**Aeris Successfully Completes Third Phase of Integrated Smart Building Project for Largest State School in North Queensland, with Contract Value of \$100,000**

Aeris Environmental Ltd (ASX:AEI) (Aeris or the Company) is pleased to announce the successful completion of an integrated Smart building project at the Kirwan State High School (Kirwan) for the Queensland State Government. Kirwan, located in Townsville, has 1,997 students and 222 teaching staff, making it the largest school in North Queensland.

This landmark project was delivered in partnership with McClintock Engineering Group Pty Ltd (a consulting engineering business) and Peak ARE Pty Ltd (Peak) (a mechanical contractor), both being leading service companies in North Queensland that Aeris partnered with to deliver the previously-announced Dexus Property Group retail building management system project.

This current third phase of the project is worth approximately \$100,000 to the Company and has involved Aeris' team commissioning the new system, which the Company designed and programmed in the earlier phases. Having undergone a major renovation over the last two years, the school has now moved from standalone direct expansion air-conditioning to a central chilled water plant.

Aeris has now delivered a range of control and visualisation technologies, equipment and services for the management of the school's temperature, lighting, ventilation, air quality and, importantly, energy usage. The Company will have an ongoing relationship with both the project and its management team, providing cloud-based data visualisation, reporting and management.

Mr Peter Bush, CEO, said, "We are delighted to have completed another project for this leading team in Townsville. The project demonstrates our ability to deliver multiple high-value projects, in various phases, on time and within budget. This also further validates the power of our platinum partner base, together with our SmarHUB technology, and our ability to scale into a wide range of customers with a proven value proposition. Aeris' proprietary technologies provide a complete range of environmental technology solutions that have a positive impact on asset life, energy efficiency and total cost of ownership, both locally and internationally."

Mr Brad Swaffer, Managing Director of Peak, said, "Our groups have all come a long way, and this is a great outcome for the client and demonstrates our collective capabilities in the fast growing north of Queensland."

**About Peak ARE Pty Ltd**

Peak ARE Pty Ltd specialises in commercial and industrial refrigeration, air-conditioning and electrical services. It provides a holistic approach and prides itself on being able to deliver expert results in the design, construction, commissioning and servicing of all key areas within the heating, ventilation and air-conditioning (HVAC) industry. Peak's dedicated team is focused on delivering the next generation of sustainable buildings through intelligent design, continual innovation and utilisation of new technologies.

**About Aeris Environmental Ltd**

Aeris develops, manufactures and markets patented, environmentally-friendly technology solutions that address the global megatrends of energy efficiency, healthier air, food safety, water quality and long-term materials protection, with core guiding principles of 'clean, green, protect'.

Smart Enzymes and Coatings provide long-term remediation, and prevention of mould, bacteria growth, corrosion and improved hygiene, with OEM, consumer and technical applications.

SmartENERGY provides dramatic and proven energy savings in the range of 19% to 33%, alongside documented improvement in system efficiency (54% to 289% improvement in airflow and up to 40% in coil efficiency), and independently-validated indoor air quality across all air-conditioning and refrigeration systems, with proven immediate cash flow savings.
