Notes to the Interim Financial Statements

3. Notes to the Interim Financial Statements

Preparation of this Report

1. General Information

Link Administration Holdings Limited (the "Company") is a company incorporated and domiciled in Australia. The Company's registered office and principal place of business is Level 12, 680 George Street, Sydney NSW 2000, Australia. The consolidated interim financial statements of Link Group as at and for the interim period ended 31 December 2018 comprise the Company and its subsidiaries and Link Group's interest in associates and jointly controlled entities. Link Group's principal activities during the course of the interim period was the provision of technology-enabled administration, securities registration and asset services, for listed and unlisted corporate entities as well as pension and superannuation funds across the globe. This is complemented by the provision of ancillary, value-added services in the areas of digital communication, data integration and insights, as well as stakeholder education and advice.

2. Basis of Preparation

(a) Statement of compliance

The consolidated interim financial statements are general purpose condensed financial statements which have been prepared in accordance with AASB 134 Interim Financial Reporting, the Corporations Act 2001 and with IAS 34 Interim Financial Reporting. They do not include all of the information required for a complete set of annual financial statements and should be read in conjunction with Link Group's consolidated annual financial statements for the financial year ended 30 June 2018 (2018 Annual Report). However, selected explanatory notes are included to explain events and transactions that are significant to understanding changes in Link Group's financial position and performance since the 2018 Annual Report. The interim financial statements have been prepared on a going concern basis. The Directors of Link Administration Holdings Limited consider it probable that Link Group will continue to fulfil all obligations as and when they fall due for the foreseeable future and accordingly consider that Link Group's interim financial statements should be prepared on a going concern basis.

These interim financial statements were authorised for issue by the Board of Directors on 15 February 2019.

(b) Basis of measurement

The interim financial statements have been prepared on the historical cost basis except for financial instruments designated at fair value through profit or loss, which are measured at fair value.

(c) Functional and presentation currency

These consolidated interim financial statements are presented in Australian dollars, which is the Company's functional currency and the functional currency of the majority of Link Group's operations.

(d) Use of estimates and judgements

Preparation of the consolidated interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these consolidated interim financial statements, the significant judgements made by management in applying Link Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the 2018 Annual Report.

2. Basis of Preparation (continued)

(e) Changes in significant accounting policies

The principal accounting policies adopted by Link Group are consistent with those of the previous financial year and comparative interim reporting period, except for the adoption of new and amended accounting standards on 1 July 2018 as set out in Note 3.

(f) Accounting standards issued but not yet effective

A number of new standards, amendments to standards and interpretations that are effective for annual periods beginning after 1 July 2018 and have not been applied in preparing these consolidated interim financial statements. Those which may be relevant to Link Group are set out below. Link Group does not intend to adopt these standards early.

AASB 16 Leases

AASB 16 Leases removes the distinction between operating and finance leases for lessees and will require nearly all leases to be accounted for as both an asset and liability on the statement of financial position. There is also new guidance on when an arrangement would meet the definition of a lease. AASB 16 is effective for annual reporting periods beginning on or after 1 January 2019.

Link Group is assessing the potential impact of the application of AASB 16 on its consolidated financial statements, including the potential impact of the various transition provisions available to Link Group. Using approximate values, if Link Group were to adopt AASB 16 as at 31 December 2018, the present value of the future minimum lease payments for non-cancellable operating leases disclosed in Note 28 of Link Group's 2018 Annual Report would be recognised as a financial liability in the statement of financial position, and under the transition provisions available, Link Group would also recognise a corresponding amount as a right-of-use asset. The new standard is also likely to result in a reduction in occupancy expenses as lease costs will instead be allocated against the lease liability. The lease asset will be amortised over the life of the lease resulting in a depreciation and amortisation charge. The depreciation and amortisation charge is expected to approximate the reduction in occupancy expenses.

(g) Rounding off

The Company is of a kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, and in accordance with that Instrument all financial information presented in Australian dollars has been rounded to the nearest thousand unless otherwise stated.

3. Changes in Significant Accounting Policies

This note explains the impact of the adoption of AASB 9 *Financial Instruments* and AASB 15 *Revenue from Contracts with Customers* on Link Group's consolidated interim financial statements and discloses any changes in accounting policies that have been applied from 1 July 2018 where they are different to those applied in prior periods.

(a) AASB 9 Financial Instruments

AASB 9 Financial Instruments replaces the existing guidance in AASB 139 Financial Instruments: Recognition and Measurement. AASB 9 includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets and new general hedge accounting requirements.

Nature of revised accounting policies

In adopting AASB 9, Link Group reviewed its impairment methodology in relation to trade and other receivables. Link Group's trade and other receivables do not contain a significant financing component, hence the lifetime expected credit loss measurement applies upon initial recognition. Link Group applies actual credit loss experience in assessing its trade and other receivables for impairment.

Effect of revised accounting policies

The adoption of AASB 9 has been applied retrospectively in accordance with the requirements of the standard, but has not had any impact on the current or prior reporting periods. The impact of the change in impairment methodology did not result in any change to Link Group's trade and other receivables given Link Group's impairments in relation to trade receivables have not been material historically.

3. Changes in Significant Accounting Policies (continued)

(b) AASB 15 Revenue from Contracts with Customers

AASB 15 Revenue from Contracts with Customers replaces existing revenue recognition guidance under Australian Accounting Standards. The core principle of AASB 15 is to recognise revenues when control of goods or services is transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services.

Nature of revised accounting policies

Type of transaction	Accounting policy
Revenue recognised over time	The majority of Link Group's revenue arises from service contracts where Link Group's performance obligations are satisfied over time. Customers obtain control of services as they are delivered, and revenue is recognised over time as those services are provided, in accordance with series guidance. Invoices are generally issued on a monthly basis and are payable within 14 to 30 days. As such, there is not considered to be any significant financing component within each contract.
Revenue recognised at a point in time	Link Group may also recognise revenue derived at a point in time, generally when Link Group's performance obligation is linked to a specific deliverable. Revenue is recognised when Link Group transfers control of the deliverable.
Contract fulfilment costs	Link Group recognises assets from migration and other costs incurred to fulfil a contract where: (a) the costs relate directly to a contract; (b) the costs generate or enhance resources that Link Group will use in satisfying (or in continuing to satisfy) performance obligations in the future; and (c) the costs are expected to be recovered. The asset is then amortised on a straight line basis over a period consistent with the transfer of the services to the customer ie over the contract term. Contract fulfilment costs are classified as Contract fulfilment cost asset included in other assets in the statement of financial position.
Contract assets	Where Link Group has satisfied a performed obligation but has no unconditional right to payment under the contract, Link Group presents a contract asset as part of trade and other receivables. A contract asset represents Link Group's right to consideration in respect of services Link Group has already transferred to a customer.
Contract liabilities	Where a customer pays or is obligated to pay consideration before Link Group has satisfied a performed obligation, Link Group presents a contract liability as part of trade and other payables. The contract liability represents Link Group's obligation to transfer services to a customer in the future.

Effect of revised accounting policies

Link Group adopted AASB 15 using the cumulative effect method, with the impact of initial application of the standard recognised in retained earnings on the date of initial application (i.e. 1 July 2018). Accordingly, the information presented for comparative periods has not been restated.

Type of transaction	Accounting policy
Revenue recognised over time	Link Group's revenue recognition in respect of these items is unaffected upon application of AASB 15. Link Group's existing revenue recognition policy accurately reflects the transfer of services to customers throughout the term of the contract.
Revenue recognised at a point in time	Link Group's revenue recognition in respect of these items is unaffected upon application of AASB 15. Link Group's existing revenue recognition policy accurately reflects the satisfaction of performance obligations at a point in time.

3. Changes in Significant Accounting Policies (continued)

(b) AASB 15 Revenue from Contracts with Customers (continued)

Effect of revised accounting policies (continued)

Type of transaction	Accounting policy
Contract fulfilment costs	Link Group has recognised a transition adjustment on 1 July 2018 representing the unamortised portion of any contract fulfilment costs arising from contracts with customers active as at 1 July 2018, in accordance with the revised accounting policy outlined above. Any amounts received upfront from clients in respect of contract fulfilment costs are classified as contract liabilities and amortised over the same period where they do not relate to a separate performance obligation.
Contract assets	Work completed but not billed and work in progress not yet billable which were previously classified as accrued revenue within trade and other receivables will now be classified as a contract asset. There is no impact on retained earnings on initial application of AASB 15.
Contract liabilities	Amounts received in advance from clients which were previously classified as unearned income within other creditor and accruals will now be classified as contract liabilities. There is no impact on retained earnings on initial application of AASB 15.

The following table summarises the impact, net of income tax, of the transition to AASB 15 on Link Group's retained earnings at 1 July 2018:

Revenue

Revenue is recognised as performance obligations are satisfied over time. Customers obtain control of services as they are delivered, and revenue is recognised over time as those services are provided. Invoices are generally issued on a monthly basis and are payable within 14 to 30 days. As such, there is not considered to be any significant financing component within each contract.

Link Group may also recognise revenue derived at a point in time, generally when Link Group's performance obligation is linked to a particular event. Revenue is recognised when Link Group has an unconditional right to payment under the terms of the contract.

Contract fulfilment costs

Costs directly related to a contract that generate or enhance Link Group's resources to satisfy performance obligations in the future, and that are expected to be recovered, are recognised as an asset. Contract fulfilment costs are amortised on a straight line basis over the expected life of the contract.

Any recoveries of those contract fulfilment costs from client are classified as contract liabilities and amortised over the same period where they do not relate to a separate performance obligation.

⁹ The comparative period represents LAS's results for 2 months ended 31 December 2017, following its acquisition on 3 November 2017.

6. Earnings per share

(a) Basic earnings per share

Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the interim period. Ordinary shares on issue have been adjusted for the bonus element of new shares issued at a discount to market value during the interim period.

Weighted average number of ordinary shares (basic)	531,173	485,313

(b) Diluted earnings per share

Diluted earnings per share is determined by adjusting the profit and loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, for the effects of all dilutive potential ordinary shares, which comprise Performance Share Rights (PSRs) granted to employees. Dilutive securities have been adjusted for the bonus element of new shares issued at a discount to market value during the interim period.

¹⁰ Prior period comparative information has been restated following amendments to and completion of provisional acquisition accounting. Refer to Note 20.

¹¹ The weighted average number of ordinary shares used in the Basic and Diluted earnings per share calculation for the current and comparative year were adjusted retrospectively in accordance with AASB 133 *Earnings per Share* following the issue of new shares at a discount to market value. When new shares are issued at a discount to market value ("bonus element"), there is a resulting theoretical dilution of existing ordinary shares on issue, leading to a decrease in basic and diluted earnings per share.

(c) Unrecognised tax losses

As at 31 December 2018 Link Group had carried forward tax losses unrecognised for deferred tax purposes, available to offset against taxable income in future years, in the following jurisdictions:

- Australian tax losses of \$206.5 million (30 June 2018: \$212.1 million); and
- Other jurisdiction tax losses of \$5.4 million (30 June 2018¹²: \$1.3 million).

The tax losses do not expire under current tax legislation. Deferred tax assets have not been recognised in respect of these losses because it is not probable that conditions will permit their utilisation in the foreseeable future.

These balances relate to investors' purchase or redemption of units in authorised funds of which Link Fund Solutions Limited (Link Asset Services' collective investment scheme administration business) is the Authorised Corporate Director. Link Fund Solutions Limited acts in the role of principal in the transactions, and the balances are due to and from the investors and investment funds. As at 31 December 2018, \$5.0 million (\$297.2 million liabilities net of \$292.2 million assets) of net cash was due to investors and investment funds. The net payable position arose because Link Fund Solutions Limited was yet to fund settlement with some investors and/or funds. The majority of funds need to be settled within a 4 day settlement period.

Provisions

A provision is recognised if, as a result of a past event, Link Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is treated as a finance expense.

Claims: Link Group recognises a provision for claims arising from processing errors and other events associated with the handling of administration activities for and on behalf of clients. Provisions are measured at the cost that Link Group expects to incur in settling the claim. The provision also includes an estimate of claims that have been incurred but are not yet reported.

Integration: The integration provision includes restructuring costs. The restructuring provision is based on estimates of the future costs associated with redundancies. The provision calculation includes assumptions around the timing and costs of redundancies. A provision for restructuring is recognised when Link Group has approved a detailed and formal restructuring plan and the restructuring either has commenced or has been announced publicly. Future operating costs are not included in the provision.

Onerous contracts: A provision for onerous contracts is recognised when the expected benefits to be derived by Link Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, Link Group recognises any impairment loss on the assets associated with that contract.

Other: Other provisions are for contractual make-good obligations. Make good provisions relate to Link Group's future obligation to remove fixtures and fittings or reinstate leaseholds back to original condition.

\$'000	\$'000
2,945	3,157

362,008	144,230

The equity securities have been designated at fair value through profit or loss because they are managed on a fair value basis and their performance is actively monitored.

As announced on 6 November 2018, a consortium comprising Link Group, Commonwealth Bank of Australia and Morgan Stanley Infrastructure Inc. (the Consortium) had its offer to acquire a controlling stake in Property Exchange Australia Limited (PEXA) via trade sale accepted by PEXA shareholders. The transaction became unconditional prior to 31 December 2018 and settled on 16 January 2019, taking Link Group's total ownership of PEXA from 19.8% to 44.2%. As at 31 December 2018, Link Group's existing investment in PEXA was carried within unlisted investments at a fair value with gains or losses recognised through profit or loss given Link Group did not have significant influence over PEXA as at 31 December 2018. The investment had a fair value of \$310.0 million at the end of the interim period (30 June 2018: \$132.3 million).

During the interim period Link Group made an investment of \$39.4 million in Leveris Limited (Leveris). Link Group's total ownership of Leveris is 13.1%. The investment in Leveris is carried within unlisted investments at a fair value with gains or losses recognised through profit or loss given Link Group does not have significant influence over Leveris. The investment had a fair value of \$39.7 million at the end of the interim period.

(b) Fair value of financial instruments

The following table details Link Group's fair value amounts of financial instruments categorised by the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There have been no assets transferred between levels during the interim period (30 June 2018: none).

15. Investment and financial risk management (continued)

(b) Fair value of financial instruments (continued)

Level 1 investments consist of financial instruments traded in active markets, and are valued based on quoted market prices at the end of the reporting period.

Level 2 investments consist of unlisted managed investment schemes and derivative financial instruments. Unlisted managed investment schemes are valued based on daily quoted unit redemption prices derived using observable market data. Derivative financial instruments are valued using quoted forward exchange rates at the reporting date and present value calculations based on high credit quality yield curves in the respective currencies.

Level 3 investments include unlisted investments held by Link Group, the valuation for which is deemed to have one or more significant inputs which are not based on observable market data.

Management has assessed the fair value of the investment in PEXA to be \$310.0 million (30 June 2018: \$132.3 million). Management's valuation as at 31 December 2018 is based on the enterprise value attributed to PEXA under the successful trade sale offer accepted by PEXA shareholders on 6 November 2018. The trade sale became unconditional on 21 December 2018 and settled on 16 January 2019.

Management has assessed the fair value of the investment in Leveris to be \$39.7 million. Management's valuation as at 31 December 2018 is based on the enterprise value attributed to Leveris under the arms-length equity raising conducted by Leveris in July 2018.

Significant increases or decreases in future cash flows would increase or decrease, respectively, the fair value of the investments.
