About Skyfii

Skyfii helps physical venues measure, predict, and influence customer behaviour.

Thousands of shopping centres, airports, retailers, smart cities, universities, restaurants, and other venues, large and small, rely on Skyfii to help improve venue performance and create better experiences for their visitors and customers.

As the world's most trusted omnidata intelligence company, Skyfii collects and analyses billions of data points each month from venues across five continents.

Our cloud-based software platform, the IO Platform, helps venues visualise trends from digital and physical data in a single system of record. The IO Platform provides location and behaviour based communications software and tools to manage guest Wi-Fi, 2D and 3D cameras, people counting technology, weather and social media data across multiple locations.

Skyfii further augments insights generated by the IO Platform with its Data & Marketing Services offering: a team of data science and marketing consultants who help clients effectively gain more value from their data.
