Capital raising overview

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

- Link Group today announces a A\$300 million fully underwritten placement (**Placement**) to be followed by a share purchase plan (**SPP**)¹
- The Placement will lead to a pro-forma reduction in Link Group's net debt to Operating EBITDA² from 2.5x to 1.6x
- This balance sheet flexibility will provide Link Group with the capacity to continue to pursue strategic opportunities

1. Link Group reserves the right to increase the size of the SPP offer or scale back applications under the SPP in its absolute discretion.
2. Includes 12 months of LAS Operating EBITDA. Operating EBITDA is earnings before interest, tax, depreciation and amortisation and significant items. Management uses Operating EBITDA to evaluate the operating performance of the business and each operating segment prior to the impact of significant items, the non-cash impact of depreciation and amortisation and interest and tax charges, which are significantly impacted by the historical capital structure and historical tax position. Management uses Operating EBITDA to evaluate the cash generation potential of the business because it does not include significant items or the non-cash charges for depreciation and amortisation. However, Link Group believes that it should not be considered in isolation or as an alternative to net operating free cash flow.

NET DEBT / OPERATING EBITDA ²	2.5x
Pro forma NET DEBT / OPERATING EBITDA ²	1.6x

1. Excludes separation and integration costs.
2. Operating EBITDA and Operating NPATA excludes significant items. Operating NPATA is net profit after tax and after adding back tax affected significant items and acquired amortisation. Acquired amortisation comprises the amortisation of client lists and the revaluation impact of acquired intangibles such as software assets that were acquired as part of Business Combinations. Link Group management considers Operating NPATA to be a meaningful measure of after-tax profit as it excludes the impact of significant items and the large amount of non-cash amortisation of acquired intangibles reflected in NPAT. This measure includes the tax effected amortisation expense relating to certain acquired software which is integral to the ongoing operating performance of the business.
3. Based on the A\$300 million Placement raising only.

Appendix: Key risks

Risks

There are a number of factors, specific to Link Group and of a general nature, which may affect the future operating and financial performance of Link Group and the industry in which it operates.

This section discusses some of the key risks associated with an investment in shares in Link Group. These risks may affect the future operating and financial performance of Link Group and the value of Link Group shares.

The risks set out below are not listed in order of importance and do not necessarily constitute an exhaustive list of all risks involved with an investment in Link Group.

Before investing in Link Group, you should consider whether this investment is suitable for you. Potential investors should consider publicly available information on Link Group (such as that available on the websites of Link Group and ASX), carefully consider their personal circumstances and consult their professional advisers before making an investment decision. Additional risks and uncertainties that Link Group is unaware of, or that it currently considers to be immaterial, may also become important factors that adversely affect Link Group's operating and financial performance.

You should note that the occurrence or consequences of many of the risks described in this section are partially or completely outside the control of Link Group, its directors and senior management. Further, you should also note that this section focuses on the potentially key risks and does not purport to list every risk that Link Group may have now or in the future. It is also important to note that there can be no guarantee that Link Group will achieve its stated objectives or that any forward looking statements or forecasts contained in this presentation will be realised or otherwise evaluated. All potential investors should satisfy themselves that they have a sufficient understanding of these matters, including the risks described in this section, and have regard to their own investment objectives, financial circumstances and taxation position.

Cooling off rights do not apply to the acquisition of shares.

Risks (cont'd)

- **General risks with Link Group's business**

- **Future acquisitions and business combinations**

Link Group continually investigates and considers potential acquisitions and other strategic initiatives, which is consistent with its growth strategy. There can, however, be no assurance that any of these opportunities will arise or be concluded. The successful implementation of any acquisitions and initiatives can be time consuming and costly, and the process of integrating acquired businesses may create unforeseen operating difficulties and expenditure. The risks Link Group may face in connection with acquisitions and other initiatives include:

- accurately assessing the value, strengths, weaknesses, contingent and other liabilities and potential profitability of the acquired business;
- difficulty in integrating and migrating the operations, systems, technologies and employees of the acquired business;
- disruption to Link Group's existing business and diversion of Link Group management's attention on transition and integration of the acquired business;
- difficulty in entering markets in which Link Group has limited direct or prior experience and where competitors have established market positions;
- potential loss of key employees, clients or suppliers of the acquired business;
- assumption of liabilities and incurrence of debt to fund acquisitions;
- assumption of contractual obligations that contain terms that are not beneficial to Link Group;
- failure to realise the expected synergies and increases in revenue, markets and net profit from acquisitions.

The occurrence of any of these risks could have a material adverse effect on Link Group's business, financial performance or financial condition, particularly in the case of larger acquisitions or concurrent acquisitions.

- **Unsuccessful integration of recent acquisition**

Link Group has completed a number of acquisitions, including Capita Asset Services (since remained Link Asset Services). There is a risk that the integration of the acquired businesses may be more complex than anticipated, encounter unexpected challenges or issues and take longer than expected, divert management attention or not deliver the expected benefits. To the extent Link Group does not complete the integration of such recent acquisitions in an orderly manner, the full benefits, expected efficiencies and synergies from those acquisitions may be achieved only in part, or not at all. This could adversely affect Link Group's financial performance and position, and the future prospects of Link Group.

Risks (cont'd)

➤ **Security software and technology breaches**

The use of information technology and the effectiveness of Link Group's proprietary technology platforms are critical to the ability of Link Group to deliver services to its clients and to continue to grow the business. By their nature, information technology systems are susceptible to cyber attacks. Security breaches may involve unauthorised access to Link Group's networks, systems and databases, exposing financial, proprietary and personal user information. It is possible that the measures taken by Link Group to protect its proprietary information and the private information of its clients may not be sufficient to prevent unauthorised access to, or disclosure of, such data. Any accidental or deliberate security breaches or other unauthorised access to Link Group's information technology systems or client data may subject Link Group to reputational damage, a loss of confidence in the services it provides, claims by clients, loss of clients, a disruption of services to clients, legal action and regulatory scrutiny.

➤ **Reliance on third party IT suppliers**

Link Group relies on certain contracts with third party suppliers to maintain and support its IT infrastructure and software, which underpin its core business activities. Link Group's reliance on third parties and their systems to provide key services decreases its control over the delivery of these services and the quality and reliability of the services provided. Any delay, disruption or deterioration in the level of service provided by a third party could impair Link Group's ability to provide services to its clients to the level expected or at all. If any of these contracts are terminated or unexpectedly unable to be performed for any reason, this could adversely impact Link Group's operations, earnings and financial condition.

➤ **Reliance on the effective performance of IT infrastructure**

Technology is the key enabler of Link Group's services. Link Group and its clients are dependent on the effective performance, reliability and availability of Link Group's technology platforms, software, third party data centres and communications systems. Link Group may fail to successfully achieve the required development of its technology and systems to meet clients' needs, match competitors or meet regulatory requirements, which may, in turn, adversely affect its operations, relationship with clients, financial performance and financial condition.

➤ **Concentrated client base**

Link Group has a relatively concentrated client base, with its top five clients expected to contribute approximately 28% of FY2018 revenues (on an annualised basis) while its top ten clients are expected to contribute approximately 37% of FY2018 revenue (on an annualised basis). If Link Group were to lose one or more of these key clients, Link Group's business and financial condition could be adversely impacted.

➤ **Failure to renew contracts or early terminations**

There is a risk that Link Group may be unable to renew contracts with its major clients upon contract expiry, or such contracts may be terminated and Link Group could be unable to add new clients. If Link Group were to lose one or more of these contracts, its operations, earnings and financial condition could be adversely affected. In addition, if one or more of these contracts is not renewed upon expiry, and Link Group is unable to add new clients, its business, financial condition and financial performance could be adversely impacted in the future.

Risks (cont'd)

➤ Regulatory compliance

Link Group is subject to privacy and data protection laws in Australia and 21 other jurisdictions in which it conducts its business. This will include the EU General Data Protection Regulation which comes into force on 25 May 2018. Such laws impact the way Link Group can collect, use, analyse, transfer and share personal data and other information that is central to many of the services Link Group provides. Any actual or perceived failure by Link Group to comply with relevant laws and regulations may lead to consequences such as the imposition of fines or other penalties, client losses, legal proceedings against Link Group, reputational damage and/or a reduction in the development of technology and services using such data and could adversely impact Link Group's business, financial condition and financial performance. Under certain client contracts, Link Group has accepted contractual commitments regarding regulatory and compliance risks to its clients which exceed those to which it would be subject in its business as usual operations. Further, under some of these contracts, Link Group has: (i) also provided indemnification to the client for losses arising from Link Group's failure to comply with these additional regulatory and compliance commitments; and/or (ii) very high contractual liability limits or no limitation on liability. Contracts which include either or both of the above characteristics expose Link Group to potentially more significant financial claims and such claims could adversely impact Link Group's financial condition and financial performance.

➤ Failure to attract and retain key personnel

A key driver of Link Group's performance is the recruitment and retention of effective and qualified employees. Link Group faces risks of loss of key management personnel, loss of other key employees, delay in finding suitable replacements for lost personnel and the inability to find suitably qualified personnel to meet Link Group's business needs as it grows. If any of these risks were to materialise, they could have a material adverse impact on Link Group's business, financial performance and financial condition.

➤ Increased competition

The key industries that Link Group operates in are all competitive markets and are expected to remain competitive. Link Group's competitive position may be impacted by a number of factors, including the level of innovation relative to that of competitors, commercial factors including pricing and liability, the ability to keep up with technological or regulatory change, the ability to respond to client preferences for products and services and the ability to maintain strong relationships with existing clients by upholding the consistency and quality of its services. In addition, Link Group needs to respond effectively to any changes in the competitive landscape, which may evolve as a result of a number of factors, including the entry of new competitors into the market and the consolidation of existing market participants. Increased competition may adversely affect Link Group's business, financial performance and financial condition.

➤ Impairment of intangible assets

Link Group has a material amount of intangible assets on its balance sheet relating to goodwill and identifiable intangible assets such as client contracts and relationships, software and licences. Under Australian Accounting Standards, goodwill and indefinite life intangible assets must be regularly tested for impairment. If impaired, Link Group would need to write down the value of its intangible assets which would result in an expense in the income statement, thereby potentially materially impacting Link Group's financial condition and reported earnings.

Risks (cont'd)

➤ Reputation risks

The Link Group brand is important in attracting and retaining clients. There is a risk that the brand may be tarnished by incidents such as negative publicity, data security breach or one-off unforeseen events that negatively impact Link Group's operations. The occurrence of any such incidents may lead to client loss and the failure to attract new clients, which, in turn, may have an adverse impact on Link Group's financial performance.

➤ Litigation risk

Link Group may in the ordinary course of business become involved in litigation and disputes, for example with its suppliers or clients. Any such litigation or dispute could involve significant economic costs and damage to relationships with suppliers, clients and/or other stakeholders. Any such outcomes may have an adverse impact on Link Group's business, market reputation and financial condition and financial performance.

➤ Failure to realise benefits from research and development investments

Developing software and technology is expensive and the investment in the development of these product and service offerings often involves an extended period of time to achieve a return on investment. An important element of Link Group's corporate strategy is to continue to make investments in innovation and related product and service opportunities through internal investments and the acquisition of intellectual property from companies that it has acquired. Link Group believes that it must continue to dedicate resources to its innovation efforts to develop its software and technology service offering and maintain its competitive position. However, Link Group may not receive significant revenues from those investments for several years, or may not realise such benefits at all.

➤ Failure to protect intellectual property rights

Link Group relies and expects to continue to rely on a combination of confidentiality, assignment, and licence agreements with its employees, consultants, and third parties with whom it has relationships, as well as trademarks, copyright and patents, to protect its proprietary rights. Third parties may knowingly or unknowingly infringe Link Group's proprietary rights, and/or may challenge proprietary rights held by Link Group, and pending and future trademark and patent applications may not be approved. In addition, effective intellectual property protection may not be available in every country in which Link Group operates or intends to operate its business. In any or all of these cases, Link Group may be required to expend significant time and expense in order to prevent infringement or to enforce its rights. If the protection of its proprietary rights is inadequate to prevent unauthorised use or appropriation by third parties, its competitors may be able to more effectively mimic its products, services, and methods of operation. Any of these events could have an adverse effect on its business, financial condition and financial performance.

➤ Infringement of third party intellectual property rights

Link Group may receive notices from third parties claiming infringement of their intellectual property rights and/or breach of its agreements with them, including from its competitors in the industries it which it operates. Such claims may require protracted negotiation, including litigation, to resolve, or the payment of monetary damages or the satisfaction of indemnification obligations in the agreements with suppliers. In addition, such claims may increase as Link Group continues to acquire new businesses and enter new markets. In such cases, if a determination was made that Link Group had infringed such third party rights, Link Group's business and financial condition may be adversely affected.

Risks (cont'd)

- **Share and offer risks**

- **Investment in equity capital markets**

There are general risks associated with investments in equity capital. The trading price of shares in Link Group may fluctuate with movements in equity capital markets in Australia and internationally. This may result in the market price for the New Shares being less or more than the Offer Price. Generally applicable factors which may affect the market price of shares include:

- general movements in Australian and international stock markets;
- investor sentiment;
- Australian and international economic conditions and outlook;
- changes in interest rates and the rate of inflation;
- changes in government regulation and policies;
- announcement of new technologies;
- geo-political instability, including international hostilities and acts of terrorism;
- demand for and supply of Link Group shares;
- announcements and results of competitors;
- analysts reports; and
- the financial and operating performance of Link Group.

No assurances can be given that the New Shares will trade at or above the price at which they are issued. None of Link Group, its Board or any other person guarantees the market performance of the New Shares or of Link Group. It is also possible that new risks might emerge as a result of Australian or global markets experiencing extreme stress or existing risks may manifest themselves in ways that are not currently foreseeable. The equity markets have in the past and may in the future be subject to significant volatility.

- **Liquidity risk**

There can be no guarantee of an active market in the shares in Link Group or that the price of the shares in Link Group will increase. There may be relatively few potential buyers or sellers of Link Group's shares on the ASX at any time. This may increase the volatility of the market price of Link Group's shares. It may also affect the prevailing market price at which shareholders are able to sell their shares in Link Group.

- **Equity raising and underwriting risk**

Link Group has entered into an underwriting agreement under which the Underwriter has agreed to fully underwrite the Placement, subject to the terms and conditions of the underwriting agreement between the parties. If certain conditions are not satisfied or certain events occur, the Underwriter may terminate the underwriting agreement. Termination of the underwriting agreement would have an adverse impact on the proceeds raised under the Placement.

Risks (cont'd)

- **General investment risks**

- **Economic risk**

General economic conditions may negatively affect Link Group's performance and the performance of Link Group's shares. Any protracted slow down in economic conditions or factors such as movements in inflation or interest rates and industrial disruption may have a negative impact on Link Group's costs and revenue.

- **Interest rate risk**

Changes in interest rates will affect borrowings which bear interest at floating rates to the extent Link Group has not hedged against this interest rate risk. An increase in interest rates will affect Link Group's cost of servicing these borrowings, which may adversely impact its business, financial condition and financial performance.

- **Foreign exchange risk**

Link Group currently conducts operations in 22 jurisdictions throughout Australasia, Europe, Middle East and the United States of America. Adverse movements in the exchange rates between the Australian Dollar and the currencies of those foreign jurisdictions in which Link Group currently operates or in the future may operate, including the British Pound, Euro and the US Dollar, may cause Link Group to incur foreign currency losses. Such losses may impact and reduce Link Group's profitability, and ability to pay dividends and service debt obligations.

- **Risk of dividends not being paid**

The payment of dividends by Link Group is announced at the time of release Link Group's half year and full year results as determined by the Board from time to time at its discretion, dependent on the profitability and cash flow of Link Group's business. While Link Group has a stated dividend policy, circumstances may arise where Link Group decides or may be required to reduce or cease paying dividends for a period of time.

- **Changes in accounting policy**

Accounting policy standards may change. This may affect the reported earnings of Link Group and its financial position from time to time. There are multiple pending changes to accounting standards that may impact Link Group, including those governing revenue recognition, leases and financial instruments. Link Group has previously and will continue to assess and disclose, when known, the impact of these change in its periodic financial reporting.

- **Taxation**

Future changes in taxation laws in material jurisdictions in which we operate, including changes in interpretation or application of the law by the courts or taxation authorities, may affect the taxation treatment of an investment in Link Group shares or the holding and disposal of those shares. Further, changes in tax law, or changes in the way tax law is expected to be interpreted, in the various jurisdictions in which Link Group operates, may impact the future tax liabilities of Link Group.
