Pursuant to Listing Rule 15.5, Tyro confirms this document has been authorised for release to the market by its Board About Tyro

Tyro is a technology-focused and values-driven company providing Australian businesses with payment solutions and value-adding business banking products. The company provides simple, flexible and reliable payment solutions as a merchant acquirer, along with complementary business banking products.

For the more than 32,000 Australian merchants who chose to partner with Tyro in the first half of FY20, the company processed more than \$11.1 billion in transaction value. In H1 FY20 the company generated \$117.3 million in revenue, originated \$37.4 million in loans and held merchant deposits totaling \$39.7 million.

Tyro is Australia's fifth largest merchant acquiring bank by number of terminals in the market, behind the four major banks.

The business was founded in 2003 with a goal of being the most efficient acquirer of electronic payments in Australia. Tyro has a track record of innovation, creating purpose-built solutions and being first to market. This approach saw the company become the first technology company to receive an Australian specialist credit card institution licence in 2005. In 2015 that licence was replaced by the award of an Australian banking licence, making Tyro the first new domestic banking licensee in over a decade.

Payments are at the core of Tyro's business, using its proprietary core technology platform to enable credit and debit card acquiring. This offering is enhanced by features purpose-designed for those merchants who choose to partner with the company, including Point of Sale systems integrations, least-cost routing (Tap & Save) and alternative payment types such as integrated Alipay. While traditionally focused on in-store payments, Tyro has recently expanded into eCommerce.

Further, Tyro provides value-adding solutions to its partners, such as loans in the form of merchant cash advances and fee-free, interest-bearing merchant transaction accounts.

Tyro has a team of more than 480 people, approximately half of whom are in technology roles.

Net tangible asset backing

	31 December 2019	31 December 2018
	\$	\$
Net tangible assets per share	\$0.40	\$0.22

The increase in net tangible assets per share relates to the increase in cash and cash equivalents and financial investments due to the cash raised from the IPO in December 2019.

Transaction value is a non-IFRS financial measure and is unaudited. Transaction value represents the total value of merchant sales that are processed through the Tyro payments platform and does not represent revenue in accordance with Australian Accounting Standards.

Tyro uses EBITDA as a non-IFRS measure of business performance, which excludes the non-cash impact of share-based payments expense and expenses associated with the IPO.

Pro forma net loss before tax excludes expenses associated with the IPO including the share based payments expense relating to Liquidity Event Performance Rights that vested as a result of the IPO.

Company Performance

For the half year ended 31 December 2019, Revenue was \$117.3 million, up 28.4% on the prior comparable period (**pcp**) driven principally by strong growth in transaction value which was up 29.7% and growth in the number of merchants. There were 32,450 Tyro merchants as at 31 December 2019, up 23.1% from 26,351 in the pcp. The growth in transaction value and merchant numbers resulted in revenue from the payments business of \$113.6 million up 28.9% on the pcp.

Revenue from our Tyro banking business was up an impressive 70.8%. This was driven by an 81.9% increase in total loan originations from our merchant cash advance offering. Loan originations for the period came in at \$37.4 million compared to \$20.6 million in the pcp. We also experienced an increase in the repeat rate of loans provided to existing merchants with 67% of merchants taking out subsequent loans.

The decrease in investment income of 38.1% at \$0.8 million from \$1.3 million is due to the redemption of high yield investments at the start of the period and a lower cash rate in Australia.

Tyro generated EBITDA (excluding share based payments and IPO costs) of \$1.5 million, a proforma loss of \$9.0 million (before costs associated with the IPO) and a statutory loss for the period of \$19.2 million as the business continues to invest in growing its existing core verticals and driving expansion into eCommerce and other payment types. This increased investment into growth resulted in employee costs increasing 16.6%, and marketing expenses increasing 47.3% compensated by a decrease in contractor and consulting costs of 37.1%.

Transaction value is a non-IFRS financial measure and is unaudited. Transaction value represents the total value of merchant sales that are processed through the Tyro payments platform and does not represent revenue in accordance with Australian Accounting Standards.

Tyro uses EBITDA as a non-IFRS measure of business performance, which excludes the non-cash impact of share-based payments expense and expenses associated with the IPO.

Directors' Report (continued)

Payments Business

Our payments business processed \$11.1 billion in transactions on behalf of our merchants, a lift of 29.7% on the pcp (H1 FY19: \$8.5 billion) - with our growth outpacing our 5-year compound annual growth rate (CAGR) of 26.9%. We achieved an all-time record in monthly transaction values in December 2019 with \$2.2 billion being processed in that month alone. Pleasingly, even with these volume increases, our ongoing transaction reliability to our merchants remained above 99.99% average availability for our core acquiring platform.

We added 6,099 net new merchants to our payments business, taking the total number of merchants trusting Tyro with their payments requirements to more than 32,400 – a 23.1% increase on H1 FY19.

These factors combined to drive a very strong revenue outcome from our payments operation of \$113.6 million, up 28.9% (H1 FY19: \$88.1 million).

Gross profit of \$46.8 million from our payments business was up 22.2% (H1 FY19: \$38.3 million) with interchange and scheme fees associated with merchant acquiring increasing by 34.2% on the pcp.

Banking Business

Our merchant cash advance in the form of a loans product continues to display a strong growth profile and is achieving strong repeat usage from existing merchants. Loan originations of \$37.4 million were achieved for the period, up 81.9% from H1 FY19 (\$20.6 million). This strong growth in originations has seen lending income from the merchant cash advance product growing 70.8% in H1 FY20. At 31 December 2019, loans of \$18.0 million were carried on the balance sheet compared to \$10.4 million in the pcp, an increase in the loan balance of 73.4%.

Similarly, strong growth has been achieved by our Tyro Bank Account. This fee-free and interest paying business transaction deposit account achieved strong momentum with more than 3,100 active accounts in existence at 31 December 2019, representing an 80.3% increase on the pcp (H1 FY19: 1,734 active accounts).

We also introduced our first term deposit product in December 2019. Although this product is still in pilot phase, the initial signs are encouraging with 8 accounts registered. Post a successful pilot, we intend to rollout this new product into general release in the second half of FY20.

The strong performance of these three banking products saw our revenue from the Banking business grow by 70.8% in the period to \$2.6 million from \$1.5 million in the pcp.

Gross profit of \$2.3 million from our banking business was up 67.1% (H1 FY19: \$1.4 million) reflecting the increased interest generated from our loan product, increased interest expense on our business deposit accounts and the introduction of our term deposit.

Financial Position

At 31 December 2019, Tyro had:

- total assets of \$276.8 million of which 51% related to cash and cash equivalents and deposits, with the remainder relating primarily to receivables from card schemes, property, plant and equipment and deferred tax assets; and
- total liabilities of \$75.0 million of which 53% related to the merchant bank account deposits, with the remainder relating to trade and other liabilities, lease liabilities and provisions.

Tyro's total assets exceed our total liabilities by \$201.8 million. This is principally due to significant cash funds available to fund future growth.

Regulatory Landscape, Capital and Funding

The Company holds an authority under the Banking Act 1959 (Cth) to carry on a banking business as an Authorised Deposit-taking Institution and is subject to prudential capital requirements set by APRA. The Company is fully compliant with the prudential capital requirements prescribed by APRA and has sufficient capital to fund on-going operations. The information required by APS 330: Public Disclosure is provided in the 'Investors' section of Tyro's website at www.tyro.com/investors (under Regulatory Disclosures).

The Company had cash and cash equivalents of \$106.9 million at the end of the reporting period.

Total Tier 1 Capital held as at 31 December 2019 was \$177.3 million. The Company has always held sufficient capital to meet its internal targets above APRA's prudential capital requirements.

Directors' Report (continued)

Risk Management

The Board is responsible for reviewing and approving the Company's risk management strategy, including determining the Company's appetite for risk. The Managing Director and CEO, and Management team are responsible for implementing the risk management strategy and framework, and for developing policies, controls, processes and procedures for identifying and managing risk.

Events occurring after balance sheet date

In the opinion of the Directors, there are no matters or circumstances which have arisen between 31 December 2019 and the date of this report that have significantly affected, or may significantly affect, the operations of the Company, the results of those operations and the state of affairs of the Company in subsequent financial periods.

1. STATEMENT OF ACCOUNTING POLICIES

The significant policies which have been adopted in the preparation of this financial report are set out below.

The financial report of Tyro Payments Limited (the **Company** or **Tyro**) was authorised for issue in accordance with a resolution of the Directors on 20 February 2020.

The Company is listed on the Australian Securities Exchange (ASX), registered and domiciled in Australia. The nature of the operations and principal activities of the Company are described in the Directors' Report.

(a) Basis of preparation

The interim financial report has been prepared in accordance with AASB 134 Interim Financial Reporting and the requirements of the Corporations Act 2001.

The interim financial report does not include all of the information required for a full annual financial report, and should be read in conjunction with the financial report of the Company for the financial year ended 30 June 2019.

The financial report is presented in Australian dollars and all values are rounded to the nearest thousand dollars, under the option available to the Company under ASIC Corporations Instrument 2016/191, unless otherwise stated.

(b) Statement of compliance

The interim financial report complies with Australian Accounting Standards issued by the Australian Accounting Standards Board and complies with International Financial Reporting Standards and Interpretations issued by the International Financial Reporting Standards Board.

(c) Significant accounting policies

The accounting policies applied by the Company in this interim financial report are the same as those applied by the Company in its financial report for the year ended 30 June 2019, with the exception of changes in accounting policies required following the adoption of new accounting standards on 1 July 2019. AASB 16 Leases is effective for the Company from 1 July 2019 as detailed in Note 1(d) below.

(d) Significant accounting judgements, estimates and assumptions

In applying the Company's accounting policies, Management continually evaluates judgements, estimates and assumptions based on experience and other factors, including expectations of future events that may have an impact on the Company. All judgements, estimates and assumptions made are believed to be reasonable based on the most current set of circumstances available to Management. Actual results may differ from judgements, estimates and assumptions. Significant judgements, estimates and assumptions made by Management in the preparation of the interim financial report, including the key sources of estimation uncertainty, are updated for the reporting date and consistent with those applied in the Company's financial report for the year ended 30 June 2019.

Initial Public Offering (IPO) costs

During the half-year ended 31 December 2019, the Company undertook an IPO to list on the ASX. Costs incurred that are directly attributable and incremental to the issuance of new equity (net of tax) have been recognised in equity as an offset to the value of capital raised. The Company exercised judgement in determining an allocation methodology (between equity and expense) for costs which relate to both the issuance of new equity and other activities. The Company's methodology was determined with reference to the number of new shares issued in raising capital, and the nature and purpose of services rendered in incurring costs. All other costs were taken directly to Statement of Comprehensive Income during the period.

New Australian Accounting Standards that are effective in the current period

AASB 16 Leases

On 1 July 2019, the Company adopted AASB 16 Leases. The primary change from the adoption of the new standard is the application of lessee's accounting principles. Under AASB 16, the lessee is required to recognise a lease on the balance sheet. This involves recognising a right-of-use (**ROU**) asset and related lease liability, being the present value of future (minimum) lease payments.

The Company elected to use the exemptions proposed by the standard on lease contracts where the lease terms ends within 12 months as of the date of initial application, and lease contracts for which the underlying asset is of low value.

for the Half-Year ended 31 December 2019

1. STATEMENT OF ACCOUNTING POLICIES (continued)

Right-of-use assets

The Company recognises ROU assets at the commencement date of the lease (i.e. the date the underlying asset is available for use). ROU assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of ROU assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Company is reasonably certain of obtaining ownership of the leased asset at the end of the lease term, the recognised ROU assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term.

Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of minimum lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs. In calculating the present value of lease payments, the Company uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Following a detailed assessment of the requirements of the standard, the Company recognised the impact of AASB 16 adoption at transition date using the modified retrospective approach and did not restate comparative information as permitted by the standard. In summary, the impact of AASB 16 adoption is as follows:

Impact on the balance sheet (increase/(decrease)) as at 1 July 2019:

	Amount in
	\$'000
Assets	
Right-of-use assets ¹	9,091
Liabilities	
Lease liabilities	11,533
Deferred rent incentive	(2,442)
Net impact on equity	-

From 1 July 2019, a portion of the ROU assets relating to the head lease has been subleased by the Company. The Company derecognised the related carrying amount of the ROU asset that it transfers to the sublessee and recognised net investment in the sublease. Any difference is recognised in the Statement of Comprehensive Income.

After the adoption of AASB 16, the Company's Statement of Comprehensive Income will change with interest expense recognised on the lease liability, depreciation recognised on the ROU asset and removal of administration expenses relating to the previous operating lease expense.

3. SEGMENT REPORTING

(a) Description of segments and principal activities

For management purposes, the Company is organised into three operating segments, comprising payments, banking, and corporate and other. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, which is the CEO and Managing Director. The Company operates in one geographical segment being Australia.

for the Half-Year ended 31 December 2019

3. SEGMENT REPORTING (continued)

The Company's operating reportable segments under AASB 8 Operating Segments are as follows:

Reportable Segment	Principal activities
Payments	Acquires electronic payment transactions from merchants. Revenue is primarily earned from fees charged for processing acquired transactions. Revenue is also earned from other fee income, terminal rental income and sales of terminal accessories. Direct expenses include scheme and interchange fees, integration, support and other fees and cost of terminal accessories sold.
Banking	Complementary banking services to merchants. Revenue is earned from fees charged on loans to merchants. Interest expense is incurred on merchant deposits.
Corporate and other	Corporate and other includes investment income earned from financial investments and other revenue and income. Corporate includes the Company's head office and includes all employee benefits expenses and other operating expenses excluding depreciation, amortisation and net lease interest expense.

(b) Revenue and gross profit by segment

11. SHARE-BASED PAYMENTS

The Company provides benefits to employees and Directors from time to time including share-based payments as remuneration for service.

(a) Employee Share Option Plan

The Employee Share Option Plan (**ESOP**) was established to grant options over ordinary shares in the Company to employees or Directors who provide services to the Company.

Options granted pursuant to the ESOP may be exercised, in whole or part, subject to vesting terms and conditions as indicated below:

TYPE OF OPTION	VESTING TERMS AND CONDITIONS
Monthly linear vesting schedule	Options granted will vest in proportion to the time that passes linearly during the vesting schedule, subject to maintaining continuous status as an employee or Director with the Company during the vesting period. The options generally vest in equal amounts each month over the vesting period.
Annual linear vesting schedule	Options vest similarly to the monthly linear vesting schedule, except they vest in equal amounts annually over the vesting period.
Performance linear vesting schedule	Options vest in equal amounts annually over the vesting period, and are also subject to performance criteria.
Service vesting schedule	Options that vest according to a period of service may be exercised as to a set number of shares per agreed day of service, as defined in the specific option grant.

All option grants must be held for a minimum period commencing on the date on which the options are granted and continuing until the earlier of:

- · the date which is 3 years after the date on which options are granted; or
- the date on which the participant ceases employment with the Company.

Other relevant terms and conditions applicable to options granted under the ESOP include:

- The term of each option grant ranges primarily between 6 7 years from the date of grant or such shorter term as provided in the ESOP or grant letter.
- Each option entitles the holder to one ordinary fully paid share.
- All awards granted under the ESOP are equity-settled.
- A 2-year holding lock applies to those options with annual linear or performance linear vesting schedules. For annual
 linear options, the lock period applies following the relevant vesting date, and for performance linear options the lock
 period applies from exercise date. During this period the shares issued cannot be transferred, sold, encumbered or
 otherwise dealt with.

(b) Fair value of options under the ESOP

The fair value of each option is estimated on the date of grant using the Black-Scholes option valuation model. The table below lists the assumptions used in determining the fair value of the options granted during the period ended 31 December 2019:

	Sep 2019	Oct 2019
Dividend yield (%)	0%	0%
Expected volatility (%)	N/A	40%
Risk-free interest rate (%)	N/A	0.73% - 0.79%
Share price ¹ (\$)	\$1.15 - \$1.50	\$1.15 - \$2.00

¹ The Company considers the volume weighted average share price near grant date, when determining fair value.

A zero dividend policy assumption is used for valuing all option grants. This is in line with the Company's capital management policy and growth strategy.

Expected volatility used is the historical volatility of the Company's estimated peer group. The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which may not necessarily be the actual outcome.

for the Half-Year ended 31 December 2019

11. SHARE-BASED PAYMENTS (continued)

There were 4,816,627 options exercised during the period ended 31 December 2019 (Dec 2018: 1,502,023).

The weighted average remaining contractual life for share options outstanding as at 31 December 2019 was 5 years (Dec 2018: 4 years).

The following table summarises further details of the share options outstanding at 31 December 2019:

Ordinary shares			264,642	141,856

During the half-year ended 31 December 2019, Tyro issued 45,493,432 additional ordinary shares as part of an IPO which raised \$125,000,000 in funds and 7,284,028 ordinary shares were issued upon exercise of options and rights, raising a total of \$2,736,000 in fully paid capital. The IPO incurred \$4,950,000 in costs directly attributable to the capital raising net of tax.

Ordinary shares have the right to receive dividends when declared and, in the event of winding up of the Company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on ordinary shares held. Ordinary shares entitle their holder to one vote, either in person or by proxy, at a meeting of the Company.

(ii) Share-based payments reserve

for the Half-Year ended 31 December 2019

13. FAIR VALUES (INCLUDING FINANCIAL RISK MANAGEMENT)

a) Fair values

The Company uses various methods in estimating the fair value of a financial instrument. The methods comprise:

- Level 2 the fair value is estimated using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).
- Level 3 the fair value is estimated using inputs for the asset or liability that are not based on observable market data.

The table below shows the Company's financial assets that are measured at fair value, or where not measured at fair value, their fair value equivalent. Management has assessed that for other financial assets and liabilities not disclosed in the table below, that due to their short-term maturity or repricing profile, the carrying amount is an approximation of fair value.

31 DECEMBER 2019 (\$'000)

FINANCIAL ASSET	LEVEL 1	LEVEL 2	LEVEL 3	TOTAL

Floating rate notes

The floating rate notes invested in by the Company have a short-term repricing profile and are of high credit quality. The fair value of these floating rate notes is obtained from an independent third party pricing service that uses tradable prices and quotes from active markets.

Loans

Loans are included in Level 3 due to one or more of the significant inputs used in determining the fair value being unobservable inputs. To determine the fair value, an income valuation approach is used. This technique converts forecasted cash flows to a present value amount (also known as a discounted cash flow method). Forecast cash flows are actuarially determined using predictive models based partly on evidenced historical performance and expected repayment profiles.

The fair value model will be periodically reviewed, tested and refined as needed.

The fair value of loans requires estimation of:

- the expected future cash flows;
- · the expected timing of receipt of those cash flows; and
- · discount rates derived from similar observed rates for comparable assets that are traded in the market.

The main inputs used in measuring the fair value of loans are as follows:

- · loan balance accepted principal and fee, outstanding principal and fee, and date of acceptance;
- annual settlement amount forecasted total annual settlements for loan customers;

for the Half-Year ended 31 December 2019

13. FAIR VALUES (INCLUDING FINANCIAL RISK MANAGEMENT) (continued)

- current repayment percentage percentage of daily settlements through the loan customers' terminals that go towards loan repayments;
- · historical default and recovery information; and
- · discount rates market benchmarked discount rate and allows for a market level of default risk.

The unobservable pricing inputs which determine fair value are based on:

- Tyro pricing of loans including adjustments for credit risk ranging between 32% and 35%;
- · historical data with respect to behavioural repayment patterns generally ranging between 3 to 6 months; and
- · default experience for loans deemed uncollectable and which are valued at \$0.

These inputs directly affect the fair value and there are no reasonable alternative inputs which warrant disclosure.

Equity investments

At the reporting date, the Company held unlisted equity instruments in meandu Australia Holdings Pty Ltd (**me&u**), YBF Holdings Pty Ltd and Teamsquare Pty Ltd (**YBF**). The valuations of me&u and YBF are level 3 financial instruments with several unobservable inputs. The cost of the investments approximates their fair value.

Transfer between categories

There were no transfers between Level 1, Level 2 or Level 3 during the period.

b) Financial Risk Management

During the ordinary course of business, the Company is exposed to credit risk, operational risk, market risk (including interest rate risk and foreign exchange risk) and liquidity risk. For details on the management of these risks, refer to the financial report for the year ended 30 June 2019.

14. COMMITMENTS AND CONTINGENCIES

Commitments relating to BECS

The Company pays merchants through the Bulk Electronic Clearing System system (BECS). As a result of BECS intra-day settlements which went live in November 2013, all merchant settlements committed are processed on the same day.

Standby letters of credit or bank guarantees are as follows:

	DEC 2019 \$000	JUN 2019 \$000
(i) Irrevocable standby letters of credit in favour of:		
Mastercard International	3,256	3,254

(ii) Bank Guarantee in favour of:		
UIR Australia, the lessor of 155 Clarence Street, Sydney	4,525	4,525
	8,376	7,910

The Company has provided irrevocable standby letters of credit of \$3,851,000 (in June 2019: \$3,385,000) secured through fixed charges over term deposits with the Commonwealth Bank of Australia and Westpac Banking Corporation, to Mastercard International, Visa International and UnionPay International. These are one-year arrangements that are subject to automatic renewal on a yearly basis. Mastercard International and Visa International, at their discretion, may increase the required amounts of the standby letters of credit upon written request to the Company. The required amounts of the standby letters of credit are dependent on Mastercard International's and Visa International's view of their risk exposure to the Company.

A bank guarantee in favour of UIR is held with the Westpac Banking Corporation in relation to the lease arrangement for the office premises. The amount represents up to 9 month's rent and includes all annual increases of 4% since 2016 until lease maturity and is refundable on expiry of the lease agreement, subject to satisfactory vacation of the leased premises.

for the Half-Year ended 31 December 2019

Independent Auditor's Review Report to the Members of Tyro Payments Limited

Report on the Half-Year Financial Report

Conclusion

We have reviewed the accompanying half-year financial report of Tyro Payments Limited (the Company), which comprises the statement of financial position as at 31 December 2019, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, notes comprising a statement of accounting policies and other explanatory information, other information and the directors' declaration.

Based on our review, which is not an audit, nothing has come to our attention that causes us to believe that the half-year financial report of the Company is not in accordance with the *Corporations Act 2001*, including:

- a) giving a true and fair view of the Company's financial position as at 31 December 2019 and of its financial performance for the half-year ended on that date; and
- b) complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001.

Directors' Responsibility for the Half-Year Financial Report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act* 2001 and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity, in order to state whether, on the basis of the procedures described, anything has come to our attention that causes us to believe that the half-year financial report is not in accordance with the Corporations Act 2001 including: giving a true and fair view of the Company's financial position as at 31 December 2019 and its financial performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting, the Corporations Regulations 2001. As the auditor of the Company, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independent Auditor's Report (continued)

Independence

In conducting our review, we have complied with the independence requirements of the Corporations Act 2001.
