

ASX Announcement

5 September 2018

Superloop Executive Appointment

Superloop Limited (**ASX: SLC**) is pleased to announce that Jon Tidd has been appointed as Group Chief Financial Officer and will commence his employment with the Group this week. Jon has held a number of senior executive financial, strategy and operational roles with nbn Co, Seven West Media and Vodafone Australia. Jon is a Fellow of the Chartered Institute of Management Accountants, a Graduate of the Australian Institute of Company Directors, a member of CPA Australia, a Chartered Global Management Accountant, holds a Bachelor of Arts in International Business, Finance and Economics from the University of Manchester and has attended Stanford University's Executive Program for Growing Companies.

Jon will work closely with former CFO Paul Jobbins to ensure a smooth transition. We thank Paul for his contributions and efforts since joining in 2016 and wish him every success in his new role.

Superloop will announce the appointment of a replacement Company Secretary prior to Paul's departure.

About Superloop

Superloop's vision is to be the most trusted enabler of connectivity and managed services in Asia Pacific.

The Group owns and operates over 670 km of carrier-grade metropolitan fibre networks in Australia, Singapore and Hong Kong, connecting more than 275 of the region's key data centres and commercial buildings.

Superloop has constructed a core network in Singapore connecting major data centres, key enterprise buildings and cable landing stations. The network includes a low-latency, diverse loop to the Singapore Stock Exchange (SGX) for secure, real-time data transactions. It is continually expanding with further diverse connections to strategic sites being constructed.

In Hong Kong, Superloop has established a 110 km fibre optic network to initially connect 30 strategic sites including the Hong Kong Stock Exchange data centre. The Company has constructed TKO Express, the first submarine cable to connect the traditional carrier hotels located in Chai Wan on Hong Kong Island and the data centre campus located at Hong Kong Science and Technology Park's Tseung Kwan O Industrial Estate on the mainland, providing much needed physical diversity and a low latency path between Hong Kong's major finance and technology hubs. TKO Express is the world's largest fibre core count subsea cable system.

Superloop also owns and operates an advanced, large-scale fixed wireless broadband network, including more than 300 wireless PoPs, delivering business-grade services at speeds up to 1Gbps.

Submarine cable infrastructure provider, SubPartners, will expand Superloop's trans-Australian and international capacity, giving the Company ownership of international submarine cable capacity as a member of the INDIGO

consortium which is constructing the INDIGO West cable system (Singapore to Perth) and the INDIGO Central cable system (Perth to Sydney).

Superloop+ provides a diverse range of ICT services to small-to-medium enterprises, government, retail, mining and education customers across Australia. Services include communications, network infrastructure, Cloud-based solutions and managed services. The segment includes CyberHound, a provider of cyber safety solutions to primary and secondary schools.

Superbb provides residential and campus broadband services including residential fixed wireless and NBN internet services as well as connectivity services for hotels, student accommodation sites and schools.
