downs, a 4,880 ha cotton property located in central Queensland for \$26.5 million. The property comprises 780 ha of developed irrigation fields and substantial underutilised water entitlements. Lynora Downs will be further developed during 2017 with the construction of an additional water storage facility and development of a larger irrigation area. RFM and Queensland Cotton Corporation Pty Ltd, a subsidiary of Olam International Limited have established a joint venture, Cotton JV Pty Ltd, which leases and operates Lynora Downs.

During the same month, RFF acquired 9,549 ML of Murrumbidgee River high security water entitlements for approximately \$34 million. This asset is a cornerstone resource for RFF's next horticultural development, and in the interim, the water allocation will be sold on an annual basis. This parcel of water represents one of the largest parcels of Murrumbidgee River high security entitlements traded.

RFF's target gearing range is 35%, plus or minus 5%. The reduction in gearing will create balance sheet capacity to further build RFF's portfolio of quality agricultural assets. RFM is currently undertaking due

3 Gearing shown on a pro forma basis. For more information see slide 5 of the Inestor Presentation

diligence on an asset within the Australian cattle sector. The asset is similar in functionality to RFF's other cattle assets, in that it provides the potential lessee, an arm's length party, with an integrated breeding and backgrounding operation.

The assets acquired in December 2016, grow the natural resource predominant component of RFF's portfolio, balancing the infrastructure intensive assets owned by RFF. One of the features of natural resource assets is the higher level of capital growth they can achieve when compared to infrastructure assets which tend to deliver higher levels of income but depreciate over time.

1.9 Allotment

It is expected that allotment of the New Units under the Retail Entitlement Offer will take place no more than five business days after the close of the Retail Entitlement Offer.

Application Monies will be held by the Responsible Entity on trust for Applicants until the New Units are allotted. No interest will be paid on Application Monies.

It is the responsibility of Applicants to determine the number of New Units allotted and issued to them prior to trading in the New Units. The sale by an Applicant of New Units prior to receiving their holding statement is at the Applicant's own risk.

1.10 Quotation and trading

The Responsible Entity will make an application within seven days from the date of this Offer for quotation of the New Units on the ASX.

Subject to ASX approval being granted, it is expected that:

- > normal trading of New Units allotted under the Institutional Entitlement Offer and Retail Entitlement Offer for applications received by the Early Retail Closing Date will commence on 22 June 2017; and
- > normal trading of new Units allotted under the Retail Entitlement Offer will commence on 3 July 2017.

1.11 Holding statements

Holding statements are expected to be dispatched to Eligible Unitholders:

- > on 22 June 2017 in respect of New Units allotted under the Institutional Entitlement Offer and the Retail Entitlement Offer for applications received by the Early Retail Closing Date; and
- > on 3 July 2017 in respect of New Units allotted under the Retail Entitlement Offer for applications received after the Early Retail Closing Date and, on or before, the Final Retail Closing Date.

It is the responsibility of each Applicant to confirm their holding before trading in New Units. Any Applicant who sells New Units before receiving confirmation of their holding in the form of their holding statement will do so at their own risk. The Responsible Entity and the Underwriters disclaim all liability whether in negligence or otherwise (and to the maximum extent permitted by law) to persons who trade New Units before receiving their holding statements, whether on the basis of confirmation of the allocation provided by the Responsible Entity, the Registry or the Underwriters.

1.12 Withdrawal of the Entitlement Offer

The Responsible Entity reserves the right to withdraw the Entitlement Offer at any time, in which case the Responsible Entity will refund any Application Monies already received in accordance with the *Corporations Act 2001* and will do so without interest.

HOW TO APPLY – ELIGIBLE RETAIL UNITHOLDERS

2.1 Eligible Retail Unitholders

An Eligible Retail Unitholder is generally a person or entity who holds Existing Units on the Record Date and who has a registered address in Australia or New Zealand and is not located in the US and is not a US Person (or a person acting for the account or benefit of a US Person).

Eligible Retail Unitholders will receive a personalised Entitlement and Acceptance Form, accompanying this Retail Offer Booklet, setting out their Entitlement. Those Unitholders who have elected to receive notices by email, will receive an email with a direct link to their personalised Entitlement and Acceptance Form and the Retail Offer Booklet. Those Unitholders who have not elected to receive notices by email will receive both documents by post.

Eligible Retail Unitholders may:

- > take up all or part of their Entitlement by the Early Retail Closing Date or the Final Retail Closing Date (refer to section 2.2); or
- > do nothing and allow their Entitlement to lapse. It is not possible to sell or transfer your Entitlement if you decide not to take it up (refer to section 2.3).

Eligible Retail Unitholders are not able to subscribe for more than their Entitlement.

2.2 How can Eligible Retail Unitholders take up their Entitlement?

You should read this Retail Offer Booklet and the Entitlement and Acceptance Form and seek appropriate professional advice if necessary. If you then wish to take up some or all of your Entitlement, there are two different ways you can submit your Application and Application Monies.

2.2.1 Payment via BPAY

To apply and pay via BPAY, you should make your payment in respect of the full Application Monies via BPAY for the number of New Units you wish to subscribe for, being the issue price of \$1.70 per New Unit multiplied by the number of New Units you are applying for.

If you have multiple holdings, you will have multiple BPAY reference numbers. To ensure you receive your Entitlement in respect of each holding, you must use the reference number shown on each personalised Entitlement and Acceptance Form when paying for any New Units that you wish to apply for in respect of that holding.

If you wish to participate in the Early Retail Offer and be allotted New Units at the same time as the Eligible Institutional Unitholders, your Application Monies must be received via BPAY only, by the Early Retail Closing Date, being 5.00pm (AEST) on 20 June 2017.

Alternatively, if your Application Monies are received after the Early Retail Closing Date, but before the Final Retail Closing Date, your application will be processed with the Retail Entitlement Offer which closes at 5.00pm (AEST) on 26 June 2017 and New Units will be allotted on 30 June 2017. **Your payment of the Application Monies will not be accepted after the Final Retail Closing Date, being 5.00pm (AEST) on 26 June 2017, and no New Units will be issued to you on the Final Allotment Date.**

You can only make a payment via BPAY if you are the holder of an account with an Australian financial institution. If you choose to pay via BPAY, you are **not required to submit the Entitlement and Acceptance Form** but are taken to make the statements on that form and representations

outlined below in section 2.4 “Implications of making an Application”, including the Eligible Unitholder declarations set out in section 5.17 of this Retail Offer Booklet.

Please be aware of cut off times with regards to electronic payment. These vary between financial institutions, and you should take this into consideration when making payment of Application Monies.

If the amount of Application Monies is insufficient to pay in full for the number of New Units you applied for, you will be taken to have applied for such whole number of New Units which is covered in full by your Application Monies. Alternatively, your application may be rejected.

2.2.2 Submit your completed Entitlement and Acceptance Form together with cheque, bank draft or money order for all Application Monies

To apply and pay by cheque, bank draft or money order, you should complete the personalised Entitlement and Acceptance Form accompanying this Retail Offer Booklet indicating the number of New Units you wish to subscribe for. The form must be returned to the Registry (address details below) together with a cheque, bank draft or money order, which must be:

- > in respect of the full Application Monies (being \$1.70 multiplied by the number of New Units you wish to subscribe for);
- > in Australian currency drawn on an Australian branch of a financial institution; and
- > should be made payable to ‘Rural Funds Group’ and crossed ‘Not Negotiable’.

Cash payments will **not** be accepted. Receipts for payment will not be issued.

If you wish to be allotted New Units, your Entitlement and Acceptance Form and your Application Monies must be received by the Registry no later than the Final Retail Closing Date, being 5.00pm (AEST) on 26 June 2017. Entitlement and Acceptance Forms (and payments for Application Monies) will not be accepted after the Final Retail Closing Date and no New Units will be issued to you in respect of that Application.

Do **not** send your Entitlement and Acceptance Forms (and payments for any Application Monies) to the Responsible Entity’s registered address or corporate offices.

Note that if you have more than one holding of Units, you will be sent more than one personalised Entitlement and Acceptance Form, and you will have separate Entitlements for each separate holding. Any Application Monies received for more than your Entitlement to New Units will be refunded as soon as practicable after allotment. No interest will be paid to Applicants on any Application Monies received or refunded.

2.3 Take no action and allow all of your Entitlement to lapse

If you are an Eligible Retail Unitholder and you do nothing, the Entitlement in respect of your existing Units will lapse. If this occurs, then your proportionate interest in the Fund will be diluted to the extent that New Units are issued to other Unitholders and Institutional Investors.

2.4 Implications of making an Application

Returning a completed Entitlement and Acceptance Form or paying any Application Monies for New Units via BPAY will be taken to constitute a representation by the Eligible Unitholder that they:

ASX Release

7 June 2017

Subject: \$78.6 million Entitlement Offer

Rural Funds Management Limited (RFM), as responsible entity and manager of Rural Funds Group (RFF), is pleased to announce that it will undertake a \$78.6 million Entitlement Offer.

RFF will use the proceeds of the Entitlement Offer to initially reduce gearing from 42.7% to 29.5%¹, following the debt funded acquisition of two key assets over the past six months. RFM Managing Director, David Bryant said, "RFF has acquired \$60.5 million of strategic new assets since December 2016 in sectors where RFM has existing expertise and knowledge. The assets are currently underdeveloped and contain a number of identified opportunities to improve productivity and drive long term income and asset value growth for RFF unitholders."

In December 2016, RFF acquired Lynora Downs, a 4,880 ha cotton property located in central Queensland for \$26.5 million. The property comprises 780 ha of developed irrigation fields and substantial underutilised water entitlements. Lynora Downs will be further developed during 2017 with the construction of an additional water storage and development of a larger irrigation area. RFM and Queensland Cotton Corporation Pty Ltd, a subsidiary of Olam International Limited have established a joint venture, Cotton JV Pty Ltd, which leases and operates Lynora Downs.

During the same month, RFF acquired 9,549 ML of Murrumbidgee River high security water entitlements for approximately \$34 million. This asset is a cornerstone resource for RFF's next horticultural development, and in the interim, the water allocation will be sold on an annual basis. This parcel of water represents one of the largest parcels of Murrumbidgee River high security entitlements traded.

RFF's target gearing range is 35%, plus or minus 5%. The reduction in gearing will create balance sheet capacity to further build RFF's portfolio of quality agricultural assets. RFM is currently undertaking due diligence on an asset within the Australian cattle sector. The asset is similar in functionality to RFF's other cattle assets, in that it provides the potential third party lessee, with an integrated breeding and backgrounding operation.

¹ Gearing shown on a pro forma basis. For more information see slide 5 of the Investor Presentation lodged with the ASX on 7 June 2017.

The assets acquired in December 2016, grow the natural resource predominant component of RFF's portfolio, balancing the infrastructure intensive assets owned by RFF. One of the features of natural resource assets is the higher level of capital growth they can achieve when compared to infrastructure assets which tend to deliver higher levels of income but depreciate over time.

The recent purchases of Lynora Downs and the Murrumbidgee River high security water entitlement, as well as the cattle assets that have been identified by RFM will provide a number of benefits to RFF, including:

- increased exposure to natural resource "growth" assets that contain productivity improvement potential;
- acquisitions secured by long-term leases to quality tenants in sectors that Australia possesses both comparative and competitive advantages, longevity and scale;
- the Murrumbidgee River high security water entitlement is a strategic asset as it may be used in time to seed a large horticultural development of greater value;
- enhancing RFF's scale, sector and climatic zone diversification; and
- RFM as manager has direct operational knowledge in all sectors to which acquisitions pertain.

Impact of the transaction and FY18 guidance

Following completion of the transaction:

- Gearing will reduce from 42.7% to 29.5% on a pro forma basis as at 30 April 2017, within RFF's target range
- AFFO and DPU forecast for FY17 remains consistent with previous guidance
 - FY17 AFFO per Unit expected to be 12.42 cents
 - FY17 DPU expected to be 9.64 cents
- FY18 AFFO per Unit is forecast to be 12.5 cents
- FY18 DPU is forecast to be 10.0 cents
 - represents growth of 4% p.a. over FY17 DPU and a conservative payout ratio of 80%

Target investments

Managed by:
 Rural Funds Management

RFM is undertaking due diligence on a substantial cattle transaction expected to complete FY18

- RFM has continued to assess investment opportunities to support or enhance the DPU growth rate, and has identified:
 - Investment opportunities in the Queensland cattle industry with similar attributes to the cattle assets previously acquired by RFF but with larger scale
 - Potential lessees which:
 - ✓ are arm's length third parties
 - ✓ bring skill, capital and appropriate security arrangements
 - ✓ are able to increase property values through productivity capex, monetised for RFF through rent reviews
- Circumstances supporting this strategy:
 - Restructuring of family businesses required to fund intergenerational asset transfer
 - Farms operating sub optimally due to capital constraints
 - Substantial opportunities for property development

6

Replicating successful acquisitions

Managed by:
 Rural Funds Management

RFF has acquired and improved three cattle properties with productivity capex

- RFF acquired three properties in 2016 that were leased to Cattle JV (wholly owned subsidiary of RFM)
- The operation consists of two breeding properties in the Gulf of Carpentaria (totalling 225,800 ha) and a finishing property in central Queensland (17,500 ha)
- The properties currently hold 27.5% more Adult Equivalents (AE) compared to the initially assessed capacity
- The increase is a consequence of management intensity with limited initial gains from productivity capex
- RFF has funded a productivity capex program of increasing cultivation area, pasture improvement and the development of water points
- Further increases in carrying capacity are expected once full benefits of productivity capex have taken effect
- Increasing productivity through productivity capex can:
 - improve the profitability and financial viability of the lessee
 - generate rent earned on capex
 - increase property value and in time increase rent

Additional water points unlock previously under utilised pasture and improve carrying capacity

Case study: Water points and pasture utilisation¹

- **Water point:** pasture in the immediate vicinity of where cattle have access to water is grazed excessively when water points are inadequately dispersed
- **1 – 2kms:** pasture within a 2km radius of the water point is well utilised
- **3kms:** pastures more than 2kms away from water points are under utilised and therefore outside the effective grazing distance from water

Mutton Hole, Gulf

- RFF is funding the development of additional water points on Mutton Hole, Oakland Park and Rewan to improve carrying capacity by unlocking previously under utilised pasture

Case study: Water points and pasture utilisation¹

Pasture improvement

Managed by:
Rural Funds Management

Pasture improvement can significantly increase productivity

Pasture improvement

- Legumes such as leucaena and stylo have higher nitrogen levels that drive protein production in cattle
- Higher legume content in pastures increases carrying capacity, fertility and weight gain
- Winter forage crops such as oats provide additional metabolizable energy when summer pastures are dormant

Rewan, Central QLD

- Forage oats crop on Rewan have provided daily weight gain in excess of 1kg/day
- Forage crops to be doubled in FY17/18 and leucaena area expanded

Pasture improvement – legumes

Legumes such as leucaena (above left) and stylo (above right) can provide substantial productivity gains^{2,3}

Strategy

Managed by:

Diligent management of existing assets and examination of acquisition opportunities

Key principles underpinning assessment of acquisition opportunities

1	Maintain agricultural REIT structure	✓ Acquire properties with income secured by long-term leases to quality tenants without the agricultural operating risks associated with a direct investment
2	Manage good assets with good people	✓ Acquire quality properties in sectors that Australia possesses a competitive advantage, longevity and scale
3	Enhance sector diversification	✓ Increase exposure to natural resource "growth" assets
4	Enhance climatic diversification	✓ Strategic geographic diversification and introduction of new counterparties in different climatic zones
5	Identify investments which may benefit from productivity capex	✓ Identify productivity improvements which over time deliver asset value growth, rental growth, and improve counterparty profitability
6	Invest in sectors where RFM has direct operational knowledge	✓ RFM is a fund and farm manager with 20 years of experience which benefits RFF in assessing acquisitions

- Further investment into this sector is facilitated by technology advances and the availability of assets with development potential

Lynora Downs: irrigation area and water storage development

Water

- Murrumbidgee River HS water entitlement of 9,549 ML was acquired for \$34.4 million
- Almonds are one of the most profitable crops on a per ML basis¹
- The HS entitlement will provide a strategic cornerstone resource for a horticultural development due to transferability and historical reliability
- In the interim, revenue will be generated from the sale of the annual water allocation from FY18 seeking the highest return throughout the irrigation season

Distribution growth

Managed by:
Rural Funds Management

RFF's conservative payout ratio supports investment into natural resource predominant assets whilst maintaining the DPU growth target of 4% per annum

DPU and AFFO retention

- Forecast distribution growth of 4% per annum is supported by:
 - Growth in existing revenue through structured rent indexation and market rent reviews
 - New revenue streams resulting from reinvestment of retained earnings into development and productivity capex

Australian cattle opportunity

RFM is attracted to the cattle industry because of Australia’s comparative advantage, sector size and the opportunity for productivity gains

- The cattle sector is Australia’s largest agricultural industry and Australia is the world largest exporter of this commodity¹
- Current cattle prices, while projected to decline to an average of 465 c/kg carcass weight (cwt) in 2021–22², remain above the EYCI³ average since 2006 of 393 c/kg cwt
- The major determinants of valuation of a cattle property is:
 - Carrying capacity, often expressed using the ‘adult equivalent’ methodology (see adjacent)
 - Weaning rate and weaner weight (for breeding properties)
 - Daily weight gain of cattle (for finishing properties)
- RFM is seeking opportunities where these metrics can be improved through productivity capex

Key terminology	
Adult Equivalent (AE)	Cattle properties are analysed and valued with reference to AE, much like other farms are analysed on a per hectare basis 1 AE is defined as a 450kg Bos Taurus steer at maintenance ⁵ . A young steer will typically represent around 0.7 AE, increasing to around 1.5 AE as it becomes larger. A breeder will represent around 1.3 AE on an annualised basis, varying substantially through the pregnancy cycle ⁶
Eastern Young Cattle Indicator (EYCI)	The leading cattle price indicator in Australia, the EYCI is a composite index of cattle sales in QLD, NSW and Victoria. Expressed in cents per kg carcass weight

Australian cotton industry

Managed by:
 Rural Funds Management

Australia is a world leader in cotton production

- RFM is attracted to the cotton industry due to:
 - Australia's comparative/competitive advantage
 - Industry scale
 - Opportunity for productivity gains
- The Australian cotton sector is a \$1.3b industry dating back to the 1800's
- In 2016, Australia was the world's 4th largest cotton exporter, with major buyers of Australian cotton including China (68%), Indonesia, Thailand, South Korea, Bangladesh and Japan
- Over the last 20 years Australia's average cotton yield has nearly doubled, mainly attributable to advances in plant breeding and seed technology which improves pest and disease resistance and climatic adaptability
- While cotton prices have remained largely flat over the past two decades profitability has been driven by productivity gains

Productivity gains

Managed by:
 Rural Funds Management

Advances in cotton biotechnology may provide development opportunities

- Recent advances in cotton biotechnology have improved insect and weed control, providing numerous benefits including:
 - Increased yields
 - Reduced operating costs
 - A wider planting window (approximately two months¹), allowing:
 - o access to more favourable growing conditions
 - o opportunities to plant later in the season if water becomes available
 - o greater flexibility with rotation crops
 - o better utilisation of stored water
- These advances are particularly beneficial in northern Australia, where improved insect and weed control and climatic conditions have historically been difficult to manage

Lynora Downs

Managed by:
Rural Funds Management

An opportunity to increase planted area through productivity capex

- In December 2016, RFF acquired Lynora Downs, a 4,880 ha cotton property located at the northern end of the Arcadia Valley in central Queensland for \$26.6 million using debt funding
- Lynora Downs is serviced by Qld Cotton (Olam) cotton gins - Emerald (169 km) and Moura (191 km)
- Fertile soils and average annual rainfall of 638 mm and with 5,000 km² catchment with no upstream irrigation
- Water licences totalling 18,487 ML acquired with the property are currently underutilised:
 - Comet River 7,780 ML
 - Overland flow licence, storage limit of 10,707 ML
- The water storage will be increased from 10,400 ML to 14,650 ML and irrigated cropping area will be expanded from 780 ha to 1,164 ha
- The development will increase the annual average planted area, a key driver of cotton property valuations

Water entitlements

Managed by:
 Rural Funds Management

Water is a tradeable resource that can be applied to the highest value use

- Water entitlements are tradable assets
 - Legally separated from land titles
 - Trading activity disclosed on public registers
 - Can be divided, leased and transferred
 - Legislative framework provided by the Water Act 2007 (Cth)
- Terminology:
 - Entitlement:** the perpetual right to use an amount of water annually
 - Allocation:** the specified volume of water that is allocated to a water entitlement for use each year
 - Security/Reliability:** available water each year is prioritised to different categories of entitlements (typically *high security (HS)* and *general security (GS)*)
- The price of *entitlements* is driven by the profitability of commodities to which it can be applied and the reliability of the allocations it receives
- The price of the *allocation* is primarily driven by seasonal weather conditions in the region

Reliability of Murrumbidgee River water entitlements

Murrumbidgee River HS water entitlement

Managed by:
 Rural Funds Management

A cornerstone resource for future horticultural development

- In December 2016, RFF acquired a 9,549 ML Murrumbidgee River HS water entitlement for \$34.4 million
- The Murrumbidgee region produces approximately 25% of NSW fruit and vegetable production, 42% of NSW grape production and 50% of NSW rice production
- The HS entitlement will provide a cornerstone asset for future horticultural development due to its transferability and historical reliability
- HS water is essential for permanently planted crops such as almonds
- The combination of water availability and water infrastructure with a suitable climate, makes the Murrumbidgee/Murray regions appropriate for almond production
- Alternative uses for the water entitlement include:
 - cotton
 - viticulture
 - fruit and vegetables
 - rice

Case study: Productivity shift – water

Managed by:
 Rural Funds Management

Water entitlements increase the value of farm land by allowing the production of higher value commodities

- The 9,549 ML Murrumbidgee River HS water entitlement could cornerstone a 1,000 ha almond orchard development
- Almonds are one of the highest value uses for the water as:
 - high profit per ML of water used, supporting higher rent
 - requires high security water as it is a permanent planting as opposed to an annual planted crop such as cotton
- Almond production is expected to grow to 90,000 tonnes (2021-22) from 80,000 tonnes (2015-16), with exports also expected to increase in the medium term due to continued growth in global consumption
- RFM will seek to lease the water on a long-term basis as part of a horticultural development
- In the interim, revenue will be generated from the sale of the annual water allocation from FY18

Note:
 1. Based on RFM's estimates of gross margins. Allocation sale price based on historical data since 2006

Key risks and international offer restrictions

Rewan, Rolleston, Qld, with the Carnarvon Gorge in background, August 2015

Key risks

An investment in RFF, like any investment, involves risk. These risks can be broadly divided between specific risks, property market risks, and general risks relevant to RFF.

Whilst the assumptions used in generating the forward looking statements within this presentation are considered reasonable, a number of these risk factors could affect these forward looking statements. Most risk factors are outside the control of RFM.

Detailed below are what RFM considers to be material risk factors however this is not an exhaustive list. Investors should make their own independent assessment of the Offer.

Specific risks

Risk	Summary
Counterparty	All land and infrastructure assets owned by RFF are leased and as such Unitholders are not directly exposed to agricultural operational risk There is a risk that a counterparty may default on its financial or operational lease obligations to RFF. Any financial default would reduce RFF's revenue and its ability to meet its debt obligations and to pay distributions. An operational default by a counterparty may require RFF to meet operating obligations until a new lessee is contracted. In the case of a default by a counterparty, the health or quality of RFF's asset may be adversely affected RFF has several lessees, with the largest lessee (by rental income) being RFM Poultry, representing 25.2% of RFF's forecast revenue stream during the 2017 financial year
Rental risk – timing of development expenditure	RFF has entered into leases with Olam Orchards Australia Pty Ltd that require RFF to fund orchard development expenditure. There is a risk that delays in developing the orchards, or the timing of the expenditure, may result in a reduction or deferral of rent to be received under the lease until the development is completed
Takeover	RFM, an experienced agricultural manager, is the responsible entity of RFF. Another entity may seek to take over RFF or replace RFM as responsible entity. Any change of responsible entity will require Unitholders' approval of an ordinary resolution at a Unitholder meeting
Future distributions or reduction in distributions	RFF must meet its operating expenses, capital commitments and debt servicing obligations before distributions can be made to Unitholders. These items are subject to interest rate movements and changes in costs. Consequently, distributions may vary.
Suspension event	There is a risk that a suspension event could occur under the terms of the chicken growing contracts. Under the terms of the RFM Poultry lease, any reduction in the grower fee revenue relating to a suspension event will result in a proportional reduction in the rent payable to RFF RFM Poultry has chicken growing contracts with Barter Enterprises (a wholly owned subsidiary of Baiada Poultry) that expire over the period from 31 March 2024 to 3 July 2026. RFM Poultry is dependent on the income from those contracts to meet its obligations to RFF under the leases The Barter Enterprises growing contracts include the following suspension events, which, if triggered, mean all obligations under the relevant growing contract, including payments to RFM Poultry, are suspended until the suspension event is rectified In the event RFM Poultry suffers a suspension event, this will have a corresponding suspension or reduction in the lease payments received by RFF under its lease with RFM Poultry. If the suspension event persists for longer than six months, the growing contract may be terminated by either party by giving one month's notice. Suspension events for all chicken growing contracts include: act of God; epidemics; fires; industrial disputes by Barter employees; livestock husbandry issues; disease caused by RFM Poultry and chicken meat importation
Competition	RFM has a significant track record in identifying, acquiring and managing agricultural properties in Australia. A number of competitors exist for potential acquisitions, which could impact upon RFM's ability to execute RFF's business strategy and thus its financial performance
Acquisition risk	In order to drive future growth of the business of RFF, RFM intends to develop a significant acquisition pipeline. There is no guarantee that RFM will be able to execute any future acquisitions

Key risks

Specific risks (continued)

Risk	Summary
Business strategy	RFM's business strategy for RFF is focused on building RFF's portfolio and cash yield through the management, acquisition and development of agricultural assets. RFF's future growth is dependent on the successful execution of this strategy. Any change or impediment to implementing this strategy including the access to funding may adversely impact RFF's operations and future financial performance
Asset valuations	The rental yield and profitability of RFF is influenced by the valuations and other industry market indicators of the leased properties, biological assets and water rights. Factors affecting asset valuations include capitalisation and discount rates, the economic growth outlook, and demand for end-market products such as chicken meat, almonds, beef, cotton, macadamias and wine. Such impacts on property valuations may lead to variations in the valuation of RFF and the rental yields RFF is able to achieve
Insurance	RFF enters into insurance policies on its properties with policy specifications and insured limits that it believes to be customary in the industry. However, potential losses of a catastrophic nature, such as those arising from war, terrorism, insects or severe flooding, may be uninsurable, or not insurable on reasonable financial terms, may not be covered at full replacement costs, or may be subject to large excesses
Interest rate risk and hedging	RFF holds interest bearing debt and as such it is exposed to movements in interest rates. RFF undertakes interest rate hedging to help protect against changes in interest rates and interest rate swaps are currently used for this purpose. These swaps provide more certainty in a changing interest rate market and will result in a higher or lower interest expense, and cash flow, relative to the floating rate market. Accounting policies require interest rate swaps to be recorded at fair value and this may lead to fluctuations in comprehensive income, however these market adjustments are non cash and do not impact AFFO
RFM Poultry right of rent review	Under the terms of the RFM Poultry lease, there is a right of rent review where there is material permanent change to the profitability of chicken growing activities. Any reduction in RFM Poultry's profitability may result in a reduction in the rent payable to the RFF
Gearing and refinancing	RFF maintains a gearing range of 30% - 40%. RFF has secured a debt facility that sets limits for the next 2.5 years. Beyond this, there is a risk that RFF's bank could reduce the gearing limit and/or fees and charges. In these circumstances, where asset values have not increased sufficiently to offset any decrease in gearing limits, RFF may be required to sell assets and reduce or suspend distributions to retire debt
Reliance on RFM's skills	Unitholders have no direct control over the decisions that affect the day-to-day management of RFF Instead they rely on the skills of RFM and RFM's employees to manage RFF assets. An RFM employee may have a specialist skill set that is used to manage those assets. If that RFM employee resigns, then RFM may not be able to replace that specialist skill set quickly or easily
Conflict of interest and related party transactions	RFM is the responsible entity for RFF and for a number of other funds. It is possible that investment opportunities will arise for RFF through RFM's relationship with those other funds. Therefore, from time to time, RFM may face a conflict of interest that arises because of its role as the responsible entity for RFF and its role as the responsible entity for other funds Related party transactions are subject to compliance with the <i>Corporations Act 2001 (Cth)</i> and the RFM Conflict of Interest Management Policy
Inflation	Inflation risk is the uncertainty over the future real value of your investment and specifically whether revenue or profitability will increase at least in line with inflation The Select Harvests and Treasury Wine Estates leases allow for annual indexing of 2.5% p.a. with three and five yearly reviews to market respectively. The RFM Poultry lease is subject to indexation of 65% of CPI capped at 2% p.a. The leases to RFM's Almond Funds are subject to fixed indexation of 2.5% p.a. The leases to the 2007 Macgrove Project are subject to a CPI linked increase. The lease to RFM of the Bonmac macadamia orchard allows for annual indexing of 2.5% p.a. with three yearly reviews to market. The CJV leases are subject to CPI and EYCI linked movements. The Cotton JV lease is subject to CPI adjustments annually.
Force majeure	All leases, with the exception of the leases to RFM Almond Fund 2006 and Treasury Wine Estates, excuse the lessee from the performance of their obligations under the lease following the occurrence of a force majeure event. In addition, the Olam lease has additional force majeure conditions. During the development period there is a risk of force majeure events, which prevents the development of the almond orchard such as an extreme climatic event which are beyond the control of either party.

Property Market risks

Risk	Summary
Decline in asset value	RFF owns property including land, water and infrastructure for agricultural production The value of these assets may rise or fall because of general economic conditions, local and global agricultural conditions, changes in independent valuation methodologies, and changes in discount rates
Destruction or damage of property	It is possible that the assets owned by RFF could be destroyed or damaged by natural or other events RFF will maintain appropriate levels of insurance, provided it is economically sensible to do so
Property illiquidity	The majority of assets owned by RFF are large scale. Given this scale, the number of potential buyers is limited. Therefore, the sale of assets at an appropriate price may take longer to realise
Reduction in water entitlements	Pursuant to the terms of the Treasury Wine Estates leases, and the lease for the RFF Almond Funds 2007 and 2008, where there is a reduction in water entitlements, RFF is required by the terms of the leases to replace the entitlements from an alternative source. Failure to do so may result in a rent abatement or a right to terminate the lease Under the terms of the Select Harvests leases, RFF is not required to replace any reduction in entitlements and there is no rental abatement at the time of the reduction. However the reduction will be taken into account in determining the orchard value at the next review date; and therefore is likely to result in a rental reduction then Under the terms of the Kerarbury and Tocabil leases with Olam, any reduction in water entitlements results in a rent abatement. If RFF secures additional water, rent is payable based on the capital cost of the purchase. In the event that a reduction results in less than 8 ML/ha (Kerarbury) and 10 ML/ha (Tocabil) being available and not replaced by RFF within 18 months of the reduction taking effect, Olam have the right to surrender an area in order to bring the entitlement back to 8 ML/ha (Kerarbury) and 10ML/ha (Tocabil). If the remaining area is less than 800 ha for Kerarbury and 300 ha for Tocabil, Olam have the right to terminate the entire lease There is no such requirement in any of the other existing leases. Annual water allocation risks are on account of the Lessee's
Climate risk and climate change risk	RFF monitors the impact of climate change on RFF's portfolio of assets and has implemented a Climatic Diversification strategy including acquiring assets across different growing regions and asset classes.
Environmental management	There is a risk that RFF doesn't protect or sustainably manage its natural resources. In aiming to work sustainably, wherever practical RFF will: <ul style="list-style-type: none"> • Monitor industry developments and adopt farm management practices that incorporate the latest research findings and technologies, to minimise environmental impacts and better utilise the natural resources; • Maximise water use efficiency through the utilisation of modern, well managed irrigation systems; • Ensure water management practices take account of water quality and minimise run-off; • Adopt nutrient management practices which improve long term soil health and ensure that pest and weed management requiring the use of chemicals, occurs in a safe and environmentally responsible manner; and • Ensure that our staff understand and are focused on sustainable farming principles and adhere to environmental legislation and regulations.

Units trading at below net asset value	The buying and selling of Units is conducted on the ASX. The trading price of the Units will be dependent on the financial performance of RFF
Liquidity	The ability to sell your Units will depend on the availability of buyers. Larger stocks generally have a higher level of liquidity or turnover than smaller stocks.

TAXATION

4.1 Introduction

This section is a summary of the key Australian tax issues for Unitholders who are residents for Australian tax purposes, who hold their Units on capital account.

This section has been prepared on the basis of taxation law as at 8 June 2017. As taxation law and its interpretation of it by the Australian Taxation Office and the courts is subject to change, Unitholders should be aware that the taxation consequences of their holding units could change in the future.

Unitholders should be aware that the actual tax implications of investing in Units may differ depending on their individual circumstances.

Neither RFM nor its directors are registered under the Tax Agent Services Regime to provide tax advice to individual Unitholders. Accordingly, Unitholders should take advice from an appropriately qualified adviser on the taxation implications of the arrangements, taking into account their particular circumstances.

Unitholders who are residents of, or subject to taxation in, other countries should also obtain advice on the tax consequences in that country.

4.2 Taxation of New Units

The New Units will rank equally with all other Units in relation to future distributions and will be taxed in the same manner as each Unitholders' Existing Units (as outlined below).

4.3 Holding of Units

Each of the components of a stapled Unit is treated separately for tax purposes. Unitholders may receive distributions from Rural Funds Trust and distributions from RF Active. The tax consequences of each are outlined below.

4.4 Taxation of distributions from Rural Funds Trust

Rural Funds Trust only holds assets that derive rental or other 'passive' income. On the basis that this continues to be the case, Rural Funds Trust should be a 'flow through' fund (rather than a public trading trust) for tax purposes.

Rural Funds Trust will not be liable for any income tax, if at all times the Unitholders are presently entitled to the net taxable income of Rural Funds Trust (or if Rural Funds Trust elects to become an Attributed Managed Investment Trust ("AMIT") for taxation purposes on the amount of taxable income allocated to each Unitholder). The net taxable income of Rural Funds Trust will generally be taxed in the hands of Unitholders.

Each year, Unitholders will include in their assessable income, that portion of the net taxable income of Rural Funds Trust to which they become entitled. This includes distributions that are reinvested to subscribe for additional Units and income to which a Unitholder becomes entitled, but has not yet received.

Distributions from Rural Funds Trust might include capital gains (including gains subject to the general 50% capital gains tax ("CGT") discount), imputation credits or foreign tax credits. Unitholders may benefit from the receipt of discount capital gains, imputation credits and foreign tax credits by way of distribution from Rural Funds Trust, depending on their personal circumstances.

Distributions made by Rural Funds Trust may also include non-assessable amounts. If all or part of a distribution by Rural Funds Trust is not subject to tax in the hands of the Unitholder (other than a distribution of the discount component of a capital gain), the Unitholder's CGT cost base in their Rural Funds Trust Units will be reduced for CGT purposes by the amount of the non-assessable component.

The cost base of a Rural Funds Trust Unit will generally include the expenditure incurred to acquire the Unit such as the issue or purchase price, and any incidental costs of acquisition and disposal.

If a Unitholder's CGT cost base in the Rural Funds Trust Units is reduced to zero, the Unitholder will make a capital gain in respect of any excess non-assessable amounts received from Rural Funds Trust.

A Unitholder who is an individual, the trustee of a trust or a complying superannuation entity may be entitled to claim the CGT discount to reduce any capital gain in respect of their Rural Funds Trust Units, if those Units have been held for at least 12 months. The CGT discount is applied to reduce the capital gain after applying any available capital losses.

4.5 Taxation of distributions from RF Active

RF Active is taxed as a public trading trust. As a public trading trust, RF Active:

- > pays tax at the corporate tax rate (currently 30%) on the profit it generates from its operational activities; and
- > may, from time to time, make distributions to Unitholders of the profit generated from its trading activities.

Distributions by RF Active to Unitholders will be regarded as dividends for tax purposes (which may be franked). Unitholders will be assessed on any distributions received from RF Active in the year of income in which the distribution is paid (even if the distribution is reinvested).

Any franking credit attached to a distribution (dividend) represents the tax paid on the profits from which the distribution has been paid. Where distributions are wholly or partly franked, the Unitholder's assessable income may include the amount of the distribution, plus an additional amount in respect of the attached franking credit.

Where a franking credit is included in the Unitholder's assessable income, the Unitholder will be entitled to a tax rebate equal to the amount of the franking credit.

In certain circumstances, the franking credit may not be included in the Unitholder's assessable income – for example, where the Unitholder has both purchased and sold Units within 45 days of the ex-distribution date, or otherwise does not hold Units sufficiently at risk.

4.6 Disposal of Units

When a Unitholder disposes of Units, the CGT issues related to the disposal of the Rural Funds Trust Units and RF Active Units should be determined separately. That is, the disposal of a Unit will involve two CGT events – the disposal of Units in Rural Funds Trust and the disposal of Units in RF Active – and the calculation of the capital gain or loss must be performed separately for each CGT event.

On disposal of a Unit, the capital proceeds will need to be apportioned between the two CGT events on the basis of what is reasonably attributable to each CGT event.

Unitholders may make a capital gain or incur a capital loss on the disposal of Units, whether disposal occurs by way of sale or upon redemption. The amount of any capital gain or loss will be calculated as the difference between the capital proceeds received for the disposal and the cost base of the Rural Funds Trust Units and RF Active Units, respectively. The cost base of a CGT asset (i.e. each Unit) generally includes the expenditure incurred to acquire the CGT asset such as the issue or purchase price, and any incidental costs of acquisition and disposal.

Depending upon the circumstances in which Unitholders acquired their Units, an apportionment may also need to be performed to determine the cost base of each CGT asset. Again, the basis of apportioning the expenditure incurred to acquire the Units between the two CGT assets will be by reference to what is reasonably attributable to each CGT asset.

Units issued under the Entitlement Offer, will be acquired for CGT purposes on the date of the allotment of Units under the Entitlement Offer.

A Unitholder who is an individual, the trustee of a trust or a complying superannuation entity may be entitled to claim the CGT discount in calculating any capital gain on disposal of their Units, if those Units were acquired at least 12 months prior. The CGT discount is applied to reduce the capital gain after any available capital losses are applied. A Unitholder that is an individual or the trustee of a trust may reduce the capital gain by 50%. A Unitholder that is a complying superannuation entity may discount the capital gain by 33 1/3%. No CGT discount is available to a Unitholder that is a company.

4.7 Tax File Numbers

An Applicant is not required to quote a tax file number (“TFN”) when applying for New Units. However, if a TFN or an Australian Business Number (“ABN”) is not provided by a Unitholder who is a resident for Australian tax purposes (and a relevant exemption has not been quoted by the Applicant), tax will be withheld from the payment of distributions by Rural Funds Trust (at the highest marginal tax rate), and from any unfranked component of distributions paid by RF Active.
