Investment properties are carried at fair value in accordance with the Group's accounting policy.

Fair value is the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date in the principal market for the asset or liability, or in its absence, the most advantageous market. In determining fair values, the Group considers relevant information including the capitalisation of rental streams using market assessed capitalisation rates. For investment properties under development the Group assesses fair value based on expected net cash flows discounted to their present value using market determined risk adjusted discount rates and other available market data such as recent comparable transactions. As such the fair value of an investment property under development will differ depending on the number of settlements realised and the stage that each development is at.
