LiveTiles creating the world's first Intelligent Secure Workplace solution in partnership with Nucleus Cyber

- LiveTiles is pleased to announce a partnership with Nucleus Cyber, the AI-driven data security company for the Intelligent Workplace
- With Nucleus Cyber, LiveTiles will create the world's first Intelligent Secure Workplace Solution, powered by Artificial Intelligence (AI) technology
- The Intelligent Secure Workplace Solution will provide a comprehensive set of capabilities on top of Microsoft's Office 365 and SharePoint platforms
- This additional functionality is expected to contribute to LiveTiles' strong subscription revenue growth in FY19 and beyond

LiveTiles Limited (ASX:LVT) (LiveTiles or the Company), a global software company that empowers its users to create their own intelligent workplace experiences, is pleased to announce a partnership with Nucleus Cyber to bring AI-powered security to the Intelligent Workplace.

Nucleus Cyber, the AI-driven data security company for the Intelligent Workplace, recently acquired the Security Sheriff platform from Cyxtera Technologies. The technology provides advanced data security protection for the Microsoft suite of workplace solutions, including SharePoint and Office 365, providing security perimeters for all environments including on-premise, cloud and hybrid environments. The platform empowers enterprises to automatically find, classify and secure unstructured data in their digital environment, and determine how this information is accessed with granular control.

With Microsoft boasting over 400,000¹ customer organisations and over 85% of Fortune 500 companies leveraging SharePoint Online as part of their Office 365 subscription, the addressable market for this solution is extremely large.

Gartner is forecasting worldwide Information Security spending to exceed \$124 billion in 2019². The Data Security segment is the second fastest growing segment within Gartner's Information Security spending forecasts and is forecast to grow by 15% in 2019. Demand for enhanced security technology is being driven by Global Data Protection Regulation (GDPR) pressures on organisations along with broader and growing security concerns around corporate and personal data.

WORLD'S FIRST INTELLIGENT SECURE WORKPLACE SOLUTION

By partnering with Nucleus Cyber, LiveTiles' Intelligent Workplace Solution (which combines LiveTiles Design, LiveTiles Intelligence, LiveTiles Bots and Hyperfish) will now be enhanced by the additional data security capabilities of Nucleus Cyber's platform to create the world's first Intelligent Secure Workplace Solution.

The Intelligent Secure Workplace Solution will be promoted to mid-sized and large organisations through LiveTiles' sales and marketing channels. Strong demand is coming from large enterprises in the financial, insurance and legal industries, all of which are greatly impacted by growing global security regulations. This, in combination with joint promotional activity from Microsoft and other LiveTiles strategic partners, is expected to drive strong commercial opportunities for the Company.

Karl Redenbach, LiveTiles Co-Founder and CEO, said: "We've had a long relationship with Kurt (founder and CEO of Nucleus Cyber) and we look forward to creating the world's first Intelligent Secure Workplace Solution. By adding powerful cyber-security technology to our product suite, we are addressing a major concern businesses have when collaborating in the cloud. We see a great market opportunity across existing and future customers."

Kurt Mueffelmann, CEO of Nucleus Cyber, said: "We love how the LiveTiles platform has empowered organisations to improve collaboration. Adding tighter security measures around these platforms is a logical next step to mitigate inside threats that result from data access and sharing. This is a great opportunity to build on LiveTiles' offering by adding intelligent security that automatically determines who can access information and what they can do with it, to ensure secure collaboration within organisations and with trusted third parties."

About Nucleus Cyber:

Nucleus Cyber is the AI-driven security solution for the intelligent workplace providing dynamic, granular data security that leverages existing infrastructure investments. The Security Sheriff platform dynamically adjusts file security based on real-time comparison of user context and file content to enforce data governance policies for more secure collaboration. It minimizes data loss and misuse risk for a wide range of digital environments including SharePoint, Office 365, file shares, enterprise social systems and the cloud.
