### **NO IMPACT ON BEAM FROM CORONAVIRUS**

**Beam Communications Holdings Ltd** (ASX: BCC) has received inquiries from existing and prospective shareholders about the possible disruption to its supply chain caused by the coronavirus (COVID-19) and would like to provide the following update.

Beam carries at its Melbourne warehouse, on average, six months of inventory of core BEAM branded products supplied out of China. There is also sufficient inventory of the Iridium GO! product held at Iridium to meet existing and expected demand, beyond the end of the 2020 financial year.

Further, the newly launched ZOLEO device is manufactured in a highly automated and state-of-the-art facility in Malaysia. Beam already has 5000 units either on hand or in transit to customers.

While the company continues to closely monitor the global outbreak, as there will always be some base componentry that is sourced from China, at this stage it believes COVID-19 will have a minimal, if any, impact on Beam's operations and ability to fulfil orders in its usual manner and timeframe.

Yours faithfully,

Michael Capocchi  
Managing Director
