March Quarterly Activity Report

<u>Summary</u>

- > The Company is actively seeking and evaluating new prospective projects
- > Production continues from the West Klondike project in Louisiana
- > Tamaska had cash holdings of \$1,891 million and no debt at 31 March 2018

New Ventures

The company's main focus is working on the identification and acquisition of a new project, that will have significant recognition in the Australian market. The company has reviewed a number of projects in the current quarter and is currently advancing a couple of projects toward potential deals.

Tamaska Oil and Gas Projects

West Klondike Well, Louisiana - (TMK 11.36% WI)

Tamaska participated in the drilling of the West Klondike discovery well in late 2012. The well commenced producing gas from the lower Nod Blan on 4 September 2014. The lower gas zones were depleted and the remaining unproduced zone is the Lario oil sand.

During the year Oleum Operating LLC purchased an interest of 76.7%, and assumed Operatorship. Oleum focussed on the oil zone in the Lario, re-entering and recompleting the well before performing a small hydraulic frac. Initial workover results were encouraging with over 100bopd in short term testing. Following the work over Oleum installed a jet pump on location to assist with oil lift. The well was placed back on production on 17 April 2017.

The well produced throughout the December quarter producing without significant interruption. Due to significant flooding event, the well was only on production for approximately 30% of the quarter. April has also been significantly affected by flooding. The water is receding and the well is expected to be back on in early May.

The field is potentially large enough for another production well, but the decision to drill is contingent on improved production performance from the Lario.

Fusselman Project Well, Texas - (TMK 12.5%)

The Fusselman Well, Clayton Johnson #3F, operated by Marshfield Oil & Gas, was drilled to its total depth of 9,883 feet on 3 January 2013. Tamaska holds a 12.5% working interest in the Fusselman Project in Borden County, Texas.

The production is depleted and there are no other potential zones to complete. The Operator is in the process of restoring the well site.

Tenement Summary

At 31 March 2018 the Company held the following interests in tenements:

Project	Percentage Interest	Number of Tenements
Fusselman Project	12.5%	7
West Klondike	11.36%	6

The Company has provided detailed tenement information in Schedule 1.

Cash Position at 31 March 2018

The Company had a closing cash balance of \$1,891 million at 31 March 2018.

Cost Control Measures

In order to maintain the maximum working capital possible, the Board has agreed to continue at reduced hours and fees charged to Tamaska until a new project is identified.
