ASX Announcement

December 2018 Quarterly Activities Report

Veriluma Limited (ASX: VRI, Veriluma or Company) one of Australia's leading Artificial Intelligence companies providing prescriptive software solutions is pleased to provide an update on its activities for the quarter ended 31 December 2018.

Operational Update

During the quarter, Veriluma continued discussions with various parties to trial our software and with partner organisations to include our software in their solutions to market. A proof of concept trial began with a leading international electronics and systems group and discussions around their expansion and rollout have begun.

Of note, following on from our tender submission, Veriluma entered negotiations with the Commonwealth. These negotiations are still proceeding. The market will be kept informed of developments at the appropriate time.

Veriluma is pleased to announce that a leading Australian university has purchased our software for use in a research project.

Corporate Update

The board continues to be focused on its core strategy where it sees Veriluma's greatest opportunity: Defence/National Security. The board is actively considering strategies to ensure the working capital needs of the Company are met.

Financial Overview

For the quarter, the Company's net operating cashflow was \$13,000, which included Cash Inflows of \$242,000 from the Research and Development Tax Incentive, and \$22,000 from Software Licences. Estimated cash outflow for the next quarter is \$354,000. The Company's cash position at 31 December 2018 (unaudited) was \$151,000.

About Veriluma and Prescriptive Analytics:

Veriluma has developed and patented an advanced algorithm dealing in Prescriptive Analytics. Prescriptive Analytics is a form of advanced, forward-looking analytics, which provides assessments about future outcomes. Although most types of analytics aim to assist and improve in the decision-making process, only Prescriptive Analytics delivers a preferred course of action.

Developed by a Commonwealth Research Centre for the Australian Defence Intelligence Organisation, which has been utilising Veriluma's technology since 2013, Veriluma's software assists decision makers with rapid and accurate assessments of terrorism and national security threats using its proprietary technology based on Prescriptive Analytics.

In complex decision-making situations, the ability to comprehensively manage incomplete or uncertain inputs is highly valuable for businesses, governments and individuals. ¹The Prescriptive Analytics software market is expected to reach US\$1.1 billion in the next 3 years, with a 22% Compound Annual Growth Rate (CAGR) from 2016. Currently, 10% of organisations have some form of prescriptive analytics and this is expected to grow to 35% by 2020. ¹Source: Gartner Forecast Snapshot: Prescriptive Analytics, Worldwide, 2016; 5 February 2016

Veriluma's software has wide applications across multiple industries including banking and financial services, government, defence and national security, insurance, legal, health, pharmaceutical and resources.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
