Energy One Limited (ASX:EOL) Investor Update for FY18

Disclaimer

This document has been prepared by Energy One Limited (EOL) and comprises written materials and slides for a presentation concerning EOL.

This presentation is for information purposes only and does not constitute or form part of any offer or invitation to acquire, sell or otherwise dispose of, purchase or subscribe for, any securities, nor does it constitute investment advice, nor shall it or any part of it nor the fact of its distribution form the basis of, or be relied on in connection with, any contract or investment decision.

Certain statements in this presentation are forward looking statements. You can identify these statements by the fact that they use words such as "anticipate", "estimate", "expect", "project", "intend", "plan", "believe", "target", "may", "assume" and words of similar import.

These forward looking statements speak only as at the date of this presentation. These statements are based on current expectations and beliefs and, by their nature, are subject to a number of known and unknown risks and uncertainties that could cause the actual results, performances and achievements to differ materially from any expected future results, performance and achievements expressed or implied by any such forward looking statements.

No representation, warranty or assurance (express or implied) is given or made by EOL that the forward looking statements contained in this presentation are accurate, complete, reliable or adequate or that they will be achieved or prove to be correct. Except for any statutory liability which cannot be excluded, EOL and its respective officers, employees and advisors expressly disclaim any responsibility for the accuracy or completeness of the forward looking statements and exclude all liability whatsoever (including negligence) for any direct or indirect loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission therefrom.

Subject to any continuing obligation under applicable law, or any relevant listing rules of the ASX, EOL disclaims any obligation or undertaking to disseminate any updates or revisions to any forward looking statements in these materials to reflect any change in expectations in relation to any forward looking statements or any change in events, conditions or circumstances on which any statement is based. Nothing in these materials shall under any circumstances create an implication that there has been no change in the affairs of EOL since the date of this presentation.

Operational review

FY18 - Another strong year with more growth anticipated

- Successfully executing our growth strategy:
 - ✓ Diversification
 - √ Acquisitions
 - ✓ Geographic expansion
- Off-shore marketing results in first overseas sale
- Debt facility repaid
- Increased dividend

We're successfully executing our long term strategy

Diversification

Invest in new products

Develop value-added services

Migrate customers to newer versions

Cross-sell products

Develop recurring revenue streams

Grow customer base

Offer a single-vendor solution

Geographic expansion

Sell into other industries

Grow by acquisition

Acquire complementary products/services

Distribution agreements

Multiple new products developed / acquired in FY17 & FY18

Marketing in UK/EU during FY18 resulted in first off-shore sale

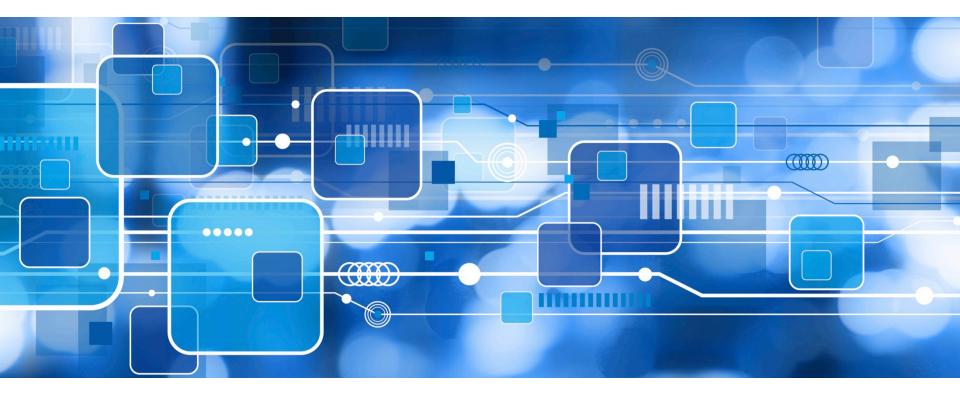

Two acquisitions in 2 years, continue to look for other opportunities

Acquisitions successfully integrated

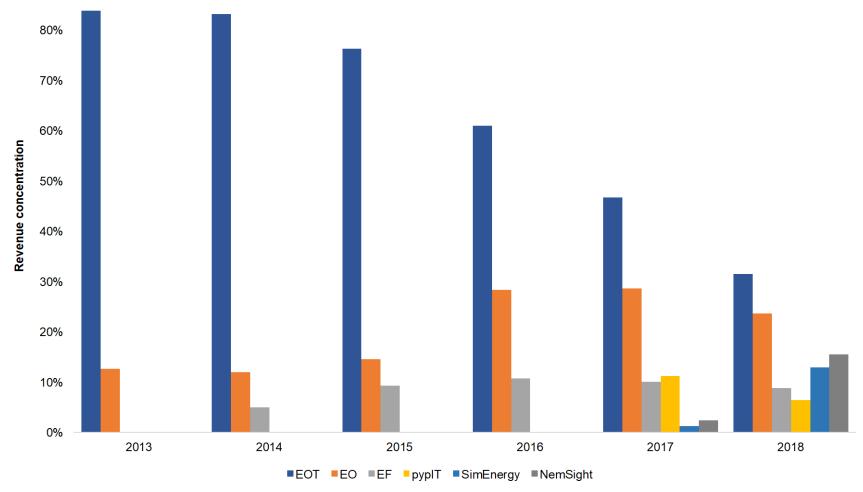

Energy One made two successful acquisitions, pypIT and Creative Analytics

- Expanded our range of wholesale energy product/service offerings
- No customers lost
- Operational integration completed during FY18

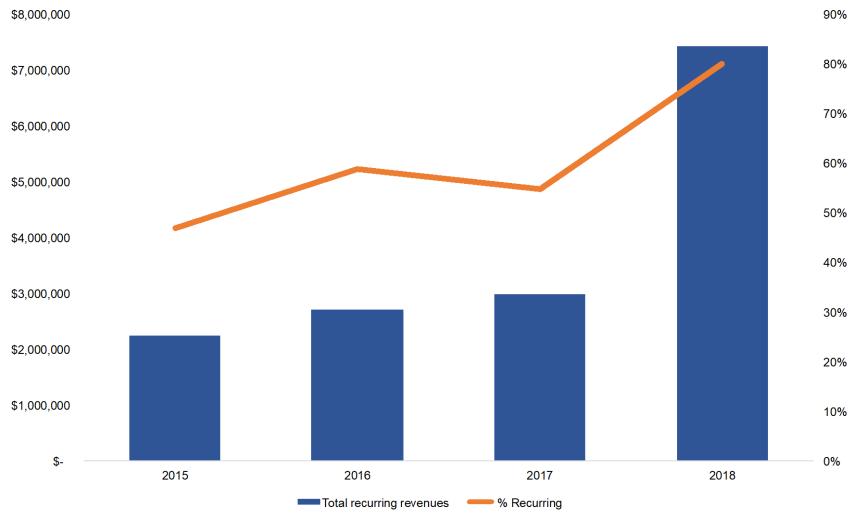

Revenue diversification continues to improve...

And recurring revenue is also increasing

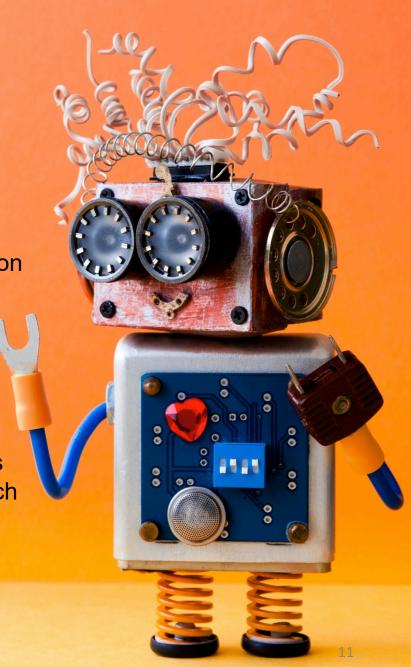

New opportunity with existing customers migrating to the cloud

- ✓ SaaS (Software as a Service) cost is bundled in a monthly amount
- ✓ Energy One is providing private cloud hosting to customers
- ✓ Depends on service levels provided but cloud hosting can add \$100k-\$200k p.a. for a medium sized customer
- ✓ Aiming to migrate 1-2 existing customer-systems per year
- ✓ Up to 50% of new clients may include some sort of hosting
- ✓ Using Amazon Web Services (AWS) to provide infrastructure

Robotic Process Automation (RPA)

- The new IT trend. Involves using software 'robots' to undertake multi-step manual processes with user-friendly interfaces
- Similar to older business process automation but aimed at smaller, desktop users
- EnergyFlow already offers a solution to the energy industry using these principles and it meets/exceeds RPA functionality in wholesale energy applications
- We have been packaging specific solutions for customers; GasFlow, PPAflow, etc. which offer customers large productivity gains

Financial review

Financial results summary

	30 June 17	30 June 18	Change
Revenue	\$6,117,698	\$9,926,946	1 62%
Recurring Revenue	\$2,978,355	\$7,438,903	150%
Underlying EBITDA	\$1,414,847	\$2,500,205	1 77%
NPBT	\$749,967	\$1,718,412	129%
NPAT	\$307,326	\$1,040,343	239%
NTA / share (cents)	9.83	14.86	1 51%
Cash and equivalents	\$362,567	\$727,856	101%

Fifth consecutive year of profit while investing for growth

Maintained investment of ~\$1M or 16% or revenue in the research and development of new products

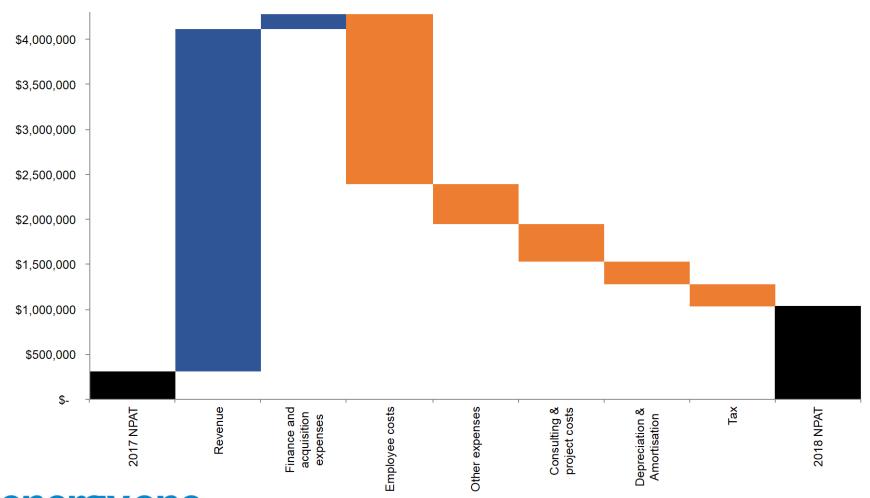

Continued investment (\$136k) in exploration of the UK and European markets

Invested \$4.5M in two strategic and synergistic acquisitions

A focus on costs whilst improving revenue has increased NPAT

EOL repaid its debt facility

- The \$1.75M debt facility was used to finance an acquisition
- Gearing ratio was less than 20%
- The strong free cash flow being generated by the business enabled early repayment
- At the end of FY18 Energy One was debt free
- Cash and equivalents balance at the end of FY18 was \$728k

Cash at beginning of year	1,501	1,982	2,228	366	_
Cash at end of year	1,982	2,228	363	728	_

A record \$3.2 million in cash was generated from operations

We've introduced a dividend policy

Directors declared a dividend of 2.0 cents per share for FY18

The dividend reinvestment pan (DRP) will issue shares at \$1.05

The DRP is underwritten to avoid cash leakage from the business and to provide incremental improvements in liquidity of EOL shares

Our new dividend policy aims to return 40% of net profit after tax, to shareholders each year

Our first UK customer went live

The UK division of a multinational energy company is using EnergyFlow to manage bespoke Power Purchase Agreements.

Project is being led & delivered by Dunstan Thomas with our support.

Continuing to invest in off-shore marketing

To capitalise on opportunities off-shore our investment will continue, including:

- Technical resources to adapt product(s) for those markets
- Direct sales and marketing costs
- Corporate costs for transacting in those markets, legal, contracts etc

Any investment will be progressive and subject to successfully achieving milestones

Market opportunity in UK/EU is potentially 10x the size of the Australian market

EOL's software now dispatches almost half the physical electricity in the NEM and manages more than a third of the financial derivatives

And our software is responsible for scheduling the transport of 40% of the domestic gas in Australia

This gives Energy One a leading market position in both gas and electricity trading software and strategically positions us for future market developments

And future market developments look positive

Future market developments that EOL is well placed to service:

- Capacity trading in the gas market (2018)
- Potential move to 5-minute electricity settlements (2020)
- Batteries, solar, demand-side management and other disruptive technologies
- Regulatory changes promote system renewal opportunities

Regulator changing the way Australian gas markets operate

- The Australian Energy Regulator is implementing a capacity trading market ~2019
- Gas pipelines will need to publish data related to their spare pipeline capacity
- AEMO will arrange an auction of this spare capacity
- This is a major change in way gas transmission operates in Australia

pypIT is being enhanced for the changes

- EOL's pypIT software serves 40% of the gas transmission market and will play an important role in facilitating the data transfer for capacity trading and (consequent) scheduling of the traded capacity.
- Changes to pypIT are commencing in FY19 and while we expect a modest increase in customisation revenue for this, other business-as-usual projects will likely be delayed offsetting this additional revenue.

Electricity market reform will also provide additional opportunities

- The Australian Energy Market Commission has announced that, from 2021, electricity market settlement periods will change from 30-minute intervals to 5-minute intervals
- This reform is intended to encourage new-technologies such as battery storage and fast-peakers by facilitating quicker economic price-signaling
- This will necessitate a 6-fold increase in the amount of data being processed in wholesale trading operations.
- Battery technology 'generators' starting to appear in the market place providing near-term opportunity for new customer acquisition

TESLA

Energy One well positioned to address the new 5-minute market

- EOL understands the market and its proposed changes better than our (overseas) competitors
- Our software systems are currently being adapted to address the new standards and the first example will go-live in mid-2019
- The effort is incremental and additional staff are already budgeted in FY19
- This reform is expected to start a product renewal cycle and EOL expects to implement mediumsized upgrades and 2-3 new med/large projects in the next two years

Investing for growth

- Domestic sales:
 Continue to develop new products. New projects pending and in development.
- Explore new markets:
 EnergyFlow offers great flexibility
 and has strong potential in
 overseas energy markets so we
 will continue investing in market
 development.
- Growth by acquisition:
 Continue actively pursuing strategic acquisitions where appropriate.

Energy One well placed for growth in FY19

- ✓ Solid financial performance for the year past
- ✓ Strong market position & good products
- ✓ Opportunities for domestic sales in FY19
- ✓ Overseas opportunities to expand reach
- ✓ Further investment in product development
- ✓ Marketing domestically and internationally

Appendix

Additional information

Sales pipeline update

- Trading system projects represent a large investment for customers requiring significant planning, development and resourcing (this increases customer retention).
- Sales cycle can be 1-5 years especially for 'large' projects (e.g. ~\$1m, over 12-18 month project). Difficulty predicting when customers will come to market.
 Expectation is to win 1-2 new large (or medium ~\$0.5m) projects per year.
- In general, smaller accounts are <\$100k per year. Sales cycles are shortened and revenues are largely subscription or annuity based.
- Assisting this, the addition of NemSight (in particular) gives us a product that can be quickly utilized, giving balance to the longer sales-cycle traditional offerings. We are positioning EnergyFlow in the same way.
- Our goal at any one time for the pipeline (and current status) is a mix of projects:
 - a) 4-5 in sales stage,
 - b) 2-3 in prospective stage; and
 - c) 1-2 in procurement.
