Commentary on results

Adherium is pleased to report achievement of all of its milestones set at the beginning of the 2018 fiscal year. Revenue this year was \$5.9 million, up 150% on 2017 and within guidance given of between \$5.7 million and \$7.0 million; 27,000 HailieTM (previously known as SmartinhalerTM) sensors were sold, with over 25,000 to AstraZeneca as forecasted; the HailieTM solution was launched online in the United States in June 2018; and closing cash was \$12.1 million compared with the minimum of \$10 million forecasted.

The milestones were achieved across three strategic channels:

- BioPharma Partner volumes with AstraZeneca met guidance, at over 25,000 sensors. In addition, new device design, development and regulatory approval programs achieved the targets needed to support customer roll-outs, while at the same time generating significant revenue for the Company. Notably, Adherium gained two US FDA 510(k) clearances in the year for its Hailie™ sensor for use with AstraZeneca's Symbicort® asthma medication in the US, the most recent being over-the-counter (OTC) clearance to enable sales direct to consumers;
- The direct to consumer program commenced at the beginning of fiscal 2018 with the launch of the
 New Zealand pilot through an online eCommerce store. Vik Panda, VP of Marketing was hired in Q2,
 and further development of the online offering and OTC clearances culminated in the US online
 launch in June 2018 with a target of 1,000 subscribing customers within the first three months.
 Subscribing customers are anticipated to be acquired through a combination of online store, retailers,
 pharmacies and consumer product partners looking to add value to their products in the market
 place;
- For payers and providers, Adherium has the best supporting clinical outcome data in reducing hospitalisations due to poorly controlled asthma. To initiate this channel in the US, Tim Houchin, VP of

Sales, was appointed in Q3 to focus on payers and providers and in Q4 announced its first program in this channel with Vitalus Health in the southwest region of the United States, targeting patients with chronic obstructive pulmonary disease (COPD) using Adherium's technology.

Revenue was up 150% on the prior year, at \$5,867,000. This increase resulted from:

- Sensor volume increasing from 18,000 in 2017 to over 27,000 in 2018. Commercial to clinical volume
 continued to increase from a ratio of 25:75 in the first half of fiscal 2017, to 95:5 in 2018,
 demonstrating a valuable shift in the Company's operations with less focus on clinical business, and
 significantly increased focus on commercial; and
- The commercialisation with AstraZeneca of innovative product design, engineering and other services which amounted to \$4,049,000 for the period.

Research and development activities for the year ended 30 June 2018 amounted to \$4,447,000 and included:

- Clearance in August 2017 by the US FDA of Adherium's 510(k) application for its SmartTouch™ for Symbicort®. This device has been designed for AstraZeneca's Symbicort® medication that is marketed in the US as a pressurised Metered Dose Inhaler (pMDI), as compared with the Turbuhaler marketed in most other countries in the world and for which Adherium supplies its SmartTurbo device, branded for AstraZeneca as Turbu+;
- Following the initial 510(k) clearance for SmartTouch™ for Symbicort® the Company submitted an
 application to extend this to over-the-counter (OTC) sales directly to consumers. This OTC clearance
 was received in March 2018, enabling support of AstraZeneca's Symbicort® medication sales in the US
 as well as Adherium's direct to consumer and payer initiatives;
- Adherium gained its US FDA 510(k) clearance for its SmartTouch™ device for GlaxoSmithKline (GSK) medications in 2014 and in fiscal 2018 submitted an application to extend this to an OTC clearance. This was received in July 2018, enabling the Company's Hailie™ solution to be sold to users of ProAir®, Ventolin® and Flovent® aerosol asthma inhalers;
- Ongoing development of our mobile apps (iOS and Android) and cloud software platform, enabling self-enrolment by patients, as well as developing an online portal for healthcare professionals and clinicians to provide patient-group data collection and reporting from HailieTM sensors. This platform will support engagement between healthcare professionals and patients by enabling sharing and monitoring of patient inhaler usage; and
- Continued development of a new SmartTouch™ sensor (ADR ST19) for an inhaled respiratory drug currently in development and scheduled by the drug's owner for clinical trials in calendar 2018.

Sales and marketing expenses were \$3,687,000 for the year. Following a reorganisation at the end of fiscal 2017, the majority of sales and marketing activities are now based in the US where Adherium is headquartered in San Mateo, California. Milestones through the year include:

- Appointment of Vik Panda as Vice President of Marketing, with proven experience in direct to consumer online community growth through digital marketing;
- The addition of Tim Houchin as its Vice President of Sales, bringing over 20 years US sales experience, including key relationships with insurance carriers, and will be primarily responsible for Adherium's US direct to payer channel;
- Initiation of a program with Vitalus Health in the southwest region of the United States, targeting patients with chronic obstructive pulmonary disease (COPD) using Adherium's technology;

- Launch of Adherium's new Hailie™ global brand and solution, comprising the OTC-cleared Hailie™
 sensors, the Hailie™ mobile app, and cloud platform to connect people with asthma and COPD to
 better care; and
- Launch of Adherium's online direct to consumer channel in both the US and New Zealand.

Administrative expenses of \$5,412,000 included the key hire, Arik Anderson, as Adherium's Chief Executive Officer based in the US, as well as recruitment of the US based Chief Financial Officer role, with David Allinson appointed in the second half of fiscal 2018. Non-cash costs in the six months included a share and option compensation credit of \$13,000 due to employee share plan reversals following the reorganisation completed during the first half of fiscal 2018 (2017: \$478,000 expense), and depreciation and amortisation expense of \$212,000 (2017: \$234,000).

Cash at 30 June 2018 was \$12,118,000, a net use of \$10,661,000 in the year. Included in this net use was \$408,000 invested in cash term deposits in the June 2018 quarter with a maturity greater than three months resulting in its classification as a short-term investment rather than cash under accounting rules.

2. Segment Information

The chief operating decision maker is the Chief Executive Officer, who reviews financial information for the Group as a whole. The information reviewed is prepared in the same format as included in the financial statements. The Company has therefore determined that one reportable segment exists for the Company's Hailie TM (formerly known as Smartinhaler TM) business.

3. Earnings per share

Basic loss per share is based upon the weighted average number of outstanding ordinary shares. For all periods presented, the Company's potentially dilutive ordinary share equivalents (being the options over ordinary shares) have an anti-dilutive effect on loss per share and, therefore, have not been included in determining the total weighted average number of ordinary shares outstanding for the purpose of calculating diluted loss per share.
