STRONG DEMAND IN THE  
**URANIUM MARKET**

An exciting long-term outlook

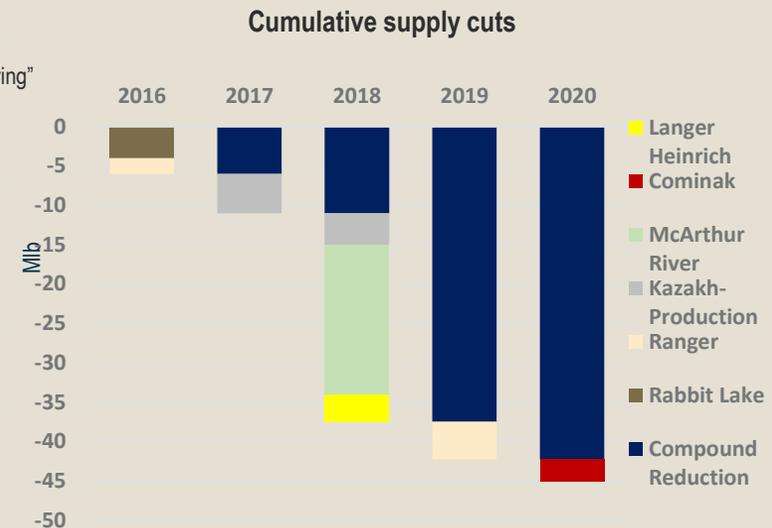

# THE URANIUM STORY IS COMPELLING

Source: IRESS 13 August 2019

Source: Paladin Research

Source: Paladin Research

Spot uranium prices are at historic lows

The nuclear power industry is consuming more uranium than pre-Fukushima with growth in China, India and elsewhere

Utilities have been "under buying" at an average rate of 80Mlb per year relative to consumption

European and US utilities are running down stockpiles and contract positions put in place pre-Fukushima

Mined supply is being rapidly cut back

# SUPPLY SIDE FACTORS

## KEY MARKET OBSERVATIONS

Stocks drawn down >400Mlb and +40Mlb taken out of the supply side in recent years (including Ranger 2019)

Significant decrease in exploration spend since Fukushima, supply side projects reduced by 90% (670 projects to 90 now)

New project development timelines stretched:

- Permitting uncertainty remains in many jurisdictions
- May require significantly higher incentive prices +US\$60-\$80/lb
- Production from new mines likely many years after incentive prices reached

When long-term contracting returns, enrichment tails will increase, reducing the contribution of secondary production to the market

Kazakhstan production flat @ <60Mlb to 2021. 15% IPO + (ve) for transparency. Changed from volume-based to value-based marketing

## MARKET OPPORTUNITIES

Rate of development of new mines cannot match the growth case and unable to respond in time to price increases

Potential for short-term price spikes

Mines currently on C&M have a significant restart timeline advantage

# DEMAND SIDE FACTORS

## GLOBAL WARMING

- Nuclear energy is a low cost and low emission base load energy source
- Global impetus to reduce carbon emissions and global warming
- Intergovernmental Panel on Climate Change (IPCC) REPORT – Limit global warming increase to 1.5°C
  - China - Plans to have 56 reactors operating by 2020 and 180 reactors, or 220% increase, by 2030 to reduce its reliance on coal
  - India following suit with 21 reactors into operation by 2031
  - 17 new reactors in Saudi Arabia announced in 2018

## ELECTRIC VEHICLE MARKET

- Forecasts show sales of electric vehicles increasing from a record 2 million worldwide in 2018, to rise to 10 million in 2025 and surging to 28 million in 2030 resulting in greater demand for electricity supply

# SENTIMENT MOVING BACK TO NUCLEAR

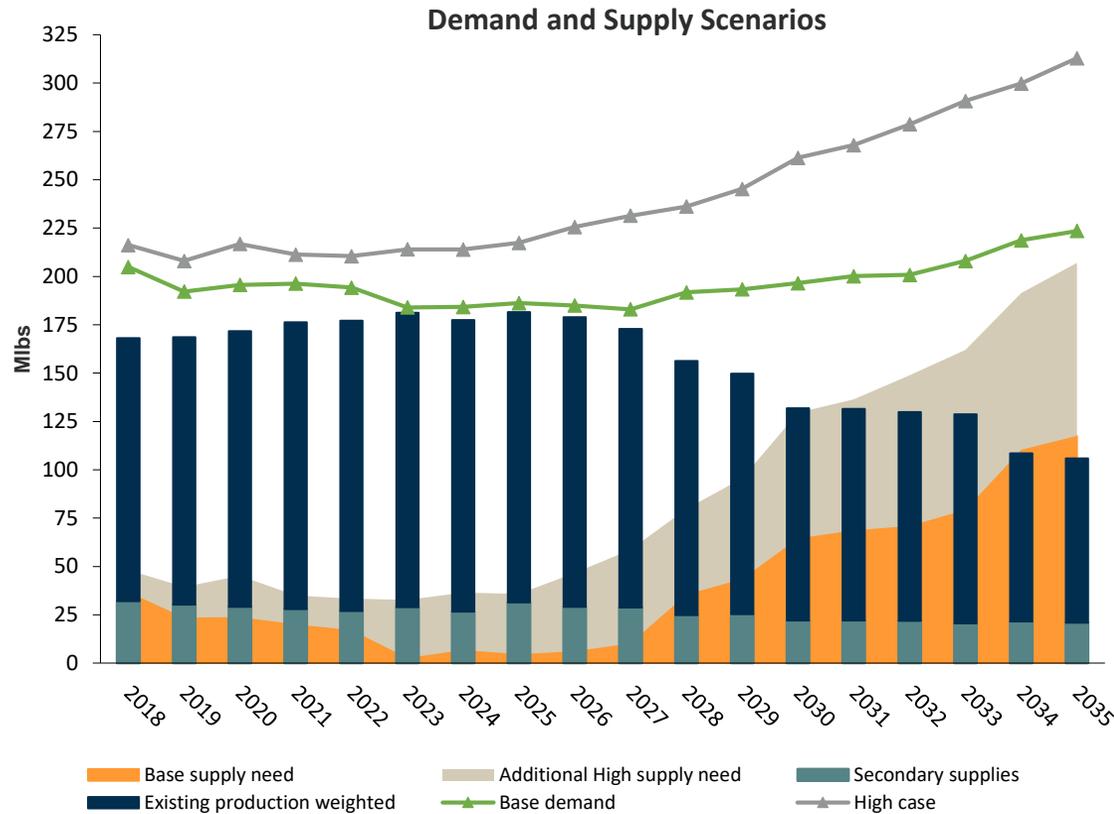

- Nuclear energy is gaining increased support, even from former opponents (Source: Michael Shellenberger <https://www.youtube.com/watch?v=N-yALPEpV4w>)
- Over two decades of climate change conferences (Berlin 1995) with little to show for it
- Carbon emission continue to increase
- Germany failing to meet goals
  - €160B investment results in zero progress in reducing emissions and 50% higher electricity prices than France (75% Nuclear in energy mix)
  - Increased reliance on lignite coal and Russian gas
  - Competitive disadvantage for Germany industry
- Renewables are not the answer by themselves
  - Not base load, highly variable, low availability eg: wind turbine 28%
  - Require gas or coal to offset variability which has resulted in reductions in nuclear energy use which is zero carbon
    - A\$750M worth of “Elon Musk Honsdale” battery installations to back up one wind turbine for one month

# DEMAND GROWTH FAR EXCEEDS SUPPLY CAPABILITY

- Current supply unable to meet even base case demand

- US contract coverage reaching critical lows

Plant repair and improvement  
**US\$24M**

Working capital  
**US\$54M**  
(includes: first fill of reagents, recommissioning, remobilisation and tailings dam costs)

- Process largely as-is with a focus on debottlenecking and process optimisation

# OPTION 2. PROCESSING UPGRADE STUDY (PFS2)

FURTHER ENCHANCEMENTS TO LANGER HEINRICH AFTER THE RAPID RESTART

US\$43M

## BACK END UPGRADE\*

- To reduce reagent costs and recover vanadium, water recovery from tailings and pressure leach
- 12-15 month Prefeasibility Study (currently in-progress) to select process flow sheet changes, followed by 6 month Feasibility Study. Decision to proceed further will be made in October 2019
- Execution most likely after plant restarted (FY22 or later)

US\$60M

## FRONT END UPGRADE \*

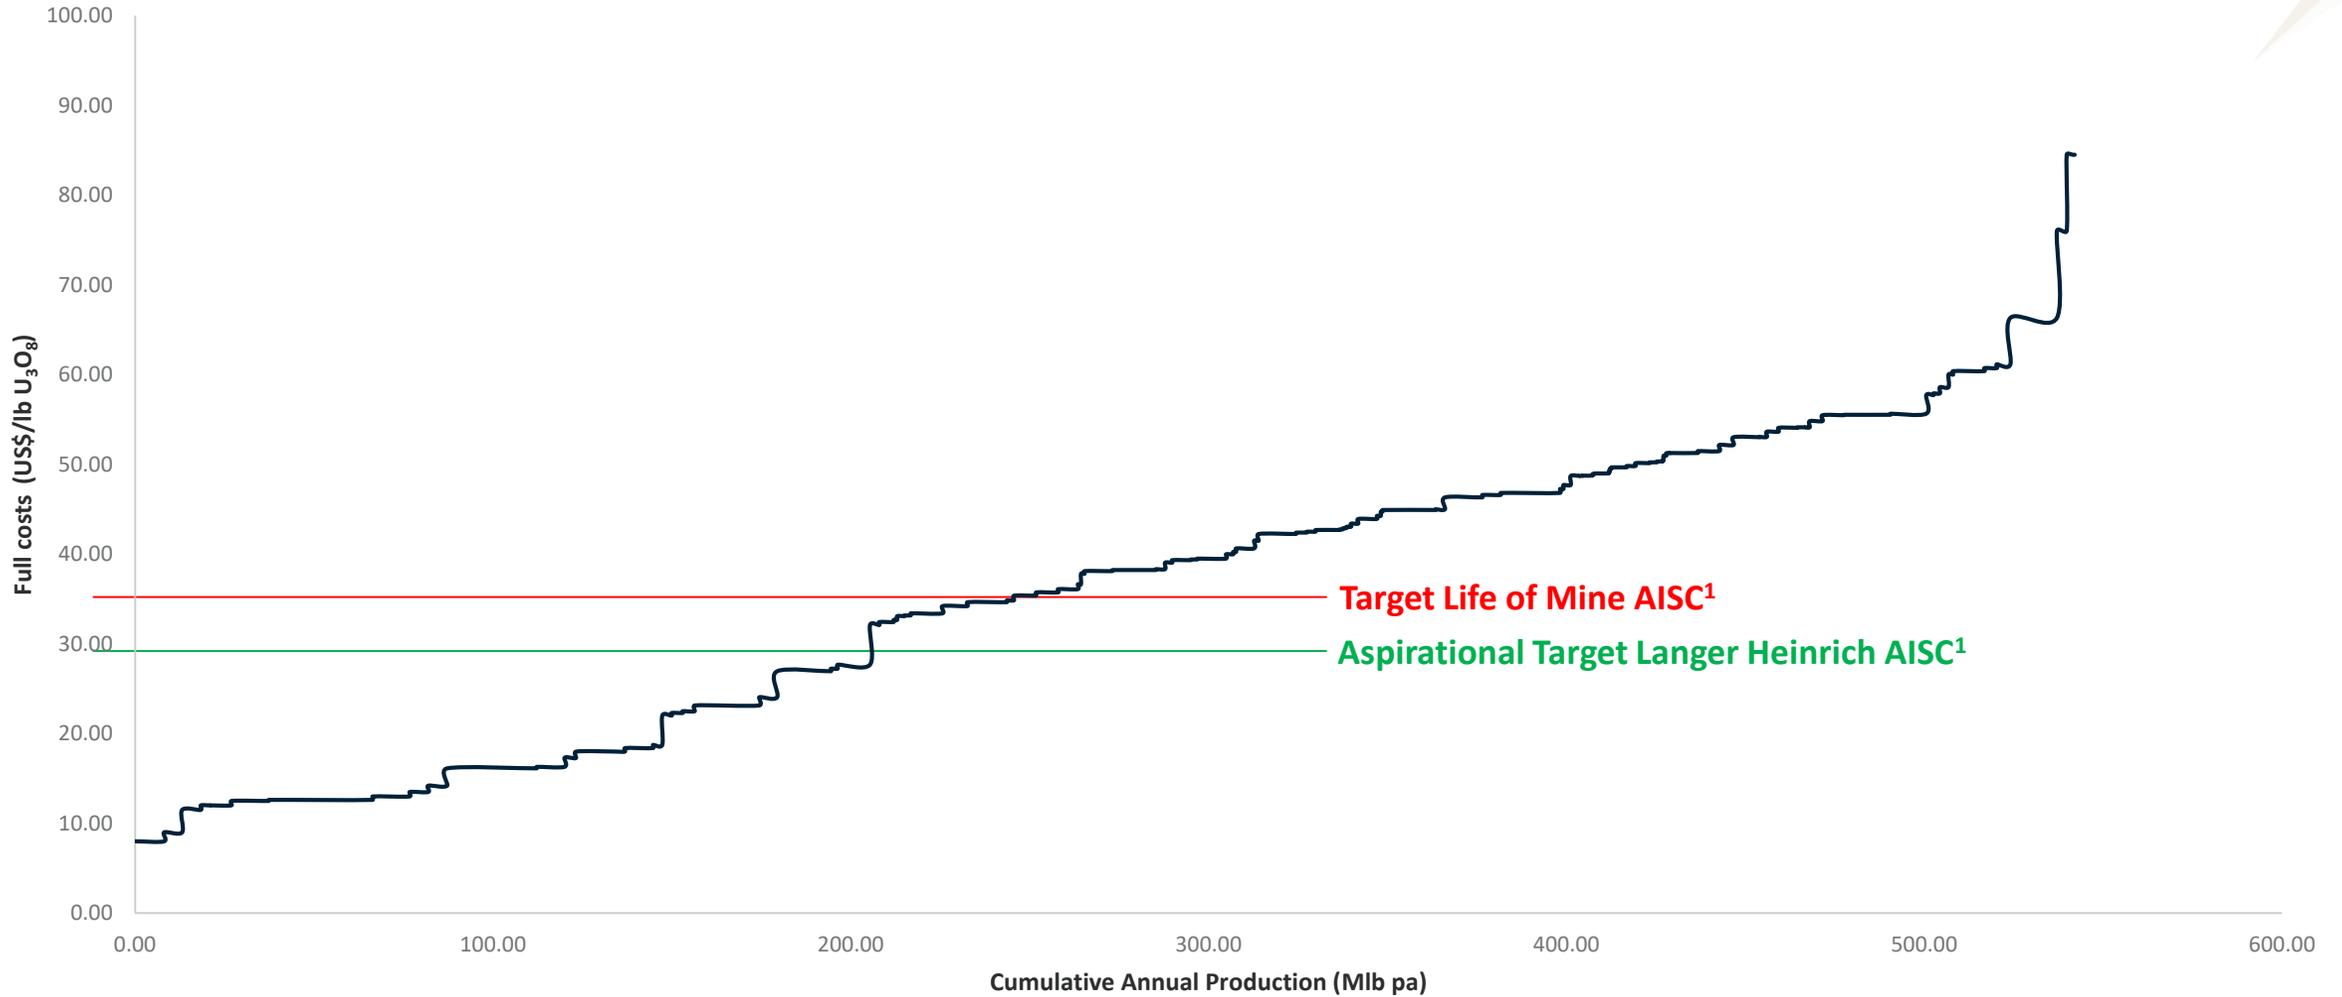

- Selectively upgrading low-grade ore to deliver higher leach feed grades and maintain Uranium production at ~5Mlbpa
  - 6-9 month Feasibility Study to plan implementation
  - Feasibility deferred until required. Decision expected at the end FY27

FY28-30

# WORLD WIDE PRODUCT COST CURVE – ALL PROJECTS

Source: UxC Production Cost Report 2019 – August 2019  
Note <sup>1</sup> AISC: All in Sustaining Cost based on the results of Paladin's Langer Heinrich Concept Study completed in February 2019

# CONCLUSION

Diversified portfolio of developed mines and exploration projects with significant leverage to upward movements in the uranium price

Lead time and capital associated with a re-start to bring Langer Heinrich back into production is shorter and lower than new projects

Lower incentive price into production than peers and well positioned on the cost curve

Proven product and market experience

Paladin is focused on minimising expenditure in the current low uranium price environment, while positioning itself for a low risk, well defined path back into production with any sustained price recovery

# FOREIGN SELLING RESTRICTIONS

# FOREIGN SELLING RESTRICTIONS

## International Offer Restrictions

This document does not constitute an offer of new ordinary shares ("New Shares") of the Company in any jurisdiction in which it would be unlawful. In particular, this document may not be distributed to any person, and the New Shares may not be offered or sold, in any country outside Australia except to the extent permitted below.

## Canada (British Columbia, Ontario and Quebec provinces)

This document constitutes an offering of New Shares only in the Provinces of British Columbia, Ontario and Quebec (the "Provinces") and to those persons to whom they may be lawfully distributed in the Provinces, and only by persons permitted to sell such New Shares. This document is not, and under no circumstances is to be construed as, an advertisement or a public offering of securities in the Provinces. This document may only be distributed in the Provinces to persons that are "accredited investors" within the meaning of NI 45-106 – *Prospectus Exemptions*, of the Canadian Securities Administrators.

No securities commission or similar authority in the Provinces has reviewed or in any way passed upon this document, the merits of the New Shares or the offering of New Shares and any representation to the contrary is an offence.

No prospectus has been, or will be, filed in the Provinces with respect to the offering of New Shares or the resale of such securities. Any person in the Provinces lawfully participating in the offer will not receive the information, legal rights or protections that would be afforded had a prospectus been filed and receipted by the securities regulator in the applicable Province. Furthermore, any resale of the New Shares in the Provinces must be made in accordance with applicable Canadian securities laws which may require resales to be made in accordance with exemptions from dealer registration and prospectus requirements. These resale restrictions may in some circumstances apply to resales of the New Shares outside Canada and, as a result, Canadian purchasers should seek legal advice prior to any resale of the New Shares.

The Company as well as its directors and officers may be located outside Canada and, as a result, it may not be possible for purchasers to effect service of process within Canada upon the Company or its directors or officers. All or a substantial portion of the assets of the Company and such persons may be located outside Canada and, as a result, it may not be possible to satisfy a judgment against the Company or such persons in Canada or to enforce a judgment obtained in Canadian courts against the Company or such persons outside Canada.

Unless stated otherwise, all dollar amounts contained in this document are in Australian dollars.

## *Statutory rights of action for damages and rescission*

Securities legislation in certain of the Provinces may provide purchasers with, in addition to any other rights they may have at law, rights of rescission or to damages, or both, when an offering memorandum that is delivered to purchasers contains a misrepresentation. These rights and remedies must be exercised within prescribed time limits and are subject to the defenses contained in applicable securities legislation. Prospective purchasers should refer to the applicable provisions of the securities legislation of their respective Province for the particulars of these rights or consult with a legal adviser.

The following is a summary of the statutory rights of rescission or to damages, or both, available to purchasers in Ontario. In Ontario, every purchaser of the New Shares purchased pursuant to this document (other than (a) a "Canadian financial institution" or a "Schedule III bank" (each as defined in NI 45-106), (b) the Business Development Bank of Canada or (c) a subsidiary of any person referred to in (a) or (b) above, if the person owns all the voting securities of the subsidiary, except the voting securities required by law to be owned by the directors of that subsidiary) shall have a statutory right of action for damages and/or rescission against the Company if this document or any amendment thereto contains a misrepresentation. If a purchaser elects to exercise the right of action for rescission, the purchaser will have no right of action for damages against the Company. This right of action for rescission or damages is in addition to and without derogation from any other right the purchaser may have at law. In particular, Section 130.1 of the Securities Act (Ontario) provides that, if this document contains a misrepresentation, a purchaser who purchases the New Shares during the period of distribution shall be deemed to have relied on the misrepresentation if it was a misrepresentation at the time of purchase and has a right of action for damages or, alternatively, may elect to exercise a right of rescission against the Company, provided that (a) the Company will not be liable if it proves that the purchaser purchased the New Shares with knowledge of the misrepresentation; (b) in an action for damages, the Company is not liable for all or any portion of the damages that the Company proves does not represent the depreciation in value of the New Shares as a result of the misrepresentation relied upon; and (c) in no case shall the amount recoverable exceed the price at which the New Shares were offered.

# FOREIGN SELLING RESTRICTIONS

Section 138 of the *Securities Act* (Ontario) provides that no action shall be commenced to enforce these rights more than (a) in the case of any action for rescission, 180 days after the date of the transaction that gave rise to the cause of action or (b) in the case of any action, other than an action for rescission, the earlier of (i) 180 days after the purchaser first had knowledge of the fact giving rise to the cause of action or (ii) three years after the date of the transaction that gave rise to the cause of action. These rights are in addition to and not in derogation from any other right the purchaser may have.

*Certain Canadian income tax considerations.* Prospective purchasers of the New Shares should consult their own tax adviser with respect to any taxes payable in connection with the acquisition, holding or disposition of the New Shares as any discussion of taxation related matters in this document is not a comprehensive description and there are a number of substantive Canadian tax compliance requirements for investors in the Provinces.

*Language of documents in Canada.* Upon receipt of this document, each investor in Canada hereby confirms that it has expressly requested that all documents evidencing or relating in any way to the sale of the New Shares (including for greater certainty any purchase confirmation or any notice) be drawn up in the English language only. *Par la réception de ce document, chaque investisseur canadien confirme par les présentes qu'il a expressément exigé que tous les documents faisant foi ou se rapportant de quelque manière que ce soit à la vente des valeurs mobilières décrites aux présentes (incluant, pour plus de certitude, toute confirmation d'achat ou tout avis) soient rédigés en anglais seulement.*
