## GAS-TESS COMMISSIONING COMPLETE

---

1414 Degrees Limited (ASX:14D) is pleased to report progress with the GAS-TESS implementation at the Glenelg Wastewater Treatment Plant.

The full suite of ten biogas burners are commissioned and performing above expectations. The silicon storage reached operating temperature and the turbine started generating electricity on Saturday 25<sup>th</sup> May. It is supplying hot water from the turbine exhaust to the treatment plant, augmenting the continuous hot water supply from the biogas burners exhaust. Electricity is being delivered to our load bank pending SA Water completing the approval processes to connect to the National Electricity Market.

### ABOUT 1414 DEGREES LIMITED

1414 Degrees believes in a sustainable energy future, where energy is available to all, at all times. Its clean energy storage is set to reduce energy costs by increasing the efficiency of renewable generation and stabilising grid supply. The 1414 Degrees thermal energy storage system (TESS) is unlike any other energy storage system in the world.

1414 Degrees' technology stores energy generated from electricity or gas and supplies both heat and electricity in the proportions required by consumers. It is unique in its combination of low cost, flexibility of location, scalability, and sustainability. Following the successful development of its commercial demonstrator, the Company is now in an early stage of product development and commercialisation.
